ATCM Engineering Service Partner Guide

ICAM 26.2

Document Revision: 26.2-1

Publication Date: November 02, 2026

Contents

1 Introduction.....3

2 Download configuration baseline and IPC document revisions.....4

3 Upload IPC change suggestions.....5

1

Introduction

Allowable Configuration is a feature of IFS Aviation Technical Content Manager.

This guide is intended for engineering service partners working with Allowable Configuration. It details how to download the files required for the suggestion of changes due to a new IPC revision and the subsequent upload of the file containing suggested changes.

2

Download configuration baseline and IPC document revisions

When a new IPC document revision is uploaded, you are alerted by email. You can then download the configuration baseline and the required IPC document revisions to formulate changes to the configuration baseline as a result of the new IPC document revision.

Steps

1. Log in to IFS Applications using the user name and password provided to you.
2. Find the **IPC Document Revision** page in the navigator and click to open.
3. Click **Search** and enter the search criteria to find the required IPC Document Revision. Alternatively you can locate the required IPC Document Revision listed by the change source code in the navigator.
4. Click **Attachments**.
5. Click **Download** to download each of the attached documents.

3

Upload IPC change suggestions

When you are ready with IPC change suggestions for configuration specialists to action, you upload your suggestions for the IPC document revision to which the change applies.

About this task

The uploaded file must be in the JSON format. You can replace an uploaded file, if required, after upload but before setting the uploaded IPC change suggestion file to Analysis Complete.

Steps

1. Log in to IFS Applications using the username and password provided to you.
2. Find the **IPC Document Revision** page in the navigator and click to open.
3. Click **Search** and enter the search criteria to find the required IPC Document Revision. Alternatively you can locate the required IPC Document Revision listed by the change source code in the navigator.
4. Click **Upload IPC Change Suggestions**.
5. Select the file to upload or drag and drop.
6. Click **OK**.
7. Click **Analysis Complete** to indicate that the suggestions are ready for the configuration specialist to action.

If your upload is successful, the IPC document revision is no longer visible and becomes available for a configuration specialist to action suggested changes. If the upload is unsuccessful, you are alerted by email. You also see an error message and can view why the error occurred in the Error Text field of the **IPC Document Revision** page. The state of the IPC Document revision changes to UploadError. When you have resolved the error in the file, you can then upload the file again in the same way.

ABOUT IFS

IFS develops and delivers enterprise software for customers around the world who manufacture and distribute goods, maintain assets, and manage service-focused operations. The industry expertise of our people and solutions, together with commitment to our customers, has made us a recognized leader and the most recommended supplier in our sector. Our team of 3,500 employees supports more than 10,000 customers world-wide from a network of local offices and through our growing ecosystem of partners.
