Note:

The capabilities listed below have been moved to generic functionality. These capabilities are no longer parameterized by Localization Control Center, they are general for any country. The capabilities moved to generic functionality are:

- Special Consumption Tax
- Customs Declaration Number in Tax Transactions

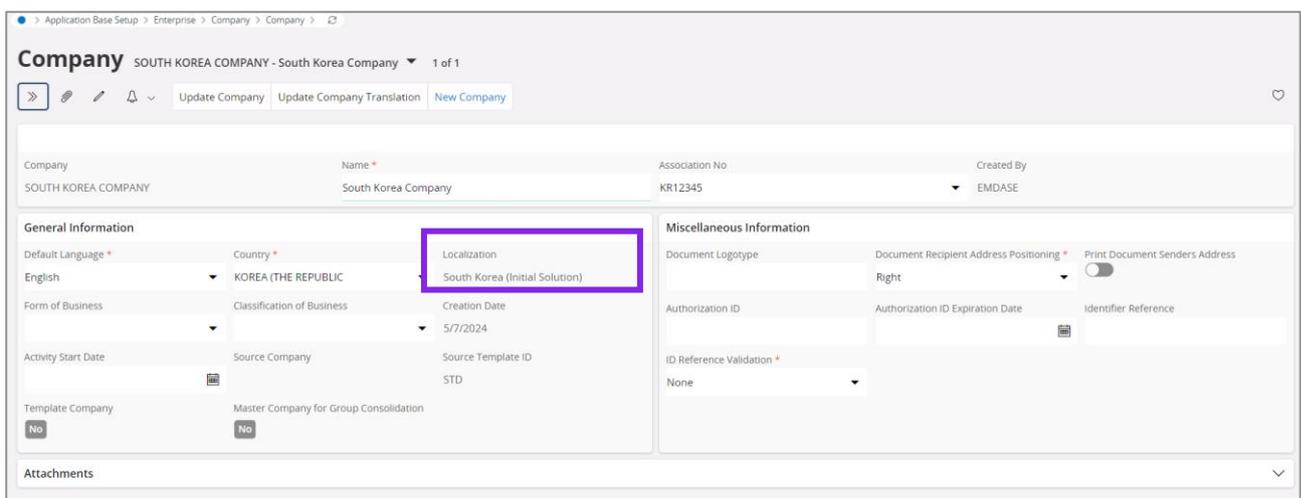

1 Company Set-up

1.1 Overview

To utilize the South Korean functionality, the company must be set up as using the **South Korean** localization. This is defined in the **General** tab on the **Company** page.

1.2 Define Localization

- Open the **Company** page.
- Search for the company.
- Select **South Korea** in the drop-down list in the **Localization** field and save. Note that this cannot be changed once transactions are created for the company.

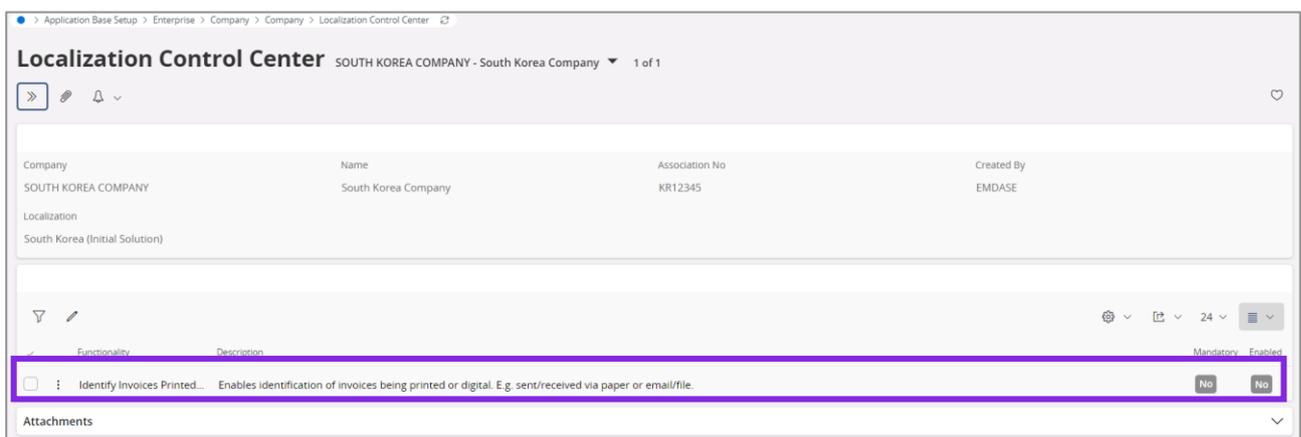

The screenshot shows the 'Company' page for 'SOUTH KOREA COMPANY - South Korea Company'. The 'Localization' field in the 'General Information' section is highlighted with a red box, indicating that 'South Korea (Initial Solution)' has been selected. Other fields include 'Default Language' (English), 'Country' (KOREA (THE REPUBLIC)), 'Form of Business', 'Activity Start Date', and 'Template Company' (No).

1.3 Select Localization functionality.

Specify which functionality to use.

- Open the **Localization Control Center** tab.
- The localization selected in the previous step is displayed in the **Localization** field and cannot be changed.
- All functionality available for South Korea is presented in the list. Enable/Disable the functionality based on the requirements of the company by selecting the Enable check box. Note that some functionality is mandatory and cannot be disabled.

The screenshot shows the 'Localization Control Center' page for 'SOUTH KOREA COMPANY - South Korea Company'. The 'Localization' field is set to 'South Korea (Initial Solution)'. Below, a table lists various functionalities. The 'Identify Invoices Printed...' functionality is highlighted with a red box, showing it is currently disabled (checkbox is unchecked).

Functionality	Description	Mandatory	Enabled
<input type="checkbox"/>	Identify Invoices Printed... Enables identification of invoices being printed or digital. E.g. sent/received via paper or email/file.	No	No

2 Identify Invoices Printed or Digital

2.1 Overview Legal Requirement

When reporting tax in South Korea, the tax information must indicate if an invoice is printed or digital. Paper invoices refer to invoices printed on paper. Digital invoices are invoices sent/received to/from customers electronically. For this, services from a third-party company are involved (e.g., Smart Bill).

2.2 Process Overview

2.3 Solution Overview

Customer and supplier invoices are categorized as either digital invoices or not. It's defined on the customer and supplier level whether the customer or supplier is sending digital invoices or not. The value is fetched when creating customer or supplier invoices and the information is transferred to tax transactions.

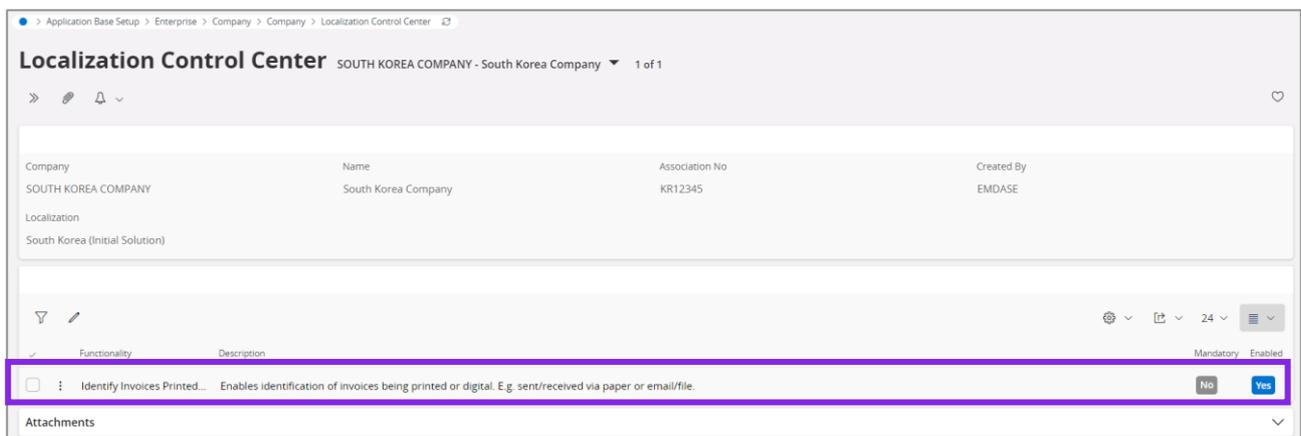

2.4 Prerequisites

The company must be set up to use South Korean localization, see the [Company Set-up](#) chapter.

2.5 Enable Localization Control Center Parameter

To enable this new functionality, navigate to the **Company/Localization Control Center** and enable the functionality, **Identify Invoices Printed or Digital**.

Please note that this is an optional localization parameter, and the user needs to enable it manually.

The screenshot shows the 'Localization Control Center' for 'SOUTH KOREA COMPANY - South Korea Company'. The interface includes a table with the following data:

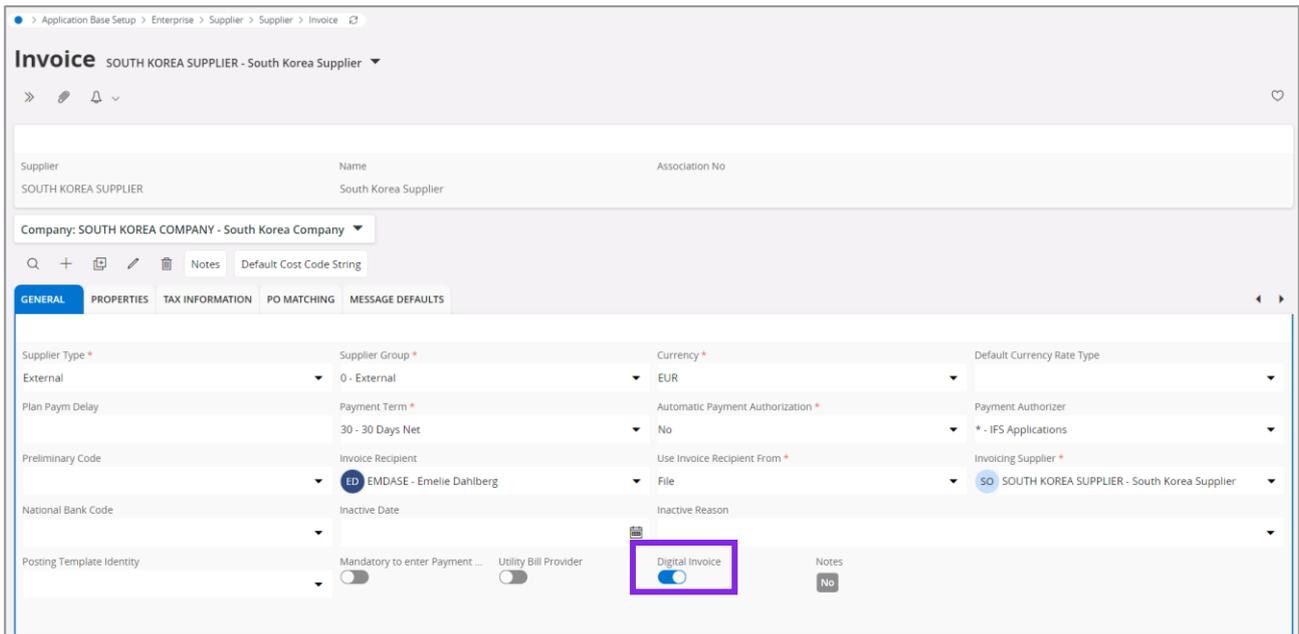

Company	Name	Association No	Created By
SOUTH KOREA COMPANY	South Korea Company	KR12345	EMDASE

Below the table, there is a list of functionalities. The 'Identify Invoices Printed...' functionality is highlighted with a red box. It is currently disabled (checkbox is unchecked).

Functionality	Description	Mandatory	Enabled
<input type="checkbox"/>	Identify Invoices Printed... Enables identification of invoices being printed or digital. E.g. sent/received via paper or email/file.	No	Yes

2.6 Set up Supplier to identify if Digital Invoices are used.

A new toggle, **Digital Invoice**, is added to the **Supplier/Invoice/General** tab.

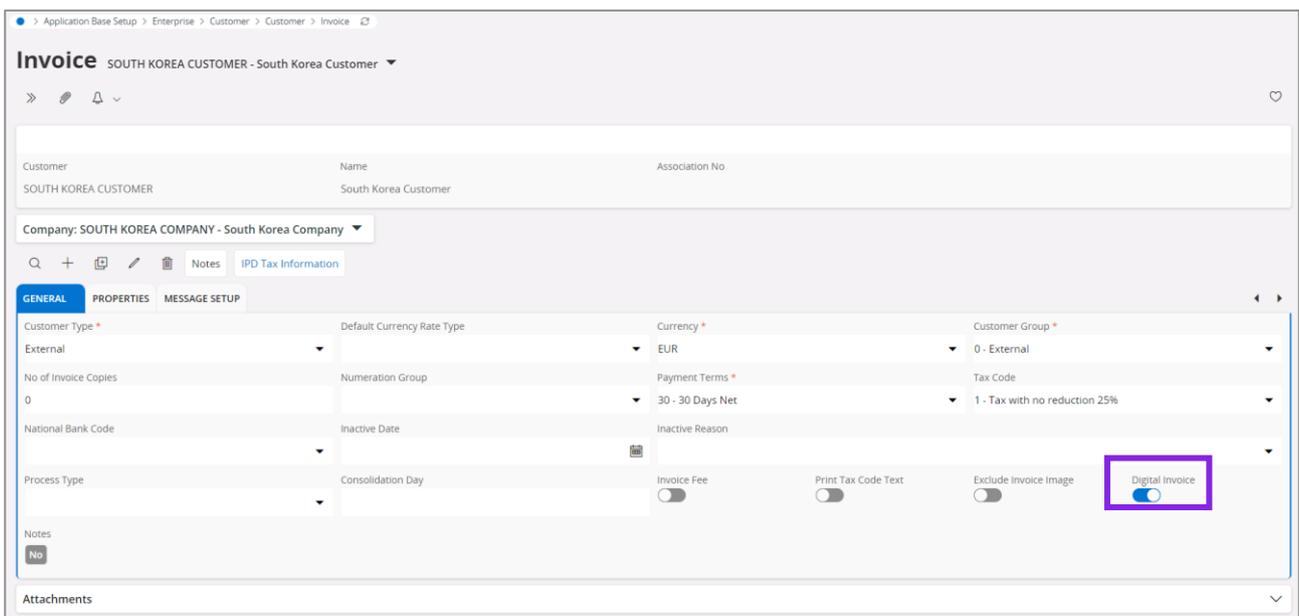

The screenshot shows the 'Supplier Invoice' configuration page for 'SOUTH KOREA SUPPLIER'. The 'GENERAL' tab is selected, and the 'Digital Invoice' toggle is turned on. Other visible fields include Supplier Type (External), Supplier Group (0 - External), Currency (EUR), Payment Term (30 - 30 Days Net), Invoice Recipient (EMDASE - Emelie Dahlberg), and Invoicing Supplier (SOUTH KOREA SUPPLIER).

Enable the toggle if the supplier is sending digital invoices. The value will be fetched when creating supplier invoices and will be later referred to in **Tax Transactions**.

2.7 Set up Customer to identify if Digital Invoices are used

A new toggle, **Digital Invoice**, is added to the **Customer/Invoice/General** tab.

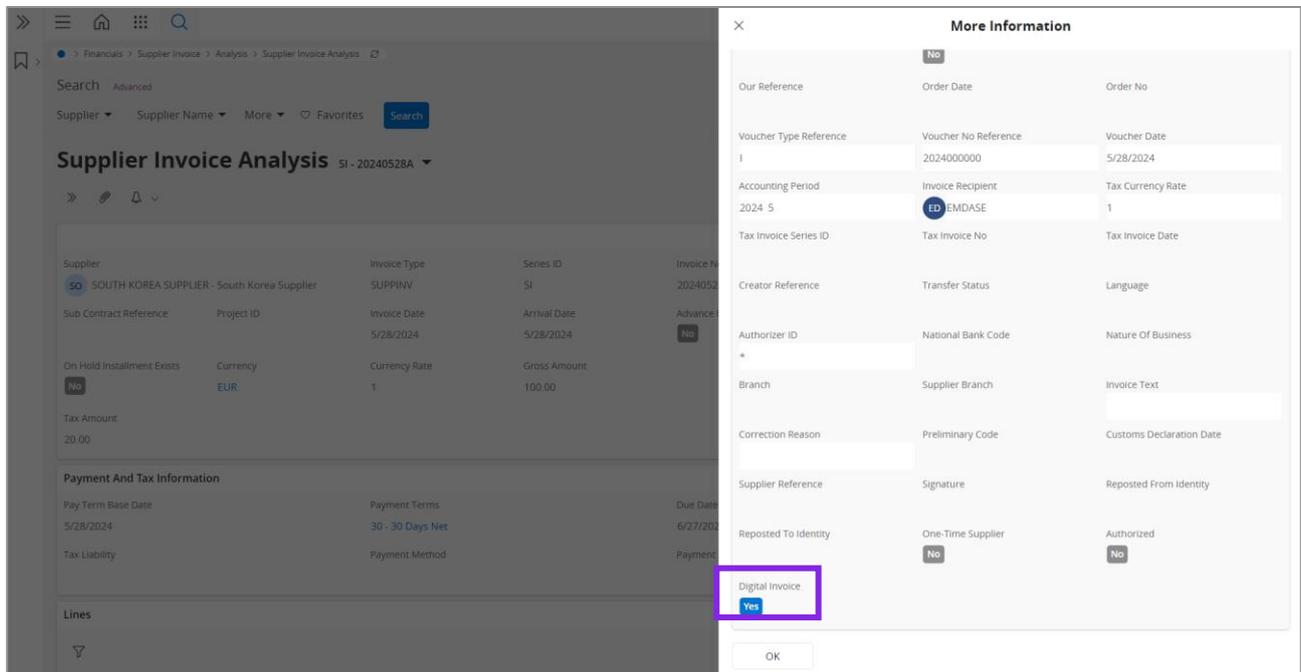

The screenshot shows the 'Customer Invoice' configuration page for 'SOUTH KOREA CUSTOMER'. The 'GENERAL' tab is selected, and the 'Digital Invoice' toggle is turned on. Other visible fields include Customer Type (External), Currency (EUR), Customer Group (0 - External), Payment Terms (30 - 30 Days Net), and Tax Code (1 - Tax with no reduction 25%).

Enable the toggle if the customer is sending digital invoices. The value will be fetched when creating customer invoices and will be later referred to in **Tax Transactions**.

2.8 View Supplier Invoice Analysis page

An indicator, **Digital Invoice**, is added to the **Supplier Invoice Analysis** page. It displays the value from the supplier at the time the invoice was created and cannot be edited.

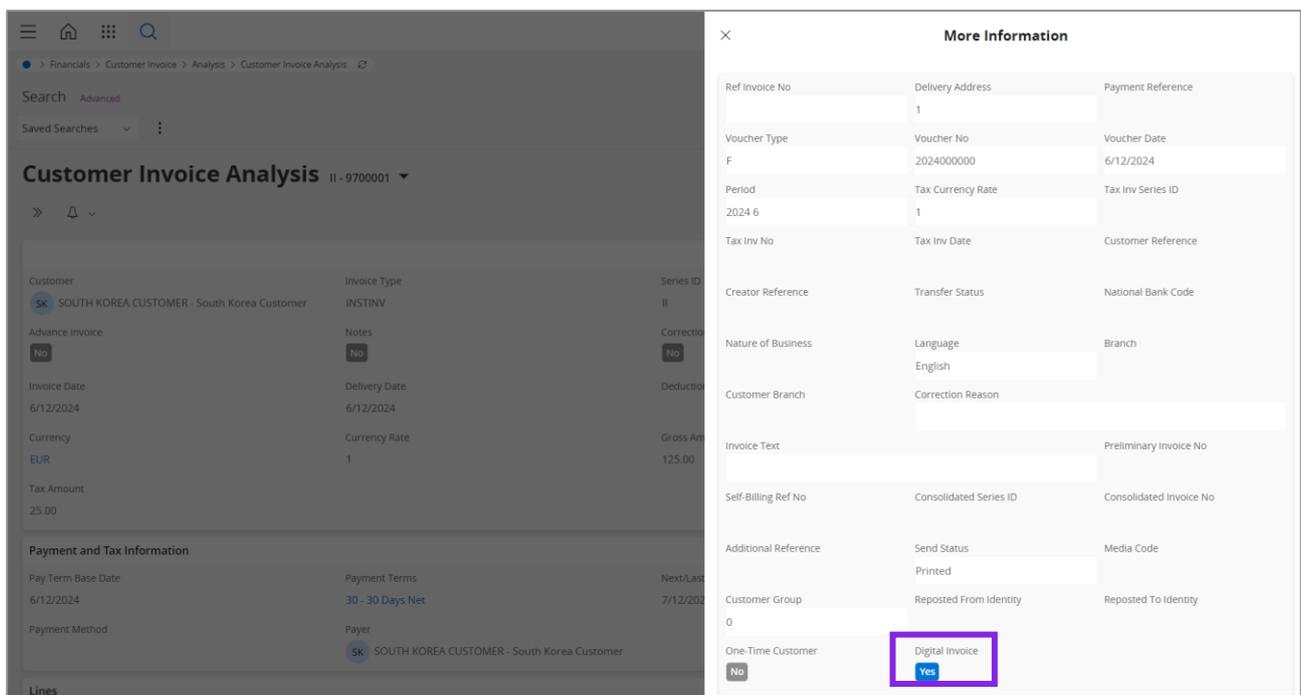

The screenshot shows the 'Supplier Invoice Analysis' page for invoice SI - 20240528A. The 'More Information' dialog box is open, displaying various fields. The 'Digital Invoice' field is highlighted with a red box, and the 'Yes' button is selected.

Field	Value	Field	Value	Field	Value
Our Reference		Order Date		Order No	
Voucher Type Reference	I	Voucher No Reference	2024000000	Voucher Date	5/28/2024
Accounting Period	2024 5	Invoice Recipient	ED BMDASE	Tax Currency Rate	1

2.9 View Customer Invoice Analysis page

An indicator, **Digital Invoice**, is added to the **Customer Invoice Analysis** page. It displays the value from the customer at the time the invoice was created and cannot be edited.

The screenshot shows the 'Customer Invoice Analysis' page for invoice II - 9700001. The 'More Information' dialog box is open, displaying various fields. The 'Digital Invoice' field is highlighted with a red box, and the 'Yes' button is selected.

Field	Value	Field	Value	Field	Value
Ref Invoice No		Delivery Address	1	Payment Reference	
Voucher Type	F	Voucher No	2024000000	Voucher Date	6/12/2024
Period	2024 6	Tax Currency Rate	1	Tax Inv Series ID

2.11 Delimitations

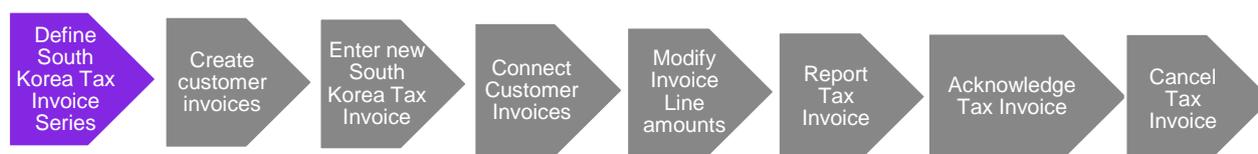

None.

3 Tax Invoices

3.1 Overview Legal Requirement

It requires South Korea Companies to create a Tax Invoice which covers one or more commercial invoices (normal IFS invoices) and send the Tax invoice to third party tax agency. It should ensure that the Tax Invoice matches commercial invoice amounts without rounding differences.

3.2 Process Overview

3.3 Solution Overview

Customer Invoices in PostedAuth, PartlyPaidPosted and PaidPosted status to be considered in creating a South Korea Tax Invoice. As part of the generic core solution South Korea Tax Invoice has been handled by Introducing South Korea Tax Invoice Series, South Korea Tax Invoice and South Korea Tax Invoices pages. The Tax Invoice can be created only in the Company's Accounting Currency, and it is possible to add invoices created in foreign currencies.

3.4 Prerequisites

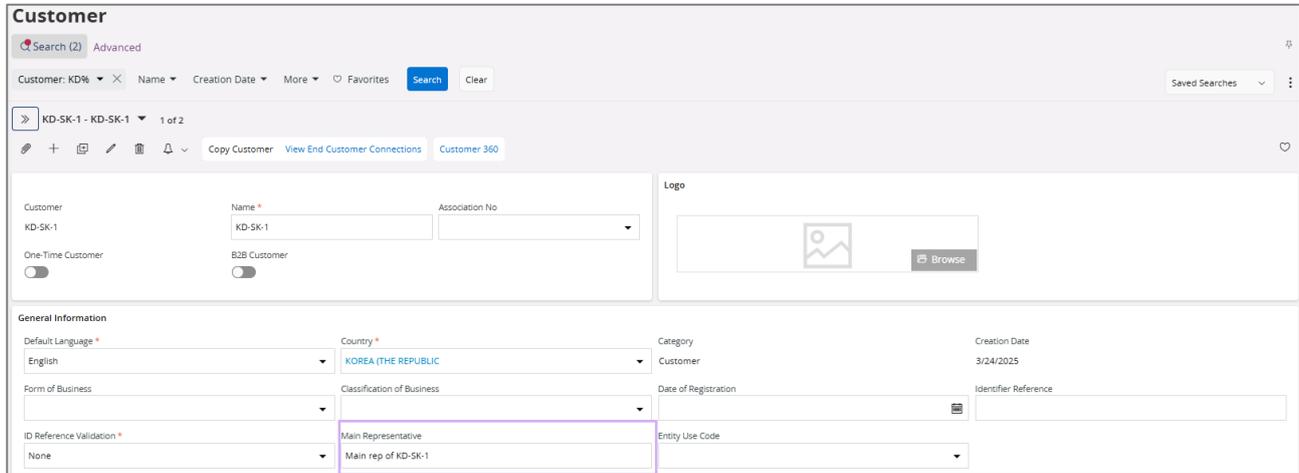

The company must be set up based on generic solution and requires an invoice series in South Korea Tax Invoice Series page.

3.5 Enable Localization Control Center Parameter

Not Controlled by any Localization Parameter and solution for South Korea Tax Invoice is part of the generic core solution.

3.6 Basic data for Customer

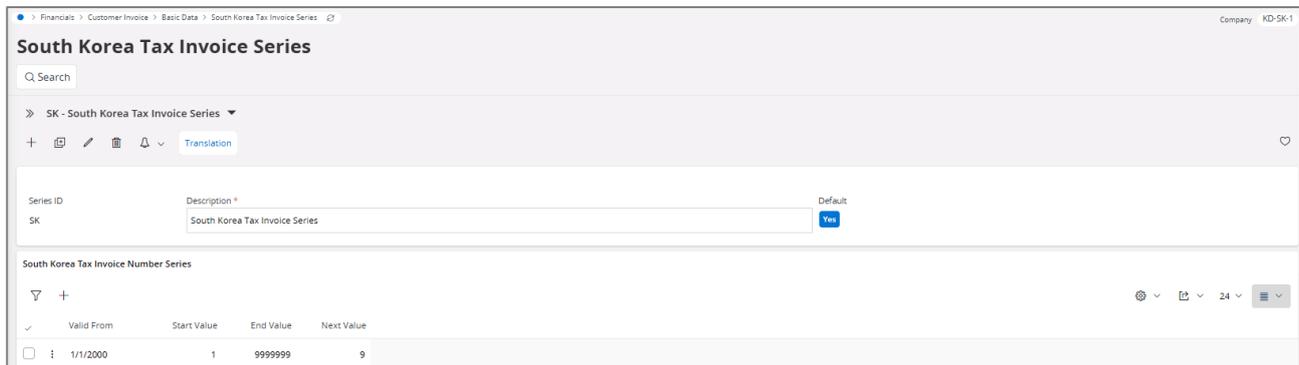

A new field has been introduced in Customer/ general tab to define the customer's main representative. Based on South Korea requirements it is needed to define a value in this field to indicate the Customer's company representative.

The screenshot shows the 'Customer' form in IFS. The 'Main Representative' field is highlighted with a purple border. The value entered in this field is 'Main rep of KD-SK-1'. Other fields visible include 'Name' (KD-SK-1), 'Country' (KOREA (THE REPUBLIC)), and 'Entry Use Code'.

3.7 Set up South Korea Tax Invoice Series

The company needs to have a tax invoice series in South Korea Tax Invoice Series Page.

The screenshot shows the 'South Korea Tax Invoice Series' page in IFS. A series named 'SK' is listed with the description 'South Korea Tax Invoice Series'. The 'Default' checkbox is checked. Below the series list, there is a table for 'South Korea Tax Invoice Number Series' with columns for 'Valid From', 'Start Value', 'End Value', and 'Next Value'. The table shows a single entry for '1/1/2000' with start value '1', end value '9999999', and next value '9'.

It requires to define a South Korea Tax Invoice series with no number series to be used when creating tax invoices that are already reported by the customer.

3.8 Create South Korea Tax Invoice

Through the South Korea Tax Invoice page user can create a Tax Invoice. The tax invoice can be created only in company's accounting currency and all amounts shown within the Tax Invoice solution will only be in the company's accounting currency. Accounting currency values will be based on the invoice accounting currency values.

Series ID	Invoice No	Invoice Date	Net Amount	Tax Amount	Gross Amount	Remaining Net Amount	Remaining Tax Amount	Remaining Gross Amount
(1)	9700005	3/31/2025	70.2366	8.4300	78.6666	19.2634	2.3100	21.5734

INVOICE LINES

Line ID	Tax Code	Net Amount	Tax Amount	Gross Amount	Remaining Net Amount	Remaining Tax Amount	Remaining Gross Amount
1	2	70.2366	8.4300	78.6666	19.2634	2.3100	21.5734

Through the 'Select Invoice' command in Invoice Details it is possible to select customer invoices that are in PostedAuth, PartlyPaidPosted and PaidPosted statuses and invoices that are in currencies other than accounting currency. All invoice types for manual customer invoice, Instant Invoice, Customer Order Invoice and Project Invoice will be available.

If required, the selected Invoice's line amounts can be modified based on the portion of the invoice/ invoice line to be reported to the Tax Invoice by adjusting the net amount. If a line should not be included the net amount needs to be modified to 0. Any balance of the selected invoice or the invoice line will be available for the next tax Invoice/s. Therefore, it will be able to add a single invoice or invoice line to one or several Tax Invoices.

Following 2 main Tax Invoice creation methods are available.

01: Manual flow with Customer Reported OFF

It requires a Series ID with a number series defined and a validation raised if no automatic number series defined for the used series ID. When the tax invoice is reported a CSV file created.

02: Manual flow with Customer Reported ON

It requires to manually enable the toggle 'Customer Reported'. It requires a Series ID without a number series defined and a validation raised if an automatic number series is defined for the used series ID. When the tax invoice is reported a CSV file will not be created.

The created Tax Invoice needs to be acknowledged prior to Reporting. Reported state Tax Invoices can be canceled, and the amounts included in the Tax invoice will be available for the next Tax invoices/s created. If a Tax invoice is included in a Quarterly Tax Report (Quarterly Tax Report toggle on) then it will not be allowed to cancel the tax invoice.

Customer Invoices included in a tax invoice will not be allowed to cancel.

3.9 Creating a CSV file when Reporting a South Korea Tax Invoice

Based on whether the Tax invoice is already reported by the customer or not the user should enable/ disable the 'Customer Reported' toggle. The created Tax Invoice can be acknowledged and reported. Upon reporting CSV file will be available as download in browser if 'Customer

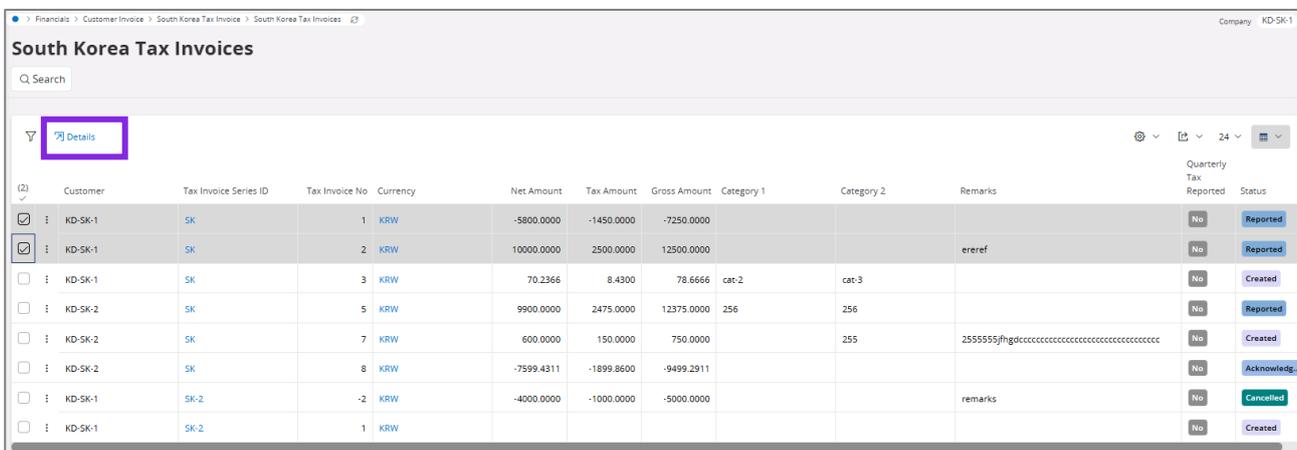

Reported' is disabled. A CSV file will not be downloaded if 'Customer Reported' is enabled for the tax invoice.

The CSV file will be created based on the External file template (EXTKRTAXINV) and external file type (KrTaxInv) introduced for South Korea Tax Invoice.

The standard External file template introduced will have only the columns which will retrieve data from core fields. Based on user requirement it is possible to create a customized template including the columns available in the external file type.

3.10 View Created South Korea Tax Invoices

A list of tax invoices created through the South Korea Tax Invoice page can be viewed through the South Korea Tax Invoices page. It is not possible to do any modifications to the tax invoice through this page. By selecting one or several tax invoices user can navigate to the South Korea Tax Invoice page by clicking 'Details'.

Customer	Tax Invoice Series ID	Tax Invoice No	Currency	Net Amount	Tax Amount	Gross Amount	Category 1	Category 2	Remarks	Quarterly Tax Reported	Status

3.11 Delimitations

Following will not be considered within the South Korea Tax Invoice Solution

1. Withholding Tax will not be considered
2. Multiple tax invoice lines not considered
3. Outgoing supplier invoices
4. Interest Invoices
5. Difference Item Invoices

4 Quarterly Tax report

4.1 Overview

It is a legal requirement in South Korea to report tax Quarterly adhering to the Tax legislation.

The suppliers and customers are categorized through 2 different categories, Individual/ Corporate and Digital/ Non digital.

The customer transactions in the Quarterly Tax Report consist of Tax invoices created through the specific Tax invoice logic, see Chapter 3 – Tax Invoices for more information.

The Quarterly Tax report consists of five sections,

1. Head Record

General information about the Company

2. Data Record for Purchase (Non-Electronic invoices)

All the transactions of “Non-Digital” Suppliers, they will be presented one row per supplier.

3. Total Data Record for purchase (Non-electronic invoices)

A summary of the transactions and amounts of the “Non-Digital” Suppliers.

4. Total Data Record for sales (Electronic invoices)

A summary of the amounts and transactions of the “Digital” Customers.

5. Total Data Record for purchase (Electronic invoices)

A summary of the transactions and amounts of the “Digital” Suppliers.

4.2 Process overview

4.3 Prerequisites

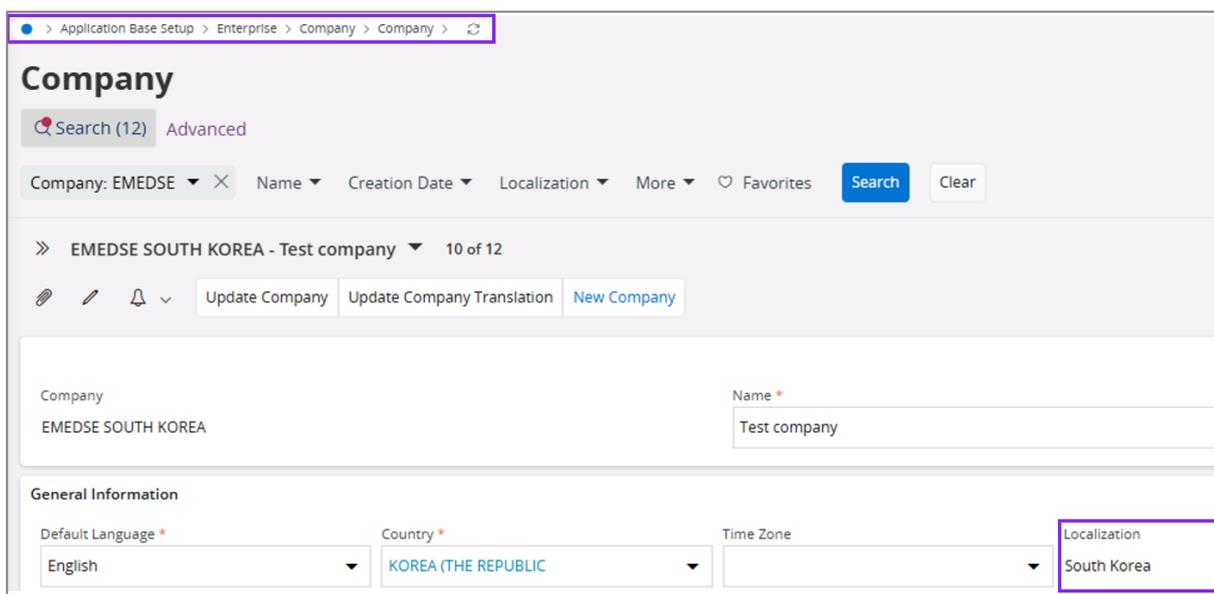

The following prerequisites should be met to generate a Quarterly Tax Report.

- Customers must have the **Digital** toggle checked to be part of the Quarterly Tax report.
- The digital toggle needs to be considered for suppliers and updated accordingly.
- Customer and Suppliers need to be updated accordingly with **Classification of Business**.
- Suppliers need to be updated accordingly with **Form of Business**.
- Suppliers need to be updated accordingly with **Business Category**.
- Taxable transactions must be updated to the general ledger and to the tax ledger.

- Tax invoices need to be in status “**Reported**” to be considered for the Quarterly Tax report.
- The report is only supported to use reporting currency = accounting currency.

4.4 Enable Localization Control Center Parameter

The Company must be set up to use the South Korea localizations, see Company Set up Chapter. **Identify Invoices Printed or Digital** and **The South Korea Quarterly Tax report** parameters must be enabled on the **Company/Localization Control Center** tab.

Company

EMEDSE SOUTH KOREA - Test company

Company: EMEDSE

Name: Test company

General Information

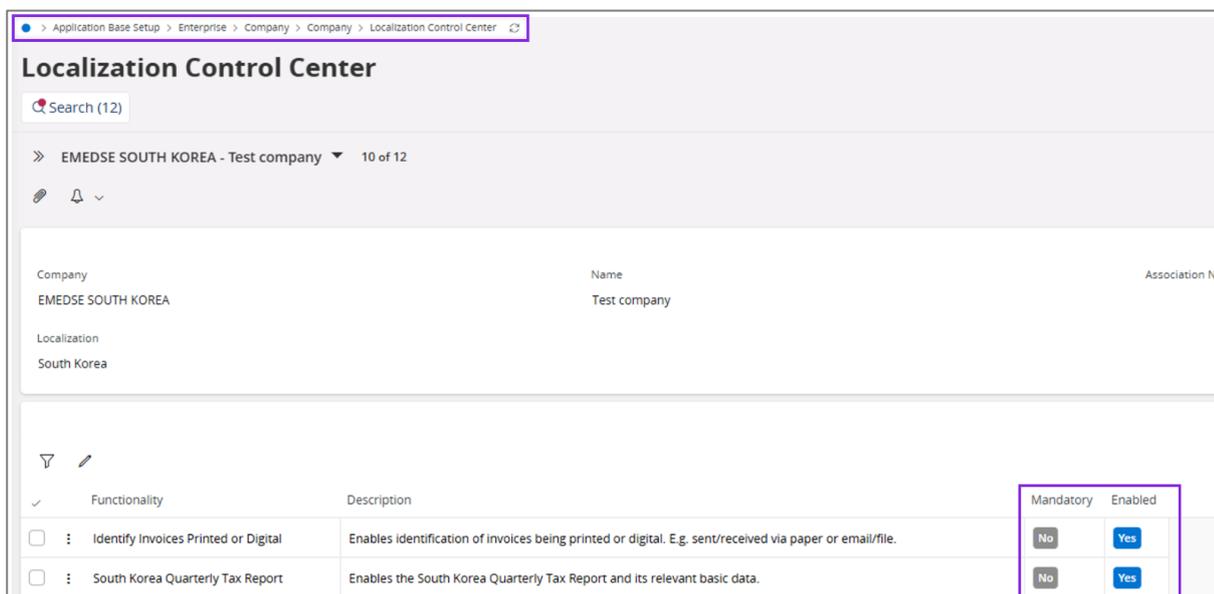

Default Language: English

Country: KOREA (THE REPUBLIC)

Time Zone: [Empty]

Localization: South Korea

The parameters **Identify Invoices Printed or Digital** and **South Korea Quarterly Tax report** need to be enabled. This is done on Company – Localization Control Center

Localization Control Center

EMEDSE SOUTH KOREA - Test company

Company: EMEDSE SOUTH KOREA

Name: Test company

4.5 Define basic data – Tax Ledger

Define Tax template

A new tax template S114 has been created to support the Quarterly Tax report.

A Copy of the Tax template need to be created to be able to add a user defined external file template. This is done by selecting the tax template S114 and click command button **Copy Tax Template Basic**.

External file type and External file template

A new External File Type TaxRepKrQuarterlyTax and a new External file template TaxRepKrQuarterlyTax have been created.

A copy of the external file template needs to be created. After creation of the new tax template the user can define the below fields in the copied external file template.

- Company Name of presenter – Name of the Company
- Name of Presenter – Name of CEO of the Company
- Business Type of Presenter – Business Type of the Company
- Business Category of Presenter – Business Category of the Company
- Serial Number of Book – Serial Number of Book of Suppliers

4.6 Define Basic Data – Company

Tax ID Number needs to be added on the Company to be shown in the output file. This is done by updating the field Tax ID Number on the **Company/Tax Control/Invoice** tab.

[Application Base Setup](#) > [Enterprise](#) > [Company](#) > [Company](#) > [Tax Control](#)

4.7 Define Basic Data – Supplier and Customer

Digital/non digital customer and supplier

Customers and suppliers must be classified as either Digital or Non-Digital, which is handled via a toggle available on the respective customer or supplier. For detailed information on digital versus non-digital, please refer to the chapter 2 "Identify Invoices Printed or Digital".

Note : The customers with toggle set to “non-digital” will not be included in the Quarterly Tax report.

Individual/Corporate Customer and Supplier

According to the South Korea Tax Reporting requirements, Customers and suppliers must be classified as either **Individual** or **Corporate**. This is achieved by updating the standard field "**Classification of Business**" located on the **General** tab of the Customer or Supplier.

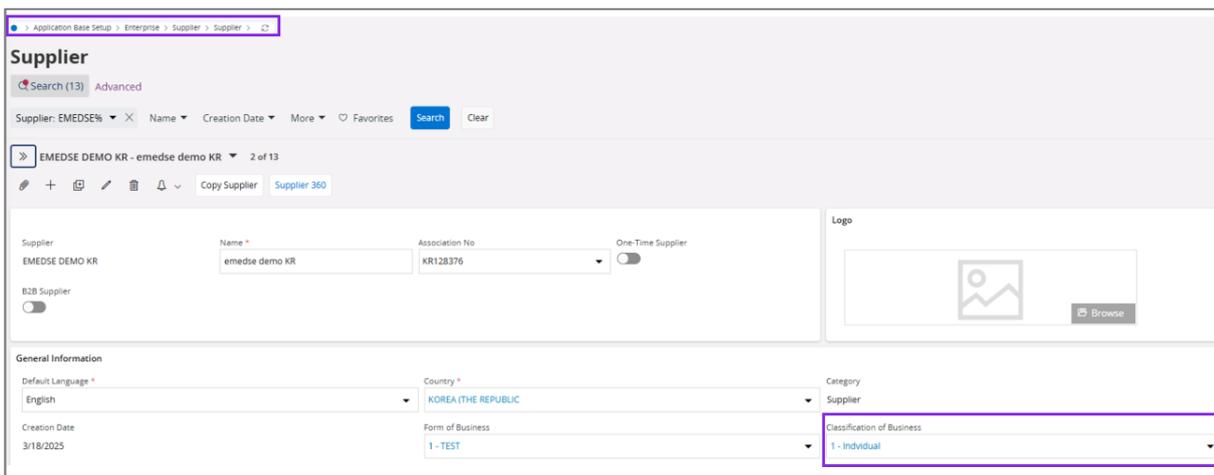

Within this solution:

Individual is represented by the value 1

Corporate is represented by the value 2

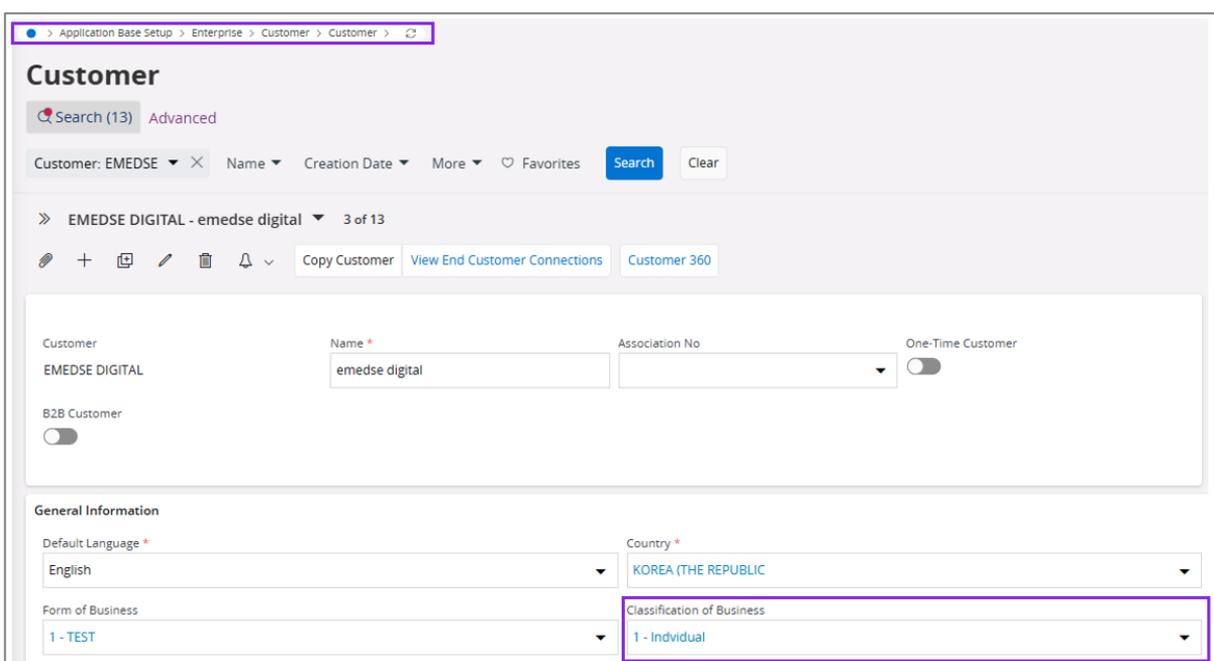

Note: Only customers and suppliers classified as 1 (Individual) or 2 (Corporate) will be included in the Quarterly Tax Report.

Classification of Business on Supplier General page.

The screenshot shows the 'Supplier' general page for 'EMEDSE DEMO KR'. The 'Classification of Business' dropdown menu is highlighted with a red box and set to '1 - Individual'. Other visible fields include 'Name' (emedse demo KR), 'Association No' (KR128376), 'Country' (KOREA (THE REPUBLIC)), and 'Form of Business' (1 - TEST).

Classification of Business on Customer General page

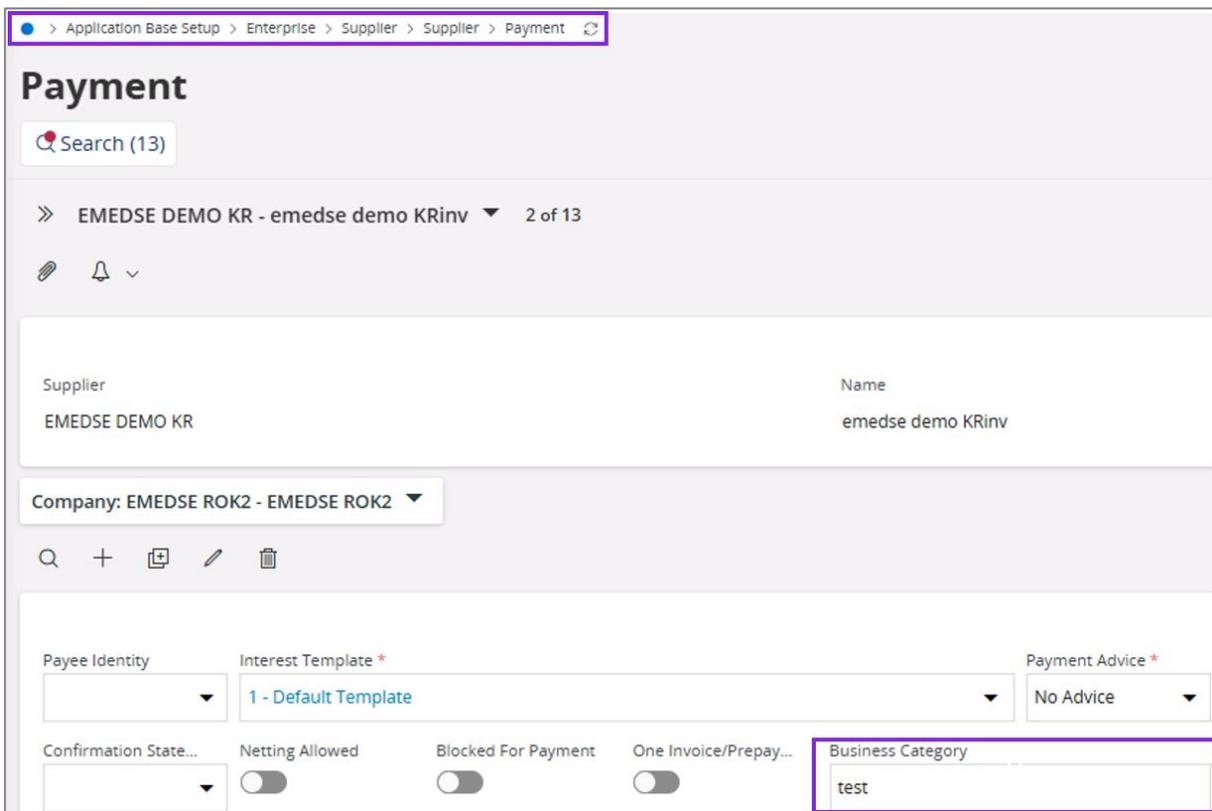

The screenshot shows the 'Customer' general page for 'EMEDSE DIGITAL'. The 'Classification of Business' dropdown menu is highlighted with a red box and set to '1 - Individual'. Other visible fields include 'Name' (emedse digital), 'Country' (KOREA (THE REPUBLIC)), and 'Form of Business' (1 - TEST).

Business Category for supplier

In alignment with South Korea Tax Reporting requirements, suppliers must be assigned a **Business Category**, which specifies the sub-industry in which the supplier operates.

To support this requirement, a new field titled “**Business Category**” has been introduced. This field is specific to the LCC parameter and becomes visible only when the parameter “**South Korea Quarterly Tax Report**” is enabled.

The Business Category field is located on the Supplier / Payment tab.

The screenshot shows the 'Payment' tab for a supplier. The breadcrumb trail at the top is 'Application Base Setup > Enterprise > Supplier > Supplier > Payment'. The main header is 'Payment' with a search bar containing 'Search (13)'. Below this, there is a dropdown menu for 'EMEDSE DEMO KR - emedse demo KRinv' and a '2 of 13' indicator. The supplier information is displayed as 'Supplier: EMEDSE DEMO KR' and 'Name: emedse demo KRinv'. A 'Company' dropdown is set to 'EMEDSE ROK2 - EMEDSE ROK2'. The 'Business Category' field is highlighted with a red box and contains the text 'test'. Other fields include 'Payee Identity', 'Interest Template *' (set to '1 - Default Template'), 'Payment Advice *' (set to 'No Advice'), and several toggle switches for 'Confirmation State...', 'Netting Allowed', 'Blocked For Payment', and 'One Invoice/Prepay...'. The 'Business Category' field is located at the bottom right of the form.

Business Type for supplier

Suppliers must be assigned a **Business Type**, which identifies the industry in which the supplier operates.

This is managed by updating the standard field “**Form of Business**”, located on the **General** tab of the Supplier.

4.8 Define Tax report

To create a new Quarterly Tax Report, navigate to: **Financials/Tax Ledger/Tax Report** and click **New**.

Follow the steps below, in line with IFS standard functionality:

- Enter the Report No and Description as appropriate.
- Select the Template ID as KR114.
- Set Report Currency Base to Account Currency.
- Choose Correction Type as Replacement Report.
- All other fields are optional.

Note: The output format for the Quarterly Tax Report is .txt.

File extension

The Quarterly Tax Report must be generated with a specific file extension. To enable this, the required file extension must first be added to the **System Parameters** under Extensions.

Solution Manager > Setup > System Parameters

RE01 - RE01

DETAILS PARAMETER

[View Tax Invoices](#)

✓	Party Type	Identity	Invoice No
<input type="checkbox"/>	Supplier	ED EMEDSE DEMO KR - emedse demo KR	10009

Executing the new command opens an assistant that displays tax invoices with **Reported** status, where the Tax Invoice Date falls within the same periods as the Tax Proposal.

Tax Invoices								
✓	Tax Invoice Series ID	Tax Invoice No	Customer	Tax Invoice Date	Currency	Net Amount	Gross Amount	Tax Amount
<input type="checkbox"/>	TX	10000	EMEDSE DIGITAL - ...	4/16/2025	KRW	4000.00	4500.00	500.00
<input type="checkbox"/>	TX	10001	EMEDSE CORPDIG ...	4/16/2025	KRW	2000.00	2250.00	250.00

It is possible to select and delete tax invoices from the Tax Proposal if they should not be included. Deleting a tax invoice removes it only from the specific proposal. If the proposal is deleted and a new proposal is created within the same period, all transactions (supplier invoices and tax invoices) will be included in the new proposal. This also applies when a proposal is in **Reported** status, and a new proposal for the same period is generated—again, all relevant transactions will be fetched into the new proposal.

Tax Invoices								
(1) ✓	Tax Invoice Series ID	Tax Invoice No	Customer	Tax Invoice Date	Currency	Net Amount	Gross Amount	Tax Amount
<input checked="" type="checkbox"/>	TX	10000	EMEDSE DIGITAL - ...	4/16/2025	KRW	4000.00	4500.00	500.00
<input type="checkbox"/>	TX	10001	EMEDSE CORPDIG ...	4/16/2025	KRW	2000.00	2250.00	250.00

User may verify the transactions and return to the **Automatic Tax Proposal** page and execute the **Acknowledge** command. This will change the Tax Proposal status to **Acknowledged**, as per IFS Standard functionality.

Automatic Tax Proposal
