1 Company Set-up

1.1 Overview

In order to utilize the Polish functionality, the company must be set up as using the Poland localization. This is defined in the page **Company**.

1.2 Define localization

- Open the page, **Company**.
- Search for the company.
- Select “Poland” in the drop-down list in the Localization field and save. Note that this cannot be changed once transactions are created for the company.

The screenshot displays the IFS 'Company' setup page for 'AMKA-PLN'. The page is divided into a left-hand navigation menu and a main content area. The navigation menu includes sections like 'Address', 'Communication Method', 'Message Setup', 'Employees', 'Accounting Rules', 'Tax Control', 'Invoice', 'Payment', 'Fixed Assets', 'Periodical Cost Allocation', 'Supply Chain Information', and 'Localization Control Center'. The main content area shows the company details for 'AMKA-PLN', including its name, association number, and creation date. The 'Localization' field is highlighted with a red box, indicating it is set to 'Poland'. Other fields include 'Default Language' (English), 'Country' (POLAND), 'Form of Business', 'Classification of Business', 'Creation Date' (4/8/2021), 'Source Company', 'Activity Start Date', 'Source Template ID' (STD-PL), and 'Template Company' (No). The 'Miscellaneous Information' section includes 'Document Logotype', 'Document Recipient Address Positioning' (Right), 'Print Document Senders Address' (toggle), 'Authorization ID', 'Authorization ID Expiration Date', and 'Identifier Reference'.

1.3 Select Localization functionality.

Specify which functionality to use.

- Open Localization Control Center sub menu under Company.
- The localization selected in previous step is displayed in the Localization Control Center field and cannot be changed.
- All functionality available for Poland is presented in the list. Enable/Disable the functionality based on the requirements for the company by enabling the radio buttons. Note that some functionality is mandatory and cannot be disabled.

Localization Control Center				
Company		Name	Association No	Created By
MABE-POLAND		Polish Company		MABEPL
Localization		Poland		
Functionality	Description	Mandato...	Enabled	
<input type="checkbox"/>	Access Control for Inventory Rese	Enables a more specific access control for making inventory reservation, instead of using the user-allowed-sites control as in core.	No	No
<input type="checkbox"/>	Access Control for Inventory Tran	Enables a more specific user access control for performing inventory transactions instead of using the user-allowed-sites control as in core.	No	No
<input type="checkbox"/>	Cash Account Currency Rate Meet	Enables to use FIFO or AVG method in mixed payment and cash box	No	Yes
<input type="checkbox"/>	Currency Rate Date and Voucher	Enables to use delivery date as voucher date and tax currency rate date in customer order invoice, instant invoice and project invoice. Enhancement of outgoing invoice currency rate date	No	No
<input type="checkbox"/>	Discounted Price Rounded	Enables the rounding of the sales price after applying the discounts on the customer order lines and customer order invoice lines.	No	Yes
<input type="checkbox"/>	Polish E-Invoice	Enables the generation of the e-invoice XML file, including Polish legally required data, used for sending invoices to tax authorities.	No	Yes
<input type="checkbox"/>	Polish Split Payment	Enables handling of split payment transactions when using payment formats. Split payment transactions are created according to Polish specific regulations.	No	Yes
<input type="checkbox"/>	Reposting of Currency Difference	Enables to handle currency difference related to tax separately from currency difference related to net amount by introduction of additional postings. The additional postings make it possi	No	No
<input type="checkbox"/>	Round Tax Amount for Supplier In	Enables rounding of tax amount to 0 decimals for supplier invoices in accounting currency when tax code is of type Calculated Tax. In Poland this is used in order to register customs docum	Yes	Yes
<input type="checkbox"/>	Specific Data for Customer Invoic	Enables to include specific additional data in Polish customer invoices, including tax amount and gross amount on the invoice lines, 0% tax rate printed in characters and Company Tax ID.	No	No
<input type="checkbox"/>	Standard Audit File-Tax for Polanc	Enables to generate reports in XML format for VAT declaration and records of VAT on sales/purchase, customer invoices, inventory, mixed payments and accounting books.	Yes	Yes
<input type="checkbox"/>	Tax Reliability Control on Supplier	Enables the control of the supplier's tax reliability status when entering purchase orders, manual supplier invoices and payment proposals.	No	No

2 Cash Account Currency Rate Method

2.1 Overview Legal Requirement

This requirement covers the different currency rate methods for bank and cash account movements in Poland. In Poland, at the outgoing payment moment it is not needed to account for the differences between the invoice currency rate and payment currency rate.

The rate for the outgoing transaction is calculated based on the incoming transactions.

The different methods for calculating currency rates are weighted average (AVG) and FIFO.

2.2 Process Overview

Postings are created for the currency difference when the outgoing payment is approved.

2.3 Solution Overview

Cash Account

Short Name	Currency Rate Calculation Method	Handling of Negative Balance	Two-step Currency Profit/Loss
AVG-GBP	Weighted Average	Currency Profit/Loss after each Inflow	No
AVG-USD	Weighted Average	Currency Profit/Loss after each Inflow	Yes

The column Currency Rate Calculation Method in the **Cash Accounts** page defines the method of currency rate calculation for outflow. It can have following values:

- Weighted average
- First in, First Out

The column Handling of Negative Balance on the **Cash Accounts** page defines how the calculation is carried out in case the cash account has a negative balance. It can have the following values:

- Currency Profit/Loss after each inflow
- Aggregate Currency Profit/Loss

The Two-steps Currency Profit/Loss check box in the **Cash Account** page is enabled for editing. It controls how currency differences are posted. The details are explained below.

If Two-steps Currency Profit/Loss check box is checked –

- Currency rate which is in the cash account queue will not be fetched to postings, instead the currency rate which is given when approving the outgoing payment is fetched to the postings.

If Two-steps Currency Profit/Loss check box is Unchecked –

- Currency rate which is in the cash account queue is fetched to the postings when the outgoing payment is approved.

New currency rate calculation methods are introduced when approving,

- Mixed Payments
- Cash Box Payments

2.4 Prerequisites

1. The company must be set-up to use Poland localization, see the Company Set-up chapter and the “Cash Account Currency Rate Method” parameter must be enabled.
2. Cash accounts should be created.
 - In the **Cash Accounts** page, you can define the calculation method of currency rate for cash account in foreign currency.
 - These columns are editable only when Cash Account is not in accounting currency.
3. Cash Accounts should be linked to posting control PP1.
4. Posting controls PP80 (currency Gain) and PP79 (Currency loss) should be created. (This is only needed when Two-steps Currency Profit/Loss check box is checked.
5. Customers and Suppliers should be created.

2.5 Weighted Average Method

In the AVG method the average currency rate is calculated for the cash account using incoming transactions. The current balance of the cash account in transaction currency and accounting currency is calculated after each incoming transaction. It is used when calculating currency rate for outgoing transactions.

Balance in accounting currency divided by balance in transactions currency calculates currency rate for outgoing transaction. The currency rate of an outflow is updated with the historical average currency rate in the mixed payment line after the mixed payment is approved.

EXAMPLE:

- Currency Rate Calculation Method – Weighted Average
- Handling of Negative balances – Currency Profit/loss
- Two step – Checked

Inflow Amount In Transaction Currency	Inflow Currency Rate	Amount in Accounting Currency	Average Currency Rate
150	4.3	645	
100	4.2	420	
200	4	800	
450		1865	4.14

1. Create 3 manual customer invoices as below,

Manual Customer Invoices											
Customer	Series ID	Invoice No	Status	Invoice Type	Invoice Date	Currency	Gross Amount	Net Amount	Tax Amount		
PL_CUS - PL_CUS FS		AJ1	PostedAuth	FS	5/12/2021	USD	150.00	150.00	0.00		
PL_CUS - PL_CUS FS		AJ2	PostedAuth	FS	5/12/2021	USD	200.00	200.00	0.00		
PL_CUS - PL_CUS FS		AJ3	PostedAuth	FS	5/12/2021	USD	100.00	100.00	0.00		

2. Create a mixed payment, connect the previously created invoices with respective currency rates and approve.

Debit	Credit	Debit Amount in Acc Curr
450.00	0.00	1865.00
Credit Amount in Acc Curr		0.00

(1) ✓	Account	Debit Amount In Transaction Currency	Credit Amount In Transaction Currency	Amount in Transaction Currency	Debit Amount In Accounting Currency	Credit Amount In Accounting Currency	Amount in Accounting Currency	Debit Am In P Cur
<input type="checkbox"/>	13010 - Current banking account		200.00	-200.00		1000.00	-1000.00	
<input type="checkbox"/>	21015 - Short-term domest.payabl.c...	200.00		200.00	1000.00		1000.00	20
<input type="checkbox"/>	13010 - Current banking account	0.00		0.00	171.12		171.12	20
<input checked="" type="checkbox"/>	3960 - Exch gain on receivables and ...		0.00	0.00		171.12	-171.12	20
<input type="checkbox"/>	75030 - Positive currency differences		0.00	0.00		0.00	0.00	

Calculation for the exchange gain is calculated as below,

Amount in Transaction Currency		Amount in Accounting Currency
200	*	4.14
200	*	1000
		171.12

Note - This is a positive currency difference (Currency Gain), posted with PP80. If in case there is a currency loss, then postings are posted with PP79 (Currency Loss)

In this scenario Two-steps Currency Profit/Loss check box is checked –

- Currency rate which is in the cash account queue will not be fetched to postings, instead the currency rate which is given when approving the outgoing payment is fetched to the postings.

Cancelling mixed payment

- For AVG method, cancelling the mixed payment is allowed.
- The warning message “There is an existing approved mixed payment with later payment date. The wrong order of approval creates wrong average currency rate. Do you want to proceed” will be presented to the user when there is any approved mixed payment which has later payment date.

2.6 Weighted Average Method – Handling of Negative Balance using Currency Profit/Loss after each inflow

Currency Profit/Loss after each inflow is one of the calculation methods of Handling of Negative Balance in the **Cash Accounts** page, it defines how the calculation is carried out in case the cash account has a negative balance.

This is when the cash account has a negative balance instead of a positive balance.

How the functionality works - when there is a negative amount in the cash account – Creating an outflow

1. Make the balance of cash account negative.

Cash Account Queue - PL_WA - P				
✓	⋮	Currency Amount	Amount in Acc Curr	Currency Rate
<input type="checkbox"/>	⋮	-290.00	-1450.00	5

2. Create a Manual supplier invoice for an amount of 200, create a mixed payment and connect the created manual supplier invoice with the currency rate 3 and approve.

Mixed Payment

PL_WA - 525 - 5/17/2021 3 of 3 Approved

<div style="display: flex; justify-content: space-between;"> [icon] [icon] [icon] [icon] </div>								
✓	:	Transaction Code	Account	Currency	Currency Rate	Conversion Factor	Debit Amount in Transaction Currency	Credit Amount in Transaction Currency
<input type="checkbox"/>	:	PP1	13010 - Current banking account	USD	3	1		200.00
<input type="checkbox"/>	:	IP1	21015 - Short-term domest.payabl.c...	USD	3	1	200.00	

Note – Even though cash account shows a currency rate of 4.18 this will not be fetched to postings as the cash account balance is negative. Here currency rates are posted based on the currency rate entered in the mixed payment.

How the functionality works - When there is a negative amount in the cash account – Creating an inflow

1. Cash account is already negative.

Cash Account Queue - PL_WA				
<div style="display: flex; justify-content: space-between;"> [icon] [icon] [icon] </div>				
✓	:	Currency Amount	Amount in Acc Curr	Currency Rate
<input type="checkbox"/>	:	-490.00	-2050.00	4.18

2. Create a manual customer invoice for an amount of 100, Create a mixed payment and connect the same invoice with the currency rate 3.5 and approve.

Transaction Balances			
Cash Account	Statement No	Remaining Amount	
PL_WA	526	0.00	
Debit	Credit	Debit Amount in Acc Curr	
100.00	0.00	350.00	
Credit Amount in Acc Curr		0.00	

Transaction Details								
<input checked="" type="checkbox"/>	:	Amount	Currency Rate	Inv/Prepaym No	Lump Sum Trans Number	Payment Transaction Type	Cash Account User Group	Bank Transactio
<input type="checkbox"/>	:	100.00	3.5	9874	1	Enter Customer Paymen	*	*

3. View the cash account.

Cash Account Queue - PL_WA				
<input checked="" type="checkbox"/>	:	Currency Amount	Amount in Acc Curr	Currency Rate
<input type="checkbox"/>	:	-390.00	-1632.00	4.18

Note – Cash account currency rate will not get updated, instead it will remain the same currency rate. This is because the cash account has a negative balance. when this balance is changed to positive, currency rates will be used proportionally.

2.7 Weighted Average Method – Handling of Negative Balance using Aggregate Currency Profit/Loss

Aggregate Currency Profit/Loss is one of the calculation methods of Handling of Negative Balance in the **Cash Accounts** page, it defines how the calculation is carried out in case the cash account has a negative balance.

This is when the cash account has a negative balance instead of a positive balance.

How the functionality works - When there is a negative amount in the cash account – Making an outflow.

1. Make the balance of cash account negative.

2.8 FIFO Method

A FIFO queue is used to keep track of incoming transactions. When cash account balance is greater than zero, then each incoming transaction is added to the FIFO queue. For outgoing transactions, the rows in the FIFO queue are consumed to compensate the outflow amounts.

EXAMPLE:

Currency Rate Calculation Method – FIFO
 Handling of Negative balances – Currency Profit/loss
 Two step – Unchecked

Inflow amount in trans curr	Inflow curr rate	Amount in acc curr
100	4.3	430
150	4	600
200	4.2	840
450		1870

1. Create 3 manual customer invoices as below using 3 different voucher dates, (Example – 18th, 20th, 24th)

Manual Customer Invoices

New Manual Customer Invoice

Customer Series ID Invoice No : AJ1PLN;AJ2PLN More Favorites Clear Q Settings

✓	:	Voucher	Date	Customer	Series ID	Invoice No	Status	Invoice Type	Invoice Date	Currency	Gross Amount	Net Amount
<input type="checkbox"/>	:		5/24/2021	PL_CUS - PL_CUS	FS	AJ1PLN	PostedAuth	FS	5/24/2021	USD	100.00	100.00
<input type="checkbox"/>	:		5/20/2021	PL_CUS - PL_CUS	FS	AJ2PLN	PostedAuth	FS	5/24/2021	USD	150.00	150.00
<input type="checkbox"/>	:		5/18/2021	PL_CUS - PL_CUS	FS	AJ4PLN	PostedAuth	FS	5/24/2021	USD	200.00	200.00

2. Create a mixed payment for each transaction separately, connect the created invoice with respective voucher date and currency rate and approve.

Note - Order of voucher dates are important when approving mixed payments. According to the functionality which ever transaction is approved in the mixed payment will be fetched to the cash account as the “first in” irrespective of the payment date.

Therefore, according to above example approve mixed payment according to the order 18th, 20th and 24th.

3. View cash account.

Note – Unlike in Weighted average method where an average currency rate was calculated, FIFO method will keep transactions separately with the respective currency rates in the cash account.

Cash Account Queue - AJFIFO - AJFIFO

✓	:	Currency Amount	Amount in Acc Curr	Original Amount	Original Amount in Acc Curr	Status	Currency Rate	Payment Date
<input type="checkbox"/>	:	200.00	840.00	200.00	840.00	NotCleared	4.2	5/20/2021
<input type="checkbox"/>	:	150.00	600.00	150.00	600.00	NotCleared	4	5/18/2021
<input type="checkbox"/>	:	100.00	430.00	100.00	430.00	NotCleared	4.3	5/24/2021

If a payment was made through mixed payment, the currency rate should be picked according to the FIFO method. The first transactions entered should be picked first as the outflow.

4. Create a manual supplier invoice for an amount of 280. Create a mixed payment and connect the created manual supplier invoice with the currency rate 4.3 and approve.

Transaction Balances

100	4.3	430
150	4	600
30	4.2	126
280		4.13

labelling mixed payment

- When FIFO method is used, only last mixed payment can be cancelled.

- When trying to cancel other mixed payments the user will be presented with an error message which says, "Only last mixed payment can be cancelled when First In First Out method is used for foreign currency cash account!"

2.9 FIFO Method – Handling of Negative Balance using Currency Profit/Loss after each inflow

Currency Profit/Loss after each inflow is one of the calculation methods of Handling of Negative Balance in the **Cash Accounts** page, it defines how the calculation is carried out in case the cash account has a negative balance.

This is when the cash account has a negative balance instead of a positive balance.

How the functionality works - When there is a negative amount in the cash account – Making an outflow.

1. Cash account is already negative.

Cash Account Queue - FIFO_PL - 123456							
✓	:	Currency Amount	Amount in Acc Curr	Original Amount	Original Amount in Acc Curr	Status	Payment Date
<input type="checkbox"/>	:	-200.00	-1000.00	-200.00	-1000.00	NotCleared	5 6/9/2021

2. Create a manual supplier invoice for an amount of 500, Create a mixed payment and connect the created supplier invoice with the currency rate 8.

Mixed Payment FIFO_PL - 11 - 6/9/2021						
Transaction Balances						
Cash Account	Statement No				Remaining Amount	
FIFO_PL	11				500.00	
Credit	Debit Amount in Acc Curr				Credit A	
500.00	0.00				4000.00	
Transaction Details						
(1)	:	Amount	Currency Rate	Inv/Prepaym No	Lump Sum Trans Number	Payment Transaction Type
<input checked="" type="checkbox"/>	:	-500.00	8	89	1	Enter Supplier Payment

3. Cash account will get updated as below,

Cash Account Queue - FIFO_PL - 123456							
✓	:	Currency Amount	Amount in Acc Curr	Original Amount	Original Amount in Acc Curr	Status	Payment Date
<input type="checkbox"/>	:	-500.00	-4000.00	-500.00	-4000.00	NotCleared	8 6/9/2021
<input type="checkbox"/>	:	-200.00	-1000.00	-200.00	-1000.00	NotCleared	5 6/9/2021

- Cash account will get updated with the new transaction which will be shown in minus.

How the functionality works - When there is a negative amount in the cash account – Creating an inflow

1. Cash account is already negative.

Cash Account Queue - FIFO_PL - 123456							
✓	:	Currency Amount	Amount in Acc Curr	Original Amount	Original Amount in Acc Curr	Status	Payment Date
<input type="checkbox"/>	:	-500.00	-4000.00	-500.00	-4000.00	NotCleared	8 6/9/2021
<input type="checkbox"/>	:	-200.00	-1000.00	-200.00	-1000.00	NotCleared	5 6/9/2021

2. Create a customer payment for an amount of 1000 and connect the invoice using mixed payment and approve. Use currency rate 4.

3. Cash account is updated as below,

Cash Account Queue - FIFO_PL - 123456							
✓	:	Currency Amount	Amount in Acc Curr	Original Amount	Original Amount in Acc Curr	Status	Payment Date
<input type="checkbox"/>	:	300.00	1200.00	300.00	1200.00	NotCleared	4 6/9/2021
<input type="checkbox"/>	:	0.00	0.00	-500.00	-4000.00	Cleared	8 6/9/2021
<input type="checkbox"/>	:	0.00	0.00	-200.00	-1000.00	Cleared	5 6/9/2021

2.10 Delimitations

- Functionality is only supported in the accounting currency. When PP79/PP80 postings and corresponding PP1 postings are created as a result of differences calculated in the accounting currency in company with parallel currency enabled, amounts in parallel currency are set to 0.
- You can only select the value in the Currency Rate Calculation Method field if the cash account is not in accounting currency and there are no transactions for the cash account.
- Cash accounts with a currency rate calculation method defined cannot be used in other payment windows (i.e.: supplier payment, customer payment, netting, acknowledge automatic supplier payment, acknowledge direct debiting etc.)
- In case when FIFO method is used, only the last mixed payment can be cancelled.

Additional delimitations may apply; all relevant flows should be tested to ensure completeness.

3 Standard Audit File-Tax For Poland (JPK)

3.1 Overview Legal Requirement

Since 1st July 2016 all companies in Poland have to comply with an additional reporting requirement, i.e., to produce a file detailing specific information about the business of the taxpayer and to provide it electronically to the Polish tax authorities for audit purposes. In other words, this is an XML-based procedure for the transmission of companies' transactions to the tax authorities to enable efficient auditing of taxable transactions.

These files should be provided in specific formats defined by the Polish tax authorities and thus they are called Standard Audit File for Tax (SAF-T) or Jednolity Plik Kontrolny (JPK) in Polish.

Since 1st of October 2020 Polish Tax Declaration, VAT-7 Report, is also included in the JPK concept.

According to the Notice published by the Polish Tax Authority, based on the Corporate Income Tax Act and the Personal Income Tax Act, the initial JPK_KR schema was logically divided into two new schemas as,

- JPK_KR_PD
- JPK_ST_KR

Accordingly, all companies in Poland are obliged to create reports in XML format according to the following rules:

Mandatory reports to be provided monthly.

- In case of reporting for periods starting from October 2020
 - Sales & Purchase VAT Registers and Tax Declaration – JPK_V7M
 - JPK_V7M (1) – from October 2020 to December 2021
 - JPK_V7M (2) – from January 2022 to January 2026
 - JPK_V7M (3) – from February 2026
- In case of reporting for periods until September 2020 (including corrections for these periods)
 - Sales & Purchase VAT Registers – JPK_VAT
 - Tax Declaration (VAT-7) reported outside JPK concept

Mandatory reports to be provided annually.

- In case of reporting for periods starting from January 2025
 - For Accounting Books - JPK_KR_PD
- In case of reporting for periods starting from January 2026
 - For Fixed Assets and Intangible Assets – JPK_ST_KR

Reports to be provided on demand:

- For Inventories - JPK_MAG
- For Sales VAT Invoices - JPK_FA
- For Mixed Payments - JPK_WB
- For Accounting Books - JPK_KR

In the standard functionality, customer/supplier group is not available in the Tax Ledger. In order to support TP indicator in JPK_V7M (connections between seller and buyer) it was requested to enable customer/supplier group in the Tax Ledger with similar functionality as tax code and delivery type in the standard system.

3.2 Customer/Supplier Group Enhancement in Tax Ledger

3.2.1 SOLUTION

In order to enhance the system with customer/supplier support in the Tax Ledger, the following has been done:

1. The Customer/Supplier Group and Original Customer/Supplier Group columns have been added to the **Tax Transactions** page.
2. The Customer/Supplier Group column have been added to the **Details** tab on the **Tax Proposal Details** page.
3. The Allow Change of Customer/Supplier Group radio button has been added to the **Tax Ledger Parameters** page.
4. The Enable Change of Customer Group radio button, **Customer Group** field, Enable Change of Supplier Group radio button and **Supplier Group** field have been added to the **Modify Tax Transactions** page under the new Customer/Supplier Group section.

3.2.2 PREREQUISITIES

The company must be set-up to use Polish localization, see the Company Set up chapter. The “Standard Audit File-Tax for Poland (JPK)” localization functionality is mandatory and enabled by default.

3.2.3 ENABLE CHANGE OF CUSTOMER/SUPPLIER GROUP

Open the **Tax Ledger Parameters** page. In order to enable possibility to update customer/supplier group in the Tax Ledger, select the Allow Change of Customer/Supplier Group radio button. If the Allow Change of Customer/Supplier Group radio button is not selected, customer/supplier group will still be available in the Tax Ledger, but it will not be possible to update.

The screenshot shows the 'Tax Ledger Parameters' configuration page. The 'Tax Proposal' section contains a radio button labeled 'Allow Change of Customer/Supplier Group' which is selected (indicated by a blue dot) and highlighted with a red rectangular box. Other options in this section include 'Include Cancelled Invoices' (disabled), 'Allow Delete on Replacement Proposal' (disabled), and 'Output File Directory'. The 'Tax Transactions' section includes 'Delete Tax Transactions with Status False' (disabled) and 'Tax Base Calculation for Non-deductible Transactions' (set to 'Original'). The 'Modify Tax Transactions' section contains several other radio buttons: 'Allow Change of Tax Number' (selected), 'Allow Change of Tax Liability Date' (selected), 'Allow Change of Tax Code' (selected), 'Allow Change of Delivery Type' (selected), 'Allow Change of Tax Direction' (disabled), 'Allow Change of Income Type' (disabled), 'Allow Change of Income Amount' (disabled), and 'Allow Update of Legal Identity' (disabled).

3.2.4 ENTER INVOICES

Follow IFS Cloud standard processes to enter customer invoices and supplier invoices.

3.2.5 UPDATE VOUCHERS TO GL

Follow IFS Cloud standard process to update vouchers to General Ledger.

3.2.6 FETCH TAX LEDGER INFO

Follow IFS Cloud standard process to update tax transactions with additional information.

3.2.7 VIEW TAX TRANSACTIONS

Follow IFS Cloud standard process to view tax transactions.

The following new columns are added to the **Tax Transactions** page.

- Customer/Supplier Group – Customer or supplier group of the party from the Identity column and the corresponding Description of the group.
- Original Customer/Supplier Group – Customer or supplier group of the party from the Identity column. This original value remains unchanged when customer or supplier group is modified in Tax Ledger. This also includes the Description of the group from the Original Customer/Supplier Group column.

✓	:	on	Invoice Type	Branch	Supplier/Custo... Branch	Tax Code	Fetches	Is Reported	Correcti...	Is Part of Tax Ledger	Include in Tax Proposal	Tax Base Amount	Tax Base Curr Amount	Tax Amount	Customer/Supplier Group	Original Customer/Supplier Group
<input type="checkbox"/>	:	1	FS			23	Yes	No	No	Yes	Yes	-813.01	-813.01	-186.99	0 - Domestic Associated Unit	0 - Domestic Associated Unit

<input type="checkbox"/>	:	1	CUSTORDCOR			23	Yes	No	No	Yes	Yes	450.00	100.00	103.50	0 - Domestic Associated Unit	0 - Domestic Associated Unit
<input type="checkbox"/>	:	1	FZ			WNT23	Yes	No	No	Yes	Yes	100.00	100.00	23.00	0 - Domestic Associated Unit	0 - Domestic Associated Unit
<input type="checkbox"/>	:	1	FZ			WNT23	Yes	No	No	Yes	Yes	-100.00	-100.00	-23.00	0 - Domestic Associated Unit	0 - Domestic Associated Unit
<input type="checkbox"/>	:	1	FZ			WNT23	Yes	No	No	Yes	No	-200.00	-200.00	-46.00	SUPPLIERGROUP1 - Supplier	SUPPLIERGROUP1 - Supplier

3.2.8 MODIFY TAX TRANSACTIONS FROM TAX TRANSACTIONS

If customer or supplier group needs to be changed, update the value on the **Tax Transactions** page. If you want to update the value for multiple tax transactions, select the Modify Tax Transactions command to open the **Modify Tax Transactions** page. If you want to update customer group, enable the Enable Change of Customer Group radio button, and enter value in the Customer Group field. If you want to update supplier group, enable the Enable Change of Supplier Group radio button, and enter value in the **Supplier Group** field.

In case transaction is already reported, use the Modify Tax Transactions command to update customer or supplier group. Two new tax transactions will be created according to the same logic as if tax code or delivery types was changed in the standard system.

3.2.9 CREATE TAX PROPOSAL AND VIEW TAX PROPOSAL DETAILS

Follow IFS Cloud standard process to create a new tax proposal in the **Automatic Tax Proposal** page. When proposal is created, follow IFS Cloud standard process to view tax proposal details, by selecting the Details command.

The following new column is added to the **Details** tab of the **Tax Proposal Details** page.

- Customer/Supplier Group – Customer or supplier group and description from tax transaction.

#Correction	#Tax ID Reference	#Trans Code	#Tax Book ID	#Subgroup	#Tax Number per Tax Code	#Tax ID Type	#Invoice Date	#Tax Transaction Liability Date	#Arrival Date	#Customer/Supplier Group
#No		IP4	TB	WNT - Sum for EU Purchase		PL	7/1/2021	7/1/2021		0 - Domestic Associated Unit
#No		IP4	TB	WNT - Sum for EU Purchase		PL	7/1/2021	7/1/2021		0 - Domestic Associated Unit
#No		IP4	TB	WNT - Sum for EU Purchase		PL	7/2/2021	7/2/2021		0 - Domestic Associated Unit
#No		IP4	TB	WNT - Sum for EU Purchase		PL	7/2/2021	7/2/2021		0 - Domestic Associated Unit

3.2.10 MODIFY TAX TRANSACTIONS FROM TAX PROPOSAL DETAILS

If customer or supplier group needs to be changed, select the Modify Tax Transactions command to open the **Modify Tax Transactions** page. If you want to update customer group, enable the Enable Change of Customer Group radio button and enter value in the **Customer Group** field. If you want to update supplier group, enable the Enable Change of Supplier Group radio button and enter value in the **Supplier Group** field.

(1)	Company	Tax Trans ID	Voucher No	Voucher Type	Voucher Date	Accounting Year	Acco
<input checked="" type="checkbox"/>	AMKA-PLN	200735	2021000002	I	6/3/2021	2021

3.3 SAF-T For Poland – VAT Report from February 2026 (JPK_V7M (3))

3.3.1 SOLUTION – SAF-T PL V7M

The solution is based on IFS Cloud standard functionality of tax reporting including tax transactions and the corresponding tax proposal and audit interface functionality.

In order to support the requirement for the SAF-T PL V7M report, the following has been done

1. New report type SAF-T added to the **Audit Formats** page.
2. In **Audit File Basic Data** page, a new tab, SAF-T Poland Setup with ten sections has been added to handle SAF-T Poland specific data.
3. In **Audit Interface Assistant** page 2/3, new **Audit Type** field has been added to select relevant SAF-T report. In page 3/3 additional **Proposal ID** field specific for the SAF-T V7M has been added.
4. New external file type and new external file template were added to support SAF-T V7M.
5. List of values is added for the Reference Number column for vouchers of function group M to have additional invoice information in tax transactions.

Process Overview:

3.3.2 PREREQUISITES

- The company must be set-up to use Polish localization, see the Company Set up chapter. The “Standard Audit File-Tax for Poland (JPK)” localization functionality is mandatory and enabled by default.
- It is recommended to create the company using Standard Polish Template (STD-PL).

3.3.3 DEFINE COMPANY BASIC DATA

3.3.3.1 Define Tax Office

Open the **Application Base Setup/Enterprise/Tax Office** page. On the **General** tab, define Tax Office for Poland – one from the list published on tax authority’s website. For example “0202”, “1010”, “3030” ...

Application Base Setup > Enterprise > Tax > Tax Office

Search **Advanced**

Tax Office Name : PL% Creation Date More Favorites Clear Settings

Sort by

Tax Office 0202 - PL Tax Office Dan 1 of 1

0202
Name: PL Tax Office Dan

Address
Communication Method
Tax Report

Tax Office: 0202
Name: PL Tax Office Dan

Default Language: English
Country: POLAND
Creation Date: 8/4/2020

On the Tax Report sub menu, enter the Company and Tax ID Number. Connect the VAT-7 report used as a base for SAF-T V7M report in the child table.

Application Base Setup > Enterprise > Tax > Tax Office > Tax Report

Sort by

Tax Report VAT PL - VAT PL 1 of 1

Tax Report Info

- Tax Report
- VAT7M - VAT7M
- VAT-2020 - Vat 2020

3.3.3.2 Define Person E-Mail and Phone Communication Methods

Open the **Application Base Setup/Enterprise/Person/Person** page General sub menu define Person ID of person responsible for JPK_V7M reporting. On the Communication Method sub menu enter E-Mail Communication Method and Phone Communication Method. Select the Default per Method check box for both methods.

Person	Full Name	User ID	Validity
AMKALK	Amaya Karunaratne	AMKALK	Active

Comm ID	Name	Description	Communication Method	Value	Default per Method	Address ID	Default per Method and Address	Validity Period
1	amaya		E-Mail	amaya@amkapln.com	Yes		No	
2	amaya		Phone	4445553535354	Yes		No	

3.3.3.3 Define Customer Groups

Using IFS Cloud standard functionality, define separate customer groups used to follow connections between seller and buyer (**V7M TP** field).

Customer Group	Description	Use Collective Voucher	Default No of Invoice Copies
0	Domestic Associated Unit	No	1
1	Domestic Not Associated Unit	No	1
2	Foreign Associated Unit	No	1
3	Foreign Not Associated Unit	No	1
4	Internal Unit	No	1

Note: In brackets you can find the name of the field where the value should be connected in the **Audit File Basic Data/SAF-T Poland Setup** tab.

3.3.3.4 Define Invoice Series

Using IFS Cloud standard functionality, define separate invoice series used to follow documents related to unreturned deposits (**Invoice Series for Unreturned Deposits** field).

Home > Financials > Customer Invoice > Basic Data > Invoice Series

Company Polish Company

Invoice Series

Search

Series ID	Description	Voucher Type	Max No of Char for Payment Reference	Fixed Length of Invoice No	Payment Method for Creation of Paym Ref	Tax Invoice	Separate Tax Invoice
FS-SK	Manual Customer Invoice, Deposit Refund System					No	No

Note: In brackets you can find the name of the field where the value should be connected in the **Audit File Basic Data/SAF-T Poland Setup** tab.

3.3.3.5 Define Voucher Types

Using IFS Cloud standard functionality, define separate voucher types used to follow

- internal documents (**WEW** field)
- internal summary documents containing sales from cash registers (**Sales/RO** field).

Accounting Rules > User Related Data > Voucher Type

Company Dan Poland

Voucher Type

WEW - Internal Documents PL 1 of 1

WEW
Description... Internal Documents...

Buttons: New Voucher Type, Voucher Series, Excluded From IL, Translation

Voucher Type WEW Description Internal Documents PL		Parameter Selection Automatic Allotment: Yes Simulation Voucher: No Use Voucher Approval Workflow: No Single Function Group: Yes Separate User Approval: No				
Ledger Selection Ledger Type: GL, Affect IL Ledger ID: * Balance Mandatory: Yes Use Manual Internal Methods: No						
Function Group Information						
Function Group	Optional Auto Balance	Store Original	Voucher Row Group Validation	Reference Mandatory	Automatic Allotment Required	Single Function Group Required
M - Manual vouchers	No	No	No	No	No	No

Note: In brackets you can find the name of the field where the value should be connected in the **Audit File Basic Data/SAF-T Poland Setup** tab.

3.3.3.6 Define Delivery Types

Using IFS Cloud standard functionality, define separate delivery types used to follow

- invoices issued on the base of fiscal receipt (**Sales/FP** field)

- invoices from small suppliers who selected cash method for VAT (**Purchase/MK** field).

Using IFS Cloud standard functionality, define separate delivery types used in order to follow:

- deliveries of alcoholic beverages (GTU_01 field)
- deliveries of petroleum products (GTU_02 field)
- deliveries of heating oil and other oil products (GTU_03 field)
- deliveries of tobacco products (GTU_04 field)
- deliveries of waste (GTU_05 field)
- deliveries of electronic devices (GTU_06 field)
- deliveries of vehicles and car parts (GTU_07 field)
- deliveries of precious metals and base metals (GTU_08 field)
- deliveries of medicines and medical devices (GTU_09 field)
- deliveries of buildings and lands (GTU_10 field)
- services in the scope of transferring the right to emit greenhouse gas (GTU_11 field)
- selected intangible services (GTU_12 field)
- transport and storage services (GTU_13 field).

Using IFS Cloud standard functionality, define separate delivery types used in order to follow:

- distance EU delivery of goods and provision of telecommunication services, broadcasting and electronic services ((V7M) WSTO_EE field)
- delivery of goods to EU consumers where taxpayer enables electronic platform to non EU taxpayer and does not use OSS or IOSS procedures ((V7M) IED field)
- invoices for tourism services ((V7M) MR_T/(FA) P_106E_2 field)
- invoices for secondhand goods and work of art ((V7M) MR_UZ/(FA) P_106E_3 field)
- EU delivery after import based on import procedure 42 ((V7M) I_42 field)

- EU delivery after import based on import procedure 63 ((V7M) I_63 field)
- transfer of a single-purpose voucher made by a taxpayer acting in his own name ((V7M) B_SPV field)
- supply of goods and provision of services to which the single-purpose voucher relates to a taxable person who issued the voucher ((V7M) B_SPV_DOSTAWA field)
- provision of brokering services and other services related to the transfer of multi-purpose voucher ((V7M) B_MPV_PROWIZJA field).

Financials > Supplier Invoice > Basic Data > Delivery Types Company Polish company

Search Advanced

Note: In brackets you can find the name of the field where the value should be connected in the **Audit File Basic Data/SAF-T Poland Setup** tab.

3.3.3.7 Define Tax Sub Group Details

Using IFS Cloud standard functionality, connect new tax codes to existing tax sub groups in the **Tax Group/Sub Groups Details** page for sub groups used for Tax Sales (Detailed) and Tax Purch (Detailed) reports (Tax groups “KRS” and “KRZ” according to STD-PL company template). If required, connect new delivery types in the same tab.

Sub Group	Currency Code	Sub Group	Tax Code	Delivery Type	Delivery Type Exceptions
<input type="checkbox"/>	PLN	SPRZ-KRAJ-22 - Domestic Sales, VAT 22% and 23%	23 - VAT 23%, domesti...	%	ZLE-DLUGI-VAT-MINUS, ZLE-DLUGI-VAT-PLUS
<input type="checkbox"/>	PLN	SPRZ-KRAJ-22-A89A-U1 - Domestic Sales, VAT 22% and 23	23 - VAT 23%, domesti...	ZLE-DLUGI-VAT-MINUS...	
<input type="checkbox"/>	PLN	SPRZ-KRAJ-22-A89A-U4 - Domestic Sales, VAT 22% and 23	23 - VAT 23%, domesti...	ZLE-DLUGI-VAT-PLUS - ...	

3.3.4 DEFINE AUDIT FILE BASIC DATA

3.3.4.1 Enter Audit Format for Poland

Go to **Accounting Rules/Audit Interface/Basic Data/Audit Formats** page. Search for the Poland SAF-T audit format or add a new record for Poland SAF-T as follows:

- Country as “Poland”
- Report Type as “SAF-T”
- If the audit file is run on batch mode, the XML can be downloaded from the **Batch Processed Audit Files** page.

3.3.4.2 Enter Audit File Basic Data

Click Audit File Basic Data command to open the **Audit File Basic Data** page.

(1) ✓	Country	Report Type	Decimal Symbol	Thousands Separator	Negative Format	Leading Zeros	Time Format	Date Format	File Type	File Template ID	Default
<input checked="" type="checkbox"/>	POLAND	SAF-T	. (point)	, (comma)	-9	0.9	13:59	YY-MM-DD			Yes

Use IFS Cloud standard functionality to add a header record in the **Audit File Basic Data** page. If required, do modifications in the **Standard Audit Code Mappings**.

The new tab **SAF-T Poland Setup** includes ten sections. For SAF-T V7M report, following sections are applicable.

General Info section

- Tax Office ID – Select from list of values; only values from legal list are accepted by tax office.

Misc Parameters section

- Person ID – Enter person ID; on list of values there are only persons connected to given company; The e-mail address and the phone number defined for the specified person is reported in SAF-T V7M XML file.
- Invoice Series for SAD – Enter invoice series from list of values – to be used for customs documents registration. When SAF-T V7M XML file is created and invoices with series entered in the **Invoice Series for SAD** field exist, it is validated if there are any references in the **Ref Invoice** No and **Ref Supplier ID** fields in the Supplier Invoice **Details/General** tab. If supplier is different from the one on the invoice, XML file contains mixed data from two

invoices. In particular supplier data is fetched from the referred invoice. If supplier is the same or Ref Invoice No is empty – only data from basic invoice is reported in XML file.

- Invoice Series for Unreturned Deposits – Enter invoice series from list of values – to be used for registration of documents related to unreturned deposits. When SAF-T V7M XML file is created and manual customer invoices with series entered in the **Invoice Series for Unreturned Deposits** field exist, fixed text “SYSTEM KAUCYJNY” is set in the <DowodSprzedazy> tag in XML file, instead of invoice number.

Voucher/Delivery Types for Document Types (JPK_V7M) section

- WEW – Enter voucher type used in order to follow internal documents.
- Sales/RO - Enter voucher type used in order to follow internal summary documents containing sales from cash registers.
- Sales/FP - Enter delivery type used in order to follow invoices issued on the base of fiscal receipt.
- Purchase/MK - Enter delivery type used in order to follow invoices from small suppliers who selected cash method for VAT.

Delivery Types for Goods and Services (JPK_V7M) section

- GTU_01 - Enter delivery type used in order to follow deliveries of alcoholic beverages.
- GTU_02 - Enter delivery type used in order to follow deliveries of petroleum products.
- GTU_03 - Enter delivery type used in order to follow deliveries of heating oil and other oil products.
- GTU_04 - Enter delivery type used in order to follow deliveries of tobacco products.
- GTU_05 - Enter delivery type used in order to follow deliveries of waste.
- GTU_06 - Enter delivery type used in order to follow deliveries of electronic devices.
- GTU_07 - Enter delivery type used in order to follow deliveries of vehicles and car parts.
- GTU_08 - Enter delivery type used in order to follow deliveries of precious metals and base metals.
- GTU_09 - Enter delivery type used in order to follow deliveries of medicines and medical devices.
- GTU_10 - Enter delivery type used in order to follow deliveries of buildings and lands.
- GTU_11 - Enter delivery type used in order to follow services in the scope of transferring the right to emit greenhouse gas.
- GTU_12 - Enter delivery type used in order to follow selected intangible services.
- GTU_13 - Enter delivery type used in order to follow transport and storage services.

Delivery Types/Customer Groups for Specific Procedures section

- (V7M) WSTO_EE - Enter delivery type used in order to follow distance EU delivery of goods and provision of telecommunication services, broadcasting and electronic services.
- (V7M) IED - Enter delivery type used in order to follow delivery of goods to EU consumers where taxpayer enables electronic platform to non EU taxpayer and does not use OSS or IOSS procedures.
- (V7M) TP - Enter customer group used in order to follow connections between seller and buyer.
- (V7M) MR_T/(FA) P_106E_2 - Enter delivery type used in order to follow invoices for tourism services.
- (V7M) MR_UZ/(FA) P_106E_3 - Enter delivery type used in order to follow invoices for secondhand goods and work of art.
- (V7M) I_42 - Enter delivery type used in order to follow EU delivery after import based on import procedure 42.
- (V7M) I_63 - Enter delivery type used in order to follow EU delivery after import based on import procedure 63.

- (V7M) B_SPV - Enter delivery type used in order to follow transfer of a single-purpose voucher made by a taxpayer acting in his own name.
- (V7M) B_SPV_DOSTAWA - Enter delivery type used in order to follow supply of goods and provision of services to which the single-purpose voucher relates to a taxable person who issued the voucher.
- (V7M) B_MPV_PROWIZJA - Enter delivery type used in order to follow provision of brokering services and other services related to the transfer of multi-purpose voucher.
- (V7M) K_14/(VAT) K_14 - Enter delivery type by which a transaction value is retrieved and reported in the <K_14> tag in the SAF-T V7M XML file.
- (V7M) K_35/(VAT) K_38 - Enter delivery type by which a transaction value is retrieved and reported in the <K_35> tag in the SAF-T V7M XML file.
- (V7M) K_36/(VAT) K_39 - Enter delivery type by which a transaction value is retrieved and reported in the <K_36> tag in the SAF-T V7M XML file.

3.3.5 CHANGE TO MANUAL FIELDS IN JPK_V7M REPORT

Using IFS Cloud standard functionality, update values in the **Automatic Tax Proposal/Template Field Presentation/Edit Manual Fields** as presented below.

The screenshot displays the 'Tax Proposal - Template Field Presentation' page in IFS Cloud. The breadcrumb trail indicates the path: Financials > Tax Ledger > Automatic Tax Proposal > Tax Proposal - Template Field Presentation. The page title is 'Tax Proposal - Template Field Presentation'. A search bar is visible at the top left. Below the search bar, there is a dropdown menu showing '9 - 2026-01, JPK_V7M3' and '1 of 1'. A 'Created/Simulated' status indicator is on the right. The main content area shows details for the tax proposal, including 'Tax Proposal: 9 - 2026-01, JPK_V7M3', 'Creation Date: 1/27/2026', 'User ID: MABEPL', 'Tax Report: JPK_V7M3-SUPP - JPK_V7M3, Based on Supplementary Sales and Purch', and 'Tax Template: S118 - Tax Sum VAT-7/23 Poland (Data for JPK_V7M3) reporting, from February 2026'. Below this, the 'Field Presentation 1' section is expanded, showing a table with columns for 'Template Field #1', 'Field #1 Visible in Report Field', and 'Field #1 Value'. The 'Edit Manual Fields' button is highlighted with a red box. The table contains the following data:

Template Field #1	Field #1 Visible in Report Field	Field #1 Value
<input type="checkbox"/> : VAT_ZWROT_BEZP - P_54 Wysokość nadwyżki podatku naliczonego nad należnym do zwrotu na rachunek wskazany przez podatnika	P_54	0.00
<input type="checkbox"/> : WYBOR_ZWROT_VAT_15 - P_540 Zwrot na rachunek rozliczeniowy podatnika w terminie 15 dni: 1 - tak	P_540	-1.00
<input type="checkbox"/> : WYBOR_ZWROT_NA_RACH_VAT - P_55 Zwrot na rachunek VAT podatnika w terminie 25 dni: 1 - tak	P_55	-1.00
<input type="checkbox"/> : WYBOR_ZWROT_VAT_25 - P_56 Zwrot na rachunek rozliczeniowy podatnika w terminie 25 dni (art. 87 ust. 6 ustawy): 1 - tak	P_56	-1.00
<input type="checkbox"/> : WYBOR_ZWROT_VAT_40 - P_560 Zwrot na rachunek rozliczeniowy podatnika w terminie 40 dni: 1 - tak	P_560	-1.00
<input type="checkbox"/> : WYBOR_ZWROT_VAT_180 - P_58 Zwrot na rachunek rozliczeniowy podatnika w terminie 180 dni: 1 - tak	P_58	-1.00

For an example, P_63 and P_64 manual fields should be edited as "1" if any invoices for tourism services or secondhand goods and work of arts exist in the reporting period respectively.

3.3.6 CREATE SAF-T V7M XML FILE

Open the **Accounting Rules/Audit Interface/Audit Interface Assistant** to create the SAF-T V7M XML file.

On Task Options in **Audit Interface Assistant** page, select one of the below options.

Start Now: This option enables user to instantly create an audit file.

Schedule: This option enables user to create an audit output file as a background job. (Refer IFS Cloud Documentation for more details).

Specify the following and Click Next:

- Company: The company you want to generate SAF-T V7M file.
- Country: "Poland"
- Report Type: "SAF-T" - the value is prompted per default Audit Formats settings for Poland.
- Audit Type: "JPK_V7M(3)"
- Period From and Period Until: The year and month range to be covered in SAF-T V7M report.
- File Type: Select JPK_V7M3 structure from list of values.
- File Template: Shows up automatically after File Type is specified.

Accounting Rules > Audit Interface > **Audit Interface Assistant**

3.3.6.1 Reporting of Bad Debt Corrections for Tax Disbursed

Use IFS Cloud standard functionality of manual voucher to register tax amount correction in connection to bad debts for domestic sales.

- If tax disbursed is to be decreased, use tax code and delivery type connected to subgroup SPRZ-KRAJ-22-A89A-U1, SPRZ-KRAJ-7-A89A-U1 or SPRZ-KRAJ-3-A89A-U1 in the **Tax Group/Subgroup Details** page (tax code 5, 8 or 23 and delivery type ZLE-DLUGI-VAT-MINUS, according to default setup).
- If tax disbursed is to be increased, use tax code and delivery type connected to subgroup SPRZ-KRAJ-22-A89A-U4, SPRZ-KRAJ-7-A89A-U4 or SPRZ-KRAJ-3-A89A-U4 in the **Tax Group/Subgroup Details** page (tax code 5, 8 or 23 and delivery type ZLE-DLUGI-VAT-PLUS, according to default setup).
- In the **New Voucher** page, register manual voucher to correct tax amount. Enter series of original invoice in the **Reference Series** field and use list of values to select number of original invoice in the **Reference Number** field.

In case tax disbursed is decreased, <TerminPlatnosci> tag (due date) is automatically set to date from the **Current Due Date** field of the first invoice installment. If other date should be reported in the <TerminPlatnosci> tag, use the **Text** field in the *New Voucher/Voucher Postings* section to enter required date.

In case tax disbursed is increased, <DataZaplaty> tag (payment date) is automatically set to latest payment date (within the reported period) for the invoice. If other date should be reported in the <DataZaplaty> tag, use the **Text** field in the *New Voucher/Voucher Postings* section to enter required date.

The text can have the following format '<any text>: YYYY-MM-DD'. For example

- 'Korekta z tytułu faktury z terminem płatności: 2022-01-01'
- 'Korekta z tytułu faktury zapłaconej: 2022-01-01'

3.3.6.2 Reporting Tax for Unreturned Deposits

Use IFS Cloud standard functionality of manual customer invoice to register transactions related to unreturned deposits.

- In the **Invoice Series** page, enter new invoice series.
- In the **Audit File Basic Data/SAF-T Poland Setup/Misc Parameters** section, enter new invoice series in the **Invoice Series for Unreturned Deposits** field.
- In the **New Voucher Type Assistant**, enter new voucher type and connect it to the "F" function group.
- In the **Audit File Basic Data/SAF-T Poland Setup/Voucher/Delivery Types for Document Types (JPK_V7M)** section, enter new voucher type in the **WEW** field.

- In the **Customer** page, enter deposit system operator for whom you want to register unreturned deposits. Make sure to include tax identity number.
- In the **New Manual Customer Invoice** assistant
 - Enter new document for the previously specified customer, using previously specified voucher type and invoice series.
 - In the **Invoice No** field, enter number consisting of three elements: “SYSTEM KAUCYJNY” text, year to which unreturned deposits are applicable and tax id number of deposit system operator, for example “SYSTEM KAUCYJNY 2025 9999999999”. When these three elements are used, invoice number is unique for each document.
 - Click Next
 - In the **Line Information** section, enter two lines per each applicable tax rate. In the first line, select tax code connected to subgroup SPRZ-KRAJ-22, SPRZ-KRAJ-7, SPRZ-KRAJ-3, SPRZ-KRAJ-0 or SPRZ-KRAJ-ZW (tax code 23, 8, 5, 0 or ZW, according to default setup), and enter amount of unreturned deposit for this tax rate. In the second line, select tax code connected to subgroup SYS-KAUC (tax code SYSKAUC23, SYSKAUC8, SYSKAUC5, SYSKAUC0 or SYSKAUCZW, according to default setup) and enter amount of unreturned deposit per this tax rate with reversed sign. Total net amount, tax amount and gross amount of the invoice are 0.
 - Click Next. Click Finish.

Example

Invoice registered with tax code 23 and SYSKAUC23.

Lines

	Tax Code	Net Amount	Tax Amount
1	23	1000	23
2	SYSKAUC23	-1000	-23

Tags in the XML

```
<K_19>1000</K_19>
<K_20>23</K_20>
<K_360>23><K_360>
```

If invoice was entered with incorrect information, cancel the invoice and enter it again. Note that multiple invoices per single deposit system operator in the same JPK_V7M3 report are not supported.

3.3.6.3 Reporting of E-invoice Reference Number (KSeF)

The following logic is used when reporting E-invoice Reference Number and in case of scenarios when E-Invoice Reference Number is not applicable. If

- In the **Tax Transactions** page, the **E-invoice Reference Number** field has a value
 - Value from the **E-invoice Reference Number** field is reported in <NrKSeF> tag
- In the **Tax Transactions** page, value from the **Voucher Type** field belongs to function group ‘M’, the **Identity** field has a value and values from the **Series ID** field and **Invoice Number** field refer to invoice for which the **E-Invoice Reference Number** field has a value
 - Value from the **E-invoice Reference No** field is reported in <NrKSeF> tag (Bad Debt Transaction)
- In the **Tax Transactions** page, value from the **Series ID** field is included in the **Invoice Series for SAD** field or **Invoice Series for Unreturned Deposits** field
 - <DI>1</DI> is reported
- In the **Tax Transactions** page, the **Identity** field has a value
 - <BFK>1/<BFK> is reported (Bad Debt Transaction)
- In other cases

- `<DI>1</DI>` is reported

Note: `<OFF>` tag is not used.

3.3.7 CREATE SAF-T V7M XML CORRECTION FILE

Open the *Accounting Rules/Audit Interface/Audit Interface Assistant* to create the SAF-T V7M XML correction file.

On page 1/3 and 2/3, select the same information as when generating the ordinary file. On page 3/3 specify the proposal identity of VAT-7 correction report and continue in the same way as when generating the ordinary file. The new XML file is created. The XML tag `<CelZlozenia>` indicates a correction file with value 2 as follows,
`<CelZlozenia poz="P_7">2</CelZlozenia>`

If only information in manual fields of VAT-7 was changed comparing to the previous report

- `<Deklaracja>` block is created in the XML file.
- `<Ewidencja>` block is not created in the XML file.

If only transaction related information was changed/added comparing to the previous report with no impact on total amounts in VAT-7

- `<Deklaracja>` block is not created in the XML file.
- `<Ewidencja>` block is created in the XML file and contains final information from all documents.
- For each document changed comparing to the original report, `<Ewidencja>` block additionally contains.
 - Original information about the document
 - Reversal information about the document (with reversed signs in the amount fields)

If both transaction related information is changed and VAT-7 information is changed

- `<Deklaracja>` block is created in the XML file.
- `<Ewidencja>` block is created in the XML file and contains final information from all documents.
- For each document changed comparing to the original report, `<Ewidencja>` block additionally contains.
 - Original information about the document
 - Reversal information about the document (with reversed signs in the amount fields)

3.3.8 DELIMITATION

- JPK_V7K (quarterly variant of JPK_V7M for small companies) is not supported.
- Reporting of fiscal registers and invoices based on fiscal registers is not supported.
- In case of correction instant invoices for which debit lines are not required, standard functionality allows to set quantity to 0 (as for CO invoices) or remove the debit lines completely. Scenario in which debit lines are removed is not supported by JPK_V7M.

3.4 SAF-T For Poland – VAT Report from January 2022 (JPK_V7M (2))

3.4.1 SOLUTION – SAF-T PL V7M

The solution is based on IFS Cloud standard functionality of tax reporting including tax transactions and the corresponding tax proposal and audit interface functionality.

In order to support the requirement for the SAF-T PL V7M report, the following has been done:

6. New report type SAF-T added to the **Audit Formats** page.
7. In **Audit File Basic Data** page, a new tab, SAF-T Poland Setup with ten sections has been added to handle SAF-T Poland specific data.
8. In **Audit Interface Assistant** page 2/3, new **Audit Type** field has been added to select relevant SAF-T report. In page 3/3 **additional Proposal ID** field specific for the SAF-T V7M has been added.
9. New external file type and new external file template were added to support SAF-T V7M.
10. List of values is added for the Reference Number column for vouchers of function group M to have additional invoice information in tax transactions.

Process Overview:

3.4.2 PREREQUISITES

- The company must be set-up to use Polish localization, see the Company Set up chapter. The “Standard Audit File-Tax for Poland (JPK)” localization functionality is mandatory and enabled by default.
- It is recommended to create the company using Standard Polish Template (STD-PL).

3.4.3 DEFINE COMPANY BASIC DATA

3.4.3.1 Define Tax Office

Open the **Application Base Setup/Enterprise/Tax Office** page. On the **General** tab, define Tax Office for Poland – one from the list published on tax authority’s website. For example “0202”, “1010”, “3030” ...

Application Base Setup > Enterprise > Tax > Tax Office

Search **Advanced**

Tax Office Name: PL% Creation Date More Favorites Clear Settings

Sort by

Tax Office 0202 - PL Tax Office Dan 1 of 1

0202
Name: PL Tax Office Dan

Address
Communication Method
Tax Report

Tax Office: 0202
Name: PL Tax Office Dan

Default Language: English
Country: POLAND
Creation Date: 8/4/2020

On the Tax Report sub menu, enter the Company and Tax ID Number. Connect the VAT-7 report used as a base for SAF-T V7M report in the child table.

Application Base Setup > Enterprise > Tax > Tax Office > Tax Report

Sort by

Company: AMKA-PLN
Tax ID Number: 202001
Our Identity: vatpl01
Electronic Tax ID: vatpl01
State Code: WN
State Name: warminsko-mazurskie

Tax Report Info

- Tax Report
- VAT7M - VAT7M
- VAT-2020 - Vat 2020

3.4.3.2 Define Person E-Mail and Phone Communication Methods

Open the **Application Base Setup/Enterprise/Person/Person** page General sub menu define Person ID of person responsible for JPK_V7M reporting. On the Communication Method sub menu enter E-Mail Communication Method and Phone Communication Method. Select the Default per Method check box for both methods.

Comm ID	Name	Description	Communication Method	Value	Default per Method	Address ID	Validity Period
1	amaya		E-Mail	amaya@amkapln.com	Yes		No
2	amaya		Phone	4445553535354	Yes		No

3.4.3.3 Define Customer Groups

Using IFS Cloud standard functionality, define separate customer groups used in order to follow connections between seller and buyer ((V7M) TP field).

Customer Group	Description	Use Collective Voucher	Default No of Invoice Copies
0	Domestic Associated Unit	No	1
1	Domestic Not Associated Unit	No	1
2	Foreign Associated Unit	No	1
3	Foreign Not Associated Unit	No	1
4	Internal Unit	No	1

Note: In brackets you can find the name of the field where the value should be connected in the **Audit File Basic Data/SAF-T Poland Setup** tab.

3.4.3.4 Define Voucher Types

Using IFS Cloud standard functionality, define separate voucher types used in order to follow:

- internal documents (**WEW** field)
- internal summary documents containing sales from cash registers (**Sales/RO** field).

Function Group	Optional Auto Balance	Store Original	Voucher Row Group Validation	Reference Mandatory	Automatic Allotment Required	Single Function Group Required
M - Manual vouchers	No	No	No	No	No	No

Note: In brackets you can find the name of the field where the value should be connected in the **Audit File Basic Data/SAF-T Poland Setup** tab.

3.4.3.5 Define Delivery Types

Using IFS Cloud standard functionality, define separate delivery types used in order to follow:

- invoices issued on the base of fiscal receipt (**Sales/FP** field)
- invoices from small suppliers who selected cash method for VAT (**Purchase/MK** field).

Delivery Type	Description	Include in Invoice Enclosure	Invoice Enclosure Series ID
MK	Invoices from small suppliers who selected cash method for VAT	No	

Using IFS Cloud standard functionality, define separate delivery types used in order to follow:

- deliveries of alcoholic beverages (GTU_01 field)
- deliveries of petroleum products (GTU_02 field)
- deliveries of heating oil and other oil products (GTU_03 field)
- deliveries of tobacco products (GTU_04 field)
- deliveries of waste (GTU_05 field)
- deliveries of electronic devices (GTU_06 field)
- deliveries of vehicles and car parts (GTU_07 field)
- deliveries of precious metals and base metals (GTU_08 field)
- deliveries of medicines and medical devices (GTU_09 field)
- deliveries of buildings and lands (GTU_10 field)
- services in the scope of transferring the right to emit greenhouse gas (GTU_11 field)
- selected intangible services (GTU_12 field)
- transport and storage services (GTU_13 field).

3.4.4 DEFINE AUDIT FILE BASIC DATA

3.4.4.1 Enter Audit Format for Poland

Go to **Accounting Rules/Audit Interface/Basic Data/Audit Formats** page. Search for the Poland SAF-T audit format or add a new record for Poland SAF-T as follows:

- Country as “Poland”
- Report Type as “SAF-T”
- If the audit file is run on batch mode, the XML can be downloaded from the **Batch Processed Audit Files** page.

3.4.4.2 Enter Audit File Basic Data

Click Audit File Basic Data command to open the **Audit File Basic Data** page.

(1)	Country	Report Type	Decimal Symbol	Thousands Separator	Negative Format	Leading Zeroes	Time Format	Date Format	File Type	File Template ID	Default
<input checked="" type="checkbox"/>	POLAND	SAF-T	. (point)	.(comma)	-9	0.9	13:59	YY-MM-DD			Yes

Use IFS Cloud standard functionality to add a header record in the **Audit File Basic Data** page. If required, do modifications in the **Standard Audit Code Mappings**.

The new tab **SAF-T Poland Setup** includes ten sections. For SAF-T V7M report, following sections are applicable.

General Info section

- Tax Office ID – Select from list of values; only values from legal list will be accepted by tax office.

Misc Parameters section

- Person ID – Enter person ID; on list of values there are only persons connected to given company; The e-mail address and the phone number defined for specified person will be reported in SAF-T V7M XML file.
- Invoice Series for SAD – Enter invoice series from list of values – to be used for customs documents registration. When SAF-T V7M XML file is created and invoices with series entered in the **Invoice Series for SAD** field exist, it is validated if there are any references in the **Ref Invoice No** and **Ref Supplier ID** fields in the Supplier Invoice **Details/General**

tab. If supplier is different from the one on the invoice, XML file will contain mixed data from two invoices. In particular supplier data will be fetched from the referred invoice. If supplier is the same or Ref Invoice No is empty – only data from basic invoice will be reported in XML file.

Voucher/Delivery Types for Document Types (JPK_V7M) section

- WEW – Enter voucher type used in order to follow internal documents.
- Sales/RO - Enter voucher type used in order to follow internal summary documents containing sales from cash registers.
- Sales/FP - Enter delivery type used in order to follow invoices issued on the base of fiscal receipt.
- Purchase/MK - Enter delivery type used in order to follow invoices from small suppliers who selected cash method for VAT.

Delivery Types for Goods and Services (JPK_V7M) section

- GTU_01 - Enter delivery type used in order to follow deliveries of alcoholic beverages.
- GTU_02 - Enter delivery type used in order to follow deliveries of petroleum products.
- GTU_03 - Enter delivery type used in order to follow deliveries of heating oil and other oil products.
- GTU_04 - Enter delivery type used in order to follow deliveries of tobacco products.
- GTU_05 - Enter delivery type used in order to follow deliveries of waste.
- GTU_06 - Enter delivery type used in order to follow deliveries of electronic devices.
- GTU_07 - Enter delivery type used in order to follow deliveries of vehicles and car parts.
- GTU_08 - Enter delivery type used in order to follow deliveries of precious metals and base metals.
- GTU_09 - Enter delivery type used in order to follow deliveries of medicines and medical devices.
- GTU_10 - Enter delivery type used in order to follow deliveries of buildings and lands.
- GTU_11 - Enter delivery type used in order to follow services in the scope of transferring the right to emit greenhouse gas.
- GTU_12 - Enter delivery type used in order to follow selected intangible services.
- GTU_13 - Enter delivery type used in order to follow transport and storage services.

Delivery Types/Customer Groups for Specific Procedures section

- (V7M) WSTO_EE - Enter delivery type used in order to follow distance EU delivery of goods and provision of telecommunication services, broadcasting and electronic services.
- (V7M) IED - Enter delivery type used in order to follow delivery of goods to EU consumers where taxpayer enables electronic platform to non EU taxpayer and does not use OSS or IOSS procedures.
- (V7M) TP - Enter customer group used in order to follow connections between seller and buyer.
- (V7M) MR_T/(FA) P_106E_2 - Enter delivery type used in order to follow invoices for tourism services.
- (V7M) MR_UZ/(FA) P_106E_3 - Enter delivery type used in order to follow invoices for secondhand goods and work of art.
- (V7M) I_42 - Enter delivery type used in order to follow EU delivery after import based on import procedure 42.
- (V7M) I_63 - Enter delivery type used in order to follow EU delivery after import based on import procedure 63.
- (V7M) B_SPV - Enter delivery type used in order to follow transfer of a single-purpose voucher made by a taxpayer acting in his own name.

- (V7M) B_SPV_DOSTAWA - Enter delivery type used in order to follow supply of goods and provision of services to which the single-purpose voucher relates to a taxable person who issued the voucher.
- (V7M) B_MPV_PROWIZJA - Enter delivery type used in order to follow provision of brokering services and other services related to the transfer of multi-purpose voucher.
- (V7M) K_14/(VAT) K_14 - Enter delivery type by which a transaction value is retrieved and reported in the <K_14> tag in the SAF-T V7M XML file.
- (V7M) K_35/(VAT) K_38 - Enter delivery type by which a transaction value is retrieved and reported in the <K_35> tag in the SAF-T V7M XML file.
- (V7M) K_36/(VAT) K_39 - Enter delivery type by which a transaction value is retrieved and reported in the <K_36> tag in the SAF-T V7M XML file.

3.4.5 CHANGE TO MANUAL FIELDS IN JPK_V7M REPORT

Using IFS Cloud standard functionality, update values in the **Automatic Tax Proposal/Template Field Presentation/Modify Manual Fields** as presented below.

The screenshot shows the 'Tax Proposal - Template Field Presentation' interface. The 'Field Presentation 1' section contains a table with the following data:

Template Field #1	Field #1 Visible in Report Field	Field #1 Value
VAT_ZWROT_BEZP - P_54 Wysokość nadwyżki podatku naliczonego nad należnym do zwrotu na rachunek wskazany przez poc	P_54	0.00
WYBOR_ZWROT_VAT_15 - P_540 Zwrot na rachunek rozliczeniowy podatnika w terminie 15 dni: 1 - tak	P_540	-1.00
WYBOR_ZWROT_NA_RACH_VAT - P_55 Zwrot na rachunek VAT podatnika w terminie 25 dni: 1 - tak	P_55	-1.00
WYBOR_ZWROT_VAT_25 - P_56 Zwrot na rachunek rozliczeniowy podatnika w terminie 25 dni (art. 87 ust. 6 ustawy): 1 - tak	P_56	-1.00
WYBOR_ZWROT_VAT_40 - P_560 Zwrot na rachunek rozliczeniowy podatnika w terminie 40 dni: 1 - tak	P_560	-1.00
WYBOR_ZWROT_VAT_60 - P_57 Zwrot na rachunek rozliczeniowy podatnika w terminie 60 dni: 1 - tak	P_57	-1.00

For an example, P_63 and P_64 manual fields should be edited as “1” if any invoices for tourism services or secondhand goods and work of arts exist in the reporting period respectively.

3.4.6 CREATE SAF-T V7M XML FILE

Open the **Accounting Rules/Audit Interface/Audit Interface Assistant** to create the SAF-T V7M XML file.

On Task Options in **Audit Interface Assistant** page, select one of the below options.

Start Now: This option enables user to instantly create an audit file.

Schedule: This option enables user to create an audit output file as a background job. (Refer IFS Cloud Documentation for more details).

Specify the following and Click Next:

- Company: The company you want to generate SAF-T V7M file.
- Country: "Poland"
- Report Type: "SAF-T" - the value will be prompted per default Audit Formats settings for Poland.
- Audit Type: "JPK_V7M (2)"
- Period From and Period Until: The year and month range to be covered in SAF-T V7M report.
- File Type: Select JPK_V7M2 structure from list of values.
- File Template: Will show up automatically after File Type is specified.

On SAF-T PL Additional Parameters in **Audit Interface Assistant** page specify the Tax Proposal ID, the VAT-7 proposal ID that was created for the period. Use the list of values to search for the correct proposal. Click Finish button to generate the SAF-T V7M XML file. The file will be named as <Audit Type>_<Time stamp(yyyymmddhhmmss)>.XML

e.g. JPK_V7M2_20220712162006.XML

3.4.6.1 Reporting of Bad Debt Corrections for Tax Disbursed

Use IFS Cloud standard functionality of manual voucher to register tax amount correction in connection to bad debts for domestic sales.

- If tax disbursed is to be decreased, use tax code and delivery type connected to subgroup SPRZ-KRAJ-22-A89A-U1, SPRZ-KRAJ-7-A89A-U1 or SPRZ-KRAJ-3-A89A-U1 in the **Tax Group/Subgroup Details** page (tax code 5, 8 or 23 and delivery type ZLE-DLUGI-VAT-MINUS, according to default setup).
- If tax disbursed is to be increased, use tax code and delivery type connected to subgroup SPRZ-KRAJ-22-A89A-U4, SPRZ-KRAJ-7-A89A-U4 or SPRZ-KRAJ-3-A89A-U4 in the **Tax Group/Subgroup Details** page (tax code 5, 8 or 23 and delivery type ZLE-DLUGI-VAT-PLUS, according to default setup).
- In the **New Voucher** page, register manual voucher to correct tax amount. Enter series of original invoice in the **Reference Series** field and use list of values to select number of original invoices in the **Reference Number** field.

In case tax disbursed is decreased, <TerminPlatnosci> tag (due date) is automatically set to date from the **Current Due Date** field of the first invoice installment. If other date should be reported in the <TerminPlatnosci> tag, use the **Text** field in the *New Voucher/Voucher Postings* section to enter required date.

In case tax disbursed is increased, <DataZaplaty> tag (payment date) is automatically set to latest payment date (within the reported period) for the invoice. If other date should be reported in the <DataZaplaty> tag, use the **Text** field in the *New Voucher/Voucher Postings* section to enter required date.

The text can have the following format '<any text>: YYYY-MM-DD'. For example

- 'Korekta z tytułu faktury z terminem płatności: 2022-01-01'
- 'Korekta z tytułu faktury zapłaconej: 2022-01-01'

3.4.7 CREATE SAF-T V7M XML CORRECTION FILE

Open the *Accounting Rules/Audit Interface/Audit Interface Assistant* to create the SAF-T V7M XML correction file.

On page 1/3 and 2/3, select the same information as when generating the ordinary file. On page 3/3 specify the proposal identity of VAT-7 correction report and continue in the same way as when generating the ordinary file. The new XML file will be created. The XML tag <CelZlozenia> will indicate a correction file with value 2 as follows,
<CelZlozenia poz="P_7">2</CelZlozenia>

If only information in manual fields of VAT-7 was changed comparing to the previous report

- <Deklaracja> block is created in the XML file.
- <Ewidencja> block is not created in the XML file.

If only transaction related information was changed/added comparing to the previous report with no impact on total amounts in VAT-7

- <Deklaracja> block is not created in the XML file.
- <Ewidencja> block is created in the XML file and contains final information from all documents.
- For each document changed comparing to the original report, <Ewidencja> block additionally contains.
 - Original information about the document
 - Reversal information about the document (with reversed signs in the amount fields)

If both transaction related information is changed and VAT-7 information is changed

- <Deklaracja> block is created in the XML file.

- <Ewidencja> block is created in the XML file and contains final information from all documents.
- For each document changed comparing to the original report, <Ewidencja> block additionally contains.
 - Original information about the document
 - Reversal information about the document (with reversed signs in the amount fields)

3.4.8 DELIMITATION

- JPK_V7K (quarterly variant of JPK_V7M for small companies) is not supported.
- Reporting of fiscal registers and invoices based on fiscal registers is not supported.
- In case of correction instant invoices for which debit lines are not required, standard functionality allows to set quantity to 0 (as for CO invoices) or remove the debit lines completely. Scenario in which debit lines are removed is not supported by JPK_V7M.

3.5 SAF-T For Poland – VAT Report from October 2020 until December 2021 (JPK_V7M (1))

3.5.1 SOLUTION – SAF-T PL V7M

The solution is based on IFS Cloud standard functionality of tax reporting including tax transactions and the corresponding tax proposal and audit interface functionality.

In order to support the requirement for the SAF-T PL V7M report, the following has been done:

11. New report type SAF-T added to the **Audit Formats** page.
12. In **Audit File Basic Data** page, a new tab, **SAF-T Poland Setup** with ten sections has been added to handle SAF-T Poland specific data.
13. In **Audit Interface Assistant** page 2/3, **new Audit Type** field has been added to select relevant SAF-T report. In page 3/3 **additional Proposal ID** field specific for the SAF-T V7M has been added.
14. New external file type and new external file template were added to support SAF-T V7M.
15. List of values is added for the Reference Number column for vouchers of function group M to have additional invoice information in tax transactions.

Process Overview:

3.5.2 PREREQUISITES

- The company must be set-up to use Polish localization, see the Company Set up chapter. The “Standard Audit File-Tax for Poland (JPK)” localization functionality is mandatory and enabled by default.
- It is recommended to create the company using Standard Polish Template (STD-PL).

3.5.3 DEFINE COMPANY BASIC DATA

3.5.3.1 Define Tax Office

Open the *Application Base Setup/Enterprise/Tax Office* page. On the **General** tab, define Tax Office for Poland – one from the list published on tax authority’s website. For example “0202”, “1010”, “3030” ...

Application Base Setup > Enterprise > Tax > Tax Office

Search *Advanced*

Tax Office Name: PL% Creation Date More Favorites Clear Settings

sort by

Tax Office 0202 - PL Tax Office Dan 1 of 1

0202
Name: PL Tax Office Dan

Address
Communication Method
Tax Report

Tax Office: 0202
Name: PL Tax Office Dan
Default Language: English
Country: POLAND
Creation Date: 8/4/2020

On the Tax Report sub menu, enter the Company and Tax ID Number. Connect the VAT-7 report used as a base for SAF-T V7M report in the child table.

Application Base Setup > Enterprise > Tax > Tax Office > Tax Report

sort by

Tax Report VAT PL - VAT PL 1 of 1

VAT PL
Name: VAT PL

Address
Communication Method
Tax Report

Tax Office: VAT PL
Name: VAT PL
Company: AMKA-PLN - AMKA-PLN
Tax ID Number: 202001
Our Identity: vatpl01
Electronic Tax ID: vatpl01
State Code: WN
State Name: warminko-mazurskie

Tax Report Info

Tax Report Info

- Tax Report
- VAT7M - VAT7M
- VAT-2020 - Vat 2020

3.5.3.2 Define Person E-Mail and Phone Communication Methods

Open the **Application Base Setup/Enterprise/Person/Person** page General sub menu define Person ID of person responsible for JPK_V7M reporting. On the Communication Method sub menu enter E-Mail Communication Method and Phone Communication Method. Select the Default per Method check box for both methods.

Person	Full Name	User ID	Validity
AMKALK	Amaya Karunaratne	AMKALK	Active

Comm ID	Name	Description	Communication Method	Value	Default per Method	Address ID	Default per Method and Address	Validity Period
1	amaya		E-Mail	amaya@amkapln.com	Yes		No	
2	amaya		Phone	444555353534	Yes		No	

3.5.3.3 Define Customer Groups

Using IFS Cloud standard functionality, define separate customer groups used in order to follow connections between seller and buyer ((V7M) TP field).

Customer Group	Description	Use Collective Voucher	Default No of Invoice Copies
0	Domestic Associated Unit	No	1
1	Domestic Not Associated Unit	No	1
2	Foreign Associated Unit	No	1
3	Foreign Not Associated Unit	No	1
4	Internal Unit	No	1

Note: In brackets you can find the name of the field where the value should be connected in the **Audit File Basic Data/SAF-T Poland Setup** tab.

3.5.3.4 Define Tax Codes

Using IFS Cloud standard functionality, define separate tax code used in order to follow invoices which are a subject to the mandatory split payment mechanism ((V7M) MPP/(FA) P_18A field).

Accounting Rules > Tax > Tax Codes company Dan Poland

Search *Advanced*

Tax Code: MPP Description Tax (%) More Favorites Clear Q Settings

Tax Codes

	Tax Code	Description	Tax Type	Tax (%)	Deductible (%)	Valid From	Valid To	Tax Method Tax Received	Tax Method Tax Disbursed	Tax Amount at Invoice Printout	Tax Amount Limit in Accounting Currency
<input type="checkbox"/>	MPP	VAT 23%, Mandatory Spli	Tax	23	100	1/1/2020	12/31/2049	Invoice Entry	Invoice Entry	Separate from Price	

Note: In brackets you can find the name of the field where the value should be connected in the **Audit File Basic Data/SAF-T Poland Setup** tab.

3.5.3.5 Define Voucher Types

Using IFS Cloud standard functionality, define separate voucher types used in order to follow

- internal documents (WEW field)
- internal summary documents containing sales from cash registers (Sales/RO field).

Accounting Rules > User Related Data > Voucher Type company Dan Poland

sort by

Voucher Type

WEW - Internal Documents PL 1 of 1

Note: In brackets you can find the name of the field where the value should be connected in the **Audit File Basic Data/SAF-T Poland Setup** tab.

3.5.3.6 Define Delivery Types

Using IFS Cloud standard functionality, define separate delivery types used in order to follow:

- invoices issued on the base of fiscal receipt (Sales/FP field)
- invoices from small suppliers who selected cash method for VAT (Purchase/MK field).

Financials > Customer Invoice > Basic Data > Delivery Types Company Dan Poland

Search Advanced

Delivery Type : MK Description Include in Invoice Enclosure More Favorites Clear Q Settings

Delivery Types

✓	⋮	Delivery Type	Description	Include in Invoice Enclosure	Invoice Enclosure Series ID
<input type="checkbox"/>	⋮	MK	Invoices from small suppliers who selected cash method for VAT	No	

Using IFS Cloud standard functionality, define separate delivery types used in order to follow:

- deliveries of alcoholic beverages (GTU_01 field)
- deliveries of petroleum products (GTU_02 field)
- deliveries of heating oil and other oil products (GTU_03 field)
- deliveries of tobacco products (GTU_04 field)
- deliveries of waste (GTU_05 field)
- deliveries of electronic devices (GTU_06 field)
- deliveries of vehicles and car parts (GTU_07 field)
- deliveries of precious metals and base metals (GTU_08 field)
- deliveries of medicines and medical devices (GTU_09 field)
- deliveries of buildings and lands (GTU_10 field)
- services in the scope of transferring the right to emit greenhouse gas (GTU_11 field)
- selected intangible services (GTU_12 field)
- transport and storage services (GTU_13 field).

Financials > Customer Invoice > Basic Data > Delivery Types Company Dan Poland

<input type="checkbox"/>	⋮	GTU_04	Deliveries of tobacco products	No	
<input type="checkbox"/>	⋮	GTU_05	Deliveries of waste	No	

Using IFS Cloud standard functionality, define separate delivery types used in order to follow:

- mail orders ((V7M) SW field)
- telecommunication services, broadcasting and electronic services ((V7M) EE field)
- invoices for tourism services ((V7M) MR_T/(FA) P_106E_2 field)
- invoices for secondhand goods and work of art ((V7M) MR_UZ/(FA) P_106E_3 field)
- EU delivery after import based on import procedure 42 ((V7M) I_42 field)
- EU delivery after import based on import procedure 63 ((V7M) I_63 field)
- transfer of a single-purpose voucher made by a taxpayer acting in his own name ((V7M) B_SPV field)
- supply of goods and provision of services to which the single-purpose voucher relates to a taxable person who issued the voucher ((V7M) B_SPV_DOSTAWA field)

- provision of brokering services and other services related to the transfer of multi-purpose voucher ((V7M) B_MPV_PROWIZJA field).

Delivery Type	Description	Include in Invoice Enclosure	Invoice Enclosure Series ID
<input type="checkbox"/> EE	Telecommunications services, broadcasting and electronic services	No	
<input type="checkbox"/> SW	Mail Orders	No	

Using IFS Cloud standard functionality, define separate delivery types by which:

- transaction value is retrieved and reported in the <K_14> tag ((V7M) K_14/(VAT) K_14 field)
- transaction value is retrieved and reported in the <K_35> tag ((V7M) K_35/(VAT) K_38 field)
- transaction value is retrieved and reported in the <K_36> tag ((V7M) K_36/(VAT) K_39 field).

Delivery Type	Description	Include in Invoice Enclosure	Invoice Enclosure Series ID
<input type="checkbox"/> K_36	K_36 (Tax Template Field VAT_WNT_PAL_SIL)	Yes	FW
<input type="checkbox"/> K_14	K_14 (Tax Template field ART_129_UST)	No	
<input type="checkbox"/> K_35	K_35 (Tax Template field VAT_NALEZ_WNT_TRANSP)	Yes	FW

Note: In brackets you can find the name of the field where the value should be connected in the **Audit File Basic Data/SAF-T Poland Setup** tab.

3.5.3.7 Define Tax Sub Group Details

Using IFS Cloud standard functionality, connect new tax codes to existing tax sub groups in the **Tax Group/Sub Groups Details** page for sub groups used for Tax Sales (Details) and Tax Purchase (Details) reports (Tax groups “KRS” and “KRZ” according to STD-PL company template). If required, connect new delivery types in the same tab.

Sub Group	Currency Code	Sub Group	Tax Code	Delivery Type	Delivery Type Exceptions
<input type="checkbox"/>	PLN	SPRZ-KRAJ-22 - Domestic Sales, VAT 22% and 23%	23 - VAT 23%, domesti...	%	ZLE-DLUGI-VAT-MINUS, ZLE-DLUGI-VAT-PLUS
<input type="checkbox"/>	PLN	SPRZ-KRAJ-22-A89A-U1 - Domestic Sales, VAT 22% and 23	23 - VAT 23%, domesti...	ZLE-DLUGI-VAT-MINUS...	
<input type="checkbox"/>	PLN	SPRZ-KRAJ-22-A89A-U4 - Domestic Sales, VAT 22% and 23	23 - VAT 23%, domesti...	ZLE-DLUGI-VAT-PLUS - ...	

3.5.4 DEFINE AUDIT FILE BASIC DATA

3.5.4.1 Enter Audit Format for Poland

Go to **Accounting Rules/Audit Interface/Basic Data/Audit Formats** page. Search for the Poland SAF-T audit format or add a new record for Poland SAF-T as follows:

- Country as “Poland”
- Report Type as “SAF-T”
- If the audit file is run on batch mode, the XML can be downloaded from the **Batch Processed Audit Files** page.

3.5.4.2 Enter Audit File Basic Data

Click Audit File Basic Data command to open the **Audit File Basic Data** page.

(1) ✓	Country	Report Type	Decimal Symbol	Thousands Separator	Negative Format	Leading Zeros	Time Format	Date Format	File Type	File Template ID	Default
<input checked="" type="checkbox"/>	POLAND	SAF-T	. (point)	, (comma)	-9	0.9	13:59	YY-MM-DD			Yes

Use IFS Cloud standard functionality to add a header record in the **Audit File Basic Data** page. If required, do modifications in the **Standard Audit Code Mappings**.

The new tab **SAF-T Poland Setup** includes ten sections. For SAF-T V7M report, following sections are applicable.

Accounting Rules > Audit Interface > Basic Data > Audit Formats > Audit File Basic Data Company Polish company

Audit File Basic Data

HEADER STANDARD AUDIT CODE MAPPINGS **SAF-T POLAND SETUP**

General Info

Tax Office ID: 0202 Address ID: A1

Misc Parameters

Person ID: MABEPL Invoice Series for SAD: SD

Voucher/Delivery Types for Document Types (JPK_V7M)

Delivery Types for Specific Procedures (JPK_FA)

Delivery Type for Delivery Goods and Services

Delivery Types/Customer Groups for Specific Procedures

Tax Codes for Specific Procedures

Invoice Type Mappings

SAF-T PL Inventory Transaction Report Types

Inventory Transaction Report Type Mappings

General Info section

- Tax Office ID – Select from list of values; only values from legal list will be accepted by tax office.

Misc Parameters section

- Person ID – Enter person ID; on list of values there are only persons connected to given company; The e-mail address and the phone number defined for specified person will be reported in SAF-T V7M XML file.
- Invoice Series for SAD – Enter invoice series from list of values – to be used for customs documents registration. When SAF-T V7M XML file is created and invoices with series entered in the **Invoice Series for SAD** field exist, it is validated if there are any references in the **Ref Invoice No** and **Ref Supplier ID** fields in the Supplier Invoice **Details/General** tab. If supplier is different from the one on the invoice, XML file will contain mixed data from two invoices. In particular supplier data will be fetched from the referred invoice. If supplier is the same or Ref Invoice No is empty – only data from basic invoice will be reported in XML file.

Voucher/Delivery Types for Document Types (JPK_V7M) section

- WEW – Enter voucher type used in order to follow internal documents.
- Sales/RO - Enter voucher type used in order to follow internal summary documents containing sales from cash registers.
- Sales/FP - Enter delivery type used in order to follow invoices issued on the base of fiscal receipt.
- Purchase/MK - Enter delivery type used in order to follow invoices from small suppliers who selected cash method for VAT.

Delivery Types for Goods and Services (JPK_V7M) section

- GTU_01 - Enter delivery type used in order to follow deliveries of alcoholic beverages.
- GTU_02 - Enter delivery type used in order to follow deliveries of petroleum products.

- GTU_03 - Enter delivery type used in order to follow deliveries of heating oil and other oil products.
- GTU_04 - Enter delivery type used in order to follow deliveries of tobacco products.
- GTU_05 - Enter delivery type used in order to follow deliveries of waste.
- GTU_06 - Enter delivery type used in order to follow deliveries of electronic devices.
- GTU_07 - Enter delivery type used in order to follow deliveries of vehicles and car parts.
- GTU_08 - Enter delivery type used in order to follow deliveries of precious metals and base metals.
- GTU_09 - Enter delivery type used in order to follow deliveries of medicines and medical devices.
- GTU_10 - Enter delivery type used in order to follow deliveries of buildings and lands.
- GTU_11 - Enter delivery type used in order to follow services in the scope of transferring the right to emit greenhouse gas.
- GTU_12 - Enter delivery type used in order to follow selected intangible services.
- GTU_13 - Enter delivery type used in order to follow transport and storage services.

Delivery Types/Customer Groups for Specific Procedures section

- (V7M) TP - Enter customer group used in order to follow connections between seller and buyer.
- (V7M) MR_T/(FA) P_106E_2 - Enter delivery type used in order to follow invoices for tourism services.
- (V7M) MR_UZ/(FA) P_106E_3 - Enter delivery type used in order to follow invoices for secondhand goods and work of art.
- (V7M) I_42 - Enter delivery type used in order to follow EU delivery after import based on import procedure 42.
- (V7M) I_63 - Enter delivery type used in order to follow EU delivery after import based on import procedure 63.
- (V7M) B_SPV - Enter delivery type used in order to follow transfer of a single-purpose voucher made by a taxpayer acting in his own name.
- (V7M) B_SPV_DOSTAWA - Enter delivery type used in order to follow supply of goods and provision of services to which the single-purpose voucher relates to a taxable person who issued the voucher.
- (V7M) B_MPV_PROWIZJA - Enter delivery type used in order to follow provision of brokering services and other services related to the transfer of multi-purpose voucher.
- (V7M) K_14/(VAT) K_14 - Enter delivery type by which a transaction value is retrieved and reported in the <K_14> tag in the SAF-T V7M XML file.
- (V7M) K_35/(VAT) K_38 - Enter delivery type by which a transaction value is retrieved and reported in the <K_35> tag in the SAF-T V7M XML file.
- (V7M) K_36/(VAT) K_39 - Enter delivery type by which a transaction value is retrieved and reported in the <K_36> tag in the SAF-T V7M XML file.
- (V7M) SW - Enter delivery type used in order to follow mail orders.
- (V7M) EE - Enter delivery type used in order to follow telecommunication services, broadcasting and electronic services.

Tax Codes for Specific Procedures section

- (V7M) MPP/(FA) P_18A - Enter tax code used in order to follow invoices which are a subject to the mandatory split payment mechanism.

3.5.5 CHANGE TO MANUAL FIELDS IN JPK_V7M REPORT

Using IFS Cloud standard functionality, update values in the *Automatic Tax Proposal/Template Field Presentation/Modify Manual Fields* as presented below.

Template Field #1	Field #1 Visible in Report Field	Field #1 Value
VAT_ZWROT_BEZP - P_54 Wysokość nadwyżki podatku naliczonego	P_54	0.00
WYBOR_ZWROT_NA_RACH_VAT - P_55 Zwrot na rachunek VAT, o l	P_55	-1.00
WYBOR_ZWROT_VAT_25 - P_56 Zwrot w terminie, o którym mowa	P_56	-1.00
WYBOR_ZWROT_VAT_60 - P_57 Zwrot w terminie, o którym mowa	P_57	-1.00
WYBOR_ZWROT_VAT_180 - P_58 Zwrot w terminie, o którym mow	P_58	-1.00
WYBOR_ZWROT_PRZYSZ_ZOB_VAT - P_59 Zaliczenie zwrotu podat	P_59	-1.00
VAT_PRZENIES - P_62 Wysokość nadwyżki podatku naliczonego n	P_62	0.00
WYBOR_ART_119_USTAWY - P_63 Podatnik wykonywał w okresie 1	P_63	-1.00
WYBOR_ART_120_USTAWY_UST_4_5 - P_64 Podatnik wykonywał w	P_64	-1.00
WYBOR_ART_122_USTAWY - P_65 Podatnik wykonywał w okresie 1	P_65	-1.00

For an example, P_63 and P_64 manual fields should be edited as “1” if any invoices for tourism services or secondhand goods and work of arts exist in the reporting period respectively.

3.5.6 CREATE SAF-T V7M XML FILE

Open the *Accounting Rules/Audit Interface/Audit Interface Assistant* to create the SAF-T V7M XML file.

On Task Options in **Audit Interface Assistant** page, select one of the below options:

Start Now: This option enables user to instantly create an audit file.

Schedule: This option enables user to create an audit output file as a background job. (Refer IFS Cloud Documentation for more details).

Specify the following and Click Next:

- Company: The company you want to generate SAF-T V7M file.
- Country: “Poland”
- Report Type: “SAF-T” - the value will be prompted per default Audit Formats settings for Poland.
- Audit Type: “JPK_V7M (1)”
- Period From and Period Until: The year and month range to be covered in SAF-T V7M report.
- File Type: Select JPK_V7M structure from list of values.
- File Template: Will show up automatically after File Type is specified.

Accounting Rules > Audit Interface > Audit Interface Assistant Company Polish company

3.5.7 CREATE SAF-T V7M XML CORRECTION FILE

Open the *Accounting Rules/Audit Interface/Audit Interface Assistant* to create the SAF-T V7M XML correction file.

On page 1/3 and 2/3, select the same information as when generating the ordinary file. On page 3/3 specify the proposal identity of VAT-7 correction report and continue in the same way as when generating the ordinary file. The new XML file will be created. The XML tag <CelZlozenia> will indicate a correction file with value 2 as follows,
 <CelZlozenia poz="P_7">2</CelZlozenia>

If only information in manual fields of VAT-7 was changed comparing to the previous report

- <Deklaracja> block is created in the XML file.

- <Ewidencja> block is not created in the XML file.

If only transaction related information was changed/added comparing to the previous report with no impact on total amounts in VAT-7

- <Deklaracja> block is not created in the XML file.
- <Ewidencja> block is created in the XML file and contains final information from all documents.
- For each document changed comparing to the original report, <Ewidencja> block additionally contains:
 - Original information about the document
 - Reversal information about the document (with reversed signs in the amount fields)

If both transaction related information is changed and VAT-7 information is changed

- <Deklaracja> block is created in the XML file.
- <Ewidencja> block is created in the XML file and contains final information from all documents.
- For each document changed comparing to the original report, <Ewidencja> block additionally contains:
 - Original information about the document
 - Reversal information about the document (with reversed signs in the amount fields)

3.5.8 DELIMITATIONS

- JPK_V7K (quarterly variant of JPK_V7M for small companies) is not supported.
- Reporting of fiscal registers and invoices based on fiscal registers is not supported.
- In case of correction instant invoices for which debit lines are not required, standard functionality allows to set quantity to 0 (as for CO invoices) or remove the debit lines completely. Scenario in which debit lines are removed is not supported by JPK_V7M.

3.6 SAF-T For Poland – VAT Report until September 2020 (JPK_VAT)

3.6.1 SOLUTION – SAF-T PL VAT

The solution is based on IFS Cloud standard functionality of tax reporting including tax transactions and the corresponding tax proposal and audit interface functionality.

Since 2018 a new schema for this report has been introduced, thus in this document the latest version, named JPK_VAT3, will be described.

In order to support the requirement for the SAF-T PL VAT report, the following has been done:

1. New report type SAF-T added to the **Audit Formats** page.
2. In **Audit File Basic Data** page, a new tab, **SAF-T Poland Setup** with ten sections has been added to handle SAF-T Poland specific data.
3. On Task Options in **Audit Interface Assistant** page, new **Audit Type** field has been added to select relevant SAF-T report. And SAF-T PL Additional Parameters in **Audit Interface Assistant** page, **Tax Proposal ID** field add to specify the tax proposal ID.
4. In **Audit File Log** page, a new column Correction Number column has been added.
5. New external file templates were added to support specific SAF-T reports.
6. List of values is added for the Reference Number column in **New Voucher** page when using the function group M, this is to add additional invoice information for tax transactions.

Process Overview:

Note: VAT-7 report has no direct impact on the SAF-T VAT report. However, the SAF-T VAT report is used to verify the VAT-7 report content. An additional step to the creation of SAF-T Vat report is added to compare the results of the two reports. If the results do not match, user need to adjust the VAT-7 report content manually.

3.6.2 PREREQUISITES

- The company must be set-up to use Polish localization, see the Company Set up chapter. The “Standard Audit File-Tax for Poland (JPK)” localization functionality is mandatory and enabled by default.
- VAT-7 report should be created for the reporting period (standard functionality) before the SAF-T VAT XML is created.
- It is recommended to create the company using Standard Polish Template (STD-PL).

3.6.3 DEFINE COMPANY BASIC DATA

3.6.3.1 Define Tax Office

Open the **Application Base Setup/Enterprise/Tax Office** page. On the General sub menu, define Tax Office for Poland – one from the list published on tax authority’s website. For example “0202”, “1010”, “3030” ...

On the **Tax Report** sub menu, enter the Company, Tax ID Number and Our Identity. Our identity is company ID for the specific tax office. Connect the VAT-7 report that should be compared with the SAF-T VAT report in the child table.

Application Base Setup > Enterprise > Tax > Tax Office > Tax Report

Tax Report

VAT PL - VAT PL 1 of 1

Sort by

VAT PL
Name: VAT PL

Address

Communication Method

Tax Report

Tax Office: VAT PL, Name: VAT PL

Company: AMKA-PLN - AMKA-PLN

Company: AMKA-PLN, Tax ID Number: PL 2337684748, Our Identity: 123456789, Electronic Tax ID: vatpl01, State Code: WN

State Name: warminsko-mazurskie

Tax Report Info

- Tax Report
- VAT-2020 - Vat 2020
- VAT7M - VAT7M

3.6.3.2 Define Person E-Mail Communication Method

On **Enterprise/Person/Person** page General sub menu define Person ID of person responsible for JPK_VAT3 reporting. On **Communication Method** tab enter E-Mail Communication Method and select Default per Method. Enter valid dates.

Application Base Setup > Enterprise > Person > Person > Communication Method

Communication Method

DAALLK - Danushka Alwis 1 of 1

DAALLK
Full Name: Danushka Alwis
User ID: DAALLK

Address

Communication Method

Documents

Person: DAALLK, Full Name: Danushka Alwis, User ID: DAALLK, Validity: Active

Comm ID	Name	Description	Communication Method	Value	Default per Method	Address ID	Default per Method and Address	Validity Period
1	Dan		E-Mail	dan@ifs.com	Yes		No	1/1/2020 - 9/1/2029
2	Dan		Phone	+48000000000	No		No	

3.6.3.3 Define delivery types

Using IFS Cloud standard functionality, define separate delivery types to be reported under K_14, K_38, K_39 fields in SAF-T VAT XML file.

Financials > Customer Invoice > Basic Data > Delivery Types Company Dan Poland

Delivery Types

✓	⋮	Delivery Type	Description	Include in Invoice Enclosure	Invoice Enclosure Series ID
<input type="checkbox"/>	⋮	EE	Telecommunications services, broadcasting and electronic services	No	
<input type="checkbox"/>	⋮	GTU_01	Deliveries of alcoholic beverages	No	
<input type="checkbox"/>	⋮	GTU_02	Deliveries of petroleum products	No	
<input type="checkbox"/>	⋮	GTU_03	Deliveries of heating oil and other oil products	No	
<input type="checkbox"/>	⋮	GTU_04	Deliveries of tobacco products	No	
<input type="checkbox"/>	⋮	GTU_05	Deliveries of waste	No	
<input type="checkbox"/>	⋮	K_14	K_14 (Tax Template field ART_129_UST)	No	
<input type="checkbox"/>	⋮	K_35	K_35 (Tax Template field VAT_NALEZ_WNT_TRANSP)	Yes	FW
<input type="checkbox"/>	⋮	K_36	K_36 (Tax Template Field VAT_WNT_PAL_SIL)	Yes	FW
<input type="checkbox"/>	⋮	MK	Invoices from small suppliers who selected cash method for VAT	No	

3.6.4 DEFINE AUDIT FILE BASIC DATA

3.6.4.1 Enter Audit Format for Poland

Go to **Accounting Rules/Audit Interface/Basic Data/Audit Formats** page. Search for the Poland SAF-T audit format or add a new record for Poland SAF-T as follows:

- Country as “Poland”
- Report Type as “SAF-T”
- If the audit file is run on batch mode, the XML can be downloaded from the **Batch Processed Audit Files** page.

3.6.4.2 Enter Audit File Basic Data

Select Audit File Basic Data command to open the **Audit File Basic Data** page.

Accounting Rules > Audit Interface > Basic Data > Audit Formats Company AMKA-PLN

Audit Formats

Audit File Basic Data												Audit File Tax Information	Audit File Log	
(1)	⋮	Country	Report Type	Decimal Symbol	Thousands Separator	Negative Format	Leading Zeros	Time Format	Date Format	File Type	File Template ID	Default		
<input checked="" type="checkbox"/>	⋮	POLAND	SAF-T	. (point)	.(comma)	-9	0.9	13:59	YY-MM-DD			Yes		

Use IFS Cloud standard functionality to add a header record in the **Audit File Basic Data** page. If required, do modifications in the **Standard Audit Code Mappings**.

The new tab: **SAF-T Poland Setup** includes ten sections. For SAF-T VAT report, the following sections applicable.

Accounting Rules > Audit Interface > Basic Data > Audit Formats > Audit File Basic Data Company Polish company

Audit File Basic Data

HEADER STANDARD AUDIT CODE MAPPINGS SAF-T POLAND SETUP

General Info

Tax Office ID: 0202 Address ID: A1

Misc Parameters

Person ID: MABEPL Invoice Series for SAD: SD

Voucher/Delivery Types for Document Types (JPK_V7M)

Delivery Types for Specific Procedures (JPK_FA)

Delivery Type for Delivery Goods and Services

Delivery Types/Customer Groups for Specific Procedures

Tax Codes for Specific Procedures

Invoice Type Mappings

SAF-T PL Inventory Transaction Report Types

Inventory Transaction Report Type Mappings

Misc Parameters section

- Person ID – specify person ID; on list of values there are only persons connected to given company; the e-mail address defined for specified person will be reported in SAF-T VAT XML file. This field is optional.
- Invoice Series for SAD – enter invoice series from list of values – to be used for customs documents registration.

When SAF-T VAT XML is created and invoices with series entered in Invoice Series for SAD exist, it is validated if there is any Ref Invoice No in *Supplier Invoice Details/General*. If the Supplier ID is different there – in XML file lines with supplier invoices with invoice series equal to Invoice Series for SAD, there will be mixed data from two invoices. If the Supplier ID is the same or Ref Invoice No is empty – only data from basic invoice will be reported in XML file.

Delivery Types/Customer Groups for Specific Procedures section

- (V7M) K_14/(VAT) K_14, (V7M) K_35/(VAT) K_38 and (V7M) K_36/(VAT) K_39 - Enter the delivery types that should be reported under each field K_14, K_38 and K_39.
- If required, you can define more than one delivery type using semicolon as a separator.

3.6.5 CREATE VAT-7 REPORT

Use IFS Cloud standard functionality to generate VAT-7 report for the SAF-T reporting period in the company. More information on creating VAT-7 report is available in IFS Cloud documentation.

3.6.6 CREATE SAF-T VAT XML FILE

On Task Options in **Audit Interface Assistant** page, select one of the below options:

Start Now: This option enables user to instantly create an audit file.

Schedule: This option enables user to create an audit output file as a background job. (Refer IFS Cloud Documentation for more details).

Specify the following and click Next:

- Company: The company you want to generate SAF-T VAT file.
- Country: "Poland"
- Report Type: "SAF-T" - the value will be prompted per default Audit Formats settings for Poland.
- Audit Type: "JPK_VAT"
- Period From and Period Until: The year and month range to be covered in SAF-T V7M report.
- File Type: Select JPK_VAT structure from list of values.
- File Template: Will show up automatically after File Type is specified.

The screenshot shows the 'Audit Interface Assistant' window for 'Dan Poland'. The 'Task Options' progress bar has the first step 'Task Options' completed. Under 'Start Option', 'Start now' is selected. The 'Parameters' section includes dropdowns for Company (DAN POLAND - Dan Poland), Country (POLAND), Report Type (SAF-T), Audit Type (JPK_VAT), File Type (JPK_VAT_3), and File Template (JPK_VAT_3_TEMPLATE). The 'Selection' section has 'Period' selected, with 'From' set to 2020-08 and 'Until' set to 2020-08. Navigation buttons at the bottom include 'Previous', 'Next', 'Finish', and 'Cancel'.

On SAF-T PL Additional Parameters, specify the Tax Proposal ID, the VAT-7 proposal ID that was created for the period. Use the list of values to search for the correct proposal. Click Finish button to generate the SAF-T VAT XML file. The file will be named as <Audit Type without brackets>_<Time stamp>(yyyymmddhhmmss).XML

e.g., JPK_VAT_20170914150743.XML

The screenshot shows the 'Audit Interface Assistant' window at the 'SAF-T PL Additional Parameters' step. The progress bar shows 'Task Options' and 'SAF-T PL Additional Parameters' as completed steps. The 'Tax Proposal ID' dropdown is set to '4 - VAT'. Navigation buttons at the bottom include 'Previous', 'Next', 'Finish', and 'Cancel'.

3.6.7 COMPARE SAF-T VAT XML WITH VAT-7 REPORT

Both the SAF-T VAT and the VAT-7 reports are legal documents relating to the same business transactions of a company and hence both reports should produce identical data once the reports are generated.

Due to the current functionality of VAT-7 (Standard) report, it always requires some manual input from the user to generate the report with correct values. SAF-T VAT XML file is an automatically generated file which does not require any manual input. When generating the SAF-T VAT file, IFS Cloud will always crosscheck the values with the corresponding data fields in VAT-7 report. If there is a difference, IFS Cloud will trigger a warning message. These warning messages can be viewed in the **Audit File Log** page.

The screenshot shows the 'Audit File Log' page with a table containing one entry. The 'Warning Text' column contains the message: 'Tax Proposal ID is not in Reported/Valid status;'. The entry details are: File ID: 1770, Audit Type: JPK_VAT, From Date: 6/1/2019, To Date: 6/30/2019, Timestamp: 2021-08-16-00:02:22, and Correction Number: 0.

File ID	Audit Type	From Date	To Date	Timestamp	Correction Number	Warning Text
1770	JPK_VAT	6/1/2019	6/30/2019	2021-08-16-00:02:22	0	Tax Proposal ID is not in Reported/Valid status;

From the **Audit Formats** page, use the Audit File Log command to open the **Audit File Log** page.

The screenshot shows the 'Audit Formats' page with three tabs: 'Audit File Basic Data', 'Audit File Tax Information', and 'Audit File Log'. The 'Audit File Log' tab is selected and highlighted with a red box. Below the tabs is a table with various configuration fields for the audit format.

(1)	Country	Report Type	Decimal Symbol	Thousands Separator	Negative Format	Leading Zeros	Time Format	Date Format	File Type	File Template ID	Default
<input checked="" type="checkbox"/>	POLAND	SAF-T	(point)	(comma)	-9	0.9	13:59	YY-MM-DD			Yes

3.6.8 CHANGE VALUES IN VAT-7 REPORT

Check all the warning messages displayed on **Audit File Log**. If there are differences related to manual Fields in VAT-7 report, the values in VAT-7 should be manually updated with values reported in JPK_VAT3 XML (*Automatic Tax Proposal/Template Field Presentation/Modify Manual Fields*).

The current functionality of VAT-7 (Standard) report assumes that summarized tax amounts to be reported in the P_14 tag, P_35 tag and P_36 tag are specified manually by the user. On the other hand delivery types specified in the (V7M) K_14/(VAT) K_14 field, (V7M) K_35/(VAT) K_38 field and (V7M) K_36/(VAT) K_39 field in the **SAF-T PL Parameters** tab are used to select detailed transactions to be reported with values in the corresponding K_14 tag, K_35 tag and K_36 tag.

In order to make sure that values have been correctly specified manually, IFS Cloud will always crosscheck the totals of K_14 tags, K_35 tags and K_36 tags with tax template fields from VAT-7 report used to fill P_14 tag, P_35 tag and P_36 tag. If there is a difference, IFS Cloud will trigger a warning message. These warning messages can be viewed in the **Audit File Log** page.

3.6.9 RECREATE SAF-T VAT XML FILE

Once all the manual modifications are done in VAT-7 report, generate SAF-T VAT XML file again using *Audit Interface Assistant*. On **Audit File Log** page, the Correction Number will be set to 0 for created original SAF-T VAT XML.

File ID	Audit Type	From Date	To Date	Output File Directory	Timestamp	Correction Number	Warning Text
63	JPK_VAT	1/1/2019	1/31/2019		2021-05-18-16:14:30	0	Tax Proposal ID is not in
175	JPK_VAT	3/1/2019	3/31/2019		2021-06-01-16:31:29	0	Tax Proposal ID is not in
41	JPK_V7M	1/1/2019	1/31/2019		2021-05-14-15:37:13		Tax Proposal ID 2 is not i
42	JPK_V7M	1/1/2019	1/31/2019		2021-05-14-15:49:39		Tax Proposal ID 2 is not i
83	JPK_V7M	2/1/2019	2/28/2019		2021-05-19-14:53:05		Tax Proposal ID 7 is not i
103	JPK_V7M	3/1/2019	3/31/2019		2021-05-20-17:43:08		Tax Proposal ID 9 is not i

Note:

By default, the XML file generated using *Audit Interface Assistant* will be created as Original XML. The Correction Number will be hence set to 0 in Audit File Log. Recreate XML File context menu option is available only for Correction Number is not 0. This value must be changed manually to create correction of SAF-T VAT3 XML. The value of XML tag <CelZlozenia> (i.e., the option to indicate whether the file is submitted for the first time or if it is an adjustment of a previously transmitted file) will be copied from Correction Number.

3.6.10 CREATE CORRECTION SAF-T VAT XML FILE

In case if there are errors or issues with SAF-T VAT XML that the company has already submitted to Polish Tax Office, the company must correct the errors in the file and send the corrected XML back. It is possible to create multiple corrections - changing the Correction Number to next number, save and select the Recreate XML File context menu option in Audit File Log. Value of Correction Number will be copied to <CelZlozenia> tag in SAF-T VAT XML file. Value of this tag cannot be repeated in one period.

3.6.11 DELIMITATIONS

No known.

3.7 SAF-T For Poland – Accounting Books (JPK_KR_PD)

3.7.1 SOLUTION – SAF-T PL ACCOUNTING BOOKS

JPK_KR_PD file is the Standard Audit File which is a uniform control file for Accounting Books. This is mandatory to be filed annually from the tax year 2025.

For capital groups and CIT taxpayers whose revenue exceed 50 million Euros in the previous tax year, the requirement of filing these audit files is mandatory from January 1, 2025. For other taxpayers, the requirement is mandatory from January 1, 2026.

The solution is based on IFS Cloud standard functionality of Accounting Journal, Turnover and Balance Report, GL Voucher Rows Analysis, and the Audit Interface functionality.

In order to support the requirement for the SAF-T PL JPK_KR_PD report, the following has been done:

- In **Audit File Basic Data** page, a new sub section JPK_KR_PD parameter in **SAF-T Poland Setup** has been added to handle JPK_KR_PD specific data.
- New Audit Type JPK_KR_PD added to the **Audit Interface Assistant**.

3.7.2 PREREQUISITES

The following prerequisites should be satisfied to generate SAF-T PL Accounting Books xml file for auditing purposes.

- The company must be set-up to use Polish localization, see chapter [Company Set Up](#). The functionality “Standard Audit File-Tax for Poland (JPK)” is mandatory and enabled by default.
- It is recommended to create the company using Standard Polish Template (STD-PL).
- All transactions from the period being of subject of XML file must be updated into General Ledger and Accounting Journal for the same period must be defined and created.

3.7.3 DEFINE COMPANY BASIC DATA

3.7.3.1 Define Company Address Details (Standard functionality)

Open the **Application Base Setup/Enterprise/Company** page. On the Address submenu, click the command View Detailed Address. The following fields must have values:

- Street
- House: Number1/Number2 format, where Number1 is house number and Number2 is apartment number
- Community
- District

The screenshot displays the 'Edit Detailed Address' dialog box. The dialog has a title bar with a close button (X) and the text 'Edit Detailed Address'. It contains four input fields: 'Street' with the value 'Dawson', 'House No' with the value '85/2', 'Community' with the value 'Krakow', and 'District' with the value 'Piaski'. Below these fields are 'OK' and 'Cancel' buttons. The background shows the 'Address' list for 'CR PL LTD - CR Poland Ltd' with a search bar and a list of address entries including 'CR PL LTD', 'IFS Racing USA', 'Racing Parent Company', 'IFS Racing Sweden AB', and 'MTO/CTO'. The 'GENERAL ADDRESS INFORMATION' tab is selected, showing 'Country *' as 'POLAND'.

3.7.3.2 Define Tax Office (Standard functionality)

Open the **Application Base Setup/Enterprise/Tax Office** page. On the **General** tab, define the Tax Office for Poland, based on the information published on Polish Tax Authority website. For example, “0202”, “1010”, “3030” ...

The screenshot shows the 'Tax Report' configuration page for '0202 - Poland Tax office'. The left sidebar lists various tax offices (UTO, FA, ZM, NL, AT, 0202) with their names. The main area shows the configuration for the selected office. Key fields include:

- Tax Office:** 0202, Name: Poland Tax office
- Company:** CR PL LTD - CR Poland Ltd
- Tax ID Number:** 777777
- Our Identity:** CR89654328
- Electronic Tax ID:** (empty)
- Account Office:** (empty)
- Legal Address ID:** (empty)
- State Code:** (empty)
- State Name:** (empty)
- User Name:** (empty)
- Password:** (empty)

The 'Tax ID Number' and 'Our Identity' fields are highlighted with a purple box in the image.

On the Tax Report submenu, enter values for the **Tax ID Number** and **Our Identity** fields after selecting the relevant company. The field ‘Our Identity’ is used to enter the National Business Registry Number of the company and will be copied in tag <REGON> in the xml file.

3.7.3.3 Define Journal ID (Standard functionality)

To create the xml file JPK_KR_PD at least one Accounting Journal (**General Ledger/Accounting Journal**) must be defined and created.

In case when more than one Accounting Journals are defined all of them must be created (**Accounting Journal/Create Accounting Journals**) and information from all journals will be included in the created JPK_KR_PD file.

3.7.3.5 Define JPK_KR_PD Parameters

Navigate to **Accounting Rules/Audit Interface/Basic Data/Audit Formats/Audit File Basic Data** and define JPK_KR_PD parameters under the SAF-T Poland set-up tab.

(1)	Country	Report Type	Decimal Symbol	Thousands Separator	Negative Format	Leading Zeros	Time Format	Date Format	File Extension	File Type	File Template ID	Default
<input checked="" type="checkbox"/>	POLAND	SAF-T	. (point)	, (comma)	-9	0.9	13:59	YY-MM-DD				Yes

JPK_KR_PD Parameters								
Compliant with IFRS	S_12_1	S_12_2	S_12_3	K_1	K_2	K_3	K_4	
<input type="checkbox"/>	S_12_1	S_12_2	S_12_3	55000.00	35200.00	25463.00	26987.24	
K_5	K_6	K_7	K_8					
23654.00	28700.00	8963.23	8965.77					

3.7.4 CREATE SAF-T JPK_KR_PD XML FILE

Open the **Accounting Rules/Audit Interface/Audit Interface Assistant**.
On the Start Option section select Online or Schedule.

And specify the following:

- Report Type: “SAF-T” - the value will be prompted according to Audit Formats settings for Poland.
- Audit Type: “JPK_KR_PD” selected from List of Values.
- Date From and Date Until: The start and end dates of the period to be covered in SAF-T JPK_KR_PD report (xml can be created for one period or more but only from one year)

or:

- Period From and Period Until: The year and month range to be covered in SAF-T JPK_KR_PD report.

The screenshot shows the 'Audit Interface Assistant' form. The 'Parameters' section is highlighted with a purple box, containing the following fields:

Company *	Country *	Report Type *	Audit Type
CR PL LTD - CR Poland Ltd	POLAND	SAF-T	JPK_KR_PD
Audit Source	Ledger ID		

Below the parameters, the 'Selection' section shows 'Period' selected with a date range from 2024-01 to 2024-12.

On SAF-T PL Additional Parameters, enable Correction Report toggle when submitting a correction report of the JPK_KR_PD file. If enabled, the CelZlozenia tag in the JPK_KR_PD file will be set to 2 indicating a correction report, otherwise CelZlozenia tag will remain as 1, indicating an original submission of JPK_KR_PD file.

The screenshot shows the 'Audit Interface Assistant' form with the 'SAF-T PL Additional Parameters' step selected. The 'Correction Report' toggle is highlighted with a purple box and is currently turned on.

Click Finish button to generate the JPK_KR_PD XML file.

If the audit file is run in schedule option, the xml can be downloaded from the **Batch Processed Audit Files** page.

Please refer chapter Appendix to view the mapping of IFS data to XML tags.

3.7.5 DELIMITATIONS

None

3.8 SAF-T For Poland – Fixed Assets and Intangible Assets (JPK_ST_KR)

3.8.1 SOLUTION – SAF-T PL FIXED ASSETS AND INTANGIBLE ASSETS

JPK_ST_KR file is the Standard Audit File for Fixed Assets which is a uniform control file for the records of fixed assets and intangible assets. This is mandatory to be filed annually from the tax year 2026.

For capital groups, CIT taxpayers, and others whose revenue exceeded 50 million Euros in the previous tax year, the requirement of filing these audit files is mandatory from January 1, 2026.

The solution is based on the IFS Cloud standard functionality of Fixed Assets and the Audit Interface functionality.

In order to support the requirement for the SAF-T PL JPK_ST_KR report, the following has been done:

- Object class change details log introduced on the server side to record any Object Class change done on the **Fixed Asset Object** page.
- In the **Object Classes** page, a new column **Tax Depreciation Rate** has been added to add the annual tax depreciation rate for each object class.
- In the **Audit File Basic Data** page, new sub-sections in **SAF-T Poland Setup** have been added to handle JPK_ST_KR specific data.
- New Audit Type JPK_ST_KR added to the **Audit Interface Assistant**.

3.8.2 PREREQUISITES

The following prerequisites should be satisfied to generate SAF-T PL Fixed Assets and Intangible Assets xml file for auditing purposes.

- The company must be set up to use Polish localization, see chapter Company Set Up. The functionality “Standard Audit File-Tax for Poland (JPK)” is mandatory and enabled by default.
- It is recommended to create the company using Standard Polish Template (STD-PL).
- It is required to have a code part defined for the FA Accounting Code Part Function.
- All fixed assets transactions of the selected period of XML file must be updated into General Ledger.

The following filters were applied to recognize the fixed asset objects that should be printed in the JPK_ST_KR file for a given period.

- JPK_ST_KR file should include all the assets in the fixed asset ledger that are of “Normal” and “Right-of-Use” object types. However, ROU Assets created via Operating Lease Type will be excluded from the XML file.
- Assets acquired during the reporting period are accurately identified by verifying the event date of their initial acquisition transaction.
- When generating the JPK_ST_KR file for a specific financial year, assets disposed before the "From Date" or the initial reporting date will be excluded.
Example: when the file is ordered for the financial period 01.01.2025 till 12.31.2025, the fixed assets disposed prior to 01.01.2025 will not be included.

- Fixed asset objects in the Registered, Import, and Investment states will be excluded from the XML file.

3.8.3 DEFINE COMPANY BASIC DATA

3.8.3.1 Define Company Address Details (Standard Functionality)

Open the Application Base Setup/Enterprise/**Company** page. On the Address submenu, click the command **View Detailed Address**. The following fields must have values:

- Street
- House: Number1/Number2 format, where Number1 is house number and Number2 is apartment number
- Community
- District

The screenshot shows the 'Edit Detailed Address' dialog box. The fields are as follows:

Street	House No	Community
Street 1	536/78	Community 1

Below these fields is a 'District' field with the value 'District 1'. At the bottom of the dialog are 'OK' and 'Cancel' buttons.

3.8.3.2 Define Tax Office (Standard functionality)

Open the Application Base Setup/Enterprise/**Tax Office** page. On the General tab, define the Tax Office for Poland, based on the information published on the Polish Tax Authority website. For example, "0202", "1010", "3030" ...

Application Base Setup > Enterprise > Tax > Tax Office > Tax Report

Tax Report

Search (1)

Sort by

<< 0202 - Poland Tax office 1 of 1

0202
Name: Poland Tax office

Address

Company: STDPOLAND, CIS Reporting:

Tax ID Number	Our Identity	Electronic Tax ID
123-555-3333-1	11223344	

Account Office, Legal Address ID, State Code, State Name

User Name, Password

On the **Tax Report** submenu, enter values for the **Tax ID Number** and **Our Identity** fields after selecting the relevant company. The field 'Our Identity' is used to enter the National Business Registry Number of the company and will be copied in tag <REGON> in the xml file.

3.8.3.3 Define Write Method Change Log (Standard functionality)

Depreciation method change information will be generated by the system when information relevant to depreciation calculation is modified in the Books tab of the **Fixed Asset Object** page when this option is enabled in Application Base Setup/Enterprise/Company/Company/**Fixed Assets** submenu.

Application Base Setup > Enterprise > Company > Company > Fixed Assets

3.8.3.4 Define Tax Depreciation Rate in Object Classes

The Classification of Fixed Assets is used in statistical reporting and in the accounting records of fixed assets. The Classification of Fixed Assets (KST) was introduced by the regulation of the Council of Ministers on 10 December 2010 (Journal of Laws No. 242, item 1622).

The KST Classification codes should be defined in the Financials/Fixed Assets/Object Basic Data/**Object Classes** page and then defined in the Financials/Fixed Assets/**Fixed Asset Object** page in the **Object Class** field. The classification defined in the field will be printed in the E_8 tag.

Financials > Fixed Assets > Fixed Asset Object

Company: STDPOLAND Co

Fixed Asset Object

Search (1) Advanced

Sort by ML1 - Object 1 1 of 1 Scrapped

ML1 Description: Object 1 Scrapped

Object	Description	Replaced/Split Object
ML1	Object 1	

Object Type: Normal

GENERAL USER DEFINED BASE VALUES BOOKS PREPOSTING INVENTORY PROPERTIES DISPOSAL RENTAL ASSETS

General Details

Object Group *	Valid *	Object Class
7 - Vehicles	1/1/2024 - 12/31/2049	774-741 - Cars
Supplier	Object Owner	External ID
Attributes	Notes	Rotable Pool Object
No	No	No

In Poland, the tax depreciation rates are specified in the "Wykaz rocznych stawek amortyzacyjnych," a schedule issued by the Ministry of Finance. These rates indicate the annual percentage at which different types of fixed assets can be depreciated for tax purposes. Each tax rate corresponds to KST.

Hence, the **Tax Depreciation Rate** column in the Financials/Fixed Assets/Object Basic Data/**Object Classes** page is given to define the rates issued by the tax authority. This field is controlled by the Poland Localization. The rate defined here will be printed in E_10A tag.

Financials > Fixed Assets > Object Basic Data > Object Classes

Company: STDPOLAND Co

Object Classes

Search

Object Class	Description	Tax Depreciation Rate
001-010	Agricultural lands	
002-020	Forests	
007-070	Water regions	2.856
110-101	Industry buildings	2.5512
110-105	Office buildings	2.56
220-201	Power-stations	4.5
222-221	Railway lines	10
331-311	Steam boilers	7
334-349	Nuclear reactors	14
441-415	Grinding machines	14

Note: When the actual depreciation factor is different than the Tax Depreciation Rate given for an object, the E_11 tag will be printed. It is taken from the Fixed Assets/Depreciation Basic Data/**Depreciation Method/Factor%** field. For instance, if the factor exceeds 100%, such as a 1200% rate for recording a one-time depreciation, the E_11 and E_25A tags will display the value 100.

3.8.3.5 Define Fixed Asset Properties

In the E_5 tag, it is required to specify the document number (OT) based on which the fixed asset or intangible asset was introduced. Similarly, it is required to specify the number (LT) of the document confirming deletion from the register in the E_30 tag.

To record these OT and LT numbers, you can use the existing functionality of Fixed Asset Property Codes. Property Codes by names OT and LT should be defined in the Financials/Fixed Assets/Object Basic Data/**Fixed Assets Property Codes** page with Data Type String.

Financials > Fixed Assets > Object Basic Data > Fixed Assets Property Codes

LT - LT Document	2023/001				

3.8.3.6 Object Class Changes

It is required to print 1 (Yes) and 2 (No) respectively in the E_32 tag if a change is done in the KST classification shown in the **Object Class** on **Fixed Asset Object** page. Therefore, a server-side implementation was done to record the changes.

3.8.4 DEFINE AUDIT BASIC DATA

Navigate to Accounting Rules/Audit Interface/Basic Data/Audit Formats/**Audit File Basic Data** and define JPK_ST_KR basic data under the **SAF-T Poland Setup** tab.

3.8.4.1 Define JPK_ST_KR General Parameter

In Accounting Rules/Audit Interface/Basic Data/Audit Formats/Audit File Basic Data/SAF-T Poland Setup/**JPK_ST_KR General Parameters**, define the fixed asset book used to record depreciation for tax purposes in **Fixed Asset Book for Tax Depreciation** field and define the fixed asset book used to record depreciation for internal accounting purposes in **Fixed Asset Book for Accounting Depreciation** field.

Based on business practice, users can connect different fixed asset books or the same book in these fields.

3.8.4.2 Define Intangible Object Groups

In Accounting Rules/Audit Interface/Basic Data/Audit Formats/Audit File Basic Data/SAF-T Poland Setup/**JPK_ST_KR Intangible Object Groups**, define the object groups that will be used to create Intangible Assets in the **Fixed Asset Object** page.

This is required to identify which tag E_2 or E_3 to be printed to show the date of acquisition/creation of a fixed asset in the JPK_ST_KR file.

3.8.4.3 Define Acquisition Reason Mapping

In Accounting Rules/Audit Interface/Basic Data/Audit Formats/Audit File Basic Data/SAF-T Poland Setup/**JPK_ST_KR Acquisition Reason Mapping**, define the following.

- Transaction Reason (Acquisition Type) - Transaction reason applicable for the acquisition or the acquisition value adjustment of a fixed asset object.
- Document Type - Select the type of document confirming the acquisition of the asset, provided by the Poland Tax Authority which should be mapped to an acquisition reason in IFS Cloud Transaction Reasons. This will be printed in the E_6 tag.

Document Type	Description
S	Sales Agreement
D	Donation Agreement
N	Non-cash contribution
W	Production/Manufacturing
F	VAT invoice
I	Other

- **Qualifying Reason** - Select the option if, the Transaction Reasons are qualifying for tax and accounting initial value changes of assets according to Article 15(5) and Article 31(3) of the Corporate Income Tax Act in Poland. This will affect E_13 to E_15 tags for the Tax Depreciation Book and E_22 to E_24 tags for the Accounting Depreciation Book.

Transaction Reason	Document Type	Qualifying Reason
<input type="checkbox"/> : APORT - Contribution in kind	F - VAT invoice	Yes
<input type="checkbox"/> : BUDOWA - Construction of new buildings	W - Production/Manufacturing	Yes
<input type="checkbox"/> : DAROWIZNA - Donation	D - Donation Agreement	No
<input type="checkbox"/> : DOTACJA - Subsidy	D - Donation Agreement	No
<input type="checkbox"/> : INWESTYCJA - Investment	S - Sales Agreement	Yes
<input type="checkbox"/> : POZOSTALE - Other reasons	I - Other	No
<input type="checkbox"/> : RABAT GOTOWKOWY - Cash Discount	N - Non-cash contribution	Yes
<input type="checkbox"/> : ZAKUP - Purchase	S - Sales Agreement	No

3.8.4.4 Define Disposal Reason Mapping

In Accounting Rules/Audit Interface/Basic Data/Audit Formats/Audit File Basic Data/SAF-T Poland Setup/**JPK_ST_KR Disposal Reason Mapping**, define the following.

- **Transaction Reason (Disposal Type)** - Transaction reason applicable for the disposal of a fixed asset object.
- **Document Type** - Select the type of document confirming the disposal of the asset, provided by the Poland Tax Authority which should be mapped to a disposal reason in IFS Cloud Transaction Reasons. This will be reflected in the E_29 tag.

Document Type	Description
A	Reclassification to another asset group
S	Sale
X	Identification of shortage
K	Theft
D	Donation
N	Non-cash contribution
I	Other

3.8.4.5 Define Tax Depreciation Mapping

In Accounting Rules/Audit Interface/Basic Data/Audit Formats/Audit File Basic Data/SAF-T Poland Setup/**JPK_ST_KR Tax Depreciation Mapping**, define the following.

- Depreciation Method – Identity of the depreciation method.
- Tax Depreciation Method - Select the Tax Depreciation Method, provided by the Poland Tax Authority which should be mapped to IFS Cloud Depreciation Method. This is reflected in E_9_1 and E_9_2 tags.

Tax Depreciation Method	Description
D	Declining Balance
L	Straight-line
J	One-time
I	Other
X	No depreciation

- Frequency of Depreciation - Select the Frequency of depreciation, provided by the Poland Tax Authority which should be mapped to IFS Cloud Depreciation Methods. This is reflected in E_17 tags.

Frequency	Description
M	Monthly
K	Quarterly
R	Annual
J	One-time
S	Seasonal
I	Other
X	No deduction

3.8.6 DELIMITATIONS

None

3.9 SAF-T For Poland – Inventory Report (JPK_MAG)

3.9.1 SOLUTION – SAF-T PL INVENTORY

The solution is based on Audit Interface functionality in standard IFS Cloud.

In order to support the requirement for the SAF-T PL Inventory report, the following has been done:

1. New report type SAF-T added to the **Audit Formats** page.
2. In **Audit File Basic Data** page, a new tab **SAF-T Poland Setup** with ten sections has been added to handle SAF-T Poland specific data.
3. Task Options in **Audit Interface Assistant** page, new field Audit Type has been added to select relevant SAF-T report. In SAF-T PL Additional Parameters, additional fields specific for the SAF-T MAG have been added.
4. New external file templates were added to support specific SAF-T reports.

3.9.2 PROCESS OVERVIEW

3.9.3 PREREQUISITES

Following prerequisites should be satisfied in order to generate SAF-T PL Inventory xml file for auditing purposes.

- The company must be set-up to use Polish localization, see the Company Set up chapter.
- The functionality “Standard Audit File-Tax for Poland (JPK)” is mandatory and enabled by default.
- It is recommended to create the company using Standard Polish Template (STD-PL).

3.9.4 DEFINE BASIC DATA

3.9.4.1 Define Company Address Details

Open the **Application Base Setup/Enterprise/Company** page. On the Address sub menu use Edit Detailed Address command button. The following fields must have values:

- Street
- House: Number1/Number2 format, where Number1 is house number and Number2 is apartment number
- Community
- District

3.9.4.2 Define Tax Office

Open the **Application Base Setup/Enterprise/Tax Office** page. On **General** tab define Tax Office for Poland – one from the list published on tax authority’s website. For example “0202”, “1010”, “3030” ...

On the Tax Report sub menu connect the company, relevant tax ID number and specify our identity. Our identity is company ID for the specific tax office.

Application Base Setup > Enterprise > Tax > Tax Office > Tax Report

Sort by

Tax Report VAT PL - VAT PL 1 of 1

VAT PL

State Name: warminsko-mazurskie

Tax Report Info

- Tax Report
- VAT-2020 - Vat 2020
- VAT7M - VAT7M

3.9.4.3 Define Inventory Transaction Report Types

Go to the **Inventory/Transaction History/Report/Inventory Transaction Report Basic Data** page. On the **Report Types** tab define report types used for inventory transactions.

Warehouse Management > Transaction History > Report > Inventory Transaction Report Basic Data

Search Advanced

Company More Favorites Clear Q Settings

Inventory Transaction Report Basic Data DAN POLAND

Copy To Company

Company: DAN POLAND

REPORT TYPES | REPORT GROUPS | REPORT TYPE FOR TRANSACTION CODES | REPORT TYPE NUMBER SERIES

Report Type	Report Type Description	Report Type Direction
<input checked="" type="checkbox"/> CS	Consignment Stock	-
<input type="checkbox"/> PZ	External Receipt	+
<input type="checkbox"/> RT-.INVM-COIN	RT-.INVM-COIN	+

On **Report Type For Transaction Codes** tab, connect the defined report types to the transaction codes. All inventory transactions to be considered in JPK_MAG report should be assigned to one of defined report types. Note: internal transfer must be reported in one type “MM” in JPK_MAG XML, while in IFS Cloud it is handled with two transactions (issue and receipt) – so only issue transaction should be mapped (to report type “MM-“).

Transaction Code	Direction	Report Type
INVM-IN - Internal Transf	+	RT-.INVM-IN - RT-.INVM-II
INVM-ISS - Internal Trans	-	RT-.INVM-ISS - RT-.INVM-I
INVM-COIN - Inter Site Tr	+	RT-.INVM-COIN - RT-.INVI
INVM-OUT - Inter Site Trz	-	RT-.INVM-OUT - RT-.INVM

3.9.5 DEFINE AUDIT FORMAT BASIC DATA

Go to **Accounting Rules/Audit Interface/Basic Data /Audit Formats** page. Search for the Poland SAF-T audit format or add a new record for Poland SAF-T as follows:

- Select the Country as “Poland”,
- Report Type as “SAF-T”
- If the audit file is run on batch mode, the XML can be downloaded from the **Batch Processed Audit Files** page.

Select the Audit File Basic Data command to open the **Audit File Basic Data** page.

Country	Report Type	Decimal Symbol	Thousands Separator	Negative Format	Leading Zeroes	Time Format	Date Format	File Type	File Template ID	Default
POLAND	SAF-T	(point)	, (comma)	-9	0.9	13:59	YY-MM-DD			Yes

Use IFS Cloud standard functionality to add a header record in the **Audit File Basic Data** page. The new tab: **SAF-T Poland Setup** includes ten sections.

For SAF-T Inventory report below sections are applicable:

- General Info
- SAF-T PL Inventory Transaction Report Types

- Inventory Transaction Report Type Mappings

General Info

On **SAF-T Poland Setup** tab General Info section applicable to all SAF-T report types are entered.

To generate JPK_MAG xml file, *General Info* group fields must have values:

- Tax Office ID - Select from list of values; only values from legal list will be accepted by tax office.
- Address ID - Specify company address ID. The address should be defined with all details.

The screenshot shows the 'Audit File Basic Data' configuration page for 'SAF-T POLAND SETUP'. The page is divided into several sections:

- General Info:**
 - Tax Office ID: 0202
 - Address ID: A1
- Misc Parameters:**
 - Person ID: MABEPL
 - Invoice Series for SAD: SD
- Other Configurations (all collapsed):**
 - Voucher/Delivery Types for Document Types (JPK_V7M)
 - Delivery Types for Specific Procedures (JPK_FA)
 - Delivery Type for Delivery Goods and Services
 - Delivery Types/Customer Groups for Specific Procedures
 - Tax Codes for Specific Procedures
 - Invoice Type Mappings
 - SAF-T PL Inventory Transaction Report Types
 - Inventory Transaction Report Type Mappings

SAF-T PL Inventory Transaction Report Types Section

SAF-T PL Inventory Transaction Report Types section contains a list of inventory transaction report types required by JPK_MAG to be reported in xml file in relevant blocks with their English description.

JPK Inventory Report Type	Description
<input type="checkbox"/> MM	Inventory Movement
<input type="checkbox"/> PZ	External Receipt
<input type="checkbox"/> RW	Internal Issue
<input type="checkbox"/> WZ	External Issue

Inventory Transaction Report Type Mappings Section

On the *Inventory Transaction Report Type Mappings* section, all inventory transaction report types to be reported in JPK_MAG, should be connected to one of SAF-T PL report types. SAF-T report types are listed on the *SAF-T PL Inventory Transaction Report Types* section. The mapping should be done for required inventory transaction report types, defined in IFS Cloud in the ***Inventory Transaction Report Basic Data*** page. Hence IFS Cloud inventory transaction report types should be mapped against the SAF-T inventory transaction report types with correct direction.

Accounting Rules > Audit interface > Basic Data > Audit Formats > Audit File Basic Data Company Polish company

Audit File Basic Data

HEADER STANDARD AUDIT CODE MAPPINGS **SAF-T POLAND SETUP**

General Info

Misc Parameters

Voucher/Delivery Types for Document Types (JPK_V7M)

Delivery Types for Specific Procedures (JPK_FA)

Delivery Type for Delivery Goods and Services

Delivery Types/Customer Groups for Specific Procedures

Tax Codes for Specific Procedures

Invoice Type Mappings

SAF-T PL Inventory Transaction Report Types

Inventory Transaction Report Type Mappings

24

SAF-T PL Inventory Transaction Report Type	Inventory Transaction Report Type	Direction
<input type="checkbox"/> : MM	CS	-
<input type="checkbox"/> : PZ	PZ	+
<input type="checkbox"/> : PZ	RT-INVM-COIN	+
<input type="checkbox"/> : MM	RT-INVM-IN	0
<input type="checkbox"/> : MM	RT-INVM-ISS	0

With this mapping, the user can specify which inventory transaction reports with assigned transactions will be reported in JPK_MAG xml file and in which block PZ, WZ, RW or MM. The data from mapped transactions, quantity and value, will be reported with specified sign assigned to SAF-T PL Inventory Transaction Report Type in Direction.

“0” direction should be assigned to “MM” SAF-T PL Inventory Transaction Report Type, so that “MM” report type will show both the source and destination.

3.9.6 CREATE SAF-T INVENTORY (JPK_MAG) XML FILE

Open the *Accounting Rules/Audit Interface/Audit Interface Assistant*.

On Start Option section select Online or Schedule.

And specify following:

- Report Type: “SAF-T” - the value will be prompted according to Audit Formats settings for Poland
- Audit Type: “JPK_MAG”
- Date From and Date Until: The start and end dates of the period to be covered in SAF-T MAG report or:
 - Period From and Period Until: The year and month range to be covered in SAF-T MAG report.
- File Type: select the file type for JPK_MAG xml structure from List Of Values. To have Inventory transactions correctly reported in xml file, “JPK_MAG” file type must be selected.
- File Template will show up automatically after File Type is specified.

Accounting Rules > Audit Interface > Audit Interface Assistant Company **Dan Poland**

No known.

3.10 SAF-T For Poland – VAT Invoices Report (JPK_FA)

3.10.1 SOLUTION – SAF-T PL VAT INVOICES

The solution is based on Audit Interface functionality in IFS Cloud core.

In order to support the requirement for the SAF-T PL VAT Invoices report, the following has been done:

1. New report type SAF-T added to the **Audit Formats** page.
2. On the **Audit File Basic Data** page, a new tab, **SAF-T Poland Setup** with ten sections has been added to handle SAF-T Poland specific data.
3. Task Options in **Audit Interface Assistant** page, new field, Audit Type, has been added to select relevant SAF-T report. In SAF-T Additional Parameters, additional fields specific for the SAF-T VAT Invoices report (JPK_FA) have been added.
4. New external file template is added.

Process Overview

3.10.2 PREREQUISITES

- The company must be set-up to use Polish localization, see the [Company Setup](#) chapter. The “Standard Audit File-Tax for Poland (JPK)” localization parameter is mandatory and enabled by default.

- It is recommended to create the company using Standard Polish Template (STD-PL).
- It is recommended to use “Prepayment Based Invoice” as Method For Invoicing Prepayment in company setup.

3.10.3 DEFINE BASIC DATA

3.10.3.1 Define Company Address Details

Open the **Application Base Setup/Enterprise/Company** page. On the Address sub menu click the View Detailed Address. The following fields must have values:

- Street
- House: Number1/Number2 format, where Number1 is house number and Number2 is apartment number
- Community
- District

The screenshot shows the 'Edit Detailed Address' dialog box with the following fields:

- Street: Lopuszanska
- House No: 123
- Community: Okecie
- District: Wlochy

The main interface shows the 'Address' section for 'AMKA-PLN' with the 'Edit Detailed Address' button highlighted in red.

3.10.3.2 Define Tax Office

Open the **Application Base Setup/Enterprise/Tax Office** page. On the General section define Tax Office for Poland – one from the list published on tax authority website. For example “0202”, “1010”, “3030”

The screenshot shows the 'Tax Office' page with the following details for the selected tax office:

- Tax Office: 0202
- Name: PL Tax Office Dan
- Default Language: English
- Country: POLAND
- Creation Date: 8/4/2020

On the Tax Report sub menu connect the company, relevant tax ID number and specify our identity. Our identity is company ID for the specific tax office.

Application Base Setup > Enterprise > Tax > Tax Office > Tax Report

Tax Report

VAT PL - VAT PL 1 of 1

State Name: warminsko-mazurskie

Tax Report Info

- Tax Report
- VAT-2020 - Vat 2020
- VAT7M - VAT7M

3.10.3.3 Define Delivery Types

Go to the **Financials/Customer Invoice/Basic Data/Delivery types** page. Define Delivery Types to be used as selection criteria in P_20, P_21, P_22, P_106E_2 and P_106E_3 fields of XML JPK_FA report – according to XSD schema provided by tax authorities.

Financials > Customer Invoice > Basic Data > Delivery Types Company: Dan Poland

Delivery Types

Delivery Type	Description	Include in Invoice Enclosure	Include in Invoice Enclosure Series ID
<input type="checkbox"/> P_106E_3	P_106E_3	No	
<input type="checkbox"/> P_106E_2	P_106E_2	No	
<input type="checkbox"/> P_22	P_22	No	
<input type="checkbox"/> P_21	P_21	No	
<input type="checkbox"/> P_20	P_20	No	
<input type="checkbox"/> EE	Telecommunications services, broadcasting	No	
<input type="checkbox"/> GTU_01	Deliveries of alcoholic beverages	No	

3.10.3.4 Define Invoice Texts

Go to the **Financials/Customer Invoice/Basic Data/Invoice Texts** page. Define Texts to be used on invoices with corresponding delivery types specified on Delivery Types for Specific Procedures section P_20, P_21 or P_22 fields. The invoice texts should be defined as follows.

Delivery Type	Invoice Text Format
P_20	<Text1>:<collector's name>, <Text2>:<collector's address>
P_21	<Text1>:< representative's name>, <Text2>:<representative's address>, <Text3>:<representative's ID>
P_22	<Text1>:< registration date>, <Text2>:<mileage>, <Text3>:<working hours>

If the invoice is created with one of the above delivery types, additional information is required and must be entered in invoice text. The required information must be defined with relevant Tax ID to be reported correctly in corresponding XML tag. For invoices with tax code meeting specific criteria, tags P_19A, P_19B and P_19C contain the texts defined with the same Tax Ids.

For P_20A, P_20B, P_21A, P_21B, P_21C, P_22A, P_22B and P_22C fields text defined in basic data can be used – as well as can be entered using the Invoice Text command. To be reported correctly in XML, the text must be defined in specified format with colons and commas as delimiters.

Text ID	Text	Ending Text
P_19C	ZwohienÉ na p·odstawie: Art 43 Ustawy Ordynacja podatkowa	No
P_19B	Zwohienne na podstawie: Artr_ 100 dyreRywy 2006/112AVE	No
P_19A	Zwohienne na podstawie: Artr.34 uSt. 1-9 Ustawy o podatku Od towar6w i	No
P_22	<Text1>:< registration date>,<Text2>:<mileage>,<Text3>:<working hours>	No
P_21	PrzedstawicÉl podatkowy: FOKUS, adres: 2S-908 Resz6w uLZÉnuwt 12,	No
P_20A	<Text1>:<collector's name>,<Text2>:<collector's address>	No

3.10.3.5 Define Correction Reasons

Go to the **Financials/Customer Invoice/Basic Data/Invoice Correction Reason** page. Define correction reasons to be used on correction invoices.

If the correction invoice is created, information about reason of the correction is required and must be entered in **Correction Reason** field on **invoice details** tab. Correction reasons defined in basic data can be used – as well as can be entered in the field on **invoice details** tab.

Financials > Customer Invoice > Basic Data > Invoice Correction Reasons Company Dan Poland

Invoice Correction Reasons

Correction Reason ID	Correction Reason	Validity
<input type="checkbox"/> INVTAX	Invalid Tax	Active
<input type="checkbox"/> ERR	Error	Active

3.10.4 DEFINE AUDIT FORMAT BASIC DATA

Go to **Accounting Rules/Audit Interface/Basic Data/Audit Formats** page. Search for the Poland SAF-T audit format or add a new record for Poland SAF-T as follows. Click New, select the Country as “Poland”, Report Type as “SAF-T” and save. If the audit file is run on batch mode, the XML can be downloaded from the **Batch Processed Audit Files** page.

Click the Audit File Basic Data command to open **Audit File Basic Data** page.

Accounting Rules > Audit Interface > Basic Data > Audit Formats Company AMKA-PLN

Audit Formats

Country	Report Type	Decimal Symbol	Thousands Separator	Negative Format	Leading Zeros	Time Format	Date Format	File Type	File Template ID	Default
<input checked="" type="checkbox"/> POLAND	SAF-T	(point)	(comma)	-9	0.9	13:59	YY-MM-DD			Yes

This opens **Audit File Basic Data** page. The new tab, **SAF-T Poland Setup** is added with ten sections. For JPK_FA below sections are applicable:

Accounting Rules > Audit Interface > Basic Data > Audit Formats > Audit File Basic Data Company Polish company

Audit File Basic Data

SAF-T POLAND SETUP

General Info

Tax Office ID: 0202 Address ID: A1

Misc Parameters

Person ID: MABEPL Invoice Series for SAD: SD

- Voucher/Delivery Types for Document Types (JPK_V7M)
- Delivery Types for Specific Procedures (JPK_FA)
- Delivery Type for Delivery Goods and Services
- Delivery Types/Customer Groups for Specific Procedures
- Tax Codes for Specific Procedures
- Invoice Type Mappings
- SAF-T PL Inventory Transaction Report Types
- Inventory Transaction Report Type Mappings

General Info section

- Tax Office ID - select from list of values; only values from legal list will be accepted by tax office.
- Address ID - specify company address ID. The address should be defined with all details.

Delivery Types for Specific Procedures (JPK_FA) section

- P_20, P_21, P_22 – enter delivery types to be used as selection criteria for the invoices to be reported in corresponding XML file fields; use list of values; multiple values can be entered for each field.
- VAT on Cash – enable this radio button, if there are invoices with cash basis method used in tax operations.

Delivery Types/Customer Groups for Specific Procedures section

- (V7M) MR_T/(FA) P_106E_2 and (V7M) MR_UZ/(FA) P_106E_3 – enter delivery types to be used as selection criteria for the invoices to be reported in the corresponding <P_106E_2> tag and <P_106E_3> tag of the XML file; use list of values; multiple values can be entered for each field.

Invoice Type Mappings section

In the *Invoice Type Mappings* section, connect the invoice types and series. Only the invoice types connected are reported in JPK_FA.

3.10.5 CREATE SAF-T VAT INVOICES (JPK_FA) XML FILE

Open the *Accounting Rules/Audit Interface/Audit Interface Assistant*.
On Start Option section select Online or Schedule.

And specify following:

- Report Type: "SAF-T" - the value will be prompted according to Audit Formats settings for Poland.
- Audit Type: "JPK_FA".
- Date From and Date Until: The start and end dates of the period to be covered in SAF-T VAT Invoices report or:
- Period From and Period Until: The year and month range to be covered in SAF-T VAT Invoices report.
- File Type: select the file type as "JPK_FA"
- File Template will show up automatically after File Type is specified.

Click Finish to generate the SAF-T VAT Invoice (JPK_FA) XML file. The file will be named as:
 <Audit Type without brackets>_<Time stamp(yyyymmddhhmmss)>.XML
 e.g. JPK_FA_20170906124804.XML

The generated XML file is submitted to Polish Tax Office.

3.10.6 INVOICE REPORTING IN XML

The transactions are classified in the XML using the *Tax Group* functionality in IFS Cloud. Tax Group “KRS” is used for this purpose. The net amount and tax amount in invoice header (faktura) are shown in below tags as per the classification.

Transaction	Tax Rate	Tax Sub Group	Net Amount	Tax Amount	Value in <P_12>
Domestic Sales	23% or 22%	SPRZ-KRAJ-22	P_13_1	P_14_1	23
Domestic Sales	8% or 7%	SPRZ-KRAJ-7	P_13_2	P_14_2	8
Domestic Sales	5% or 3%	SPRZ-KRAJ-3	P_13_3	P_14_3	5
Domestic Reverse Charge	0%	NABPOD-DOST	P_13_4	P_14_4	oo
Sales of Goods and Services - Taxable Outside Country	0%	ZAG ZAG-UE ZAGB ZAGB-UE	P_13_5	P_14_5	np
Domestic Sales 0% Export EU Delivery of Goods	0%	SPRZ-KRAJ-0 EKSP-TOW WDT	P_13_6	N/A	0
Tax Free Sales – Exempted	0%	SPRZ-KRAJ-ZW	P_13_7	N/A	Zw
Tourism Services, Second Hand Goods and Work of Art	0%	SPN	N/A	N/A	N/A

Following transactions are specifically handled in XML.

3.10.6.1 Correction invoices

Following customer invoice types are considered as correction invoice in JPK_FA and identified by “KOREKTA” value in <RodzajFaktury> tag.

- Customer Order Correction Invoice
- Customer Order Collective Correction Invoice
- Correction Instant Invoice
- Customer Order Rebate Credit Invoice

3.10.6.2 Prepayment invoices

Following customer invoice types are considered as prepayment invoice in JPK_FA and identified by “ZAL” value in <RodzajFaktury> tag.

- Prepayment Based Debit Invoice
- Prepayment Based Credit Invoice

Additionally, delivery invoices matched with a prepayment-based invoices are considered as prepayment invoices (ZAL) in JPK_FA.

Following amounts in invoice header (faktura), are fetched from customer order for prepayment invoices.

- Net Amount (P_13_1, P_13_2, P_13_3, P_13_4, P_13_5, P_13_6, P_13_7)
- Tax Amount (P_14_1, P_14_2, P_14_3, P_14_4, P_14_5)

Foreign currency transactions are recalculated to accounting currency using tax currency rate in relevant invoice.

For all other invoices, the information is fetched from invoice.

3.10.6.3 Invoices with tax exempt transactions

For invoices with tax exempt transactions (belonging to tax sub group SPRZ-KRAJ-ZW) the information in P_19A, P_19B and P_19C XML tags, is fetched from Invoice Texts with corresponding Tax ID defined in basic data.

3.10.6.4 Invoices issued by Tax Collectors

Invoices issued by Tax Collectors are identified by delivery type specified in P_20 field in Delivery Types for Specific Procedures (JPK_FA) section. The Invoice Text entered in invoice header will be shown in P_20A and P_20B tags.

3.10.6.5 Invoices issued by Tax Representatives

Invoices issued by tax representatives are identified by delivery type specified in P_21 field Delivery Types for Specific Procedures (JPK_FA) section. The Invoice text entered in invoice header, is show as below in the XML.

P_21A: Tax Representative

P_21B: Address of the Tax Representative

P_21C: Tax ID number of Tax Representative

3.10.6.6 Invoices related to delivery of new means of transport

Invoices related to delivery of new means of transport in EU are identified by delivery type specified in P_22 field in Delivery Types for Specific Procedures (JPK_FA) section.

Invoice text entered in invoice header, is show as below in the XML.

P_22A: Date of Registration

P_22B: Course of transport

P_22C: No of hours spent

3.10.6.7 Invoices related to secondhand goods or work of art

Invoices related to secondhand goods or work of art are identified by delivery type specified in the (V7M) MR_UZ/(FA) P_106E_3 field in the Delivery Types/ Customer Groups for Specific Procedures section. The additional information is required in P_106E_3A XML tag. This information is fetched from specified Delivery Type Description.

3.10.6.8 Invoices related to tourism services

Invoices related to tourism services are identified by delivery type specified in the (V7M) MR_T/(FA) P_106E_2 field of the **SAF-T PL Parameters** tab.

3.10.7 DELIMITATIONS

No known.

3.11 SAF-T For Poland – Mixed Payment Report (JPK_WB)

3.11.1 SOLUTION – SAF-T PL MIXED PAYMENTS

The solution is based on IFS Cloud standard functionality of Mixed Payments and the Audit Interface functionality.

In order to support the requirement for the SAF-T PL Mixed Payment report, the following has been done:

- New report type SAF-T added to the **Audit Formats** page.
- In **Audit File Basic Data** page, a new tab, **SAF-T Poland Setup** with ten sections has been added to handle SAF-T Poland specific data.
- In Task Options on **Audit Interface Assistant** page, new Audit Type field has been added to select relevant SAF-T report. In SAF-T PL Additional Parameters in **Audit Interface Assistant** page Short Name field specific for the SAF-T WB has been added.
- New external file template JPK_WB_TEMPLATE has been added to support specific SAF-T reports.

Process Overview

3.11.2 PREREQUISITES

Following prerequisites should be satisfied in order to generate SAF-T PL Mixed Payments xml file for auditing purposes.

- The company must be set-up to use Polish localization, see chapter [Company Set Up](#). The functionality "Standard Audit File-Tax for Poland (JPK)" is mandatory and enabled by default.
- It is recommended to create the company using Standard Polish Template (STD-PL).

- Mixed Payments with status Approved must exist in company.

3.11.3 DEFINE COMPANY BASIC DATA

3.11.3.1 Define Company Address Details (Standard functionality)

Open the **Application Base Setup/Enterprise/Company** page. On the Address sub menu click the View Detailed Address command. The following fields must have values:

- Street
- House: Number1/Number2 format, where Number1 is house number and Number2 is apartment number
- Community
- District

The screenshot shows the 'Edit Detailed Address' dialog box. The fields are as follows:

Field	Value
Street	Lopuszanska
House No	123
Community	Okecie
District	Wlochy

The 'Edit Detailed Address' button is highlighted with a pink box.

3.11.3.2 Define Tax Office (Standard functionality)

Open the **Application Base Setup/Enterprise/Tax Office** page. On the General sub menu, define Tax Office for Poland – one from the list published on tax authority's website. For example "0202", "1010", "3030" ...

The screenshot shows the 'Tax Office' page. The search bar is set to 'Name: PL%'. The selected tax office is '0202 - PL Tax Office Dan'. The details for this tax office are as follows:

Field	Value
Tax Office	0202
Name	PL Tax Office Dan
Default Language	English
Country	POLAND
Creation Date	8/4/2020

On the *Tax Report* sub menu, enter the Company, Tax ID Number and Our Identity. Our identity is a National Business Registry Number of company and will be copied in tag <REGON> in XML file.

Application Base Setup > Enterprise > Tax > Tax Office > Tax Report

Tax Report VAT PL - VAT PL 1 of 1

Company: AMKA-PLN - AMKA-PLN

Company	Tax ID Number	Our Identity	Electronic Tax ID	State Code
AMKA-PLN	PL 2337684748	123456789	vatpl01	WN

State Name: warminsko-mazurskie

Tax Report Info

- Tax Report
- VAT-2020 - Vat 2020
- VAT7M - VAT7M

Other parameters from General Info (Journal ID and Person ID) will not be used in JPK_WB file.

3.11.4 ENTER AUDIT FILE BASIC DATA

Click the command Audit File Basic Data to open **Audit File Basic Data** page.

Accounting Rules > Audit Interface > Basic Data > Audit Formats

Audit Formats

Company: AMKA-PLN

(1)	Country	Report Type	Decimal Symbol	Thousands Separator	Negative Format	Leading Zeros	Time Format	Date Format	File Type	File Template ID	Default
<input checked="" type="checkbox"/>	POLAND	SAF-T	(point)	(comma)	-9	0.9	13:59	YY-MM-DD			Yes

Use IFS Cloud standard functionality to add a header record in the **Audit File Basic Data** page. If required, do modifications in the *Standard Audit Code Mappings*.

The new tab, **SAF-T Poland Setup** contains ten sections. For SAF-T_WB report only data from General Info should be defined.

- Tax Office ID
- Address ID

Data from the rest of group boxes are not used in creation of JPK_WB file.

Press the button Finish and file will be saved.

If the audit file is run on batch mode, the XML can be downloaded from the **Batch Processed Audit Files** page.

In created XML file values in tags like Opening Balance or Transaction Amount are fetched from approved Mixed Payments created for Cash Account selected in *Audit Interface Assistant*.

3.11.6 DELIMITATIONS

None

3.12 SAF-T For Poland – Accounting Books (JPK_KR)

3.12.1 SOLUTION – SAF-T PL ACCOUNTING BOOKS

The solution is based on IFS Cloud standard functionality of Accounting Journal, Turnover and Balance Report, GL Voucher Rows Analysis, and the Audit Interface functionality.

In order to support the requirement for the SAF-T PL KR report, the following has been done:

- New report type SAF-T added to the **Audit Formats** page.
- In **Audit File Basic Data** page, a new tab, **SAF-T Poland Setup** with ten sections has been added to handle SAF-T Poland specific data. For generation of JPK_KR only values from group box General Info will be used.
- Task Options in **Audit Interface Assistant** page, **new Audit Type** field has been added to select relevant SAF-T report.

3.12.2 PREREQUISITES

Following prerequisites should be satisfied in order to generate SAF-T PL Accounting Books xml file for auditing purposes.

- The company must be set-up to use Polish localization, see chapter [Company Set Up](#). The functionality “Standard Audit File-Tax for Poland (JPK)” is mandatory and enabled by default.
- It is recommended to create the company using Standard Polish Template (STD-PL).
- All transactions from period being of subject of XML file must be updated into General Ledger and Accounting Journal for the same period must be defined and created.
- In XML file there are tags <TypKonta>, <KodZespolu> and <OpisZespolu> which can be filled only with manually added two new attributes in *Accounting Rules/Code Part Attributes* (ID-s of attributes are hard coded):

- ZESPOL connected with Account.
- TYP_KONTA connected with Account.

Accounting Rules > Code String > Code Part Attributes Company **Dan Poland**

Code Part Attributes

✓	:	Attribute	Description	Code Part Name
<input type="checkbox"/>	:	ZESPOL	ZESPOL	Account
<input type="checkbox"/>	:	TYP_KONTA	TYP_KONTA	Account
<input type="checkbox"/>	:	RZIS1	Rachunek zysków i strat -	Account
<input type="checkbox"/>	:	BILANS	Bilans	Account

There are recommendations to use the following values for above attributes.

1. ZESPOL

Accounting Rules > Code String > Code Part Attributes > Attribute Value Company **Dan Poland**

Attribute Value

ZESPOL - ZESPOL 1 of 1

Connect Attribute

Attribute
[ZESPOL - ZESPOL](#)

Code Part Name
[Account](#)

Code Part Attribute Values

✓	:	Attribute Value	Description
<input type="checkbox"/>	:	9	Konta statystyczne
<input type="checkbox"/>	:	8	Kapitał własny
<input type="checkbox"/>	:	7	Przychody i koszty ich uzyskania
<input type="checkbox"/>	:	6	Produkty i rozliczenia międzyokresowe
<input type="checkbox"/>	:	5	Koszty w układzie kalkulacyjnym
<input type="checkbox"/>	:	4	Koszty według rodzajów
<input type="checkbox"/>	:	3	Materiały i towary
<input type="checkbox"/>	:	2	Różnice i rozszczenia
<input type="checkbox"/>	:	1	Inwestycje krótkoterminowe
<input type="checkbox"/>	:	0	Aktywa trwałe

2. TYP_KONTA

Attribute Value	Description
<input type="checkbox"/> WYNIKOWE	Konta wynikowe
<input type="checkbox"/> ROZLICZENIOWE	Konta rozliczeniowe
<input type="checkbox"/> POZABILANSOWE	Konta pozabilansowe
<input type="checkbox"/> BILANSOWE	Konta bilansowe

The Attribute ZESPOL must be created because the tag <KodZespolu> is obligatory in XML. If such Attribute does not exist or some Account used in transactions is not connected with this Attribute – the XML is created with errors.

If Attribute TYP_KONTA is not created, or some used Account is not connected with Attribute in tag <TypKonta> - in XML values from *Accounting Rules/Code String/Account Types* connected with used account will be selected. So, the user can choose to use an Attribute or Account Type.

3.12.3 DEFINE COMPANY BASIC DATA

3.12.3.1 Define Company Address Details (Standard functionality)

Open the **Application Base Setup/Enterprise/Company** page. On the Address submenu, click the command View Detailed Address. The following fields must have values:

- Street
- House: Number1/Number2 format, where Number1 is house number and Number2 is apartment number
- Community
- District

3.12.3.2 Define Tax Office (Standard functionality)

Open **the Application Base Setup/Enterprise/Tax Office** page. On the **General** tab, define Tax Office for Poland – one from the list published on tax authority’s website. For example “0202”, “1010”, “3030” ...

On the Tax Report sub menu, enter the Company, Tax ID Number and Our Identity. Our identity is a National Business Registry Number of company and will be copied in tag <REGON> in XML file.

3.12.3.3 Define Journal ID (Standard functionality)

In order to create XML file JPK_KR at least one Accounting Journal (*General Ledger/Accounting Journal*) must be defined and created.

In the case when more than one Accounting Journal are defined all of them must be created (*Accounting Journal/Create Accounting Journals*) and all of them will be included in created JPK_KR file.

3.12.4 CREATE SAF-T MIXED PAYMENTS (JPK_KR) XML FILE

Open the *Accounting Rules/Audit Interface/Audit Interface Assistant*.

On Start Option section select Online or Schedule.

And specify following:

- Report Type: “SAF-T” - the value will be prompted according to Audit Formats settings for Poland.
- Audit Type: “JPK_KR” selected from List of Values.
- Date From and Date Until: The start and end dates of the period to be covered in SAF-T KR report (XML can be created for one period or more but only from one year) or:
- Period From and Period Until: The year and month range to be covered in SAF-T KR report.

Press the button Finish and file will be saved.

If the audit file is run on batch mode, the XML can be downloaded from the **Batch Processed Audit Files** page.

In order to check if values in XML tags are correct a Turnover and Balance Report should be created for the same period and values from this report should be compared with values in block ZOiS. Values from block Dziennik should be compared with values in Journal Report created for the same period. Values in block KontoZapis can be compared with values in General Ledger Report.

3.12.5 DELIMITATIONS

No known.

4 Reposting of Currency Difference on Tax

4.1 Overview Legal Requirement

According to Polish Income Tax Law there are two ways for handling currency rate differences:

- Directly according to Income Tax Law (art. 15a)
- Following the Accounting Law (art. 9b ust. 1 pkt 2)

First method is the default and most of companies use this method. When using this method, currency differences at payment are considered as revenue/cost for income tax only in part related to net amount and non-deductible tax amount. Currency differences related to deductible VAT are not considered as revenue/cost.

4.2 Solution

Standard solution is used in order to create currency differences postings (PP12 and PP13), that is, differences related to gross amount.

In addition, the following new postings are added for differences related to deductible vat amount:

- PP81 - Currency Loss, Tax Related Difference
- PP82 - Contra Account, Currency Loss, Tax Related Difference
- PP83 - Currency Profit, Tax Related Difference
- PP84 - Contra Account, Currency Profit, Tax Related Difference

4.2.1 OVERVIEW PROCESS

4.3 Prerequisites

The company must be set-up to use Polish localization, see the [Company Set Up](#) chapter. The parameter “Reposting of Currency Difference on Tax” should be enabled.

4.4 Define Basic Data

Follow the IFS Cloud standard process to define basic data:

- In the **Payment Terms** page, define payment terms. Note that the value selected in the **Tax Distribution** field affects the calculation logic.
- In the **Posting Control** page, make sure to have standard posting types PP12 and PP13 defined.

4.4.1 NEW POSTING TYPES

New posting types PP81, PP82, PP83 and PP84 are available in the *Posting Control* page.

- PP81 - Currency Loss, Tax Related Difference
- PP82 - Contra Account, Currency Loss, Tax Related Difference
- PP83 - Currency Profit, Tax Related Difference
- PP84 - Contra Account, Currency Profit, Tax Related Difference

The new posting types are used according to the following rules:

In case of PP12 Currency Loss (debit)

- PP81 is used to repost currency difference related to deductible tax amount (debit)
- PP82 is used to clear currency difference related to deductible tax amount from PP12 account (credit)

In case of PP13, Currency Profit (credit)

- PP83 is used to repost currency difference related to deductible tax amount (credit)
- PP84 is used to clear currency difference related to deductible tax amount from PP13 account (debit)

Follow the IFS Cloud standard process to define new posting types in the **Posting Control** page.

4.5 Enter Supplier Invoice/Create and Print Customer Invoice

Follow the IFS Cloud standard process to enter foreign currency supplier invoices.

Follow the IFS Cloud standard process to create and print foreign currency customer invoices.

4.6 Enter and Approve Payment

Follow the IFS Cloud standard process to enter and approve payment in the **Mixed Payment** page or **other payment** page.

Amounts to be reposted with the new posting types depend on the tax distribution.

Tax Distribution	Installment ID	Reposting Logic
Even	All	Amount to be reposted considers deductible tax as evenly distributed on all installments.
First Installment only Tax	1	Amount to be reposted considers deductible tax as fully included in the first installment.
First Installment only Tax	Other than 1	No amount is reposted.
All Tax on First Installment	1	Amount to be reposted considers deductible tax as fully included in the vat portion of the first installment.
All Tax on First Installment	Other than 1	No amount is reposted.

Example 1: Tax distribution “Even” and currency loss calculated

Invoice type	customer invoice
Net amount	100
Deductible tax amount	23
Currency rate at invoice entry	4
Currency rate at payment	3.5
Payment Posting Method field on the Company/Payment/General tab	Gross
Currency difference	$(123 * 4) - (123 * 3.5) = 492 - 430.50 = 61.50$
Currency difference related to net	$61.50 * (100/123) = 61.50 * 0.81300813 = 50$
Currency difference related to tax	$61.50 - 50 = 11.50$

Purple color: New posting types.

Green color: Net balance on the currency different account.

PP84, Contra Account, Currency Profit, Tax Related Difference				PP83, Currency Profit, Tax Related Difference				
						0,00 USD (4,5)	11,50	(2) Additional

4.7 Delimitations

When specific tax currency rates are enabled for the company, and the tax code used for the transaction has tax method as payment entry, the tax currency difference is handled through PP61 (Tax Currency Loss) /PP62 (Tax Currency Profit) postings in core application. In that case, if any duplication of entries arises with the above functionality, those have not been specifically handled.

Additional delimitations may apply; all relevant flows should be tested to ensure completeness.

5 Currency Rate Date and Voucher Date Extended Capabilities for Outgoing Invoices

5.1 Overview Legal Requirements

According to legal regulations in countries like Hungary, Czech Republic, Slovakia or Poland, date of posting of debit sales invoices, as well as currency rates used for posting, should be based either on invoice date or on delivery date, depending on type of transaction.

Also, according to legal regulations in Poland, prepayment based invoices should be posted with the date of the payment which is the base for the invoice.

5.2 Solution Overview

Process Overview

Standard invoicing flow is used in the solution:

Solution Summary

New field **Delivery Date** is added to handle delivery dates on project invoices.

Handling of default value of the **Latest Ship Date** field on prepayment based invoices is modified, so that payment date could be the base for posting of the invoice.

New fields **Voucher Date Base**, **Currency Rate Base** and **Tax Currency Rate Base** are added to define base for voucher date, currency rate and tax currency rate for invoices. The fields are added on customer order invoices, instant invoices and project invoices. Either invoice date or delivery date can be the base for voucher date and currency rates.

New fields are added on company and customer level as sources of default values for new fields on invoices mentioned above.

5.3 Prerequisites

The company must be set-up to use Polish localization, see the [Company Set up](#) chapter and the “Currency Rate Date and Voucher Date Extended Capabilities for Outgoing Invoices” parameter must be enabled on the **Company/Localization Control Center** tab.

5.4 Set up Basic Data

Settings on Company level

New field **Outgoing Invoice Voucher Date Base** is added on the **Company/Invoice/General** tab. Available values are: “Invoice Date” and “Delivery Date”.

Attachments

New field **Tax Sell Currency Rate Base** is added in the **Company/Accounting Rules/Currency Rate Type Information** tab. The field is enabled when the **Allow Specific Currency Rates for Tax Transactions** option is enabled. Available values are “Invoice Date” and “Delivery Date”.

Accounting Rules SW-PL - SW-PL 1 of 1

Company: SW-PL, Name: SW-PL, Association No: , Created By: SASGLK

GENERAL DATA | **CURRENCY RATE TYPE INFORMATION**

Default Buy Currency Rate Type: 1 - Normal
 Default Sell Currency Rate Type: 1 - Normal

Default Currency Rate Types for TAX

Allow Specific Currency Rates for Tax Transactions:

Buying Currency Rate for Tax: 1 - Normal
 Selling Currency Rate for Tax: 1 - Normal

Tax Sell Currency Rate Base: **Delivery Date**
 Delivery Date
 Invoice Date
 Delivery Date

Note: Apart from new fields mentioned above, the standard **Outgoing Invoice Currency Rate Base** field on the **Company/Invoice/General** tab is used in this solution and it has to be set according to the needs.

Settings on Customer level

Following fields are added on **Customer/Address/Delivery Tax Information** tab: **Voucher Date Base**, **Currency Rate Base**, **Tax Currency Rate Base**. Available values for these fields are “Invoice Date”, “Delivery Date” and “Specified on Company”.

The screenshot displays the 'Address' configuration page for 'CUSTOMER SWPL - CUSTOMER SWPL'. The 'DELIVERY TAX INFORMATION' tab is selected. The 'Currency Rate Base' is set to 'Delivery Date' and the 'Tax Currency Rate Base' is set to 'Invoice Date'. The 'Voucher Date Base' dropdown menu is open, showing options: 'Specified on Company' (selected), 'Invoice Date', 'Delivery Date', and 'Specified on Company'.

5.5 New Fields on Invoices

Customer Order Invoice

New fields: **Voucher Date Base**, **Currency Rate Base** and **Tax Currency Rate Base** are added on **Customer Invoice/General** tab. Available values for these fields are “Invoice Date” and “Delivery Date”.

Note: In customer order invoice the **Latest Ship Date** field plays role of delivery date. “Delivery Date” setting means that value of the **Latest Ship Date** field will be taken as a base for voucher date or currency rate.

The **Currency Rate** and **Tax Currency Rate** fields are based on value of either the **Invoice Date** or **Latest Ship Date** fields, depending on setting of the **Currency Rate Base** and **Tax Currency Rate Base** fields.

5.6 Process Invoices

General

New functionality to define the base for voucher date and currency rates is added for following types on invoices:

- Customer order invoices – normal debit invoices (invoice type CUSTORDDEB), collective debit invoices (invoice type CUSTCOLDEB) and prepayment based debit invoices.
- Instant invoices – normal instant debit invoices (invoice type INSTINV).
- Project invoices – debit invoices (invoice type PRJINV).

For all other invoices currency rates and voucher date are handled in a standard way. In particular for correction invoices, as well as for credit customer order and project invoices, the **Voucher Date Base**, **Currency Rate Base** and **Tax Currency Rate Base** fields are always set to hidden.

Create Invoice

When debit customer invoice (customer order invoice, instant invoice, and project invoice) is created then the **Voucher Date Base**, **Currency Rate Base** and **Tax Currency Rate Base** fields get default values based on settings on customer level. Fields which are set to “Specified on Company” on customer level get values based on settings on company level.

Note: When the **Currency Rate Base** field on customer level is set to “Specified on Company” then the **Currency Rate Base** field on invoices for this customer will get default value based on setting of the standard **Outgoing Invoice Currency Rate Base** field for company.

When prepayment based invoice is created then the **Latest Ship Date** field gets default value equal to date of payment. In standard solution this field is empty when invoice is created.

Modify Invoice

Values of the **Voucher Date Base**, **Currency Rate Base** and **Tax Currency Rate Base** fields can be modified when debit invoice is in the “Preliminary” state with following exceptions:

- The **Tax Currency Rate Base** field can be modified only when the **Allow Specific Currency Rates for Tax Transactions** option for company is enabled.
- On instant invoice the **Currency Rate Base** and the **Tax Currency Rate Base** fields can be modified only before invoice line is entered.

Whenever the **Currency Rate Base** or the **Tax Currency Rate Base** fields get modified, values in the **Currency Rate** or the **Tax Currency Rate** fields are updated accordingly.

Print and Post Invoice

When invoice gets printed then it will be posted with voucher date based on value in the **Voucher Date Base** field. If the **Voucher Date Base** field is set to “Invoice Date” then voucher date will be equal to value of the **Invoice Date** field. If the **Voucher Date Base** field is set to “Delivery Date” then voucher date will be equal to value of the **Delivery Date** field (or the **Latest Ship Date** field in customer order invoice).

Note: Value of the **Voucher Date Base** field has no impact on voucher date of invoices in following cases:

- When invoice is printed from the **Print Invoice** page with the **Use Voucher Date** option enabled.
- When invoice is processed from the **Customer Invoices with Errors** page with the **Use Voucher Date** option enabled.
- When invoices are processed from the **Create Collective Vouchers** page.

5.7 Delimitations

- Manual customer invoices are not handled.
- Outgoing supplier invoices are not handled.

Additional delimitations may apply; all relevant flows should be tested to ensure completeness.

6 Discounted Price Rounding (moved to generic functionality)

The functionality Discounted Price Rounding is removed as a country specific functionality. This is now available as a **generic functionality** through the system toggle “**Use Discounted Price Rounding**” in Company Settings. Information and more details can be found in the supply chain News presentation for the IFS Cloud 25R2.

7 Specific Data for Customer Invoice Reports

7.1 Overview Legal Requirement

The invoice layouts released with IFS Cloud standard version meet all the legal requirements for Poland. There are some additional data which are typically printed on the invoices generated by Polish companies that does not exist in the standard layouts.

7.2 Solution

The additional data fields are added to customer invoice report definition files (.RDF). This allows to define new invoice report layouts according to requirements from Poland. Example data added are company addresses, company tax id, information regarding VAT and gross amount. Also, some changes in the existing functionality, e.g., presenting delivery address on collective invoices. New Tax Character field is added to the **Tax Codes** page to group the tax types.

The following invoices reports are affected:

- Customer Order Invoice
- Customer Order Collective Invoice
- Prepayment Based Invoice
- Instant Invoice

Note

Generated xml file can be extracted from the **Print Manager** page. Select the relevant report **RMB**, “*save xml Data*” will facilitate you to download xml to the local machine.

The major changes are:

- Company payment and document addresses are added to the report header
- Tax amount and gross amount are added to the report lines
- Company Tax ID is presented differently depending on whether the goods are delivered to a domestic or a foreign customer
- Translatable texts TF or NT are added to invoice line depending on tax character attribute of tax code (in Polish ZW, NP).
- Customer delivery address is added to the header of the collective invoice report when the address is the same on all the invoiced orders. Otherwise, it will be presented in each invoice line separately

7.3 Prerequisites

The company must be set-up to use Polish localization, see the [Company Set up](#) chapter and the “Specific Data for Customer Invoice Reports – Poland” parameter must be enabled.

7.4 Set Up Basic Data Accounting Rules

The new column Tax Character is added to the **Tax Codes** page. The allowed values are “Normal”, “Tax Free”, “No Tax” and “Export”. The value is set to “Normal” by default.

Tax Codes											
☰ ▼ 📄 + ✎ 🗑️ 📄 🔊 ▼ Tax Texts per Tax Code Copy to Companies Translation 📄 ▼											
(1)	:	(%)	Deductible (%)	Valid From	Valid To	Tax Method Tax Received	Tax Method Tax Disbursed	Tax Amount at Invoice Printout	Tax Amount Limit in Accounting Currency	Tax Reporting Category	Tax Character
<input type="checkbox"/>	:	0	100	1/1/2020	12/31/2049	No Tax	No Tax	Separate from Price		None	No Tax
<input checked="" type="checkbox"/>	:	0	100	1/1/2020	12/31/2049	Invoice Entry	Invoice Entry	Separate from Price		None	Normal
<input type="checkbox"/>	:	23	100	1/1/2020	12/31/2049	Invoice Entry	Invoice Entry	Separate from Price		None	Normal
<input type="checkbox"/>	:	23	100	1/1/2020	12/31/2049	Invoice Entry	Invoice Entry	Separate from Price		None	Normal
<input type="checkbox"/>	:	23	100	1/1/2020	12/31/2049	Invoice Entry	Invoice Entry	Separate from Price		None	Normal
<input type="checkbox"/>	:	5	100	1/1/2020	12/31/2049	Invoice Entry	Invoice Entry	Separate from Price		None	Normal
<input type="checkbox"/>	:	5	100	1/1/2020	12/31/2049	Invoice Entry	Invoice Entry	Separate from Price		None	Normal
<input type="checkbox"/>	:	5	100	1/1/2020	12/31/2049	Invoice Entry	Invoice Entry	Separate from Price		None	Normal

The ‘No Tax’ value is allowed only for tax codes with Tax Type set to ‘No Tax’ or ‘Calculated Tax’.

The ‘Tax Free’ and ‘Export’ values are allowed for tax codes with 0% tax rate and with Tax Type different than ‘No Tax’.

This function is used when printing customer invoices. When the value is either ‘Tax Free’ or ‘No Tax’, a report text ‘TF’ or ‘NT’ can be printed instead of the tax rate (in Polish ZW, NP).

7.5 Print Customer Orderdebit Invoice

New fields have been added to the standard report data, and existing ones have been changed to comply with the requirement. Specific changes for other invoice types are described in the next chapters of the document.

File modified: ORDER/CustomerOrderIvc.rdf

Report Fields Added

- Company Addresses - Company payment address is included in the report header.

XML tags: COMPANY_PAY_ADDR_1 until COMPANY_PAY_ADDR_7 is used for company payment address.

Here is a company payment address:

```

<COMPANY_PAY_ADDR_1>Braty i kompany</COMPANY_PAY_ADDR_1>
<COMPANY_PAY_ADDR_2>Karpelowka 414</COMPANY_PAY_ADDR_2>
<COMPANY_PAY_ADDR_3>34-511 - Kościelisko</COMPANY_PAY_ADDR_3>
<COMPANY_PAY_ADDR_4>PL - POLSKA</COMPANY_PAY_ADDR_4>
<COMPANY_PAY_ADDR_5 xsi:nil="1"/>
<COMPANY_PAY_ADDR_6 xsi:nil="1"/>
<COMPANY_PAY_ADDR_7 xsi:nil="1"/>

```

- Company Tax Identity Number - Company Tax Identity Number (NIP) is added to invoice header. The value is fetched from the Tax ID Number column on the **Company/Tax Control/Invoice** tab. The tax identity number consists of ten digits separated with dashes, e.g., 123-456-78-90. It should always be registered in the system with 'PL' prefix, e.g., PL123-456-78-90. The prefix or the dashes are removed from entered value depending on the country defined in a customer delivery address settings.
- If the country is Poland or the country is not marked as EU member, then the 'PL' prefix is removed from registered tax identity, e.g., 123-456-78-90
- If the country is different than Poland and is marked as EU member, then the dashes are removed from registered tax identity, e.g., PL1234567890

XML tag: COMP_TAX_ID_NUMBER

```
<COMP_TAX_ID_NUMBER>1112223344</COMP_TAX_ID_NUMBER>
```

- Tax Amount and Gross Amount - New columns – Tax Amount and Gross Amount – have been added to the invoice line. The values are retrieved from an invoice item.

XML tags: LINE_VAT_AMOUNT, LINE_GROSS_AMOUNT

```
<LINE_VAT_AMOUNT>354.2</LINE_VAT_AMOUNT>
<LINE_GROSS_AMOUNT>1894.2</LINE_GROSS_AMOUNT>
```

- Tax Character – New column has been added to invoice line and tax totals. Value from this column can be used to print tax free or no tax information ("ZW" or "NP" in Polish) instead of tax rate 0%.
 - o **Tax Character Tax Free:** a translatable report text 'TF' is presented
 - o **Tax Character No Tax:** a translatable report text 'NT' is presented

XML tag: TAX_CHARACTER

```
- <INVOICE_LINE>
  <TAXABLE>0</TAXABLE>
  <NOTE_TEXT xsi:nil="1"/>
  <LOT_BATCH_NO xsi:nil="1"/>
  <SERIAL_NO xsi:nil="1"/>
  <LINE_NO>3</LINE_NO>
  <PREPAY_INV_NO xsi:nil="1"/>
  <PREPAY_INV_SERIES_ID xsi:nil="1"/>
  <TAX_CHARACTER>TF</TAX_CHARACTER>
  <ORDER_LINE_POS>3</ORDER_LINE_POS>
```

- Signatures - Two new fields for the signatures of seller and buyer are added at the end of the report.

New report text PURCHSIGN and SELLSIGN are defined.

```
<PURCHSIGN>Purch Sign</PURCHSIGN>
```

```
<SELLSIGN>Sell Sign</SELLSIGN>
```

Report Fields Changed

- Totals and Tax Totals sections - The sections which present the information total invoice amount and total amount per tax code have been redesigned. The column labels have been removed from the tax totals sections and the required data (Price – Tax Base Amount, Tax Rate, Net Amount and Gross Amount) are presented in the proper report line columns.

XML tag: TAX_AMOUNT, SHOW_SUB_TOTAL_ITEMS

```
- <SUB_TOTAL_ITEMS>
  - <SUB_TOTAL_ITEM>
    <FEE_AMOUNT>0</FEE_AMOUNT>
    <SUB_TOTAL_AMOUNT>1000</SUB_TOTAL_AMOUNT>
    <SUB_TOTAL_INCL_TAX>1230</SUB_TOTAL_INCL_TAX>
    <TAX_AMOUNT>230</TAX_AMOUNT>
    <SHOW_SUB_TOTAL_ITEMS>FALSE</SHOW_SUB_TOTAL_ITEMS>
  </SUB_TOTAL_ITEM>
</SUB_TOTAL_ITEMS>
```

7.6 Print Customer Order correction Invoice

According to legal requirements, the correction invoice contain information based on the original invoice lines (retrieved for the corresponding debit invoice).

The Tax Totals section should not be shown in the Invoice before Correction section anymore. Only one Tax Totals section presenting the information about the final correction amount per tax code is shown at the end of the report.

File modified: ORDER/CustomerOrderIvc.rdf

7.7 Print Customer Order collective invoice

In IFS Cloud standard version, customer delivery addresses are always printed for each invoice line separately. The Polish requirement states that the delivery address should be printed in the report header when the goods have been delivered with the same delivery address. When printing collection invoices, the system checks if a delivery address registered on all the invoiced customer order headers is the same. If it is, then the address is presented in the header part of the report in the same way like on debit invoices. Otherwise, it is handled as in standard: no information will be presented in the header; the corresponding delivery addresses is present in the report data for each invoice line.

Note: If the delivery address is specific for customer order lines (which are not marked as Default) it is handled as an exception and is always presented under invoice line regardless of the mentioned validation.

File modified: ORDER\CustomerOrderCollvc.rdf

7.8 Print Prepayment Based Debit/Credit Invoice

New fields have been added to the standard report layout and existing fields have been changed, very similar to the customer order debit invoice:

- Company addresses and company tax id are added to the report header.
- Value printed in Tax Rate column depend on the Tax Character settings.

Also, the **Prepayment Invoice Lines** and **Order Information** sections which are shown in the report details are redesigned. The existing logic for fetching the required data is not affected.

File modified: ORDER\CustOrderPrepaymInvoice.rdf

```
comppayaddr1_);      Xml_Record_Writer_SYS.Add_Element(xml_,'COMPANY_PAY_ADDR_1',
comppayaddr2_);      Xml_Record_Writer_SYS.Add_Element(xml_,'COMPANY_PAY_ADDR_2',
```

```

comppayaddr3_);
    Xml_Record_Writer_SYS.Add_Element(xml_,'COMPANY_PAY_ADDR_3',
comppayaddr4_);
    Xml_Record_Writer_SYS.Add_Element(xml_,'COMPANY_PAY_ADDR_4',
comppayaddr5_);
    Xml_Record_Writer_SYS.Add_Element(xml_,'COMPANY_PAY_ADDR_5',
comppayaddr6_);
    Xml_Record_Writer_SYS.Add_Element(xml_,'COMPANY_PAY_ADDR_6',
comppayaddr7_);
    Xml_Record_Writer_SYS.Add_Element(xml_,'COMPANY_PAY_ADDR_7',
    Xml_Record_Writer_SYS.Add_Element(xml_,'COMPANY_ADDR_1', compaddr1_);
    Xml_Record_Writer_SYS.Add_Element(xml_,'COMPANY_ADDR_2', compaddr2_);
    Xml_Record_Writer_SYS.Add_Element(xml_,'COMPANY_ADDR_3', compaddr3_);
    Xml_Record_Writer_SYS.Add_Element(xml_,'COMPANY_ADDR_4', compaddr4_);
    Xml_Record_Writer_SYS.Add_Element(xml_,'COMPANY_ADDR_5', compaddr5_);
    Xml_Record_Writer_SYS.Add_Element(xml_,'COMPANY_ADDR_6', compaddr6_);
    Xml_Record_Writer_SYS.Add_Element(xml_,'COMPANY_ADDR_7', compaddr7_);
    Xml_Record_Writer_SYS.Add_Element(xml_,'OUR_REF', header_rec_.authorize_name);

    Xml_Record_Writer_SYS.Add_Element(xml_,'COMPANY_VAT_NO', company_tax_no_);
    Xml_Record_Writer_SYS.Add_Element(xml_,'CUSTOMER_VAT_NO',
customer_tax_no_);

    Xml_Record_Writer_SYS.Add_Element(xml_,'TAX_CHARACTER',
Statutory_Fee_API.Get_Tax_Character_db(company_, inv_line_rec_.vat_code));

```

7.9 Print Instant invoice

The changes are similar as for customer order debit invoice. The only exception is the customer order information since they do not exist on the instant invoices (Delivery Term, Ship Via, CO Number, Customer's PO No, Delivery Note Number etc.).

File modified: INVOIC\InstantInvoice.rdf

TAX_CHARACTER
CUSTOMER_VAT_NO_PL

COMP_PAY_ADDR_1
COMP_PAY_ADDR_2
COMP_PAY_ADDR_3
COMP_PAY_ADDR_4
COMP_PAY_ADDR_5
COMP_PAY_ADDR_6
CURRENCY_CODE

7.10 Delimitations

No invoice print layouts are modified. It is only the RDF files that are changed. The RDL files (Report layout) are modified in each implementation project.

8 Round VAT Amount for Supplier Invoices in Accounting Currency

8.1 Overview Legal Requirement

In Poland VAT is rounded to 0 decimals in customs documents. Due to art. 33a of Tax law, when using simplified procedure for importing goods, tax disbursed is reported in VAT Declaration. Therefore, when customs document is registered as supplier invoice, Calculated Tax functionality is used in order to have both tax disbursed and tax received. It is not possible in that case to adjust tax amount manually.

8.2 Solution

The following is added to support this requirement:

- Possibility to set up rounding to 0 decimals for a specific tax code of type “Calculated Tax”.
- Rounding of tax amount is performed in the Preliminary Supplier Invoice and Manual Supplier Invoice pages.

PROCESS OVERVIEW

8.3 Prerequisites

The company must be set-up to use Polish localization, see the [Company Set up](#) chapter and the “Round VAT Amount for Supplier Invoices in Accounting Currency” parameter must be enabled.

8.4 Define Basic Data

Open the **Tax Codes** page and select the **Round to 0 Decimals** check box for tax codes which are used when customs documents are registered as supplier invoices.

Tax Codes							
<input type="checkbox"/> Tax Texts per Tax Code <input type="button" value="Copy to Companies"/> <input type="button" value="Translation"/>							
Tax Code ▾ Description ▾ Tax Type ▾ More ▾ <input type="checkbox"/> Favorites Clear Q <input type="checkbox"/> Settings							
<input checked="" type="checkbox"/>	:	Tax Code	Description	Round to 0 Decimals	Tax Type	Tax (%)	Deductible (%)
<input type="checkbox"/>	:	IM-PU0	Import of goods, simplified procedure, 0%	No	Calculated Tax	0	100
<input checked="" type="checkbox"/>	:	IM-PU23	Import of goods, simplified procedure, 23%	Yes	Calculated Tax	23	100
<input type="checkbox"/>	:	IM-PU23B	Import of goods, simplified procedure, 23%	No	Calculated Tax	23	100
<input type="checkbox"/>	:	IM-PU23S	Import of goods, simplified procedure, 23%	No	Calculated Tax	23	100
<input type="checkbox"/>	:	IM-PU5	Import of goods, simplified procedure, 5%, v	No	Calculated Tax	5	100
<input type="checkbox"/>	:	IM-PU5B	Import of goods, simplified procedure, 5%, v	No	Calculated Tax	5	100
<input type="checkbox"/>	:	IM-PU5S	Import of goods, simplified procedure, 5%, c	No	Calculated Tax	5	100
<input type="checkbox"/>	:	IM-PU8	Import of goods, simplified procedure, 8%, v	No	Calculated Tax	8	100

Note that it is only possible to select this check box for tax code of type “Calculated Tax” with tax received method “Invoice Entry” or “Final Posting” and deductible percentage set to 100. As customs documents are always registered in PLN, only supplier invoices in accounting currency are affected by this functionality.

8.5 Enter Supplier Invoice

Follow the IFS Cloud standard process to register supplier invoice via the Preliminary Supplier Invoice or Manual Supplier Invoice pages. Use tax code with the **Round to 0 Decimals** check box selected.

8.6 Post Invoice

Follow the IFS Cloud standard process to post the invoice.

8.7 View Vouchers

Follow the IFS Cloud standard process.

Follow the IFS Cloud standard process to view voucher. Tax amount posted on IP9 and IP10 posting types is rounded to 0 decimals.

Voucher Rows										
✓	:	✎	Action	Trans Code	Currency Debit Amount	Currency Credit Amount	Currency Amount	Currency Rate	Conversion Factor	Accounting Currency
<input type="checkbox"/>	:	✎		IP5	139.00		139.00	1	1	PLN
<input type="checkbox"/>	:	✎		IP1		139.00	-139.00	1	1	PLN
<input type="checkbox"/>	:	✎		IP10		32.00	-32.00	1	1	PLN
<input type="checkbox"/>	:	✎		IP9	32.00		32.00	1	1	PLN

In the example above net amount = 139.00 PLN, Tax % = 23% so tax amount is calculated in the following way: round (139.00 * 0.23, 0) = round (31.97, 0) = 32.00.

8.8 Delimitations

No known.

9 Polish Split Payment

9.1 Overview Legal Requirement

In July 2018 split payment model was introduced in Poland.

- This model introduces additional VAT bank account for every company. The new bank account is created in the same bank where the company has its regular bank account. The access to the new bank account is limited.
- When sending payment instruction to the bank, company can indicate that payment is to be made in the split payment model. This requires including additional details, that is, VAT amount, VAT identification number of the supplier and invoice number.
- When bank (of the paying party) receives split payment instruction
 - VAT amount is reposted from VAT account to regular account.
 - Full payment amount is transferred to another bank according to the payment instruction.
- When bank (of the receiving party) receives split payment instruction
 - Full payment amount is posted to regular account.
 - VAT amount is reposted from regular account to VAT account.
- The model is optional. However, if company receives payments via split payment model it is forced to use this model also when sending payments since otherwise money will be blocked on VAT bank account.
- Split payment instruction can only be used when paying in PLN and from bank account in PLN.
- Split payment instruction must be created separately for each invoice.

Split Payment functionality is required for invoices in the accounting currency as well as for invoices in the foreign currency.

- In case of invoice in the accounting currency, either whole invoice or just VAT is paid in the Split Payment model.
- In case of invoice in the foreign currency, payment instruction must still be created in PLN according to the Split Payment legislation. Therefore, in this scenario, only VAT is assumed to be paid in PLN (with tax currency rate from the invoice). Net amount is to be paid in the foreign currency, that is, according to standard functionality.

9.2 Process Overview

9.2.1 PROCESS OVERVIEW-PAYMENT TO SUPPLIER FOR THE INVOICES IN ACCOUNTING CURRENCY

9.2.2 PROCESS OVERVIEW – REPAYMENT TO CUSTOMER FOR THE INVOICES IN ACCOUNTING CURRENCY

9.2.3 PROCESS OVERVIEW - PAYMENT TO SUPPLIER FOR THE INVOICES IN FOREIGN CURRENCY

9.3 Solution Overview

9.3.1 SOLUTION FOR INVOICES IN THE ACCOUNTING CURRENCY

Solution is based on the First Installment only Tax functionality of payment terms (standard functionality). All invoices that are to be paid with split payment instruction must use payment terms with this setup.

In addition, the following has been changed to support the requirement for invoices in the accounting currency:

- New column and new field are introduced in the basic data for payment institutes so that it is possible to indicate that payment instruction should be created in the split payment variant.
- PLBREPLN and ISO20022 payment formats are adjusted to handle split payment.

This functionality is available for supplier payment order flow and customer repayment order flow.

9.3.2 SOLUTION FOR INVOICES IN THE FOREIGN CURRENCY

The following has been additionally changed to support the requirement for invoices in the foreign currency:

- New column and new field are introduced in the basic data for payment institutes so that it is possible to indicate whether tax installment from foreign currency invoice should be paid in the accounting currency.
- When creating payment order, selection rules related to currency are changed.
- New columns are introduced in the payment order and acknowledge payment to indicate tax installment paid in the accounting currency and currency of the invoice.
- PLBREPLN and ISO20022 payment formats are adjusted to handle tax installment of foreign currency invoice paid in the accounting currency.

This functionality is available only for supplier payment order flow.

9.4 Prerequisites

The company must be set-up to use Polish localization, see the [Company Set-Up](#) chapter. The parameter “Polish Split Payment” should be enabled.

9.5 Define Basic Data for Basic Solution for Invoices in the Accounting Currency

Follow the IFS Cloud standard process to define basic data:

- In the **Format Specific Info per Institute** page (available from **Payment Institutes** page, **Payment Methods per Institute** command, **Format Specific Info per Institute** command) setup payment formats details as required by the bank. In case of ISO20022 format, make sure not to select the **Structured Payment** option.
- In order to handle payment to supplier, in the **Payment Addresses** page (available from the **Supplier/Payment** tab, **Electronic Payment Addresses** command) setup payment format details as required by the bank.
- In order to handle repayment to customer, in the **Payment Addresses** page (available from the **Customer/Payment** tab, **Electronic Payment Addresses** command) setup payment format details as required by the bank.
- In the **Payment Terms** page, define payment term with “First Installment only Tax” selected in the **Tax Distribution** field. Use this payment term when entering/creating invoices within this process.

9.5.1 SETUP SPLIT PAYMENT FOR INVOICES IN THE ACCOUNTING CURRENCY

9.5.1.1 PLBREPLN format (BRE Bank/mBank)

For PLBREPLN format, the **Split Payment** field is added to the **Format Specific Info per Institute** page (available from **Payment Institutes** page, **Payment Methods per Institute** command, **Format Specific Info per Institute** command).

Use this field to setup split payment. The following options are available:

- Not Used
- Optional

- Mandatory

See chapter [Split payment options](#) for description of the options.

The screenshot shows the 'Format Specific Information per Institute - BRE - BREPLN' page. The 'Format ID' is 'PLBREPLN'. The 'Split Payment' field is highlighted with a purple box and is set to 'Optional'. There is also a 'Use Acc Curr for Tax Installment' toggle switch which is turned on.

9.5.1.2 ISO20022 format

For ISO20022 format, the **Split Payment** field is added to the *Format Specific Info per Institute* page (available from **Payment Institutes** page, **Payment Methods per Institute** command, **Format Specific Info per Institute** command).

Use this field to setup split payment. The following options are available:

- Not Used
- Optional
- Mandatory

See chapter [Split payment options](#) for description of the options.

The screenshot shows the 'Format Specific Information per Institute - BANK - ISO20022' page. The 'Polish Split Payment Parameters' section is highlighted with a purple box and shows the 'Split Payment' field set to 'Optional'. There is also a 'Use Acc Curr for Tax Installment' toggle switch which is turned on. The page includes various sections like 'Initiating Party Identification Information', 'Debtor/Division Identification Information', 'Payment Parameters', and 'Credit Notes Grouping For Structured Payment'.

9.5.1.3 Split payment options

The following options are available for split payment:

- Not Used
 - Standard payment instruction is created.
- Optional
 - Split Payment instruction is created for invoices with “First Installment only Tax” setup as long as first installment is included in the payment order.
 - Other payment transactions can be included in the same payment order.
- Mandatory
 - Only invoices with “First Installment only Tax” setup can be included in the payment order.
 - If first installment of the invoice is included, split payment instruction is created.
 - If first installment of the invoice is not included, standard payment instruction is created for other installments.
 - Other payment transactions cannot be included in the same payment order.
 - This option makes it possible to setup the system so that all payments to unreliable supplier are handled via split payment method.

9.6 Define Basic Data for Solution for Invoices in the Foreign currency

9.6.1 SETUP SPLIT PAYMENT FOR INVOICES IN THE FOREIGN CURRENCY

9.6.1.1 PLBREPLN format (BRE Bank/mBank)

For PLBREPLN format, the **Use Acc Curr for Tax Installment** field is added to the **Format Specific Info per Institute** page (available from **Payment Institutes** page, **Payment Methods per Institute** command, **Format Specific Info per Institute** command). Select this option in order to pay tax installment, that is, first installment of the invoice with “First Installment only Tax” setup, in the accounting currency.

Also select value in the **Split Payment** field in the similar way as for invoices in the accounting currency.

Format ID	Split Payment	Use Acc Curr for Tax Installment
PLBREPLN	Optional	<input checked="" type="checkbox"/>

9.6.1.2 ISO20022 format

For ISO20022 format, the **Use Acc Curr for Tax Installment** field is added to the **Format Specific Info per Institute** page (available from **Payment Institutes** page, **Payment Methods per Institute** command, **Format Specific Info per Institute** command). Select this option in order to pay tax installment, that is, first installment of the invoice with “First Installment only Tax” setup, in the accounting currency.

Also select value in the **Split Payment** field in the similar way as for invoices in the accounting currency.

The screenshot displays the 'Format Specific Information per Institute - BANK - ISO20022' configuration page. The page is divided into several sections:

- File Template:** CORE, XML Schema Version: 001.001.03
- Initiating Party Identification Information:** Includes fields for BICorBEI, Initiating Party ID, and Repeat in Debtor Identification Level (toggle).
- Debtor/Division Identification Information:** Includes fields for Debtor/Division ID, Repeat in Initiating Party Identification Level (toggle), and Hide From Debtor Level (toggle).
- Initiating Party Identification Scheme Name:** Includes Code, Proprietary, and Issuer fields.
- Debtor/Division Identification Scheme Name:** Includes Code, Proprietary, and Issuer fields.
- Payment Parameters:** Includes Charge Bearer Level, Payment Type Info Level, Create Separate Payment Information per Current (toggle), Detailed Postal Address (toggle), Batch Booking (toggle), and Structured Payment (toggle).
- Credit Notes Grouping For Structured Payment:** Includes Maximum Occurrences, Allow Credit Grouping for Non-SEPA Payments (toggle), and Allow Credit Grouping for SEPA Payments (toggle).
- Polish Split Payment Parameters:** (Highlighted with a purple box) Includes Split Payment (Optional) and Use Acc Curr for Tax Installment (toggle, turned on).

9.7 Details of Basic Solution for Invoices in the Accounting Currency

9.7.1 ENTER SUPPLIER INVOICE

Follow the IFS Cloud standard process to enter supplier invoice.

Make sure to enter invoice in “PLN”. Also make sure to use payment terms with “First Installment only Tax” specified in the **Tax Distribution** field.

9.7.2 CREATE SUPPLIER PAYMENT PROPOSAL

Follow the IFS Cloud standard process to create and acknowledge supplier payment proposal.

9.7.3 CREATE SUPPLIER PAYMENT ORDER

Follow the IFS Cloud standard process to create supplier payment order.

9.7.3.1 PLBREPLN format

The screenshot shows the 'New Payment Order' dialog box. The 'Payment Method' dropdown is highlighted with a red box and contains the text 'BREPLN - BRE domestic format in PLN'. Other fields include 'Selected Proposals' (5), 'Payment Institute' (BRE - BRE Bank in Poland), and 'Currencies' (PLN).

Note split payment details in the output file for PLBREPLN format

- VAT amount after “/VAT/”
- Supplier tax identity number after “/IDC/”
- Invoice number after “/INV/”
- Optional text after “/TXT/”
- “53” instruction (instead of standard “51”)

The screenshot shows a Notepad window titled 'BREPLN.DAT - Notepad'. The text content is:

```
D/Add Add2/ZIP city","CH-SUPPLIER1/Add 01 Add 02/ZIP City/",0,18300004,"/VAT/230,00/IDC/123456X1/INV/08/01-|01/TXT/||","","","53" ""
D/Add Add2/ZIP city","CH-SUPPLIER1/Add 01 Add 02/ZIP City/",0,18300004,"/VAT/230,00/IDC/123456X1/INV/08/01-|02/TXT/||","","","53" ""
```

 The two lines of text are highlighted with red boxes, and the '53' instruction in each line is also highlighted with red boxes.

Also note the following

- In the standard version, PLBREPLN format creates single payment instruction for each payment proposal item.
- In case of split payment instruction this logic is changed so that single payment instruction is created per invoice.

9.7.3.2 ISO20022 format

The screenshot shows the 'New Payment Order' dialog box. The 'Payment Method' dropdown is highlighted with a red box and contains the text 'ISO20022 - ISO 20022 Payments'. Other fields include 'Selected Proposals' (4), 'Payment Institute' (BANK - Bank in Poland), and 'Currencies' (%).

Note split payment details in the output file for ISO20022 format (unstructured variant)

- <Prtry> tag
 - “SPLT”
- <Ustrd> tag
 - VAT amount after “/VAT/”
 - Supplier tax identity number after “/IDC/”
 - Invoice number after “/INV/”
 - Optional text after “/TXT/”

```

</RmtInf>
</CdtTrfTxInf>
</PmtInf>
</CstmrCdtTrfInitn>
</Document>

```

Also note the following

- In the standard version, unstructured ISO20022 format creates common payment instruction for multiple invoices from the same supplier.
- In case of split payment instruction this logic is changed so that single payment instruction is created per invoice.

9.7.4 CREATE AND PRINT CUSTOMER INVOICE

Follow the IFS Cloud standard process to create and print customer correction invoice with negative total amount.

Make sure to create invoice in “PLN”. Also make sure to use payment terms with “First Installment only Tax” specified in the **Tax Distribution** field.

9.7.5 CREATE CUSTOMER REPAYMENT PROPOSAL

Follow the IFS Cloud standard process to create and acknowledge customer repayment proposal.

9.7.6 CREATE CUSTOMER REPAYMENT ORDER

Follow the IFS Cloud standard process to create customer repayment order.

9.7.6.1 PLBREPLN format

Note split payment details in the output file for PLBREPLN format

- VAT amount after “/VAT/”
- Customer tax identity number after “/IDC/”
- Invoice series and number after “/INV/”
- Optional text after “/TXT/”
- “53” instruction (instead of standard “51”)

Also note the following

- In the standard version, PLBREPLN format creates single payment instruction for each payment proposal item.
- In case of split payment instruction this logic is changed so that single payment instruction is created per invoice.

9.7.6.2 ISO202222 format

✕ New Payment Order

Payment Order Information **●** Cash Accounts Information ○

Selected Proposals: 3

  </RmtInf>
</CdtTrfTxInf>
</PmtInf>
</CstmrCdtTrfInitn>
</Document>

```

Also note the following

- In the standard version, unstructured ISO20022 format creates common payment instruction for multiple invoices from the same customer.
- In case of split payment instruction this logic is changed so that single payment instruction is created per invoice.

9.8 Details of Solution for Invoices in the Foreign Currency

9.8.1 ENTER SUPPLIER INVOICE

Follow the IFS Cloud standard process to enter supplier invoice.

Make sure to enter invoice in the foreign currency. Also make sure to use payment terms with “First Installment only Tax” specified in the **Tax Distribution** field.

9.8.2 CREATE SUPPLIER PAYMENT PROPOSAL

Follow the IFS Cloud standard process to create and acknowledge supplier payment proposal.

9.8.3 CREATE SUPPLIER PAYMENT ORDER

Follow the IFS Cloud standard process to create supplier payment order.

9.8.3.1 Changed Selection Logic

When invoices are loaded into payment order, currencies specified in the **Currencies** field in the *Create Payment Order* dialog box affect selection of invoices into payment order.

The screenshot shows the 'New Payment Order' dialog box with the following fields and values:

- Selected Proposals:** 5
- Payment Method:** ISO20022 - ISO 20022 Payments
- Only Installments Specified with Default Payment Method:**
- Payment Institute:** BANK - Bank in Poland
- Currencies:** % (highlighted with a purple box)
- Payment Date:** (empty)
- Cash Account:** (empty)

Navigation buttons at the bottom: Previous, Next, Finish, Cancel.

In the standard system it is currency of the invoice that is considered in this process. This logic has been adjusted so that tax installment of the foreign currency invoice can be paid in the accounting currency.

The changed logic is the following:

- The **Currencies** field in the *Create Payment Order* dialog box indicates currency of the payment.
- If the **Use Acc Curr for Tax Installment** field in the basic data is not selected, invoices will be selected to the order as long as value of the **Currencies** field matches invoice currency. Same logic as in the standard system.
- If invoice included in the proposal has the **Tax Distribution** field set to value other than “First Installment only Tax”, it is selected to the order as long as value of the **Currencies** field matches invoice currency. Same logic as in the standard system.
- If invoice included in the proposal has the **Tax Distribution** field set to “First Installment only Tax”, net installments (Installment ID <> 1) are selected to the order as long as value in the **Currencies** field matches invoice currency. Same logic as in the standard system.
- If the **Use Acc Curr for Tax Installment** check box is selected and invoice included in the proposal has the **Tax Distribution** field set to “First Installment only Tax”, existing logic is changed for tax installment (Installment ID = 1)
 - Regardless currency of the invoice, installment is selected to the order only if accounting currency (PLN) is included in the selection specified in the **Currencies** field.

See example scenarios:

9.8.3.2 Create Supplier Payment Order – Cash Accounts

When payment order is created, cash accounts to be used for payment can be specified with respect to currency.

Currency	Cash Account
PLN	BANK-PLN - Bank PLN
USD	BANK-PLN - Bank PLN

In the standard system currencies displayed in the **Currency** column in the *Cash Accounts* dialog box correspond to currencies of the invoices included to the payment order. This logic has been adjusted to consider scenario when tax installment of the foreign currency invoice is paid in the accounting currency. As a result, the displayed currencies correspond to payment currencies.

Example 1

- Only foreign currency invoices are included in the payment order.
- “First Installment only Tax” is selected in the **Tax Distribution** field in the *Payment Terms* page for the payment term used in the involved invoices.
- Only first installments are included in the payment order.

According to the standard logic, only foreign currencies are displayed in the *Cash Accounts* dialog box.

When the **Use Acc Curr for Tax Installments** check box is selected, only accounting currency is displayed in the *Cash Accounts* dialog box.

Example 2

- Only foreign currency invoices are included in the payment order.
- “First Installment only Tax” is selected in the **Tax Distribution** field in the *Payment Terms* page for the payment term used in the involved invoices.
- First and other installments are included in the payment order.

According to the standard logic, only foreign currencies are displayed in the *Cash Accounts* dialog box.

When the **Use Acc Curr for Tax Installments** check box is selected, foreign currencies and accounting currency are displayed in the *Cash Accounts* dialog box.

9.8.3.3 PRBREPLN format

The screenshot shows the 'New Payment Order' form. The 'Payment Method' dropdown is highlighted with a purple box and contains the text 'BREPLN - BRE domestic format in PLN'. Other fields include 'Selected Proposals' (5), 'Payment Institute' (BRE - BRE Bank in Poland), and 'Currencies' (PLN).

Note split payment details in the output file for PLBREPLN format

- VAT amount after “/VAT/”
- Supplier tax identity number after “/IDC/”
- Invoice number after “/INV/”
- Optional text after “/TXT/”
- “53” instruction (instead of standard “51”)

Also note that total amount of the payment instruction as well as VAT amount are expressed in the accounting currency.

The screenshot shows a Notepad window titled 'BREPLN.DAT - Notepad'. The text in the window is:

```
lish Co.LTD/Add Add2/ZIP city", "CH-SUPPLIER1/Add 01 Add 02/ZIP City/",0,18300004, /VAT/2300,00/IDC/123456X1/INV/08/02|-01/TXT/|||", "", "" "53" ""
```

 The fields '/VAT/2300,00/IDC/123456X1/INV/08/02|-01/TXT/|||' and '"53"' are highlighted with purple boxes.

Also note the following

- In the standard version, PLBREPLN format creates single payment instruction for each payment proposal item.
- In case of split payment instruction this logic is changed so that single payment instruction is created per invoice.

9.8.3.4 ISO20022 format

The screenshot shows the 'New Payment Order' form. The 'Payment Method' dropdown is highlighted with a purple box and contains the text 'ISO20022 - ISO 20022 Payments'. Other fields include 'Selected Proposals' (4), 'Payment Institute' (BANK - Bank in Poland), and 'Currencies' (%).

Note split payment details in the output file for ISO20022 format (unstructured variant)

- <Prtry> tag
 - “SPLT”
- <Ustrd> tag
 - VAT amount after “/VAT/”
 - Supplier tax identity number after “/IDC/”
 - Invoice number after “/INV/”
 - Optional text after “/TXT/”

Note currency and amounts details in the output file for ISO20022 format (unstructured variant)

- <InstdAmt> tag
 - Currency “PLN” and amount in the accounting currency
- <Ustrd> tag
 - VAT amount in the accounting currency

```

- <RmtInf>
  <Ustrd>/VAT/2300,00/IDC/123456/INV/05/10-04/TXT/</Ustrd>
</RmtInf>

```

Also note the following

- In the standard version, unstructured ISO20022 format creates common payment instruction for multiple invoices from the same supplier.
- In case of split payment instruction this logic is changed so that single payment instruction is created per invoice.

9.8.4 VIEW PAYMENT ORDER ITEMS

New **Tax Installment in Acc Curr** and new **Invoice Currency** columns are added in the *Payment Order Items* page:

- The **Tax Installment in Acc Curr** indicator is selected when tax installment of the foreign currency invoice is paid in the accounting currency.
- When the **Tax Installment in Acc Curr** is selected:
 - Invoice currency is displayed in the **Invoice Currency** column.
 - Payment currency is displayed in the **Currency** column.
 - Payment amount in the invoice currency is displayed in the **Pay Amount in Inv Curr** column.
 - Payment amount in the payment currency as well as in the accounting currency is displayed in the **Pay Amount in Acc Curr** column.
 - Payment amount in the accounting currency is calculated using tax currency rate from the invoice.

9.8.7 ACKNOWLEDGE SUPPLIER PAYMENT IN MIXED PAYMENT

Follow the IFS Cloud standard process to enter mixed payment with acknowledge supplier payment order transaction. When acknowledge supplier payment transaction is saved, invoices are automatically matched with the lump sum transaction.

- Transactions with the **Tax Installment in Acc Curr** field selected (in the **Acknowledge Payment Details** page) are considered when matching lump sum transactions in the accounting currency.
- Payment amount in the invoice currency is fetched from the **Pay Amount in Inv Curr** field from the **Acknowledge Payment Details** page.
- Payment amount in the payment currency and payment amount in the accounting currency are fetched from the **Pay Amount in Acc Curr** field from the **Acknowledge Payment Details** page.
- Tax currency rate from the invoice is fetched into the **Currency Rate** field.

9.8.8 APPROVE MIXED PAYMENT

Follow the IFS Cloud standard process to approve mixed payment.

Postings are created and transactions are removed from the **Supplier Payment Orders** and **Acknowledge Supplier Payment Orders** pages.

9.8.9 CANCEL MIXED PAYMENT

In case of mistakes in payment registration, follow the IFS Cloud standard process to cancel mixed payment.

Postings are reversed and transactions are recreated in the **Supplier Payment Orders** and **Acknowledge Supplier Payment Orders** pages, including new **Tax Installment in Acc Curr** check box and new **Invoice Currency** column.

9.8.10 LOAD INTO MIXED PAYMENT/CREATE MIXED PAYMENT FROM EXTERNAL PAYMENT

Follow the IFS Cloud standard process to load bank statement transactions from CAMT file into the **Mixed Payment** page, that is:

- Place the file under respective IN folder. The file is loaded automatically, and details are displayed in the **External Payments** and **External Payment Details** pages.

- Select **Match & Check All Item** command.
- Select **Load Into Mixed Payment** or **Create Mixed Payment** command.
- Transaction of type “Acknowledge Supplier Payment” is created on the **Mixed Payment/Transactions** tab.

When transaction with the **Tax Installment in Acc Curr** field selected (in the *Acknowledge Payment Details* page) is loaded into the **Mixed Payment/Transactions** tab, currency, currency rate and amounts are handled in the same way as described in the “Acknowledge Supplier Payment Order in the Mixed Payment” chapter.

9.9 Delimitations

- Split Payment for invoices in the accounting currency is only available in supplier payment order flow and customer repayment order flow.
- Split Payment for invoices in the foreign currency is only available in supplier payment order flow.
- ISO20022 format is only supported in the unstructured variant, based on information from ING bank.
- Split payment is not supported for invoice with payment reference or remittance.
- Payment order with split payment for foreign currency invoices can only be acknowledged from the mixed payment.
- Rounding to nearest is always used after recalculating tax amount from the foreign currency to the accounting currency with a use of tax currency rate.

Additional delimitations may apply; all relevant flows should be tested to ensure completeness.

10 Access Control for Inventory Transactions and Reservations

10.1 Overview of Legal Requirements

In Poland, warehouse manager or other personnel must be appointed by management as acting authority for material located in warehouses. This is a legal requirement. Due to this requirement only, authorized personnel may change quantity and/or value of material in warehouses. Warehouse access authorization is required to prevent any inventory transactions or reservations to be executed by unauthorized personnel.

10.2 Solution

In IFS Cloud standard version IFS Cloud users are connected to sites and this connection determines the possibility to reserve inventory parts or conduct operations which are resulting in inventory transactions.

For IFS Polish Localization an additional level of authority is added where IFS Cloud users are connected to warehouses and given the authority to perform inventory transactions and make reservations.

Making Reservation Allowed

Perform Transaction Allowed

Basic Data: A basic data page is added where the authority is set up per user over warehouses in a site. This page is **Warehouse Access**.

Inventory transactions: Controls are added when a user is saving inventory operations (e.g. receipt, scrap, pick, move, transfer between warehouses, revaluation etc.):

- If access has been granted the user can register the operation.
- If access has not been defined or not granted an error message is displayed and the user cannot proceed.

Reservations: Controls are added when a user is reserving inventory parts (e.g., customer order, work order, shop order, material requisition):

- If access has been granted the user can reserve the quantity.
- If access has not been defined or not granted an error message is displayed and the user cannot proceed.

10.3 Prerequisites

The company must be set-up to use Polish localization.

Warehouse Access

Use the **Warehouse Access** page to give users access to make reservations or/and transactions. Users can be added to this page and the access can be controlled over inventory reservation and transaction as required. To control an inventory transaction, enable/disable the option in the column **“Making Stock Reservation Allowed”**. To control an inventory reservation, enable/disable the option in the column, **“Performing Inventory Transaction Allowed”**.

✓	:	User	Site	Warehouse	Making Stock Reservation Allowed	Performing Inventory Transaction Allowed
<input type="checkbox"/>	:	LW LALWLK - Lalitha Wijebandara	LPSS1 - Polish Supply Site-1	WH-01 - WH-01	Yes	No
<input type="checkbox"/>	:	LW LALWLK - Lalitha Wijebandara	LPDS1 - Polish Demand Site-1	WH-01 - WH-01	Yes	No
<input type="checkbox"/>	:	LW LALWLK - Lalitha Wijebandara	LWPS1 - LW Poland Site - 1	WH-01 - WH-01	No	Yes
<input type="checkbox"/>	:	LW LALWLK - Lalitha Wijebandara	LWPS1 - LW Poland Site - 1	WH-02 - WH-02	No	Yes

To save a record in **Warehouse Access** page a user must have at least one option enabled out of the 2 controls, reservation, and transaction. A record with a user whose both **“Making Stock Reservations Allowed”** and **“Performing Inventory Transactions Allowed”** disabled, is considered as an invalid record which cannot be saved.

10.3.1 INVENTORY RESERVATION CONTROL

Controls are added when a user is reserving inventory parts (e.g., Customer Order, Work Order, Shop Order, Material Requisition, Pick by Choice):

- If access has been granted the user can reserve the quantity
- If access has not been defined or not granted an error message is displayed and the user cannot proceed.

The screenshot shows the 'Material Requisition' interface for requisition 200067. The status is 'Released'. The interface includes a header with navigation icons and buttons like 'Plan', 'Stop', 'Pre Posting', and 'Document Text'. Below the header, there is a summary section with fields for Order No (200067), Site (LWPS1), Internal Customer (LWIC - LW Int Cus), Due Date (7/29/2021), and Created (7/29/2021). Other fields include Created By (LALWLK), Total Amt/Base (20.00), Internal Destination, and Document Text (No). A 'Notes' section is also visible.

The 'Lines' section contains a table with columns: (1) ✓, Release No, Part, Due Qty, UoM, Due Date, Created, Created By, and Delivery Date. The table has one row with Release No 1, Part LW A2450 - Air Filter - I..., Due Qty 2, and UoM PCS. A red error message box is overlaid on the table, stating: 'LALWLK does not have access to make stock reservations in the warehouses of Site LWPS1'.

10.3.2 INVENTORY TRANSACTION CONTROL

Controls are added when a user is saving inventory operations (e.g., Receipt, Scrap, Pick, Move, Move Reserved Materials, Transfer between Warehouses, Revaluation, Attach to Handling Unit, Unattached from Handling Units, Pack According to Pack Instructions, Pack According to Handling Unit Capacity, etc...):

- If access has been granted the user can register the operation
- If access has not been defined or not granted an error message is displayed and the user cannot proceed

Attachments

✖ LALWLK does not have access to perform inventory transactions in Warehouse WH-01 of Site LWPS1

When moving parts directly into the new inventory, you should have access to both warehouses, on each site. If access is not authorized, you will receive an error message.

When moving into transit at first (i.e., the goods are under transportation) you can put the material into transit, but you can move them from transit into the target location only if you have an access to that target warehouse. If access is not authorized, you will receive an error message.

Note:

- You may grant a user an access to a warehouse but not connect him to the site. In this case the user cannot perform any transactions or/and reservations.
- If the user does not have warehouse access defined or the access is set to “No”, the user cannot perform Inventory transactions or/and reservations.
- If the company’s parameter is not enabled, the effect is that no access control will occur.

10.4 Automatic Reservation

With the automatic reservation, the system decides under IFS Cloud standard logic from which locations and in what order inventory parts are reserved. During automatic reservation the Cloud will only reserve material from locations from/to which the user has access according to the Access Rights enabled in the **Warehouse Access** Page.

10.5 Exceptions in Access Rights

For changing inventory part locations between two sites, the user must be authorized to perform transactions in warehouses of both sites. During the transportation of Parts to another site, two transactions are generated: INVM-OUT (direction -) and INVM-TRIN (direction 0). The second transaction, INVM-TRIN, refers to a target location. But, if the user is not granted access to the Warehouse in destination Site the Part cannot be moved to a destination location, so that transactions cannot be completed.

10.6 Delimitations

No known.

11 Tax Reliability Control on Suppliers

11.1 Overview Legal Requirement

The amendment of the Polish VAT act, in force since 1st of September 2019, introduced regulations on the electronic database of taxpayers registered for VAT purposes in Poland (known as 'white list', or 'e-register'). This new database allows to verify the current status of the taxpayers (suppliers), whether the supplier is an active VAT payer, deregistered, restored or exempted. Additionally, there will be information regarding the bank accounts numbers of the suppliers. For instance, if a company has to make payments exceeding 15000PLN, company have to pay only to the suppliers' bank accounts disclosed in the white list. If company fail to do so, following sanctions will be applied,

- For VAT: responsible for payment of output VAT (if not settled by the supplier (up to the VAT amount disclosed on the invoice)).
- For income taxes (corporate and personal): the expenditure will not be treated as tax deductible costs.

To avoid sanctions the company will have to notify the tax authority about making a payment to an undisclosed on the list bank account within three days from the transfer date or make payment using split payment.

11.2 Solution Overview

Functionality is added to define if suppliers are considered unreliable and if bank accounts are valid for payments. There are also added controls and warning messages raised in the following scenarios:

- Control of supplier reliability is performed in following scenarios:
 - Purchase order entry
 - Manual supplier invoice entry
 - Creating supplier payment proposal
 - Acknowledging tax proposal
- Control of bank account validity is performed in the following scenarios:
 - Authorizing invoice for payment
 - Creating supplier payment proposals

Process Overview

11.3 Prerequisites

- The company must be set up to use Poland localization, see the [Company Setup](#) chapter, and the “Tax Reliability Control on Suppliers” parameter must be enabled.

11.4 Define the reliability status on the Supplier

After checking the tax authority’s database, the user can manually update the supplier basic data via *Application Base Setup/Enterprise/Supplier/Supplier/Address* tab and **Document Tax Information** sub tab.

The following columns are added:

- **Supplier Tax Reliability Status.** Enter the status for the supplier. Values are “Not set”, “Reliable” and “Unreliable”.
- **Supplier’s Tax Reliability Declaration Date.** This is the date the tax authorities have classified the supplier’s reliability. The information is provided via the tax authority’s web site and entered manually.
- **Supplier’s Tax Reliability Status Last Modified.** This is the date when the reliability data was last updated, it’s entered manually.

✓ Tax ID Number	Unreliable	7/23/2021	7/23/2021

11.5 Define the bank account validity on the Supplier

Supplier reliability status and bank account validation recognized as independent functionalities. Therefore, irrespective of the **Supplier Reliability Status**, electronic payment address's **Account Validation** checkbox can be updated to define the bank account validity on the supplier.

This is defined as supplier basic data via the **Application Base Setup/ Enterprise/ Supplier/ Supplier/ Payment** tab and sub tab **Payment Method**. Open the context menu and select **Electronic Payment Addresses** to open the **Bank Address** page. A new, **Account Validated** check box and **Account Validated Date** fields are added where the user may define if the account is valid or not with the account validated date.

11.6 Validation and Warning when entering a purchase order

When creating a new purchase order, the reliability of the supplier is validated.

If the value on the supplier is “Unreliable” a warning message is displayed.

 This supplier is classified unreliable as tax payer.
 Recipients of supplies will be liable for any tax not paid by suppliers, who are identified as unreliable. Do you want to continue?

The supplier’s document address as defined in the purchase order header will be used to perform the validation.

11.7 Validation and Warning when entering a manual supplier invoice

When creating a manual supplier invoice, the reliability of the supplier is validated. If the value on the supplier record is set to “Unreliable” a warning message is displayed when saving the invoice.

The chosen supplier invoice address set for the invoice will be used to perform the validation. This may be changed in **Manual Supplier Invoice** page and the **General Invoice Information** dialog box accessed under the **General Info...** context menu option. The reliability of the selected address is displayed in the **Tax Reliability Status** field.

11.8 Validation and Warning when acknowledging a Tax Proposal

When acknowledging a tax proposal, the reliability of the supplier is validated. If the value on the supplier record is set to “Unreliable” a warning message is displayed.

To show the tax reliability status in the tax proposal, **Tax Reliability Status** column is added to **Tax Proposal Details page**. This column is automatically updated with the changes in the supplier basic data.

11.9 Validation and warning when authorizing invoice for payment

A validation is done to control whether the bank account on the payment method is valid. If the chosen bank account is not valid for the supplier or connected payee for the supplier, a warning message is displayed. The warning is generated at time of authorizing the invoice installment for the payment.

This authorization can be done manually or automatically. This is set up as basic data on the supplier in the **Supplier/Invoice** tab and **General** subtab, this is IFS Cloud standard functionality.

Invoice FIELDS - FIELDS NIWADK UNRELIABLE 1 of 1

Supplier: FIELDS Name: FIELDS NIWADK UNRELIABLE Association No:

Company: NIWAPOLAND - NIWADK POLISH COMPANY A/S

Supplier Type: External Supplier Group: 0 - External Currency: PLN

Payment Term: 30 - 30 Days Net Invoice Recipient: ALAIN - Alain Prost Automatic Payment Authorization: No

Payment Authorizer: IFS Applications Invoicing Supplier: FIELDS - FIELDS NIWADK UNRELIABLE

The following options are available:

- “No”. The validation of the account is done when the **Authorize** check box is manually selected in the **Supplier Invoice Installment Plan and Discount** page.
- “At Final Posting”. The validation of the account is done when final postings are created.
- “When Posted” The validation of the account is done when the first postings are created for the invoice.

On company level, on the **Company/Invoice** tab. it's possible to control if invoice authorization should be done in a separate function/page, this is IFS Cloud standard functionality. If the **Supplier Invoice Authorization Only by Separate Function** check box is selected the authorization can only be done from the **Authorize Invoices for Payment** page. The validation of the account is performed when the **Authorized** check box is selected.

11.10 Validation and Warning when creating a Payment Proposal

When creating a new supplier payment proposal, a validation is done to control the reliability status of the supplier and a control is done to check that the account connected to the payment method is valid.

If the supplier or payee is unreliable and/or the account is not valid a warning message is displayed. For the account to be validated, it's required that the invoices are registered with a **Payment Method** and **Payment Address ID**.

The validation is performed in the following scenarios:

- When creating the proposal under the **Create Proposal** context menu option in the **Accounts Payable/Supplier Payment Proposal/Supplier Payment Proposals** page
- When connecting invoices manually in the **Supplier Payment Proposal Details** page in the **Details** tab.

Read IFS Cloud Documentation for more information on how to use these functions.

11.11 Delimitations

- There is no online, nor offline connection developed to integrate IFS Cloud with the tax authorities' database.
- This functionality is only available in purchase order entry, manual supplier invoice entry, supplier invoice authorization for payment, payment proposal and tax proposal.

Additional delimitations may apply; all relevant flows should be tested to ensure completeness.

12 Polish E-Invoice

12.1 Overview Legal Requirement

KSeF, Krajowy System e-Faktur (National System of e-Invoices), is a platform intended for issuing and receiving invoices by electronic means. Using of KSeF platform is facultative. In 2026, issuing of B2B invoices via KSeF platform will become mandatory for domestic, EU as well as non-EU sales. For B2C invoices, it will be optional. For large tax payers, issuing invoices via KSeF platform will be mandatory from February 2026. For other tax payers, it will be mandatory from April 2026. For micro businesses, it will be mandatory from 2027.

In order to make it possible to issue invoices via KSeF platform, Tax Authorities publish official schema of E-invoice (FA(3) as for 2026) and enable API which allows to send the XML message and receive response. Accepted invoices are available in KSeF platform for companies having Polish tax identity and they are archived for 10 years. KSeF platform does not include any function to inform buyers that new invoice is available. In order to check whether any new invoices have been issued, buyers must integrate with KSeF platform or login to one of the applications prepared by the Tax Authorities.

In case of enabling invoices issued via KSeF platform outside KSeF, number assigned by KSeF and QR code must be included. QR code secures the content of the invoice and makes it possible to reach invoice in KSeF platform.

12.2 Solution Overview

The solution is based on standard E-invoice process which is using a 3rd party service provider to handle the communication of invoice information. The solution has been developed in cooperation with the IFS partner Pagero but other local or global service providers can be utilized. The service provider is needed to transform the IFS style invoice file to required format and to transform the response file to an IFS style format. The service provider is also needed to transform received invoice file in the official format to IFS style invoice file. Read more about the IFS eInvoice solution in IFS cloud documentation.

The following is added/changed to support this requirement:

- New **E-invoice Poland** is added to the **Format** drop-down in the **Message Setup** section in the **E-invoice Processing Type** page.
- New **STD-PL** E-invoice processing type is added.
- IFS Cloud standard functionality which allows to create XML in IFS Style is enhanced with additional information for Polish E-invoice.
- When printing invoices, **E-Invoice Reference Number** and **QR Code** are included in the report data.

In this document

- **Polish E-invoice XML in IFS Style** refers to IFS Style E-invoice XML enhanced with Polish specific attributes. This file is generated from IFS Cloud and can be sent to service provider for conversion.
- **Polish E-invoice XML in KSeF Style** refers to Polish specific legally required XML format (FA(2) as for 2024) which can be sent by service provider to KSeF platform, as a result of conversion of **Polish E-invoice XML in IFS Style**.
- **E-Invoice Reference Number** refers to standard field that can be used to maintain number assigned by KSeF platform.

12.3 Process Overview

12.3.1 PROCESS OVERVIEW - BASIC DATA

12.3.2 PROCESS OVERVIEW - CUSTOMER INVOICES

12.3.3 PROCESS OVERVIEW - SUPPLIER INVOICES

12.4 Prerequisites

- The company must be set-up to use Polish localization, see the [Company Set up](#) chapter. “Polish E-Invoice” parameter must be enabled.
- To support reporting of split payment invoices, the “Standard Audit File-Tax for Poland (JPK)” functionality is also used. “Standard Audit File-Tax for Poland (JPK)” parameter is mandatory and enabled by default.
- It is recommended to create the company using Standard Polish Template (STD-PL).

12.5 Basic Data

12.5.1 BASIC DATA ADDED DURING INSTALLATION

The following new data is added for Poland during the installation:

- In the **E-invoice Processing Type** page, new value **E-invoice Poland** is added in the **Format** drop-down.
- New **STD-PL** e-invoice processing type with the **E-invoice Process** enabled, **Process after Response** enabled, and **E-invoice Poland** selected in the **Format** drop-down is added.

12.5.2 DEFINE BASIC DATA

12.5.2.1 Modify Process Type

Using IFS Cloud standard functionality, select user from the **Approval User** drop-down in the **E-Invoice Processing Type** page for **STD-PL** process type.

12.5.2.3 Define Tax Codes and Tax Categories 1

Using IFS Cloud standard functionality, define separate tax code used in order to follow invoices which are a subject to the mandatory split payment mechanism.

Tax Codes							
✓	Tax Code	Description	Tax Type	Tax (%)	Deductible (%)	Valid From	Valid To
<input type="checkbox"/>	MPP	Mandatory Split Payment	Tax	23	100	1/1/2023	12/31/2049

Using IFS Cloud standard functionality, select **Tripartite EU Trade** in the **Tax Reporting Category** drop-down for tax codes intended for scenarios in which company is second party in EU tripartite trade.

Tax Codes							
✓	Tax Code	Description	Tax Type	Tax (%)	Tax Reporting Category	Deductible (%)	Valid From
<input type="checkbox"/>	WDTWTT	EU Sales - triangulation	Tax	0	Tripartite EU Trade	100	1/1/2017

Polish E-invoice XML in KSeF Style requires

- classification of tax transactions
- indicating invoices with reverse charge
- indicating exception base.

Polish E-invoice XML in IFS Style is enhanced with additional tags with this information.

Using IFS Cloud standard functionality, make sure that all categories listed below are available in the **Tax Category 1** page all tax codes used in customer invoicing are connected to relevant tax category 1 in the **Tax Codes** page. When Polish E-invoice XML in IFS Style is created, the <PLTaxCategory1> tag includes this information in the <InvoiceRow> section, the <VatSpecificationDetails> section and, in case of prepayment based invoices, <PLOrderRow> section. During conversion to Polish E-invoice XML in KSeF Style, this information should affect the P_12 tag (tax percentage, 'zw', 'oo' or 'np'), the P_18 tag (reverse charge indicator) and total amounts reported in tags with patterns P_13_% (tax base amounts), P_14_% (tax amounts) and P_14_%W (tax amounts in PLN).

Tax Category 1	KSeF tag to report tax base	KSeF P_12 (Tax Rate)	KSeF P_18 (Reverse Charge) 1-Yes, 2-No	Comment
P_13_1	P_13_1	Tax Code Percentage (23% or 22%)	2	Domestic, basic percentage
P_13_2	P_13_2	Tax Code Percentage (8% or 7%)	2	Domestic, first reduced percentage
P_13_3	P_13_3	Tax Code Percentage (5% or 3%)	2	Domestic, second reduced percentage
P_13_6_1	P_13_6_1	0 KR	2	Domestic 0%
P_13_6_2	P_13_6_2	0 WDT	2	EU Sales of Goods
P_13_6_3	P_13_6_3	0 EX	2	Export

Tax Category 1	KSeF tag to report tax base	KSeF P_12 (Tax Rate)	KSeF P_18 (Reverse Charge) 1-Yes, 2-No	Comment
P_13_7/P_19A P_13_7/P_19B P_13_7/P_19C	P_13_7	zw	2	Tax Free

<input type="checkbox"/>	ZAGU-UE	Non domestic services with deductible tax (included in Art 100)	0	P_13_9 - P_13_9 = Tax Base, P_12 = ...	EU Services	100	Tax	1/1/2017
<input type="checkbox"/>	ZAGUB	Non domestic services with non deductible tax (not included in Art 1	0	P_13_8 - P_13_8 = Tax Base, P_12 = ...	None	100	Tax	1/1/2017
<input type="checkbox"/>	ZAGUB-UE	Non domestic services with non deductible tax (included in Art 100)	0	P_13_9 - P_13_9 = Tax Base, P_12 = ...	EU Services	100	Tax	1/1/2017
<input type="checkbox"/>	ZW	Domestic and import of goods (sales and purchase) exempted	0	P_13_7/P_19A - P_13_7 = Tax Base, ...	None	100	Tax	1/1/2017

In case of exemption, select tax category depending on the reference you would like to include:

- Select “P_13_7/P_19A” category if exemption base refers to Polish VAT Law.
- Select “P_13_7/P_19B” category if exemption base refers to EU Directive.
- Select “P_13_7/P_19A” category if exemption base refers to other rules.

Using IFS Cloud standard functionality, click **Tax Texts per Tax Code** in the **Tax Codes** page and enter details referring to exemption base in the **Tax Code Text** field.

Tax Texts per Tax Code

+

✓	Tax Code	Tax Code Text	Valid From	Valid To
<input type="checkbox"/>	ZW - Domestic and import of goods (sales and purchase) exempted	Tax Free Text (connected to P_19A)	7/3/2023	12/31/2049

Polish E-invoice XML in KSeF Style requires sending company basic tax identity for domestic sales and export sales (tax id without PL prefix) and company EU tax identity for EU sales (tax id with PL prefix).

Handling of <SellerOrganizationTaxCode> tag in the Polish E-invoice XML in IFS Style is adjusted, depending on the attributes of the selected tax code.

- In case of invoices issued in connection to EU sales of goods, select **P_13_6_2** in the **Tax Category 1** drop-down.
- In case of invoices issued in connection to EU sales of services, select **EU Services** in the **Tax Reporting Category** drop-down and select **P_13_9** in the **Tax Category 1** drop-down.
- In case of invoices issued by second party in the EU tripartite trade, select **Tripartite EU Trade** in the **Tax Reporting Category** drop-down and select **P_13_8** in the **Tax Category 1** drop-down.

When sending invoices with such tax code included, “PL” prefix remains in company tax identity. Otherwise “PL” prefix is removed from company tax id number.

12.5.2.4 Define Invoice Information per Currency

Using IFS Cloud standard functionality, in the **Invoice Information per Currency** page, select **All Invoice Recipients** in the **Print Tax in Alternative Currency** drop-down and select **Accounting Currency** in the **Alternative Tax Currency** drop-down for all foreign currencies.

✓	Currency Code	Rounding Factor	Invoice Fee Amount	Invoice Fee Threshold Amount	Print Euro Equivalents on Invoice	Print Tax in Alternative Currency	Alternative Tax Currency
<input type="checkbox"/>	BRL	0			No	All Invoice Recipients	Accounting Currency
<input type="checkbox"/>	CAD	0			No	All Invoice Recipients	Accounting Currency
<input type="checkbox"/>	CHF	0			No	All Invoice Recipients	Accounting Currency
<input type="checkbox"/>	DKK	0			No	All Invoice Recipients	Accounting Currency
<input type="checkbox"/>	EUR	0			No	All Invoice Recipients	Accounting Currency
<input type="checkbox"/>	GBP	0			No	All Invoice Recipients	Accounting Currency
<input type="checkbox"/>	HUF	0			No	All Invoice Recipients	Accounting Currency

12.5.2.5 Define Audit Format for Poland

Go to **Accounting Rules/Audit Interface/Basic Data/Audit Formats** page. Search for the Poland SAF-T audit format or add a new record for Poland SAF-T as follows:

- Country as “Poland”
- Report Type as “SAF-T”.

12.5.2.6 Enter Audit File Basic Data

Click **Audit File Basic Data** to open the **Audit File Basic Data** page.

Audit Formats											
(1) ✓	Country	Report Type	Decimal Symbol	Thousands Separator	Negative Format	Leading Zeroes	Time Format	Date Format	File Type	File Template ID	Default
<input checked="" type="checkbox"/>	POLAND	SAF-T	.(point)	.(comma)	-9	0.9	13:59	YY-MM-DD	JPK_V7M2	JPK_V7M2_TEMPLATE	Yes

Using IFS Cloud standard functionality add a header record in the **Audit File Basic Data** page.

The new tab **SAF-T Poland Setup** includes ten sections. For Polish E-Invoice functionality, the **Tax Codes for Specific Procedures** section is applicable.

Enter tax code used in order to follow invoices which are a subject to the mandatory split payment mechanism in the **(V7M) MPP/(FA) P_18A** field.

Audit File Basic Data

- SAF-T PL Inventory Transaction Report Types
- Inventory Transaction Report Type Mappings

12.5.2.7 Define Customer

Using IFS Cloud standard functionality, enter customer tax identity in the **Customer/Address/Document Tax Information** tab. In case of Polish tax identity, value can be specified with dashes (for example 123-456-78-90) or without dashes (for example 1234567890). In case of EU customer, enter customer tax identity including country prefix.

Address

MB-CUST-PL-PL - Polish Customer in Polish Company 5 of 7

Customer: MB-CUST-PL-PL Name: Polish Customer in Polish Company Association No:

Address ID: A1-CUST-PL

Customer's Own Address ID: Customer Name: End Customer: End Customer: Address Identity:

It is also possible to modify the process type at the invoice level (Instant Invoice/Customer Order Invoice/Project Invoice) when it is connected to the Company or Customer. In such cases, the system will automatically fetch the process type associated with the Company or Customer. Priority is given to the customer-level process type. This functionality enables the exclusion of non-liable invoices from being sent to Tax Authorities by selecting a process type that is not enabled for “**E-invoice Process**” at the invoice level.

New tag in Polish E-invoice XML in IFS Style	Related/affected tags in Polish E-invoice XML in KSeF Style	Comment
InvoiceRow/ PLTaxReportingCategory	Fa/ Adnotacje/ P_23	Tax Reporting Category selected for the tax code in the Tax Codes page. See Define Tax Code chapter for details.
InvoiceRow/ PLRowUnitDiscountedPriceAmount (just for consistency with standard structure InvoiceRow/ AmountCurrencyIdentifier attribute from PLRowUnitDiscountedPriceAmount tag & InvoiceRow/ UnitPriceUnitCode attribute from PLRowUnitDiscountedPriceAmount tag)	Fa/ FaWiersze/ FaWiersz/ P_9A	Price after discount. If column Total Line Discount is 0% (or has no value), whole tag is not be created and standard price tag can be used in mapping.
InvoiceRow/ PLBeforeCorrectionIndicator	Fa/ FaWiersze/ FaWiersz/ StanPrzed	Indicator of line before correction. Y for lines before correction on the correction invoice. Otherwise N. Information on lines with Y indicator should be reserved during conversion.
InvoiceRow/ PLInvoiceTextLineIndicator		Indicator of instant invoice text line. Lines with this indicator should not be reported in <FaWiersz>.
InvoiceRow/ PLPrepaymentBasedInvoiceRowIndicator		Indicator of all lines of prepayment based invoices and lines of final invoices which represent matching with previous prepayment based invoices. Lines with this indicator should not be reported in <FaWiersz>.
VatSpecificationDetails/ PLTaxCategory1	Fa/ P_13_%, P_14_% and P_14_%W & Fa/ Adnotacje/ P_18 & Fa/ Adnotacje/ Zwolnienie/ P_19 and P_19A and P_19B and P_19C	Tax Category 1 selected for the tax code in the Tax Codes page. See Define Tax Code chapter for details.

New tag in Polish E-invoice XML in IFS Style	Related/affected tags in Polish E-invoice XML in KSeF Style	Comment
PLOrderRow/ PLArticleName & PLOrderRow/ QuantityUnitCode attribute from PLDeliveredQuantity tag & PLOrderRow/ PLDeliveredQuantity & PLOrderRow/ PLUnitPriceAmount & PLOrderRow/ PLRowVatRatePercent & PLOrderRow/ PLTaxCategory1 & PLOrderRow/ PLRowVatAmount & PLOrderRow/ PLRowVatExcludedAmount (just for consistency with standard structure PLOrderRow/ AmountCurrencyIdentifier attribute from PLUnitPriceAmount tag & PLOrderRow/ UnitPriceUnitCode attribute from PLUnitPriceAmount tag & PLOrderRow/ AmountCurrencyIdentifier attribute from PLRowVatAmount tag & PLOrderRow/ AmountCurrencyIdentifier attribute from PLRowVatExcludedAmount tag)	Fa/ Zamowienie	New block with order details in case of prepayment based invoices. The structure of tags follows the same principle as for InvoiceRow tag.

Changed tags.

Existing tag in E-invoice XML in IFS Style	Comment
VatSpecificationDetails/	According to IFS Cloud standard functionality, when rows are created in this block, one row is created per tax percentage, in particular, all tax codes with 0% will end up as one line. Rules for creating this block are changed so that rows are created separately for each Tax Category 1.
SellerPartyDetails/ SellerOrganizationTaxCode	Handling of PL prefix of company tax identity is changed. See Define Tax Code chapter for details. All characters other than letters and digits are removed from company tax identity.
BuyerPartyDetails/ BuyerOrganizationTaxCode	All characters other than letters and digits are removed from customer tax identity if country from document address is PL.

12.6.2 ACTIVITIES AT SERVICE PROVIDER

The following steps are handled by Service Provider

- Receiving Polish E-Invoice in IFS Style from IFS
- Conversion of Polish E-invoice to KSeF Style
- Sending Polish E-Invoice in KSeF Style to KSeF Platform
- Receiving Response Message in KSeF Style from KSeF Platform
- Conversion of Response Message to IFS Style
- Sending Polish E-Invoice in KSeF Style to IFS

12.6.3 RECEIVE RESPONSE MESSAGE IN IFS STYLE FROM SERVICE PROVIDER

Response message in IFS Style is placed in incoming folder of IFS Connect. From this folder it is automatically uploaded to IFS Cloud.

12.6.3.1 Response Status - Accepted

In case of response **Accepted**, in the ***E-Invoice Process Monitoring*** page.

- **Status** is set to **Accepted**.
- **E-Invoice Reference Number** is set based on value of the <EINVOICE_REFERENCE_NUMBER> tag from the response message.
- **E-Invoice Reference Date** is set based on value of the <EINVOICE_REFERENCE_DATE> tag from the response message.

E-Invoice Process Monitoring										
Identity	Series ID	Document No	Document Status	Sent Time	Status	E-invoice Reference Number	E-invoice Reference Date	Document Type	Attachmen...	Error
MB-CUST-PL-PL	ZK	200700050	Preliminary	9/5/23, 4:38 PM	Accepted	999999999-20230830-08F1E0ACC9EE-43	9/5/23, 12:00 AM	Customer Invoice	No	

When accepted invoice is later referred:

- as original invoice in case of correction invoice
- as previous prepayment based invoice in case of next prepayment based invoice or final invoice

number from the **E-Invoice Reference Number** field and, in case of correction invoice, date from the **E-Invoice Reference Date** field of the accepted invoice are included in the later invoice.

12.6.3.2 Response Status - Rejected

In case response status is **Rejected**, in the ***E-Invoice Process Monitoring*** page:

- **Status** is set to **Rejected**.
- **Response Error** is set based on value of the <RESPONSE_ERROR> tag from the response message.
- **Response Error Code** is set based on value of the <REPONSE_ERROR_CODE> tag from the response message.

Adjust basic data to correct the reason of the rejection.

As a result of enabling **Process After Response** in the ***E-Invoice Processing Type*** page **Document Status** is **Preliminary** and rejected invoice can also be adjusted in ***Instant Invoice*** page, ***Customer Invoice*** page or ***Project Invoice*** page respectively.

When reason for rejecting the invoice is fixed, click **Resend E-invoice** in the ***E-Invoice Process Monitoring*** page.

12.6.4 PRINT/POST INVOICE

If **Automatically Process Accepted Invoice** is enabled in the **E-Invoice Processing Type** page, invoice is automatically posted (**Document Status** set to **Posted Auth** in the **E-Invoice Process Monitoring** page) when **Status** is set to **Accepted**.

If **Automatically Process Accepted Invoice** is disabled in the **E-Invoice Processing Type** page, invoice should be posted manually.

- In the **Print Invoice** page, select the invoice and click **Print**.
- In the **Instant Invoice** page, select the invoice and click **Print Invoice**.
- In the **Customer Invoice** page, select the invoice and click **Share** and next click **Print Invoice**.
- In the **Project Invoice** page, select the invoice and click **Release Invoice**.

The screenshot shows the 'Customer Invoice' page for invoice number 200700050. The 'Share' button is highlighted with a red box, and a dropdown menu is open showing the 'Print Invoice' option. Below the header, there is a table with invoice details and an 'Amounts' section. The 'Amounts' table shows a Gross Amt of 1,230.0000 and a Net Amt of 1,000.0000. The 'LINES' section is currently set to 'GENERAL' and shows 'E-invoice Information' with a status of 'Accepted' and an E-invoice Reference Number of 999999999-20230830-08F1E0ACC9EE-43. The E-invoice Reference Date is 9/5/23, 12:00 AM.

When printing the invoice, new data is added to the standard report data.

- New **<IRN>** tag includes value from the **e-Invoice Reference Number** field, fetched from response message.
- New **<QR_DATA>** tag includes data for QR code, fetched from response message.

<IRN>111111111-20260430-087BE268DAB3-E5</IRN>

<QR_DATA> https://ksef-test.mf.gov.pl/client-app/invoice/111111111/01-02-2026/UtQp9Gpc51y-u3xApZjlgkpZ01js-J8KfISPW8WzIE</QR_DATA>

The following invoice reports include additional data

Report Title	Layout ID/ File	Comment
Instant Invoice	INSTANT_INVOICE_REP InstantInvoice.rdf	Instant Invoice and Correction Instant Invoice
Invoice Printout	PROJECT_INVOICE_REP ProjectInvoice.rdf	Project Invoice Debit, Credit and Correction
Invoice	CUSTOMER_ORDER_IVC_REP CustomerOrderIvc.rdf	Customer Order Invoice Debit, credit and Correction
Collective Invoice	CUSTOMER_ORDER_COLL_IVC_REP CustomerOrderCollIvc.rdf	Customer Order Collective Invoice Debit, Credit and Correction
Prepayment Based Invoice	CUST_ORDER_PREPAYM_INVOICE_REP CustOrderPrepaymInvoice.rdf	Prepayment Based Invoice Debit and Credit
Advance Invoice	CUSTOMER_ORDER_ADV_IVC_REP CustomerOrderAdvIvc.rdf	Advance Invoice Debit and Credit
Rebate Credit Invoice	REBATE_CREDIT_IVC_REP RebateCreditIvc.rdf	Rebate Credit Invoice

Note

- Advance Invoice is covered for consistency with other countries for which this functionality is enabled.
- In the Polish company template STD-PL, REBATE_CREDIT_IVC_REP layout id is not connected to rebate credit invoice type by default.

12.6.5 UPDATE GENERAL LEDGER

Using IFS Cloud standard functionality, update vouchers to General Ledger.

12.6.6 FETCH TAX LEDGER INFO

Using IFS Cloud standard functionality, update tax transactions with additional information.

12.6.7 VIEW TAX TRANSACTIONS

Using IFS Cloud standard functionality, view tax transactions.

In the **Tax Transactions** page, value is fetched to the **E-invoice Reference Number** field.

(1)	Fetch	E-invoice Reference Number	Identity	Party Type	Invoice Type	Series ID	Invoice No	Tax Code
<input checked="" type="checkbox"/>	Yes	5285537316-20240111-8DE0D0CEAA76-38	PC MB-CUST-PL-PL - Polish Customer in Polish Company	Customer	FP	FP	200700039	23

12.7 Supplier Invoices

12.7.1 LOAD E-INVOICE IN IFS STYLE

Using IFS Cloud standard functionality, load XML file.

E-invoice XML in IFS Style is placed in incoming folder of IFS Connect. From this folder it is automatically uploaded to IFS Cloud.

IFS Cloud standard functionality uses tax identity values of selling and buying party from incoming file to identify the relevant company and supplier. Enhancements have been introduced to better handle cases where tax identities include the "PL" prefix, specifically for companies with the "Polish E-Invoice" parameter enabled.

12.7.1.1 Identification of Company

IFS Cloud standard functionality

- The system searches the database using the company tax identity from the file.
- If no match or multiple matches are found, the system proceeds with other attribute-based searches.

Enhanced functionality for PL prefix when company has “Polish E-Invoice” parameter enabled

- The system first searches the database using the company tax identity from the file.
- If multiple matches are found using the company tax identity, the system proceeds with other attribute-based searches.
- If no match is found
 - The system removes the "PL" prefix from both the file and database tax identities.
 - It performs an additional search limited to companies with the “Polish E-Invoice” parameter enabled.
 - If still no match or multiple matches are found, the system proceeds with other attribute-based searches.

Example

Company Tax ID File	Company Tax ID Database	Polish E-Invoice enabled	Match Outcome
1234567890	PL1234567890	No	No match
1234567890	PL1234567890	Yes	Match
PL1234567890	1234567890	No	No match
PL1234567890	1234567890	Yes	Match

12.7.1.2 Identification of Supplier

Once the company is identified, the system proceeds to identify supplier.

IFS Cloud standard functionality

- The system searches the database using the supplier tax identity from the file.
- If no match or multiple matches are found, the system proceeds with other attribute-based searches.

Enhanced functionality for PL prefix when company has “Polish E-Invoice” parameter enabled

- The system first searches the database using the supplier tax identity from the file.
- If no match or multiple matches are found, and
 - The company has “Polish E-Invoice” parameter enabled and
 - The supplier tax identity from the file starts with “PL”
 - Then the system removes the "PL" prefix from the supplier tax identity in the file and performs an additional search.
 - If still no match or multiple matches are found, the system proceeds with other attribute-based searches.
- Otherwise, the system proceeds with other attribute-based searches.

Example

Supplier Tax ID File	Supplier Tax ID Database	Polish E-Invoice enabled	Match Outcome
PL1234567890	1234567890	No	No match
PL1234567890	1234567890	Yes	Match

12.7.2 VIEW EXTERNAL SUPPLIER INVOICE

If the number assigned to the invoice by Tax Authorities was included in the <InvoiceReferenceNumber> tag in the <InvoiceDetails> section, value will be fetched into **E-invoice Reference Number** field in the *External Supplier Invoices* page. Value can be added or changed if required for the uploaded invoice.

Load ID	E-invoice Reference Number	Invoice No	Supplier	Invoice Type	Invoice Load Status	Load Error	Invoice Status	Transaction Date	Invoice Date	Delivery Date
150	5285537316-20240111-8DE0D0CEAA76-10	ZK200700001-3	PS MB-SUPP-PL-PL- P...	ZZ	Checked			1/31/2024	1/11/2024	1/11/2024

12.7.3 CREATE MANUAL SUPPLIER INVOICE

Using IFS Cloud standard functionality, create supplier invoice from external supplier invoice.

Load ID	E-invoice Reference Number	Invoice No	Supplier	Invoice Type	Invoice Load Status	Load Error	Invoice Status	Transaction Date	Invoice Date	Delivery Date
150	5285537316-20240111-8DE0D0CEAA76-10	ZK200700001-3	PS MB-SUPP-PL-PL- P...	ZZ	Checked			1/31/2024	1/11/2024	1/11/2024

Using IFS Cloud standard functionality, in the **Manual Supplier Invoice** page click the **More Information** command. In the **More Information** dialog, value in the **E-invoice Reference Number** field can be changed for invoice in **Preliminary** status.

12.8 Delimitations for Customer Invoices

This is an initial solution for Polish E-Invoice.

When creating **Polish E-invoice XML in IFS Style**

- Only basic information is supported.
- Non-mandatory elements/tags are not supported.
- Rebate invoice is not supported.
- Invoices with price including tax are not supported.

Information for some of the KSeF tags is not included in Polish e-Invoice. In particular the following is not available.

KSeF Element/Tag	Description
Podmiot3	Information identifying a third party entity/entities referred to in the invoice
PodmiotUpowazniony	Information identifying an authorized entity referred to in the invoice
Stopka	Other information included in the invoice such as, among other things, the invoice's footer and the KRS and REGON numbers
P_13_4 P_14_4 P_14_4W	Amounts related to flat rate applicable to taxi services
P_13_5 P_14_5	Amounts related to invoice documenting transactions realized by a taxable person identified in the territory of the country as EU OSS
P_13_11	Amount related to invoice with margin based scheme
P_16	Annotation "cash-basis settlement method"
P_17	Annotation "self-billing"
P_22	Intra-community supply of new means of transport
P_PMarzy	Margin based scheme details
NrFaKorygowany	Correct number of the invoice corrected in cases where the correction is made to amend the invoice's number

Podmiot1K	Element containing the data of Podmiot1 put on the invoice corrected
Podmiot2K	Element containing the data of Podmiot2 put on the invoice corrected
P_15ZK	
KursWalutyZK	
ZaliczkaCzesciowa	
Zwrot akcyzy	Additional information necessary for farmers claiming refund of excise duty included in the price of fuel oil

When additional information is fetched to tax transactions for posted invoices, value in the **Status** field from the **E-invoice Process Monitoring** page is not validated. In case of using processing type with **Process After Response** disabled, information can be fetched for not accepted status. When invoice is accepted after the fetch process, **E-invoice Reference Number** is missing for the tax transaction.

12.9 Delimitations for Supplier Invoices

No known..

13 Appendix

13.1 Polish e-Invoice functionality schemas and examples

See Technical Documentation for more information about e-Invoice schema.

Under *Solution Manager User Guide/Integration/IFS Cloud Business Components*

- *IFS Connect for Sending e-Invoices* – Polish e-Invoice schema (IFS Style) and generic e-Invoice response schema
- *IFS Connect for Receiving IFS e-Invoices* – receiving e-Invoice example (IFS Style).

13.2 JPK_KR_PD XML FILE TAG MAPPING

The below attached files describe the legal requirement and the mapping of IFS data to xml tags along with the attribute values for S_12_1, S_12_2 and S_12_3 tags.

Broszura_informacyjna_dotycząca_struktury.
