1 Scope of This Document

This document describes the functionality available in the IFS Cloud for Brazil and explains how the supported features are designed to operate. Its purpose is to provide an overview of the solution and serve as a functional reference for the capabilities currently available in the product.

The business scenarios described throughout this document are intended to demonstrate how the standard functionality operates. Since each company may have unique business processes, operational variations, and legal requirements, this document should not be interpreted as a complete list of all possible scenarios that may exist in implementation projects.

When evaluating a specific business process or operational requirement that is not explicitly described in this document, additional assessment may be required to determine whether the scenario is supported by the standard localization in the product, or can be addressed through configuration, customization or requires product enhancement.

During the sales cycle, this assessment is typically coordinated through the IFS Pre-Sales organization, which may include collaboration with Product Management. For existing customers, similar questions can be evaluated together with IFS Consulting, Unified Support, and Product Management, as appropriate.

In IFS Cloud, Tax Determination, NF-e Issuance, and Tax Reporting rely on integration with an External Tax System in Brazil, meaning that the overall solution combines functionality provided by both IFS Cloud and the tax partner. When evaluating business requirements, it is therefore important to consider not only the capabilities available in IFS Cloud, but also the functionality supported by the External Tax System, including any partner-provided integrations, APIs, or complementary products that may be part of the proposed solution.

2 Basic Data Setup

2.1 Company Setup

2.1.1 Overview

Create a new Brazilian company. The company can be created based on the Brazilian Standard Template (STD-BR).

Template	Valid	Default Template...	Creation Date	Last Modification Date	Created By	System Template...
STD-BR - Brazilian Standard Template	Yes	No	12/16/22, 1:19 AM	1/6/23, 4:07 AM	IFSAPP	Yes

To utilize the Brazilian functionality, the company must be set up as using the Brazilian localization. This is defined in the page **Company**.

2.1.2 Define Localization

- Open the page, **Company**.
- Search for the company.
- Select “Brazil” in the drop-down list in the **Localization** field and **save**. Note that this cannot be changed once transactions are created for the company.

Company EABR1 - Brazilian Company 1

Update Company Update Company Translation New Company

Company EABR1 Name Brazilian Company 1

General Information

Default Language English Country BRAZIL Localization Brazil

Form of Business Creation Date 2019-09-25 Activity Start Date

Source Company Source Template ID STD Template Company No

Master Company for Group Consolidation No

2.1.3 Select Localization Functionality.

Specify which functionality to use.

- Open *Localization Control Center* sub-menu in the **Company** page.
- The localization selected in previous step is displayed in the **Localization Control Center** field and cannot be changed.
- All functionality available for Brazil is presented in the list. Enable/Disable the functionality based on the requirements for the company by enabling/disabling the toggle. Note that some functionality is mandatory and cannot be disabled.

For example, showing Brazilian Specific Fiscal Attributes in the sales and purchasing flow is mandatory. But if Avalara taxes are supposed to be used, this specific function for “Integration to Brazilian External Tax System” need to be enabled.

2.2 Business Operation

2.2.1 Overview Legal Requirement

The Business Operation (Brazilian CFOP code) is a code specified by the Brazilian tax system and determined by the federal government. It can be used to define if a specific operation is taxable or not and is mandatory information for the NF-e XML (electronic version of the Nota Fiscal).

2.2.2 Process Overview

2.2.2.1 PROCESS OVERVIEW - SALES

2.2.2.2 PROCESS OVERVIEW - PROJECT INVOICE (INITIAL SOLUTION)

2.2.2.3 PROCESS OVERVIEW - PROCUREMENT

2.2.3 Prerequisites

The company must be set up to use Brazilian localization, see the Company Set-Up chapter, and the “Business Operation” parameter must be enabled (this is mandatory in the Localization Control Center for Brazil localization).

2.2.4 Define Basic Data.

Enter the CFOP codes for your company on the **Application Base Setup/General Data/Business Operation** page.

2.2.5 CFOP with the AVALARA Integration

From IFS Cloud 21R2 release onwards the Business Operation (CFOP) is associated with integration with an external tax calculation partner, hence the code will be received and recorded

into the lines of the following objects, where tax determination with the external tax system is supported:

- Sales Quotation
- Customer Order
- Customer Invoice
- Project Invoice
- Order Quotation
- Purchase Order Line
- Incoming Nota Fiscal and Bill of Lading
- Outgoing Tax Document

The user can manually edit the Business Operation value in the Invoice line if the Customer Order Invoice is in Preliminary status, but it will be overridden with the CFOP value coming from tax calculation engine, if the tax is fetched again by changing quantity or Brazil specific attributes like Acquisition Origin and icms Statistical Code.

In Project Invoices, the user can manually edit the Business Operation value in the Invoice line if the Project Invoice is in Preliminary status and no Outgoing Nota Fiscals are created for the Project Invoice, but it will be overridden with the CFOP value coming from tax calculation engine, if the tax is fetched again by changing quantity or Brazil specific attributes like Business Transaction ID and Goods/Services Statistical Code.

For the Order Quotation and/or Purchase Order user will not be able to add a value when creating an Order Quotation Line and/or Purchase Order Line, the field for Business Operation will be empty until a response from Avalara has been received. This value can only be changed by a new request and response from Avalara (e.g. triggered from a change on the Order Quotation and/or Purchase Order line). The value received from Avalara doesn't have to exist in the basic data in IFS Cloud, regardless of whether it will be added to the Order Quotation and/or Purchase Order LineTax Request to Avalara

After the user triggers a request to Avalara, (depending on Company setup this can be done by for example creating/modifying a part line or any line connected charge, releasing the order, using the manual command, etc.) the response from Avalara will include a value for Business Operation. All details related to the Avalara request mapping can be seen in the Appendix.

2.3 Acquisition Origin

2.3.1 Overview of Legal Requirement

The Brazilian Tax Authority provides a list of numeric codes to be used to indicate the acquisition origin for a part. The information is used for tracking if a company is applying the proper tax rates. The acquisition origin of a sold part is mandatory information in the NF-e XML file. This is also possible to set the purchased part to have a default value for the purchase order line, as the value is mandatory on the purchase order line when sending a request to Avalara.

2.3.2 Prerequisites

The company must be set-up to use Brazilian localization, see the Company Set-Up chapter, and the “Acquisition Origin” parameter must be enabled (which is mandatory for the Brazil localization).

2.3.3 Define Basic Data.

Enter the Acquisition Origin basic data for your company in the **Application Base Setup/General Data/Acquisition Origin** page.

✓	:	Acquisition Origin	Description	Validity
☐	⋮	0	National	Active
☐	⋮	1	Foreign, direct import	Active
☐	⋮	2	Foreign, acquired domestically	Active
☐	⋮	3	National, goods with Import Content greater than 40% and less than or equal to 70%	Active
☐	⋮	4	National, whose production has been made in accordance with the basic production processes referred to in the legislations mentio...	Active
☐	⋮	5	National, goods with Import Content less than or equal to 40%	Active
☐	⋮	6	Foreign, direct import, without national similar, listed in CAMEX and natural gas	Active
☐	⋮	7	Foreign, acquired domestically, without national similar, listed in CAMEX and natural gas	Active
☐	⋮	8	National, goods with Import Content higher than 70%	Active

2.3.4 Define Acquisition Origin in the Part Level

The default value for Acquisition Origin can be defined in Sales Part, Purchase Part and Inventory Part pages.

----------------------	---	---

The Acquisition Origin connected in the Brazilian Specific Attributes for a given Part No will be copied to other part-related pages, if this part exists as Sales Part, Non-Inventory Sales Part, Inventory Part, and Purchase Part in application.

Optionally, a specific Acquisition Origin can be defined directly in the Sales Part, Non-Inventory Sales Part, Inventory Part, or Purchase Part, different from the one connected to the Master Part, if needed.

2.3.6 Fetching Logic for Acquisition Reason

The Acquisition Origin will be fetched into the lines of the following objects:

- Business Opportunity
- Sales Quotation
- Customer Order
- Customer Invoice
- Outgoing Tax Document
- Outgoing Nota Fiscal
- Project Invoice
- Order Quotation
- Purchase Order Line
- Incoming Nota Fiscal and Bill of Lading
- Incoming Tax Document

The default value for Acquisition Origin will be fetched from the Sales Part into the Business Opportunity Lines, and it can be modified manually. When the Sales Quotation is created from a Business Opportunity, the Acquisition Origin value for each order line is fetched from the Business Opportunity.

The default value for Acquisition Origin will be fetched from the Sales Part into the Sales Quotation and Customer Order Lines, and it can be modified manually. When the Customer Order is created from a Sales Quotation, the Acquisition Origin value for each order line is fetched from the Sales Quotation.

The default value for Acquisition Origin will be fetched from the Purchase Part into the Order Quotation and Purchase Order Lines, and it can be modified manually. When the Purchase Order is created from an Order Quotation, the Acquisition Origin value for each order line is fetched from the Order Quotation.

The default value for Acquisition Origin will be fetched from the Inventory Part into Outgoing Tax Document Lines, and it can be modified manually.

The default value for Acquisition Origin will be fetched from the Report Code Details into Project Invoice Lines, and it can be modified manually.

In the Outgoing Nota Fiscal, the Acquisition Origin is fetched into the lines from the connected object.

In the Incoming Nota Fiscal, the Acquisition Origin is fetched into the lines from the connected object, but it be entered and/or modified manually.

2.3.7 Tax Determination with External Tax System

Acquisition Origin will be included in the Avalara request file for each item. See further information in the *Appendix* for the mapping between IFS and Avalara.

2.3.8 Delimitations

No part lines, rental lines, and non-line connected charges are supported for the procurement flow. Furthermore, the flow Purchase Requisition is not supported. For the Sales flow, rental lines and non-line connected charges are not supported.

Additional delimitations may apply; all relevant flows should be tested to ensure completeness.

2.4 Goods/Services Statistical Codes

2.4.1 Overview of Legal Requirement

NCM is the Brazilian classification system of goods, which determines the import duties and taxes needed to pay for a product. The codes are based on the international Harmonized System (HS) for classifying imported and exported products, but with 2 additional digits in the codes. The NCM code is mandatory information in the NF-e XML file.

The Service Code (Código de Serviço) is a standardized classification used to identify and categorize different types of services provided by businesses. This code is essential for the correct taxation of services, especially regarding the ISS (Imposto Sobre Serviços), which is a municipal tax applied to service providers.

Each service type is assigned a specific code according to the Lista de Serviços (Federal List LC 116) defined by Brazilian tax legislation. This list is detailed and includes a wide range of services. The correct application of the Service Code is crucial for calculating the appropriate tax rates and for the accurate issuance of Service Nota Fiscal.

The NBS Code , Brazilian Nomenclature of Services. (Nomenclatura Brasileira de Serviços) is a standardized classification used to identify and categorize different types of services provided by businesses. This code is essential for the correct taxation of services, especially regarding the new taxes introduced in new Brazilian Tax reform.

To differentiate it from the service code still used under the current tax system in Brazil, a toggle must be selected to indicate that the code refers to the NBS.

In IFS Applications, the NCM Codes for the classification of Goods and Federal Service Codes for the classification of Services are handled with Goods/Services Statistical Codes functionality.

2.4.2 Prerequisites

The company must be set-up to use Brazilian localization, see the Company Set-Up chapter, and the “Goods/Services Statistical Codes Definition per Company” Localization Control Center parameter must be enabled (mandatory for Brazil localization).

2.4.3 Enter Basic Data

Enter the NCM codes for your company in the **Application Base Setup/General Data/Goods/Services Statistical Codes** page.

Application Base Setup > General Data > Goods/Services Statistical Codes

2.4.7 Fetching Logic for Goods/Service Statistical Codes

The Goods/Service Statistical Codes will be fetched into the lines of the following objects:

- Business Opportunity
- Sales Quotation
- Customer Order
- Customer Invoice
- Outgoing Tax Document
- Outgoing Nota Fiscal
- Project Invoice
- Order Quotation
- Purchase Order Line
- Incoming Nota Fiscal and Bill of Lading
- Incoming Tax Document

The default value for Goods/Service Statistical Code will be fetched from the Sales Part into the Business Opportunity Lines, and it can be modified manually. When the Sales Quotation is created from a Business Opportunity, the Goods/Service Statistical Code for each order line is fetched from the Business Opportunity.

The default value for Goods/Service Statistical Code will be fetched from the Sales Part into the Sales Quotation and Customer Order Lines, and it can be modified manually. When the Customer Order is created from a Sales Quotation, the Goods/Service Statistical Code for each order line is fetched from the Sales Quotation.

The default value for Goods/Service Statistical Code will be fetched from the Purchase Part into the Order Quotation and Purchase Order Lines, and it can be modified manually. When the Purchase Order is created from an Order Quotation, the Goods/Service Statistical Code for each order line is fetched from the Order Quotation.

The default value for Goods/Service Statistical Code will be fetched from the Inventory Part into Outgoing Tax Document Lines, and it can be modified manually.

The default value for Goods/Service Statistical Code will be fetched from the Report Code Details into Project Invoice Lines, and it can be modified manually.

In the Outgoing Nota Fiscal, the Goods/Service Statistical Code is fetched into the lines from the connected object.

In the Incoming Nota Fiscal, the Goods/Service Statistical Code is fetched into the lines from the connected object, but it be entered and/or modified manually.

2.4.8 Tax Determination with External Tax System

Goods/Service Statistical Code will be included in the Avalara request file for each item. See further information in the *Appendix* for the mapping between IFS and Avalara.

2.4.9 Delimitations

Connection of Goods/Services Statistical Codes is limited to Sales Parts, Non-Inventory Sales Parts, Purchase Parts, Inventory Parts and Report Codes in this version.

Project Invoicing for the provision of services is supported in this Project Invoice – Initial Solution. Project Invoicing flows not supported in this Project Invoice – Initial Solution are:

- Project Invoicing for sale of goods.
- Credit Project Invoices and Project Correction Invoices.

Additional delimitations may apply; all relevant flows should be tested to ensure completeness.

2.5 Brazilian Specific Fiscal Attributes

2.5.1 Overview of Legal Requirement

The **Business Transaction Code** is required in the 3rd party tax calculation engine to properly identify the business scenario details performed and return calculated tax amounts, as well as other relevant tax-related information in accordance.

The **Product Type** is the tax classification of goods. This is a methodology used in Brazil to standardize the goods in groups, providing the possibility to classify the groups and assign them the taxes and regulations. Product Type is required in 3rd party tax calculation engine to properly identify the group in which the good is framed into and return calculated tax amounts as well as other relevant tax-related information. This classification is also needed when submitting the Taxes Reporting to Brazilian Tax Authority per period.

The **CEST** is the Tax Substitution Specifier Code that identifies products framed in Tax Substitution protocols. This is used by the 3rd party tax calculation engine as one of the possible ways to find the set of taxes for a good (with EAN and Harmonized Codes - NCM).

This code is also needed in the xml files for Nota Fiscais as well as when submitting the Taxes Reporting to the Brazilian Tax Authority per period.

The **FCI** (Import Content File) hash code is provided by Brazilian Tax Authority for parts containing coefficient of imported inputs in manufacturing process.

The **Acquisition Reason** is used by the customers and recipients of Nota Fiscal when applying for a given good. This is required for 3rd party tax calculation engine to properly identify the business scenario details performed and return calculated tax amounts, with other relevant tax-related information accordingly.

2.5.2 Enter Basic Data

2.5.2.1 Acquisition Reason

Navigate to Application Base Setup > General Data > Acquisition Reason. Enter the Acquisition Reason ID and Description, select the External Use Type from the drop-down list, and define the credit appropriation setup for ICMS, IPI, PIS/COFINS, and CBS/IBS taxes.

You may also select the PIS/COFINS Revenue Type from the drop-down list, which will be used in the Tax Calculation to help identify the correct PIS/COFINS CST to be applied in each scenario, according to the acquisition reason selected in the Order Quotation line, Purchase Order line, or Incoming Nota Fiscal line.

The credit appropriation setup determines whether these taxes will be posted as recoverable taxes or absorbed into the cost of goods for incoming procurement transactions.

Application Base Setup > General Data > Acquisition Reason

The Use Type defined for given the Acquisition Reason ID is one of the key attributes used by External Tax System for tax determination.

The Acquisition Reason can be defined in both part level and Business Transaction Code levels. Select it from list of values in the field **Acquisition Reason ID** in Sales Part and/or Purchase Part.

Acquisition Reason ID: RS - Goods for Resale | Acquisition Origin: 0 - Nacional, exceto as indicadas nos c... | Tax Manufacturing Equivalent: ☐

The Acquisition Reason is automatically fetched into the field **Acquisition Reason Id** in the object lines (Sales Quotation, Customer Order, Order Quotation, Purchase Order, etc..). The fetching of Acquisition Reason Id to the Sales Quotation line is done in two ways:

1st – The Acquisition Reason ID is automatically derived from the related part used in the transaction, e.g.: from the Sales Part in sales transactions, the Purchase Part in procurement transactions, and the Inventory Part in transfer transactions.

2nd – If the Acquisition Reason ID is not found at Part level, then this is derived from the Business Transaction Code.

The Acquisition Reason ID can also be entered and/or modified manually directly in the object line level in Sales Quotation, Customer Order, Order Quotation, Purchase Order and Outgoing Tax Document.

In Outgoing Nota Fiscal, the Acquisition Reason field is not editable at the line level, since in these scenarios, tax calculation with ExternalTax System is always done based on the source object from which the fiscal document was generated from.

In Incoming Fiscal Documents, the Acquisition Reason field is primarily derived from the source object to which this is related, e.g. Purchase Order. In cases where incoming Fiscal Document is not linked to a source object, the Acquisition Reason ID is fetched from Part or Business Transaction Code level, depending on the scenario. However, manual editing at the line level is allowed, since for incoming transactions the Fetch External Tax option is supported directly on the Incoming Nota Fiscal and Bill of Lading page.

2.5.2.2 Business Transaction Code

Navigate to the **Business Transaction Codes** page available in *Application Base Setup/General Data/Business Transaction Code*. Enter **Business Transaction ID**, description, and direction (Inbound/Outbound). For example, in the procurement flow, the Direction should be set to Inbound, while in the sales flow the Direction should be set to Outbound.

Define Presence Type with one of options from the dropdown list in the Business Transaction Codes. This information is reported to Brazilian Tax Authority in the electronic Nota Fiscal of goods in the tag <indPres> under <ide> element.

When tax determination is performed through integration with an External Tax System, the Business Transaction ID must be linked to an External Tax System Reference. This reference is the main parameter used in tax determination, as it specifies the business scenario being executed. The complete list of reference values used to manage different business scenarios must be obtained directly from the tax determination partner to ensure accurate configuration.

The Acquisition Reason can optionally be defined in the Business Transaction Code level.

Application Base Setup > General Data > Business Transaction Code Company: BLUE NOTE GL

Business Transaction Codes

✓	:	Business Transaction Id	Description	Direction	Presence Type	Acquisition Reason Id	External Tax System Reference
☐	:	100	Standard Sales	Outbound	Presence-Onsite	UC	standardSales

☐	:	600	Receipt of Goods - Intersite	Inbound	Internet		

The column Connected Business Transaction ID supports scenarios in which a second Nota Fiscal must be created for the same transaction — specifically the Sales for Future Delivery and Triangular Sales scenarios.

Validations for Connected Business Transaction ID:

- The Business Transaction ID must be outbound for sales-related flows.
- The Connected Business Transaction ID must be unique and cannot match the primary Business Transaction ID.
- A Connected Business Transaction ID cannot be assigned to multiple Business Transaction IDs.

The column **Coastal Shipping** refers to transporting goods by sea between ports within the same country. It is required by 3rd party tax calculation engine to properly identify the destinations and return calculated taxes. The value set in this field will be included in the Avalara request file and Avalara will return the percentage of ICMS tax according to the state where the sender and recipient is placed.

- When the **Coastal Shipping** is selected to number **1 - Intrastate**, Avalara will apply the percentage of ICMS tax according to the state where the sender is placed.
- When the **Coastal Shipping** is selected to number **2 - Interstate**, Avalara will apply the percentage of ICMS tax according to the state where the sender and the receiver is placed.
- When the **Coastal Shipping** is selected to number **3 - Long-Haul**, Avalara will apply the percentage of ICMS tax with exemption applied for exportation

Note: For **Coastal Shipping** option number **2 - Interstate**, there is a limitation where Avalara will not return the correct percentage of ICMS tax. Since, in Brazil the ICMS percentages depends on the sender and the recipient states involved in the transaction and the Avalara JSON file do not include the recipient state. Therefor Avalara will base the ICMS tax on the addresses in the JSON file, which is the sender and the receiver. If the receiver address is outside Brazil, it should be treated as exportation, option number 3. To be able to receive the correct ICMS tax from Avalara for this scenario the user must configure a customized rule in Avalara. With this customized rule, the user can determine what is the ICMS percentage to be fetched when JSON file is integrated, containing specifics parameters as filter, to fetch that specific rule.

Coastal Shipping is supported by each Avalara call in Sales Quotation, Customer Order, Customer Invoice and Outgoing Nota Fiscal.

If no value is defined in the Coastal Shipping field no value will be sent, and Avalara will instead decide the value based on the address information included in the JSON file.

Enable the Export Purpose toggle for Business Transaction Codes with Direction = Outbound that are used to handle domestic business scenarios which must be treated as equivalent to export operations. When this toggle is enabled, the application fetches the Custom Unit of Measure (UoM) defined for the Inventory Part and uses it as the taxed unit of measure in the electronic Goods Nota Fiscal, even in scenarios where the recipient's country in the Nota Fiscal is Brazil. This behavior affects the following XML tags under the <prod> element: <qTrib>, <uTrib>, and <vUnTrib>.

The default value for Business Transaction Code can be defined in entity and address level in Customer/Address/Delivery Tax Information and Supplier/Address/Delivery Tax Information.

2.5.2.3 Brazilian Specific Attributes for Master part

To enter Product Type Classification, CEST, FCI Hash Code, CBS/IBS Unit Factor, IS Unit Factor and Legal Reference for the parts, select “Brazilian Specific Attributes” in the **Part Master Data/Master Part/part** page, command group **Part Details**.

On the Brazilian Specific Attributes page, select the appropriate **Product Type Classification** for the part from the dropdown menu. The value selected for the part is integrated to external tax system and will be used for Brazilian tax reporting.

For the Purchasing flow it is mandatory to set the **Product Type Classification** for the part as either Goods or Services to run Avalara. This value can be changed, however if changed open order will not be affected, meaning they will not be updated with the new classification. If classification of a part is missing, then user tries to fetch external taxes from Avalara, a warning will be triggered.

The 7-digit code from the official CEST list (provided by the Brazilian Government) which fits the part can be set in the **CEST Code** field.

Next, enter the FCI Hash Code in the **FCI Code** field and save the record. The FCI (Import Content File) hash code is provided by Brazilian Tax Authority for parts containing coefficient of imported inputs in manufacturing process.

The **Legal Reference** to identify the specific legal basis and tax treatment. In the external tax calculation, this refers to the technical name of the item, as defined in legislation that specifies a list of products subject to a particular tax rule. This name is typically used if, and only if, the product belongs to an NCM classification that may be subject to different CBS and IBS tax rates.

Next, enter the **CBS/IBS Unit Factor** and/or **IS Unit Factor** to specify the conversion factor between the commercial unit and the taxable unit. This factor is used to calculate the taxable quantity that will be multiplied by the specific tax rate. The values of "cbslbsUnitFactor" and "isUnitFactor" must be multiplied by the commercial quantity of the item to obtain the quantity in the taxable unit as required by legislation and save the record.

Part
BRPART3 - Brazilian Part 3

Product Type Classification Finished Product	Cest Code 0200400	FCI Code B01F70AF-20BF-BB1F-B4BC-65F937F616FE	CBS/IBS Unit Factor 2
IS Unit Factor 3	Legal Reference AGUA TONICA		

The NCM codes and purpose for acquisition can also be defined at the Master Part level. On the Brazilian Specific Attributes page, select the appropriate NCM code to classify the part from the **Goods/Service Statistical Codes** dropdown list. Next, choose the option for the **Acquisition Origin** field and save the record. Once the record is saved, the application copies the configuration from the master part to all related part pages, such as Sales Part, Purchase Part, and Inventory Part.

In cases where the NCM code and purpose for acquisition may differ between purchase and sales process for the same part, these can be specifically defined directly in the Purchase Part and Sales Part pages, in **Goods/Service Statistical Codes** and **Acquisition Origin** fields.

The Tax Manufacturing Equivalent can also be defined in sales part level, inventory part level, non inventory sales part level, supplier for purchase part level and package part level. When using the Avalara integration, you will need to set the Tax Manufacturing Equivalent to force the IPI calculation in a company whose CNAE is not classified as an industrial company, enable the manufacturing toggle in Brazilian Specific Attributes group.

2.6 Brazilian Charge Category for Purchase Charges

2.6.1 Overview of Legal Requirement

For Avalara taxes to be correct, there is a need to differentiate costs related to the importation and transport process. For example, costs that should be included in the customs value and costs that should be reported separately, such as for example freight and insurance.

2.6.2 Solution overview

To support this a **Brazilian Charge Category** is connected to the **Purchase Charge Type** when using the Brazil localization with Avalara Tax Integration.

Line connected charges on the Purchase order, connected via the Dispatch Advice process, is the main way to handle these transport and importation fees in Brazil. These different charges need to be sent to Avalara in the request file (with the correct Avalara tag) to get the correct calculated part line taxes.

The **Brazil Charge Category** can be set and edited on the **Purchase Charge Type** page, in the **Purchase Order** page on the **Charge** tab, in the **Supplier for Purchase Part** page on the **Charge** tab and in the **Incoming Dispatch Advice** Charges assistant. The default value can be set on the Purchase Charge Type. If values are set in the **Supplier for Purchase Part** page, these values are fetched to the Purchase Order.

If the charge line is not line connected the value for Brazil Charge Category will be blank.

2.6.3 Process overview Purchase Charges

2.6.4 Prerequisites

The company must be set-up to use Brazilian localization, see the Company Set-Up chapter, and the “Integration to Brazilian External Tax System” parameter must be enabled (this is not mandatory in Localization Control Center for Brazil localization).

2.6.5 Connect Brazil Charge Category

In **Purchase Charge Type** page there is a field for **Brazilian Charge Category** only visible when Site company is using Avalara. The possible values to choose from are as below:

- National Freight (connected to Avalara JSON tag freightAmount)
- National Insurance (connected to Avalara JSON tag insuranceAmount)
- National Expenses (connected to Avalara JSON tag otherCostAmount)
- International Freight (connected to Avalara JSON tag customsValue)
- International Insurance (connected to Avalara JSON tag customsValue)
- International Expenses (connected to Avalara JSON tag customsValue)
- AFRMM (connected to Avalara JSON tag afrmmValue)
- Siscomex (connected to Avalara JSON tag customsValue)
- Demurrage (connected to Avalara JSON tag customsValue)
- Wharfage (connected to Avalara JSON tag customsValue)

2.6.7 Add or modify Charges in Purchase Order and/or Incoming Dispatch Advice

If default charges have been added in Supplier for Purchase Part these will be inherited to the Purchase Order. These values can be modified if needed in the Purchase Order. It is only charges that are connected to Purchase Order Lines that will have a value in Brazilian Charge Category. This value can be changed if needed also in the Purchase Order. If using a Purchase Order Change Order, the value can be changed also there.

In the **Purchase Order/Charges** tab it is also possible to add and modify new charge lines. They need to be connected to a Purchase Order Line to get a **Brazil Charge Category** visible or added.

Connect to Rel No	Connect to Line No	Brazilian Charge Category	Sequence No	Charge Type
			6	CE-BR-CT1
1	3	National Insurance	5	CE-BR-CT2
1	1	National Freight	3	CE-BR-CT3

One common way to add transport related costs in Brazil is to use **Incoming Dispatch Advice** page and add charges there. Also, in this dialog for **Charges for Incoming Dispatch Advice**, the value for **Brazilian Charge Category** can be changed if needed. The value connected to the **Charge Type** will be default if existing.

Brazilian Charge Category	Sequence No	Charge Type	Charge Currency	Distribute Charge By	Connect to Purchase Order No	Connect to Line No	Connect to Rel No	Transferred to Orders	Invoicing Supplier
National Freight	1	CE-BR-CT1	BRL		P101062	1	1	No	CE-CE-BR-S

If new charge lines are added or modified, they need to be either line connected or distributed per line in order to have a **Brazilian Charge Category**.

2.6.8 Tax Request to Avalara

Purchase Order Line connected charges is a part of the information to be included in the Request file sent to Avalara.

See further information in the *Appendix* for the mapping between IFS and Avalara.

2.7 Brazilian Charge Category for Sales Charges

2.7.1 Overview Legal Requirement

For Avalara taxes to be correct, there is a need to include sales charges in the tax calculations on Customer Orders and Invoices. For example, charges for freight, insurance and other expenses should be passed to the Outgoing Nota Fiscal and included in the request message sent to Brazil Tax Authorities.

2.7.2 Solution overview

To support this, a **Brazilian Charge Category** is connected to the **Sales Charge Type** when using the Brazil localization with Avalara Tax Integration.

Line-connected charges on the Customer Order are the main way to handle freight, insurance, and expense Sales Charges in Brazil. These different charges need to be sent to Avalara in the request file (with the correct Avalara tag) to get the correct calculated part-line taxes.

The **Brazil Charge Category** can be set and edited on the **Sales Charge Type** page, in the **Sales Quotation** page on the **Charge** tab, in the **Customer Order** page on the **Charge** tab, in the **Sales Part** page on the **Charge** tab, in the **Package Part** page on the **Charge** tab and the **Non-Inventory Sales Part** Page **Charge** Tab. Default value can be set on the Sales Charge Type.

If the charge line is not line connected the value for Brazil Charge Category will be blank.

2.7.3 Process overview Sales Charges

2.7.4 Prerequisites

The company must be set up to use Brazilian localization, see the Company Set-Up chapter, and the “Brazilian Specific Fiscal Attributes” and “Integration to Brazilian External Tax System” (this is not mandatory in Localization Control Center for Brazil localization) parameters must be enabled.

2.7.5 Connect Brazil Charge Category

In **Sales Charge Type** page there is a field for **Brazilian Charge Category** which is only visible when the Localization Control Center parameters are enabled for the company. The possible values to choose from are as below:

- Freight (connected to Avalara JSON tag freightAmount)
- Insurance (connected to Avalara JSON tag insuranceAmount)
- Expenses (connected to Avalara JSON tag otherCostAmount)

The screenshot shows the 'Sales Charge Type' page. On the left, there is a list of charge types: EX (National Expenses), FR (National Freight), FR2 (National Freight 2), FR3 (National Freight 3), HT% (HT%), and HTTEST (Testfreight). The 'EX - National Expenses' charge type is selected. The main form displays details for this charge type, including Charge Type (EX), Description (National Expenses), Charge Group (EX), and Charge Group Description (Expense Charge). The Sales UoM is set to '*' and the Currency is BRL. The 'GENERAL' tab is active, showing fields for Charge Price (10.00), Charge Price incl Tax (10.00), Charge Cost (10.00), Charge Cost (%), HSN/SAC Code, and Brazilian Charge Category. The 'Brazilian Charge Category' field is highlighted with a red box.

2.7.6 Default Sales Charges for Sales Part

If needed, it is possible to add default values for Charges on the **Sales Part** page. If a Brazil Charge Category has been set for the Sales Charge Type this value will be defaulted, but the values can also be changed in this page.

2.7.7 Add or Modify Charges in Sales Quotation and Customer Order

If default charges have been added for the sales part, they will be inherited in the Sales Quotation and Customer Order. These values can be modified if needed in the Sales Quotation and Customer Order. Only charges connected to customer order lines will have a value in the Brazilian charge category.

2.7.8 Tax Request to Avalara

Sales Quotation line and Customer Order Line connected charges are a part of the information to be included in the Request file sent to Avalara.

See further information in the *Appendix* for the mapping between IFS and Avalara.

2.7.9 Delimitations

- Fetch taxes from Avalara to a sales quotation and customer order line containing Non-Inventory Sales Part of type “Goods” is not supported.
- The Brazilian charge category will only be visible in the sales quotation and customer order charges tab when the charge line is connected to a quotation/order line.
- Avalara Tax calculations in customer orders including Sales charges are not supported in Customer order Collective, Correction, Prepayment based, Advanced and Rebate Invoice types and are only implemented in Customer order Invoices.
- When performing a partial delivery, charges are not automatically distributed; therefore, if a charge is added and the delivery and invoicing are done partially, the user must manually adjust the charge amount to accurately reflect the partial delivery.

Additional delimitations may apply; all relevant flows should be tested to ensure completeness.

2.8 Classification of Business and Form of Business

2.8.1 Overview Legal Requirement

“Tax Regime” and “Entity Type” are legally required to determine the Brazilian tax calculation and tax reporting in Nota Fiscal.

- Tax Regime is determined according to the company's profit. Most important tax regimes are Real Profit, Estimated Profit and Simplified.
- “Entity Type” refers the type of administration.

2.8.2 Solution Overview

To support this requirement, IFS Application core functionalities were slightly enhanced to define the required basic data.

- New page, **Classification of Business** is introduced with system defined values. User can manually define “*External Tax System Reference*”.
- Brazilian specific **Forms of Business** added

2.8.3 Prerequisites

IFS Application core generic functionalities are used to define these basic data, hence not controlled by Brazilian-specific Localization Control Center parameters.

2.8.4 Enter Basic Data

Classification of Business

Go to the page, **Application Base Setup/Enterprise/Company/Basic Data/Classification of Business**. From this page, query the country as “BR-Brazil” and find the system-defined Brazilian specific *Classification of Business* records.

In the **External Tax System Reference** column, the user can manually define the *External Tax System References* according to the value and format given by the 3rd party tax calculation integrator. In example below, you can see the *External Tax System References* mapped according to the AVALARA requirements.

Classification of Business					
☰ 🔍 📄 + ✎					
✓	:	Country	Classification of Business	Description	External Tax System Reference
☐	:	BR - BRAZIL	1	Lucro Real	realProfit
☐	:	BR - BRAZIL	2	Lucro Presumido	estimatedProfit

The field **Classification of Business** can also be set to different values depending on supplier. For example, 7 for foreign suppliers, that indicates that this is an international supplier which will show the description "Não Aplicável".

2.9 Address Specific Tax Registration Numbers

2.9.1 Overview Legal Requirement

In Brazil, all entities and individuals engaged in business or professional activities must obtain unique tax identification numbers from the appropriate Tax Authority, depending on their legal nature and scope of operations.

CNPJ (Cadastro Nacional da Pessoa Jurídica) is the corporate tax identification number assigned to legal entities before they can commence business activities. The CNPJ must be informed on all incoming and outgoing *Nota Fiscais* issued or received by the company. Each CNPJ is linked to a specific physical address.

There is a validation process to ensure the CNPJ number are valid. Alphanumeric CNPJ are already being considered in this validation.

CPF (Cadastro de Pessoas Físicas) is the individual tax identification number issued by the Federal Revenue Service of Brazil (Receita Federal).

State Registration (Inscrição Estadual) is a tax identification number issued by state-level tax authorities (*Secretarias da Fazenda Estaduais*) for companies that are taxpayers of ICMS (Tax on the Circulation of Goods and Services). This registration is also associated with a specific physical address.

There is a validation process to ensure the State Registration number are valid.

City Registration (Inscrição Municipal) is a municipal tax identification number issued by local tax authorities. It is required for companies that provide services and are subject to ISS (Service Tax). The City Registration is mandatory for issuing the *NFS-e* (Electronic Service Invoice), obtaining the business operating license (*alvará de funcionamento*), and maintaining compliance with municipal regulations. This registration is also specified by physical address.

CNAE (Classificação Nacional de Atividades Econômicas) is an economic activity classification code defined by the Brazilian Federal Revenue Service. It consists of a seven-digit number that identifies the primary and secondary economic activities performed by a business. A company may hold multiple CNAE codes, one for its main activity and others for additional operations.

SUFRAMA (Superintendência da Zona Franca de Manaus) is a registration number issued by the regulatory agency of the Manaus Free Trade Zone. Companies registered with SUFRAMA may benefit from specific tax incentives applicable to operations within the Free Trade Zone.

State Registration for Tax Substitution (Inscrição Estadual de Substituição Tributária) is a specific registration number issued by state tax authorities to ICMS taxpayers subject to the Tax Substitution regime (*Substituição Tributária*). This registration applies when the company remits the tax to the state authority on a periodic basis rather than per fiscal documents. It is tied to a particular physical address, and a company may hold multiple registrations — one for each state in which it conducts taxable transactions.

The tax registration numbers described above must be included by both the issuer and the receiver in fiscal documents — *NF-e* for goods and *NFS-e* for services — and in all relevant tax reporting processes, depending on the applicable case, to ensure proper identification and compliance with municipal, state, and federal tax authorities.

2.9.2 Prerequisites

The company must be set-up to use Brazilian localization, see the Company Set-Up chapter, and the “Address Specific Tax Registration Numbers” parameter must be enabled.

2.9.3 Enter Basic Data for Tax ID Types

In IFS Applications, the Brazilian unique identification numbers are handled via the following Tax Type IDs:

Unique Identification Number	Tax Type ID
CNPJ	CNPJ
CPF	CPF
State Registration	STATE_REG
Municipality Registration	CITY_REG
CNAE	CNAE
SUFRAMA	SUFRAMA

State Registration for Tax Substitution	ST_REG%
---	---------

Ensure the Tax ID Types “CNPJ”, “CPF”, “STATE_REG”, “CITY_REG”, “CNAE”, “SUFRAMA” and “ST_REG%” are defined for Country Code “BR” in the **Application Base Setup/Enterprise/Tax/Tax ID Types** page (standard functionality)

Tax ID Types

✓	Tax ID Type	Country Code	Report Code	Description	Layout Format	Validate Tax ID Number	Automatically Set to Valid
☐	: CNPJ	BR	1		XX.XXX.XXX/XXXX-XX	No	No
☐	: STATE_REG	BR	1			No	No
☐	: SUFRAMA	BR	1			No	No
☐	: CNAE	BR	1			No	No
☐	: CPF	BR	1			No	No
☐	: CITY_REG	BR	1			No	No

Note that a company may have multiple State Registrations for Tax Substitution, depending on the states where the recipients of the Nota Fiscal are located. In such cases, the Tax Type ID to be used starts with ST_REG, and the last two characters refer to the state where the registration applies. For example, for the state of Acre (acronym AC), the corresponding Tax Type ID would be ST_REG_AC.

		CITY_REG		3550308					

Note that tax ID numbers cannot be entered on the upper level if address specific tax ID numbers are already entered in the nested list. This is to ensure no duplicate records are entered.

2.9.9 Delimitations

Address specific tax registration numbers for Forwarder are supported if the Forwarder is connected with a Supplier.

2.10 Service Codes per Service and City

2.10.1 Overview Legal Requirement

The federal service codes provided by the Brazilian government and used to classify services are managed in IFS Applications as Goods/Services Statistical Codes. For more details on this functionality, please refer to the chapter on Goods/Services Statistical Codes.

In addition to the federal codes, each municipality in Brazil may have its own list of Service Codes. These municipal codes generally align with the Service List established by federal law (LC 116) but may include additional details or specific categorizations relevant to the local economy. These codes are used when issuing the Service Nota Fiscal.

In IFS Applications, the specific service codes for classifying services according to the various lists provided by each municipality are managed using the City-Based Service Codes per Non-Inventory Part and City-Based Service Codes per Report Code pages.

2.10.2 Prerequisites

The company must be set-up to use Brazilian localization, see the Company Set-Up chapter.

2.10.3 Enter Basic Data – Services Handled via Project Invoice

Open the **Financials/Financial e-Reporting/Basic Data/Brazilian Specific Attributes/City-Based Service Codes per Report Code** page and enter a Report Code.

Select the "Labor Assignment" toggle button if this service requires a local crew to be physically present at the location where it will be provided.

In the session Service Codes per City, enter the Service Code provided by each city where this service, the Report Code, will be provided and received.

2.10.6 Tax Determination with External Tax System

City-Based Service Codes will be included in the Avalara request file for each item. See further information in the *Appendix* for the mapping between IFS and Avalara.

2.11 Payment Mode

2.11.1 Overview Legal Requirement

In Brazil, the Payment Mode specifies how the buyer has made, or will make, the payment for the business transaction. This information must be reported under the Payment Information group of the NF-e layout established by the Brazilian Tax Authority (SEFAZ).

2.11.2 Prerequisites

The company must be set-up to use Brazilian localization, see the Company Set-Up chapter.

2.11.3 Enter Payment Mode for Customer

In IFS Applications, the payment mode for electronic Nota Fiscal purposes must be defined in the dropdown field Payment Mode, in Customer, Payment tab:

Customer

```

2.12 Automatic Generation of Official Document Number

2.12.1 Overview Legal Requirement

In Brazil, Nota Fiscal series are needed to segregate and control the Nota Fiscal numbering. Nota Fiscal number intervals are assigned to companies by the Tax Authority and there is a legal requirement to use the assigned numbers for the issued Nota Fiscals. Each series has its own Nota Fiscal number interval. When the last number in the interval has been used, a new series must be started.

The Brazilian law admits a branch of the company to have a separate series, which is a commonly used business practice. The Nota Fiscal series are separating goods and services.

Nota Fiscal number and series is mandatory information in the NF-e XML file sent to the Tax Authority before goods delivery.

2.12.2 Process Overview

The “Official Document Number” functionality is a generic solution to support generation of official invoice numbers in the Core application. It can be configured to support the requirements in Brazil, following the below process:

2.12.2.1 PROCESS OVERVIEW WITH CUSTOMER ORDER SALES OF GOODS

2.12.2.2 PROCESS OVERVIEW WITH PROJECT INVOICE – INITIAL SOLUTION

2.12.3 Enter Basic Data

The basic data described in below chapters must be entered to support the Nota Fiscal series and numbering.

2.12.3.1 DEFINE COMPANY BRANCHES

Define company branches in the **Application Base Setup/Enterprise/Company/Basic Data/Branches** page.

Search **Advanced**

Company: BNFX X Name More Favorites Search Clear

Branches BNFX - BLUE NOTE GUITAR EFFECTS - IFS CLOUD 24R1 1 of 1

»

✓	Branch	Description	Company Address ID
☐	MG01	Filial Minas Gerais	MG01
☐	SP01	Filial São Paulo	SP01

2.12.3.2 CONNECT BRANCH TO SITE

Connect Sites to company branches in the **Application Base Setup/Enterprise/Site/Site/Sales and Procurement** tab (IFS standard functionality). The Site-to-Branch relationship should be one-to-one.

Sales and Procurement DUBR1 - DU:BR:S1 - DU:BRAZIL-01 1 of 1

Branch B1	Print Pick Report Detailed	Order Type
Priority	Forwarder ID	Replicate Doc Text
Reserve from Transport Task	Create CO in Released Status	Use Part Catalog Description for Sales Part
Use Inventory Default		

2.12.3.3 DEFINE OFFICIAL DOCUMENT COMPONENTS PER COMPANY

The official document components are defined in two steps:

1. Specify names and descriptions for each component
2. Define the values of the components.

Open the **Financials/Customer Invoice/Basic Data/Official Document Number Components** page for the relevant Company, specify names and descriptions as follows on the **Define Components** session:

- Component A: Serie
- Component B: Branch
- Component C: Fiscal Document Model
- Sequence: Nota Fiscal Number

After saving, the **Component A** tab will be renamed to “Serie”, **Component B** tab will be renamed to “Branch” and **Component C** tab will be renamed to “Fiscal Document Model”. As a result, these components will be used when generating the official document number for Nota Fiscais.

Official Document Number Components

Define Components

Component	Name	Description	Component Separator	Used in Outgoing Documents	Used in Incoming Documents
: A	Serie			☒	☒
: B	Branch			☒	☐
: C	Fiscal Document Model			☒	☒
: SEQUENCE	Nota Fiscal Number			☒	☐

SERIE

BRANCH

FISCAL DOCUMENT MODEL

Value	Description
☐ : 001	Services
☐ : 009	Goods

2.12.3.4 DEFINE SERIES FOR NOTA FISCAL

In the **Serie** tab (Component A) the series to be used in Nota Fiscal of goods and/or services can be defined for company.

SERIE

BRANCH

FISCAL DOCUMENT MODEL

Value	Description
☐ : 001	Services
☐ : 009	Goods

2.12.3.5 DEFINE BRANCHES FOR NOTA FISCAL

The Branch (Component B) should correspond to the Branches created for the Company. The purpose is to utilize this component when the company operates with multiple Sites, ensuring that Official Document Numbers are unique and avoiding duplication when Invoices are processed, since the invoice numbers will be the concatenation of Series (Component A) + Branch (Component B) + Model (Component C) + Fiscal Note Number (Sequence) when they are posted in the application.

In the **Branch** tab (Component B) the branches from where Nota Fiscal of goods and/or services will be issued can be defined for company.

2.12.2 Project Invoice

2.12.2.1 Enter Invoicing Plan/Project Transaction

Enter an Invoicing Plan/Project Transaction using standard functionality.

2.12.2.1 Create Project Invoice

Create a preliminary Project Invoice.

If a Branch is connected to a Project on the **Project Management/Plan and Execute/Project Setup Parameters** page, the Branch is automatically fetched on the Project Invoice. This value can be

manually changed by the user as long as the invoice is in “Preliminary” status and no Outgoing Nota Fiscals are created for the Project Invoice.

See further information in the *Outgoing Nota Fiscals* chapter.

The image displays two screenshots from the IFS software interface. The top screenshot is the 'Project Setup Parameters' page for 'BR-001 - Brazilian Project 01'. It shows various settings including 'Material Allocation*' set to 'Within Project', 'Misc Demand Component Planning Method*' set to 'Manually Planned', and 'Project Access On' set to 'On'. A purple box highlights the 'Branch' dropdown menu, which is set to 'BSP01'. The bottom screenshot is the 'Project Invoice' page, showing 'Invoice Information' and 'Customer Information' tabs. A purple box highlights the 'Branch' dropdown menu in the 'Customer Information' section, which is also set to 'BSP01'.

If a Branch is not connected to a Project, the Branch should be manually entered on the Project Invoice. This value can be manually changed by the user as long as the invoice is in “Preliminary” status and no Outgoing Nota Fiscals are created for the Project Invoice.

See further information in the *Outgoing Nota Fiscals* chapter.

When a Branch is fetched/entered on the Project Invoice, the default **Nota Fiscal Series** defined for the Branch is shown in the **Official Document Number Components** dialog.

2.12.2.3 Delimitations

Project Invoicing for provision of services is supported in this Project Invoice – Initial Solution. Project Invoicing flows not supported in this Project Invoice – Initial Solution are:

- Project Invoicing for sale of goods.

- Credit Project Invoices and Project Correction Invoices.

Additional delimitations may apply; all relevant flows should be tested to ensure completeness.

3 Tax Calculation with Tax Calculation Structures

3.11.2 Overview Legal Requirement

In Brazil it's a legal requirement that some tax types are included in the tax base amount. This could be referred as 'Price Including Tax' or more precisely, 'Price Including Selected Taxes'. It is important to note that this is different from 'price including tax' terminology used in IFS standard application.

For legal tax reporting purposes, a tax type category must be defined for each tax code.

In CONVÊNIO ICMS 52/62 2017 the Brazilian Tax Authority introduced a new formula for calculating ICMS ST (ICMS Tax Substitution) tax base amount, including a markup percentage (%).

3.11.3 Process Overview

Set up basic data for Tax Codes, define Tax Calculation Structures, connect a Tax Calculation Structure to each customer order line and view the taxes on Customer Order Tax Lines and Customer Invoice Tax Lines. Tax amounts are calculated according to the Brazilian requirements.

Tax Calculation Structures functionality can be used on the Project Invoicing and Procurement side as well.

- Tax Codes
 - In **Tax Codes** page two new columns are introduced, "Tax in Tax Base" to facilitate Inclusion of taxes to the tax base amount and "Tax Type Category" to be able to separate the different Brazilian taxes (e.g. ICMS and IPI taxes).
- Tax Calculation Structure
 - In *Tax Calculation Structures* two new columns are introduced, **Tax in Tax Base** and **Mark up (%)**.

3.2 Prerequisites

The company must be set-up to use Brazilian localization, see chapter Company Set up, and you will notice that the mandatory localization parameter "Extended Tax Codes and Tax Calculation Structures set-up" in Localization Control Center is enabled.

- Standard IFS "Price including tax" functionality should not be used.
- Sales parts should be entered without a tax code since taxes from the connected tax calculation structure will be applied.
- All prices (sales part, sales price list, campaigns, agreements etc.) should be entered as Brazilian Net Price = "Raw Price" (standard IFS have a different definition of Net Price).

3.3 Tax Type Category in tax codes page

Define a Tax Type Category for each tax code in page **Accounting Rules/Tax/Tax Codes**.

3.4 Tax in Tax Base in Tax Codes Page

3.4.1 TAX IN TAX BASE CALCULATIONS

In Brazilian context, ICMS/ISS, PIS, COFFINS are taxes included in the price (in Brazilian way of explaining). This means tax amounts are included in the tax base amount. The tax % is expressed for the tax base amount which includes tax amount as well.

For example, if the tax percentage is 17% and the price with tax is 100, then the tax amount is equal to 17.00 BRL. In other words, the net amount excluding taxes is 83.00 BRL. The Tax amount is 17.00 BRL. Which means price including tax is 83+17 = 100 BRL. But still the Tax Base amount is 100 BRL which should include tax amount as well.

$$\text{Net Price} = 100 - 17 = 83$$

This is not equal to the 17% tax in the core application

Tax Amount in core for 17% = 87X17% = 14.11

Therefore, it is clear that Brazilian Tax calculation method yields a different value to that of core calculation. In fact, tax amount itself is included in the tax base amount in Brazilian ICMS and other Brazilian tax types which are included in the price.

Mathematically, tax base amount can be calculated as follows,

$$\text{Tax Base Amount} = \frac{p * 100}{100 - t}$$

Where;

p – Net Amount

t -Tax Rate

3.4.2 DEFINE TAX IN TAX BASE IN TAX CODES

A new toggle button, “Tax in Tax Base” added to the Tax Codes.

Whether the tax amount itself to be included in the tax calculation or not is decided by a toggle button introduced to the Tax Codes form. Users should select this toggle button for ICMS/ISS, PIS, and COFFINS tax type categories since their tax values are included in price. In other words, tax amounts include in the tax base amount.

Tax Codes						
☰ 🔍 📄 + ✎ 🗑 📋 Tax Texts per Tax Code Copy to Companies Translati						
Tax Code	Description	Tax Type	Tax in Tax Base	More	♥ Favorites	Clear 🔍 ⋮ Sett
(1) ✓	:	Tax Code	Description	Tax Type	Tax (%)	Tax in Tax Base
☐	:	COFINS	COFINS	Tax	20	Yes
☒	:	ICMS-1	ICMS-1	Tax	10	Yes
☐	:	PIS	PIS	Tax	5	Yes
☐	:	E0	EU Tax 0%	Calculated Tax	0	No
☐	:	E1	EU Tax with no reduction, goods, 25%	Calculated Tax	25	No

For an example, if we take 10% Tax Code enable to “Tax in Tax Base”,

Net Amount = 100.00 (100%-10% = 90%)
 Net Amount as a % = 90%

Tax Base Amount (TB) = $\frac{p \times 100}{100 - t}$
 (Tax Base Amt for Tax Calculation)
 $TB = \frac{100 \times 100}{100 - 10} = 111.11$

Tax Amount (T) = 111.11 x 10% = 11.11

3.4.3 TAX IN TAX BASE IN TAX CALCULATION STRUCTURE

A new column **Tax in Tax Base** is added to the Tax Calculation Structure.

When a new structure item is created and connected a tax code with “Tax in Tax Base” enabled, this new field is automatically set to “Yes” indicating the connected tax code set up.

3.5 Markup (%) in Brazilian Tax Calculation

3.5.1 MARKUP (%) TO THE TAX CALCULATION STRUCTURE

Increasing the Tax Base amount by certain percentage is required for some Brazilian taxes like, ICMS and referred as ICMS Substitute.

A new column "Markup %" added to the Tax Calculation Structure to facilitate this requirement.

Mathematically, tax base amount with a Markup % is calculated as follows,

Calculate new tax base amount for tax codes in the customer order line and customer invoice line.

- a. Take the Net Amount as, " p " and the Net Amount as a %, as " $p\%$ "
- b. Markup % as " m "
- c. Tax Percentage as " t "
- d. First, Increase " p " by markup %, " m " as follows,

$$(P + m)$$

- e. Then to get the new tax base amount " TB "

$$\text{Tax Base Amount (TB)} = \frac{(P + m) * 100}{(100 - t)}$$

- f. In the final step, tax (T) to be calculated as follows,

$$\text{Tax (T)} = TB * t$$

$$(t = \text{tax \%})$$

For an example, if we take 20% Tax Code enable to “Tax in Tax Base”, and “Markup %” as 10%.

Tax Percentage (t) = 20%
 Net Amount (p) = 100.00 (100%-20% = 80%)
 Net Amount as a % = 80%

Markup % = 10%

First, Increase “p” by markup %, “m” as follows,

$$= (p + m)$$

$$= (100+10\%)$$

Tax Base Amount (TB) = $\frac{(p + m) * 100}{(100-t)}$
 (Tax Base Amt for Tax Calculation)

$$TB = \frac{100 + 10\%}{100 - 20} * 100 = 137.50$$

Tax Amount (T) = 137.50 x 20% = 27.50

3.5.2 DEFINE MARKUP (%) IN TAX CALCULATION STRUCTURE

A new column **Markup (%)** added to the Tax Calculation Structure.

When a new structure item is created and connected a tax code with “Tax in Tax Base” enabled, user can manually define a markup % to the connected tax code.

3.6 Tax calculation structure with Multiple Tax in Tax BASE TAX Codes

As per the Brazilian way of tax calculation, when there are multiple “Tax in Tax Base” tax codes contain in the transaction, those tax rates should be added together to get the tax calculation basis. As explained in the previous chapter, if the “Tax in Tax Base Amount” is selected in the tax code, the tax base amount is calculated as follows,

$$\text{Tax Base Amount} = \frac{p * 100}{100 - t}$$

Where;

p – Net Amount

t -Tax Rate

In multiple “Tax in Tax Base” tax codes scenarios, the above logic is altered to absorb the impact of the sum of all tax rates connected to the Tax Calculation Structure.

In multiple “Tax in Tax Base” tax codes scenario, instead of using the 't', the system will use the sum of all tax rates connected to the tax calculation structure, like $t_1 + t_2 + t_3 + \dots + t_n$ where t_1, t_2, t_3 to t_n indicate the sum of all tax rates connected to the Tax Calculation Structure.

$$\text{Tax Base Amount} = \frac{p * 100}{100 - (t_1 + t_2 + t_3 + \dots + t_n)}$$

Where;

p – Net Amount

$(t_1 + t_2 + t_3 + \dots + t_n)$ - Sum of all tax rates connected to the Tax Calculation Structure

Below example illustrate the how the calculation is done,

- 1) Set it up Tax Calculation Structure with two Tax Codes as follows,

- a) ICMS 5% with Tax in Tax Base enabled.
- b) ICMS 20% with Tax in Tax Base enabled and added Markup percentage as 10%

Tax Calculation Structure BR:ST:3:M% - TCS with Markup %

<< + ✎ 🗑️ 📄 🔔 ▼ Set Preliminary Set Obsolete Translation

Structure	Description
BR:ST:3:M%	TCS with Markup %

Structure Items

☰ 🔍 📄 ▼ ✎

✓	:	Structure Item	Calculation Order	Tax Code	Tax%	Include Price in Tax Base	Tax in Tax Base	Markup (%)
☐	:	1	1	ICMS 5% - ICMS 5%	5	Yes	Yes	
☐	:	2	2	ICMS 20% - ICMS 20% with M% 10%	20	Yes	Yes	10

2) Create a CO Line connecting the above Tax Calculation Structure

- a) ICMS 5% with "Tax in Tax Base" is calculated as follows,

$$\text{Tax Base Amount} = \frac{p * 100}{100 - (t1 + t2 + t3 + \dots . tn)}$$

$$p - \text{Net Amount} = 100.00$$

$(t1 + t2 + t3 + \dots . tn)$ - Sum of all tax rates connected to the Tax Calculation Structure
 = $100 - (5 + 20)$
 = $100 - 25$
 = 75

$$\text{Tax Base Amount} = \frac{100 * 100}{100 - (5 + 20)}$$

$$\text{Tax Base Amount} = \frac{100 * 100}{75}$$

$$\text{Tax Base Amount} = 133.33$$

- b) ICMS 20% with “Tax in Tax Base” enabled and added Markup percentage as 10% is calculated as follows,

$$\text{Tax Base Amount} = \frac{(p + m) * 100}{100 - (t1 + t2 + t3 + \dots . tn)}$$

P =Net Amount

M = Markup percentage

(p+m) =Increase “p” by adding markup %, “m”

(t1+ t2+ t3+....tn) =Sum of all tax rates connected to the Tax Calculation Structure

$$\text{Tax Base Amount} = \frac{(100 + m) * 100}{100 - (t1 + t2 + t3 + \dots . tn)}$$

$$\text{Tax Base Amount} = \frac{(100 + 10) * 100}{100 - (5 + 20)}$$

$$\text{Tax Base Amount} = \frac{(110) * 100}{75}$$

$$\text{Tax Base Amount} = 146.67$$

- a) ICMS 5% “Tax” is calculated as follows,

$$\text{Tax Amount} = \text{Tax Base Amount} * t$$

$$\text{Tax Amount} = 133.33 * 5\%$$

$$\text{Tax Amount} = 6.67$$

- b) ICMS 20% with “Tax in Tax Base” enabled and added Markup percentage as 10% is calculated as follows,

$$\text{Tax Amount} = \text{Tax Base Amount} * t$$

$$\text{Tax Amount} = 146.67 * 20\%$$

$$\text{Tax Amount} = 29.33$$

×

3.7 Delimitations

No additional support for manual tax handling.

Additional delimitations may apply; all relevant flows should be tested to ensure completeness.

4 Tax Calculation with External Tax System

4.1 Overview Business Requirement

IFS developed an integration with third-party Brazilian External Tax System, Avalara Brazil, which allows the user to rely on Avalara for retrieval of correct tax information when performing a taxable business transaction in IFS Applications in Brazilian companies. With this integration, the whole process of tax determination is done by Avalara instead of calculating and updating tax information manually on the business transaction level.

When a tax calculation is performed e.g. on the Customer Order level, Project Invoice level, Order Quotation level or Purchase Order level, IFS Cloud uses the Avalara integration to calculate/fetch the correct tax information like, Tax Rates, Tax Amounts and other tax-related information and insert it to the CO, Project Invoice, OQ or PO Line level.

The integration supports the following functional flows in IFS:

- Business Opportunity
- Sales Quotation
- Customer Order
- Customer Order Invoice
- Customer Order Line Connected Charge Lines
- Outgoing Tax Document
- Project Invoice – Initial Solution
- Order Quotation
- Purchase Order, Part Lines
- Purchase Order Line Connected Charge Lines
- Purchase Order Change Order
- Incoming Nota Fiscal

All the other areas in IFS Cloud are using core functionality for calculating taxes.

Avalara offers a software application called AvaTax Brazil for the Brazilian market. AvaTax Brazil keeps track of valid tax information like tax types, tax rates, legislation, and rules applicable and then performs the tax calculations accordingly.

When a tax call is initiated from IFS Cloud, a call is made to the AvaTax Brazil software to fetch the correct tax types and tax rates, in the Sales flow based on the information on the customer, business opportunity, sales quotation, customer order, customer order invoice and tax document, in Project Invoicing flow from the information on the Customer, Project Invoice, or in the Procurement flow from the supplier, order quotation and purchase order. The following main parameters are used to identify the correct tax rate:

- Company Document Address
- Company tax registration numbers, activity sector and tax regime
- Customer setting for ICMS Taxpayer
- Customer setting for IBS/CBS Tax
- Customer Document Address (the document address associated with the customer order or the Project Invoice)
- Customer tax registration numbers, activity sector and tax regime

- Supplier setting for ICMS Taxpayer
- Supplier setting for IBS/BS Taxpayer
- Supplier Document Address and supplier tax registration numbers
- Classification of Business and Tax Rates of the Tax Codes connected to the suppliers under the Simple National tax regime
- Goods classification code (NCM) on sales respectively purchase parts in OQ and/or PO
- Goods acquisition reason on sales respectively purchase parts in OQ and/or PO
- Goods acquisition origin on sales respectively purchase parts in OQ and/or PO
- Business transaction code on sales respectively order quotation and/or purchase order
- Discount Amount on the OQ line
- Discount Amount on the PO line
- Line connected charge on PO
- Line connected charge on CO
- Line connected charge on SQ

In addition to these main parameters, information such as the price and quantity is also passed to the AvaTax software to ensure the correct tax types and tax rates are fetched. The discount amount is needed to be calculated if any discount is added for each row in the order quotation and/or purchase order and sent to Avalara. Based on the information sent, Avalara determines the correct tax rates and tax amounts and return the information back to IFS Cloud. The information is then uploaded into the relevant Business Opportunity, Sales Quotation Tax Lines, Customer Order Tax Lines, Customer Order Invoice Tax Lines, Project Invoice Tax Lines, Order Quotation Tax Lines, Purchase Order Tax Lines etc.

4.2 Process Overview

Integration Overview Example

Process Overview with Customer Order sales of goods

Process Overview with Project Invoice – Initial Solution

Process Overview with Purchase Order purchase of goods

Process Overview with Incoming Nota Fiscal

4.3 Prerequisites

The company must be set-up to use Brazilian localization, see the Company Set-Up chapter, and the “Integration to Brazilian External Tax System” parameter must be enabled.

Select “Avalara Tax - Brazil” as the External Calculation Method in page **Application Base Setup/Enterprise/Company/Company/Tax Control** and tab **External Tax System**.

The screenshot shows the 'Tax Control' interface for 'EABR1 - Brazilian Company 1'. The 'EXTERNAL TAX SYSTEM' tab is selected. Under the 'External Tax Codes Mapping' section, the 'External Tax Calculation Method' is set to 'Avalara Tax - Brazil'. Below this, there are fields for 'Generic Tax Codes' including City, County, District, and State.

The prerequisites for IFS Cloud to communicate with Avalara is that the tax liability on the customer address is set to TAX and the sales part is taxable. In the Project Invoicing flow, the tax liability on the customer address should be set to TAX and the Report Code should be taxable. Also for the procurement flow the tax liability need to be TAX on the supplier address and the purchase part should be taxable.

Note that also parameters “Acquisition Origin”, “Business Operation”, “Brazilian Specific Fiscal Attributes”, “Address Specific Tax ID Numbers”, “Goods/Services Statistical Codes”, “Extended Tax Codes Tax Calculation Structures set-up”, “Outgoing Nota Fiscals” and “Use Automatic Generation of Official Invoice Numbers” must be enabled to fulfill data requirements for the Integration. Also, company, customer and supplier basic data for tax calculation and Nota Fiscal must be defined. Please see the specific chapters on how to set up the data needed. Same basic data needed for Outgoing Nota Fiscal, as for example, States and Cities, are also needed for the Procurement flow.

4.4 Define Basic Data

In order to utilize the IFS integration for Avalara, some basic data set-up is required with regards to the Tax Codes, the Company, the Customer, Part and Sales Parts for sales flow, Report Codes for

Project Invoicing flow, as well as the Supplier and Purchase Parts for procurement flow. If line-connected sales or purchase charges are used, the sales or purchase charge types must also have corresponding values connected to the Brazil Charge Category.

4.4.1 EXTERNAL TAX SYSTEM PARAMETERS

The Avalara Brazil connection information is defined in the page **Application Base Setup/Enterprise/Tax/External Tax Systems/External Tax Systems Parameters**.

For companies using Avalara, the created order quotation and purchase orders will have the default setting as “Price incl Tax” (on OQ part line and PO header) regardless of setup on supplier and company.

4.4.9 DEFINE THE SUPPLIER FOR PURCHASE TAX MANUFACTURING EQUIVALENT

When using the Avalara integration, you will need to set the Tax Manufacturing Equivalent to force the IPI calculation in a company whose CNAE is not classified as an industrial company, enable the manufacturing toggle.

The screenshot shows the 'Supplier for Purchase Part' configuration page. The page has a search bar at the top. Below it, there's a list of suppliers. The selected supplier is 'BRPART6 - Brazilian Part6 - SP01 - BR DOMESTIC SUPP'. The page shows various tabs for configuration, including 'Part', 'Supplier', 'Supplier Contact', and 'Site'. The 'Part' tab is active, showing 'BRPART6 - Brazilian Part6'. The 'Supplier' tab is also active, showing 'BR DOMESTIC SUPP - NF-E EMITIDA EM AMBIENTE DE HOMOLO...'. The 'Supplier Contact' and 'Site' fields are empty. The 'Active' toggle is turned on. The 'Notes' section is expanded, showing a list of tabs: 'GENERAL', 'INSPECTION INFO', 'PRICE LIST', 'RENTAL PRICE LIST', 'MANUFACTURERS', 'CONSIGNMENT', 'CHARGES', 'DELIVERY OVERHEADS', and 'EMISSIONS'. The 'GENERAL' tab is selected, showing 'Part Parameters', 'Supplier's Part Information', 'Units of Measure', 'Order Information', 'Price Information', and 'Brazilian Specific Attributes'. The 'Brazilian Specific Attributes' section is highlighted with a red box, showing the 'Tax Manufacturing Equivalent' toggle, which is currently turned on.

4.4.10 DEFINE THE SUPPLIER UNDER THE SIMPLE NATIONAL TAX REGIME

When a company purchases goods or services from a supplier that is registered under the Simple National Tax Regime, the third-party Brazilian External Tax System, Avalara, does not calculate the taxes, since the percentages depends on an information that they do not have, which is the supplier’s revenue used in the business transaction, in the last fiscal year.

According to the information received from Avalara, in such cases, the ERP solution is required to send the applicable tax percentage for these transactions in the integration JSON file when we call Avalara to get the taxes calculated by them.

The following configurations must be set to ensure that tax rates are properly sent to Avalara when tax calculation is triggered for Order Quotation, Purchase Order, and Incoming Nota Fiscal:

- The Classification of Business field in the header of the Supplier page must be set to one of the following values: **3 - Simplified**, **4 - Simplified Above Gross Limit**, or **5 - Simplified Entrepreneur** to indicate that the supplier is under the Simple National Tax Regime.

- Each supplier's address may have only one tax code per tax type (ICMS or ISS) when its Classification of Business is set to 3, 4, or 5 (valid values from the Classification of Business list that indicate the supplier is under the Simple National tax regime). This prevents duplicate tax codes and ensures that only one ICMS and one ISS code are sent for tax calculation.
 - Validation message included: For suppliers classified under the Simple National Tax Regime, only one Tax Code may be entered for the Tax Type Categories ICMS and ISS.
- When the supplier's Classification of Business is set to 3, 4, or 5, only ICMS and ISS tax codes are allowed in the Delivery Tax Information section, as other tax types may be returned by Avalara.
 - Validation message included: For suppliers classified under the Simple National Tax Regime, only Tax Codes with a Tax Type Category defined as ICMS or ISS may be entered.

4.5 Create Business Opportunity

For Business Opportunity you must manually run the **Update External Taxes** command for the opportunity lines to initiate a new tax request to Avalara.

4.6 Create Sales Quotation

For Sales Quotation a new tax Calculated/Fetched is initiated resulting in new tax requests being sent to Avalara under the following circumstances:

- New sales quotation line is added
- Sales Qty is updated
- Sales Price is updated
- Quotation Address is updated
- Sales charge Line is connected to a SQ line
- Quotation Line Address is updated
- Goods/Services Statistical Code is updated
- Acquisition Origin updated
- Acquisition Reason Id is updated
- Sales Quotation is Released

User can decide whether the taxes are Calculated/Fetched upon, "Release of Sales Quotation" or "Line Entry Level". This is controlled by the IFS Application core functionality, **Company/Tax Control/External Tax System** tab, "*Tax Integration Parameters for Sales*".

Example: If user decides not to send tax requests upon releasing the quotation. Then you need to disable the option **Refresh Tax Information at Release of Customer Order/Sales Quotation** in **Company/Tax Control/External Tax System** tab.

 2.PIS-1.65 %: PIS/COFINS Lei nº 10.637/2002, Artigo 2º

Refer the Appendix 2 for the Avalara Request File Mapping details.

4.8 Create Customer Order

For Customer Order a new tax Calculated/Fetched is initiated resulting in new tax requests being sent to Avalara under the following circumstances:

- New customer order line is added
- Sales Qty is updated
- Sales Price is updated
- Order Address is updated
- Sales charge Line is connected to a CO line
- Order Line Address is updated
- Goods/Services Statistical Code is updated
- Acquisition Origin updated
- Acquisition Reason Id is updated
- Order is Released

User can decide whether the taxes are Calculated/Fetched upon, “Release of Customer Order” or “CO Line Entry Level”. This is controlled by the IFS Application core functionality, **Company/Tax Control/External Tax System** tab, “*Tax Integration Parameters for Sales*”.

IFS Cloud supports both **Net** and **Gross** Avalara tax calculation methods for **Customer order**. The applied calculation method depends on the status of the “**Use Price Including Tax**” toggle.

- When **enabled**, the Customer order is subject to **Gross tax calculation**.
- When **disabled**, the Customer order is subject to **Net tax calculation**.

The screenshot displays the IFS Customer Order form. The 'ORDER DETAILS' section is expanded, showing various fields for order creation. In the 'Invoice' section, the 'Use Price Incl Tax' toggle is highlighted with a red box. The toggle is currently set to 'Off', indicating that the net price is used for tax calculation. Other visible fields include 'Order No', 'Customer', 'Site', 'Order Type', 'Wanted Delivery Date/Time', 'Delivery Address', 'Document Address', 'Tax ID', 'Tax ID Validated', 'Tax ID Error Message', 'Tax Liability', 'Pay Term', 'Pay Term Base D...', 'Invoice Customer', 'Addr ID', 'Invoice Cust Reference', 'Tax Paying Party', 'Customer Branch', 'Invoice', 'External Tax Use Code', and 'Supply Country'.

IFS Cloud treats **Price** as the net price and **Price Including Tax** as the gross Price. The price value sent to Avalara for tax calculation is determined by the status of the **Use Price Including Tax** toggle.

Example: If user decides not to send tax requests upon releasing the order. Then you need to not select the option **Refresh Tax Information at Release of Customer Order** in **Company/Tax Control/External Tax System** tab (standard functionality).

4.8.1 CITATION INFORMATION IN CUSTOMER ORDER LEVEL

In the Avalara response message, there is a placeholder called “Citation” which is information related to possible tax benefits applicable for the tax scenario, for example that the company might be subject to ICMS reduction benefits. The Citation information usually refers to the conditions in an article or paragraph to be observed in more details for possible application of said tax benefit.

```
"citation": "Subject to ICMS_Reduction Benefits: \\"ICMS/SP_Decreto nº 45.490/2000, Anexo II, Artigo 66\\"", "description": "Para aplicação do citado benefício fiscal pelo Artigo 51 e Anexo II, Artigo 66, RICMS/SP.", "isCustomCitation": false}, {"goods": {"subjectToIPIonInbound": false, "entityIcmsStSubstitute": "no"}, "LineNetFigure": [{"jurisdictionName": "Brazil", "jurisdictionType": "Country", "taxImpact": {"impactOnFinalPrice": "Included", "impactOnNetAmount": "Included", "accounting": "Liability"}},

Refer the Appendix 2 for the Avalara Request File Mapping details.

4.9 Create Customer Invoice

In Customer Order Invoice level, a new tax Calculated/Fetched is initiated resulting in new tax request being sent to Avalara under the following circumstances below:

- Invoice is created
- Invoice Qty is updated
- Invoice Price is updated
- Goods/Services Statistical Code is updated.
- Acquisition Origin updated

Please note that for Brazilian country specifics, a new tax request is not initiated at the point when the invoice is printed/posted (as compared to IFS core). This is because of the no changes are allowed after Brazilian Tax Authority approved the electronic Nota Fiscal.

The Customer Invoice Line/Tax Lines dialog will be updated with the data received from Avalara.

The Avalara tax calculation method (Net or Gross) is determined by the status of the **“Use Price Including Tax”** toggle in the **Customer Invoice header**, following the same logic applied to **Sales Quotations** and **Customer Orders**.

Refer the Appendix 2 to see the Avalara Request File Mapping details.

Complementary information (with reference to a specific law or regulation or to explain and prove that the taxes applied, and their rates, fulfill the Brazilian regulations) is sent in **additionalInfo** / **ComplementaryInfo** of the Avalara response JSON and saved as Invoice Text on header level of the Customer Invoice in "Preliminary" state.

4.9.2 HANDLE OUTGOING NOTA FISCALS

Please read chapter “Outgoing Nota Fiscals” for description.

4.9.3 CREATE POSTINGS

Please read chapter “Gross Revenue Accounting” and Appendix 2 for description.

4.10 Create Invoicing Plan/Project Transaction

Enter an Invoicing Plan/Project Transaction using standard functionality.

4.11 Create Project Invoice

Create a preliminary Project Invoice. In Project Invoices, new tax calculation requests are initiated under the following circumstances:

- Invoice is created
- New Project Transaction is added/removed using the Add to Invoice/Remove from Invoice function
- Invoice Qty is updated
- Invoice Price is updated
- Invoice Address is updated
- Delivery Address is updated
- Goods/Services Statistical Code is updated
- NBS Code is updated
- Branch is updated

Please note that for Brazilian country specifics, a new tax request is not initiated at the point when the invoice is printed/posted (as compared to IFS core). This is because no changes are allowed to the Project Invoice after the Outgoing Nota Fiscal is approved.

```

After Avalara completes tax determination, the **Project Invoice Tax Lines** dialog is updated with the tax attributes returned by Avalara. These attributes include the tax base amount, the IFS tax code (retrieved through the external tax codes mapping), applicable tax rates, calculated tax amounts, CST, Legal Tax Class for IPI taxes, Tax Type Category, and other Brazil-specific tax attributes provided by Avalara.

4.11.1 CITATION INFORMATION IN PROJECT INVOICE LEVEL

In the Avalara response message, there is a placeholder called “Citation” which includes information related to possible tax benefits applicable to the tax scenario, for example that the company might be subject to ICMS reduction benefits. The Citation information usually refers to the conditions in an article or paragraph to be observed in more details for possible application of said tax benefit.

4.12 Order Quotation

For Order Quotation new taxes are initiated, resulting in new tax requests being sent to Avalara, under the following circumstances (depending on Company setup and order status):

- New order quotation line is added
- Quotation Qty is updated
- Quotation Price is updated
- If Company default Document Address is updated also manual command to fetch tax is needed
- Supplier Document Address is updated on Order Quotation
- Goods/Services Statistical Code is updated.
- Acquisition Origin updated
- Acquisition Reason is updated
- Manual command in Order Quotation to **Fetch External Taxes**.

In the **Order Quotation** header there is a new command available to Fetch External Taxes from Avalara. When at least one quotation line has status Answered, this command is used to manually trigger a tax calculation from Avalara.

To restrict the number of requests sent to Avalara, there will not be any requests sent to Avalara before a quotation has been manually executed by selecting the *Fetch External Tax* command. But after manually selecting the command, any change of the data will automatically generate a request to update taxes from Avalara.

PART QUOTATION LINES NO PART QUOTATION LINES ACTIVITIES SUBMISSION REQUIREMENTS

Order Quotation Approval Order Quotation Approvals Quotation Tax Lines Update Emissions

(1)	Status	Line No	Part No	Part Description	Business Operation	Price/Curr	Price Ind	Price Tax/Curr	Price UoM	Discount Amount	Discount(%)	Acquisi
✓	Answered	1	CEL-BR.PART.1	Brazilian Part 1		100.00		100.00	pcs	0.00	0	0 - Naci

When using the new manual command **Fetch External Taxes** in the OQ header, a request will be sent to Avalara. This command will be enabled even if there are lines which are not supposed to be sent. When a request is sent to Avalara then the taxes will be fetched/updated for all the part lines in the OQ. Exception to this is for OQ lines which are not supposed to get Avalara taxes:

- when having status Cancelled
- when Tax Liability is EXEMPT
- when Not Taxable.

No part lines, rental lines, master parts with non-line connected charges are not supported for the procurement flow. Furthermore, the flow Purchase Requisition is not supported.

This means that those lines are not sent in the request to Avalara.

NOTE that for automatically created lines there will be no support for automatically getting the taxes from Avalara. The user needs to fetch the taxes for these lines by using the manual command in the Order Quotation header to fetch taxes.

This is also needed if the Company default Document Address is changed as this will not generate any automatic fetch of taxes.

When Order Quotation Lines are added, default values will be added for Goods/Services Statistical Code, Acquisition Reason and Acquisition Origin. If no default values are added, these need to be manually entered.

There is also a new column to show the **Discount Amount**, calculated as the discount percentage of the Price incl Tax/Base amount, multiplied by the line quantity.

When all information needed for the request to be sent is present, a request to Avalara can be processed correctly. If something is missing, you will receive an error and details about the error can be seen in the response message details.

When response message from Avalara has been received the tax lines will be updated in the dialog for Purchase Quotation Tax Lines.

The data received from Avalara will include Tax Base Amount, IFS Tax Code (fetched based on the tax codes mapping set-up), Tax %, Tax Amount in Curr and Base, CST Code, Legal Tax Class (for IPI taxes), Tax Type Category and Impact on Net Amount.

Gross Amount/Curr 85.00	Net Amount/Curr 69.70	Tax Amount/Curr 15.30	Non-deductible Tax Amount/Curr 0.00
Total Tax Amount/Curr 15.30			

Tax Base Amount	Tax Code	Tax Type	Tax(%)	Deductible(%)	Tax Amount/Curr	Tax Amount/Base	Non-deductible Tax/Curr	Total Tax Amount	Impact On Net Amount	CST Code	Legal Tax Class	Tax Type Category
1	0.00	BR-COFINS	Tax	0	100	0.00	0.00	0.00	Tax Inclusive	70		COFINS
1	85.00	BR-ICMS	Tax	18	100	15.30	15.30	0.00	Tax Inclusive	00		ICMS
1	0.00	BR-PIIS	Tax	0	100	0.00	0.00	0.00	Tax Inclusive	70		PIIS

This dialog with these specific Avalara columns will only be shown for quotation lines when using Avalara integration, the standard tax dialog is shown for no parts and rental parts. Lines with **“Tax Inclusive”** value in Impact On Net amount column will be considered for the total tax calculation. The tax is included in the price of the product or service and is calculated based on the total amount, which already includes the tax itself. This results in a higher final price as the tax applies to the price with the tax added.

Lines with **“Tax Exclusive”** value in Impact On Net amount column will be added to the final price. The tax is calculated separately from the price of the product or service, without being part of the amount used to calculate the tax. The final price is the product price plus the tax amount.

Order Quotation part lines calculation will only consider the goods value when calculating the net amount and price for the part line. This calculation will be according to below example.

$$Part\ Line\ Tax = Part\ Gross * \left(\frac{Total\ Tax\ incl\ line\ connected\ charges}{Total\ Gross\ incl\ line\ connected\ charges} \right)$$

$$Part\ Line\ Net\ Amount = Part\ Gross - Part\ Line\ Tax$$

4.12.1 CITATION INFORMATION IN ORDER QUOTATION LEVEL

In the Avalara response message, there is a placeholder called “Citation” which is information related to possible tax benefits applicable for the tax scenario, for example that the company might be subject to ICMS reduction benefits. The Citation information usually refers to the conditions in an article or paragraph to be observed in more details for possible application of said tax benefit.

The Avalara “Citation Information” is saved in the new “Additional External Tax Information” field on the Order Quotation header and in the “Note” Field on the Order Quotation lines.

4.13 Create Purchase Order

For Purchase Order new taxes are initiated, resulting in new tax requests being sent to Avalara, under the following circumstances (depending on Company setup and order status):

- New purchase order line is added
- Purchase Qty is updated
- Purchase Price is updated

- If Company default Document Address is updated also manual command to fetch tax is needed
- Supplier Document Address is updated on Purchase Order
- Goods/Services Statistical Code is updated.
- Acquisition Origin updated
- Acquisition Reason Id is updated
- Line connected charges are added or updated.
- Order is Released
- Manual command in Purchase Order to **Fetch External Taxes**.

User can decide whether the taxes are Calculated/Fetched upon, “Release of Purchase Order” or “PO Line Entry Level”. This is controlled by the IFS Application core functionality, **Company/Tax Control/External Tax System** tab, “*Tax Integration Parameters for Procurement*”.

In order to be able to restrict number of requests sent to Avalara there will not be any requests sent to Avalara when modifying above data, before an order is released (when having setup as only to fetch taxes at Purchase Order release). But after release any change of the data will automatically generate a request to update taxes from Avalara. (Except for when adding a new line, as fetching for part line entry is disabled.)

If instead the toggle for fetching taxes at part line entry is enabled the changes will trigger a request to update taxes regardless of status.

Example: If user decides not to send tax requests upon releasing the order. Then the option Refresh Tax Information at Release of Purchase Order in **Company/Tax Control/External Tax System** tab (standard functionality) should be disabled. But please note that if using this setup you will need to manually fetch the taxes for automatically added PO lines, as explained more below.

In the Purchase Order header there is a new command available to Fetch External Taxes from Avalara that can be used whenever the user want to manually trigger a tax calculation from Avalara.

When using the new manual command in the PO header **Fetch External Taxes** a request will be sent to Avalara. This command will be enabled even if there are lines which are not supposed to be sent. When a request is sent to Avalara then the taxes will be fetched/updated for all the part lines in the PO. Exception to this is for PO lines which are not supposed to get Avalara taxes:

- when having status Cancelled

- when Tax Liability is EXEMPT
- when Not Taxable.

No part lines, rental lines, non-line connected charges are not supported for the procurement flow. Furthermore, the flow Purchase Requisition is not supported.

This means that those lines are not sent in the request to Avalara.

PLEASE NOTE that for automatically created lines there will be no support for automatically getting the taxes from Avalara. The user needs to fetch the taxes for these lines by using the manual command in the Purchase Order header to fetch taxes or use the setup to get them automatically when release of PO.

This is also needed if the Company default Document Address is changed as this will not generate any automatic fetch of taxes.

When Purchase Order Lines are added, default values will be added for Goods/Services Statistical Code, Acquisition Reason and Acquisition Origin. If no default values are added, these need to be manually entered.

There is also a new column to show the **Discount Amount**, calculated as the discount percentage of the Price incl Tax/Base amount, multiplied by the line quantity.

When response message from Avalara has been received the tax lines will be updated in the dialog for Purchase Order Line Taxes.

The data received from Avalara will include Tax Base Amount, IFS Tax Code (fetched based on the tax codes mapping set-up), Tax %, Tax Amount in Curr and Base, CST Code, Legal Tax Class (for IPI taxes), Tax Type Category and Impact on Net Amount.

Tax Base Amount	Tax Code	Tax Type	Tax(%)	Deductible(%)	Tax Amounts/Curr	Tax Amounts/Base	Non-deductible Tax/Curr	Total Tax Amount	Impact On Net Amount	CST Code	Legal Tax Class	Tax Type Category
100.00	BR-COFINS	Tax	7.6	100	7.60	7.60	0.00	7.60	Included	56	COFINS	COFINS
100.00	BR-ICMS	Tax	18	100	18.00	18.00	0.00	18.00	Included	00	ICMS	ICMS
100.00	BR-PIS	Tax	1.65	100	1.65	1.65	0.00	1.65	Included	56	PIS	PIS

This dialog with these specific Avalara columns will only be shown for part lines when using Avalara integration, the standard tax dialog is shown for no parts and rental parts. Lines with “**Tax Inclusive**” value in Impact On Net amount column will be considered for the total tax calculation. The tax is included in the price of the product or service and is calculated based on the total amount, which already includes the tax itself. This results in a higher final price as the tax applies to the price with the tax added.

Lines with “**Tax Exclusive**” value in Impact On Net amount column will be added to the final price. The tax is calculated separately from the price of the product or service, without being part of the amount used to calculate the tax. The final price is the product price plus the tax amount.

Purchase Order part lines calculation will only consider the goods and service value when calculating the net amount and price for the part line. This calculation will be according to below example.

$$Part\ Line\ Tax = Part\ Gross * \left(\frac{Total\ Tax\ incl\ line\ connected\ charges}{Total\ Gross\ incl\ line\ connected\ charges} \right)$$

$$Part\ Line\ Net\ Amount = Part\ Gross - Part\ Line\ Tax$$

4.13.1 CITATION INFORMATION IN PURCHASE ORDER LEVEL

In the Avalara response message, there is a placeholder called “Citation” which is information related to possible tax benefits applicable for the tax scenario, for example that the company might be subject to ICMS reduction benefits. The Citation information usually refers to the conditions in an article or paragraph to be observed in more details for possible application of said tax benefit.

The Avalara “Citation Information” is saved as a “Note” on the Purchase Order header and on the Purchase Order lines.

4.14 Tax Request to Avalara when having Line Connected Charges

The charges that are using the same Brazilian Charge Category for a line will be summarized and sent for the different Avalara tags.

For example if two charge lines connected to line no 1, rel no 1 are having National Freight as Brazilian Charge Category, the sum of 5+5=10 will be shown in the request message as freightAmount.

PART LINES

NO PART LINES

```

In a scenario where line connected charges exist the following calculations will be done in the Customer Order Lines tax assistant.

When line connected charges exist, the following calculations will be done in the Purchase Order Lines tax assistant. In below example there is one-line connected charge line with a gross amount base of 10.

Purchase Order Line Taxes

Gross Amount/Curr

210.00

OK

Cancel

Line connected charges will be included in the Gross Amount/Curr, then the tax lines with the included flag in Impact on Net Amount will be deducted from the Gross Amount/Curr to get the correct Net Amount/Curr for the Goods and the line connected charges according to below calculations.

$$\text{Gross Amount in Curr} = \text{Part Gross} + \text{Gross Amount Base for line connected charge lines.}$$

$$\text{Net Amount in Curr} = \text{Gross Amount in Curr} - \text{Tax Amount in Curr}$$

Purchase Order part lines calculation will only consider the goods value when calculating the net amount and price for the part line. This calculation will be according to below example.

$$\text{Part Line Tax} = \text{Part Gross} * \left(\frac{\text{Total Tax incl line connected charges}}{\text{Total Gross incl line connected charges}} \right)$$

$$\text{Part Line Net Amount} = \text{Part Gross} - \text{Part Line Tax}$$

4.15 Purchase Order Change Order

It is possible to also make changes to the Purchase Order via a Purchase Order Change Order (POCO). Brazilian specific attributes such as Goods/Service Statistical Codes, Acquisition Reason, Acquisition Origin, NBS Code and Business Transaction Code can be modified at line level. Either it is possible to always enforce the use of Purchase Order Change Order for changes (which can be set in Site setup), or to manually trigger the creation of a Purchase Order Change Order. When the changes are applied to the Purchase Order through the **Update PO** option, the application automatically fetches external taxes based on the updated information.

If adding or changing line connected charges including the Brazilian Charge Category in the POCO, this will also generate a new version of the Purchase Order.

4.16 Integration with Avalara for Tax Determination on Incoming Fiscal Documents

An integration with third-party Brazilian External Tax System, Avalara Brazil, allows the user to rely on Avalara for retrieval of correct tax information in the Incoming Nota Fiscal object without having to adjust data manually.

User can decide whether the taxes need to be automatically calculated based on external tax calculation application, Avalara, on Incoming NF based on manual command in Incoming NF to **Fetch External Taxes**.

This Manual command in Incoming Nota Fiscal initiated in a new tax request being sent to the Avalara, depending on the Incoming NF status below,

- Initiated
- Error

When all information needed for the request to be sent is present, a request to Avalara can be processed correctly. If some information is missing, you will receive an error and details about the error can be seen in the response message details.

The request and response message details can be checked in the page for Application messages. View details and download the message in order to check the values sent/received.

When response message from Avalara has been received, the tax lines will be updated in the dialog for Incoming Nota Fiscal Tax Lines.

The data received from Avalara will include Tax Base Amount, IFS Tax Code (fetched based on the tax codes mapping set-up), Tax %, Tax Amount in Curr and Base, CST Code, Legal Tax Class (for IPI taxes), Tax Type Category.

Exceptions for the Incoming Nota Fiscal Document types

Since the below two Incoming NF types are not relevant to the automatic tax calculations, the “Fetch External Tax” Command button is not enabled for the following Incoming NF Document Types,

- ❖ Import Nota Fiscal
- ❖ Complementary Nota Fiscal

Tax Basis for Incoming Nota Fiscal Automatic Tax Calculation

- ❖ If the Nota Fiscal has a connected Purchase Order,
 - “amountCalcType” in the request file sent to Avalara will always be set to “Gross”
- ❖ If the Nota Fiscal does not have a connected Purchase Order,
 - “amountCalcType” in the request file sent to Avalara will be decided based on the “Default”
- ❖ Amount Method” set up in the company,
 - “amountCalcType” should be “Gross” when the “Default Amount Method” is “Gross” in the company
 - “amountCalcType” should be “Net” when the “Default Amount Method” is “Net” in the company

4.16.1 DIFAL (ICMS Differential Rate)

Overview

DIFAL (Differential ICMS Rate) is a Brazilian tax mechanism designed to ensure a fair distribution of ICMS (Tax on Circulation of Goods and Services) revenue between Brazilian states in interstate transactions. In interstate operations, the supplier applies the interstate ICMS rate defined for transactions between the supplier’s state and the destination state. When the internal ICMS rate established by the destination state is higher than the interstate rate, the difference between these rates represents the DIFAL amount. This additional tax is paid to the Tax Authority of the destination state, where the goods will be used or consumed. DIFAL is applicable to Incoming Nota Fiscal transactions involving purchases from suppliers located in another Brazilian state, especially when goods are acquired for Consumption/Use or Fixed Assets purposes.

Tax Treatment

From a fiscal and accounting perspective, DIFAL is considered an expense tax, meaning that the company cannot recover this tax amount as a credit. Therefore, when applicable, the DIFAL amount must be included in the acquisition cost of the goods received. This ensures that the inventory value reflects the total cost incurred by the company to acquire the goods. At the same time, because DIFAL represents a tax obligation to the destination state, the corresponding liability must also be recorded in accounting. The accumulated liability is paid at the end of the fiscal period according to the rules and deadlines defined by the applicable Tax Authority.

In IFS Cloud, DIFAL processing is integrated with the Incoming Nota Fiscal flow and the External Tax System used for Brazilian tax calculation. When an Incoming Nota Fiscal is linked to a Purchase Order, the External Tax System calculates the applicable taxes according to the fiscal information of the transaction such as Acquisition Reason and Product Type Classification. When DIFAL applies, the application receives the differential tax amounts related to:

- ICMS: Tax on the Circulation of Goods and Services.
- FCP: Poverty Alleviation Fund.

To properly handle the ICMS and FCP DIFAL tax amounts in the application, Tax Codes must be created in Tax Codes page as Tax Type = Use Tax, Deductible Percentage = 0% and Tax Type Category = ICMS/DIFA/DEST and ICMS/DIFA/FCP:

✓	Tax Code	Description	Tax Type	Tax (%)	Tax Type Category	Deductible (%)	Valid From	Valid To	Tax Method Tax Received	Tax Method Tax Disbursed	Tax Amount at Invoice Printout
☐	FCP DIFAL	Avalara FCP DIFAL	Use Tax	0	ICMS/DIFA/FCP	0	06/06/2026	31/12/2049	Invoice Entry	Invoice Entry	Separate from Price
☐	ICMS DIFAL	Avalara ICMS DIFAL	Use Tax	0	ICMS/DIFA/DEST	0	06/06/2026	31/12/2049	Invoice Entry	Invoice Entry	Separate from Price

The Tax Codes must be linked to the External Tax Codes Mapping in Company > Tax Control > External Tax System > External Tax Codes Mapping:

✓	Tax Type Category	Tax Code	Appropriation of Credit	Tax (%)	Tax in Tax Base	Tax Type
☐	ICMS/DIFA/DEST	ICMS DIFAL - Avalara ICMS DIFAL	0% Deductible	0	No	Use Tax
☐	ICMS/DIFA/FCP	FCP DIFAL - Avalara FCP DIFAL	0% Deductible	0	No	Use Tax

Reviewing DIFAL Amounts Before Receipt

Once the command button Fetch External Tax is selected for Incoming Nota Fiscal, the DIFAL amounts returned by External Tax System can be verified in the Tax Lines assistant in Incoming Nota Fiscal lines:

Gross Amount	Net Amount	Tax Amount	Non-deductible Tax Amount
1,000,000,000.00	659,300,000.00	212,500,000.00	128,200,000.00
Total Tax Amount			
340,700,000.00			

Tax Base Amount	Impact On Net Amount	Tax Code	Tax(%)	Non-deductible Tax Amount	Deductible(%)	Tax Type	Tax Amount	Tax Amount in Accounting Currency	Tax Amount in Parallel Currency	Tax Base Amount in Accounting Currency

787,500,000.00	Informative	CBS-N	0,9	0,000,000.00	100	No Tax	7,090,000.00	7,090,000.00		787,500,000.00
787,500,000.00	Informative	IBS-N	0,1	0,000,000.00	100	No Tax	0,790,000.00	0,790,000.00		787,500,000.00
787,500,000.00	Informative	IBSMUN-N	0	0,000,000.00	100	No Tax	0,000,000.00	0,000,000.00		787,500,000.00
787,500,000.00	Informative	IBSU-F-N	0,1	0,000,000.00	100	No Tax	0,790,000.00	0,790,000.00		787,500,000.00

The expected inventory cost can be reviewed directly on the Incoming Nota Fiscal lines. The Unit Price displayed by the application considers Product Price + DIFAL Amounts for ICMS and FCP returned by the External Tax System. This allows the fiscal user to validate the final expected inventory cost before completing the approval and receipt process:

DIFAL Impact on Cost of Goods

When the goods arrival is registered, IFS Cloud uses the calculated cost including the applicable DIFAL amounts. As DIFAL is an expense tax, the amount is incorporated into the inventory value, increasing the cost of the received goods.

DIFAL Accounting in Supplier Invoice

After the goods receipt is completed, the DIFAL amounts must also be accounted for as a tax liability.

When the Supplier Invoice is created through the Self-Billing or manual Supplier Invoice process, the application automatically creates the required accounting entry using the Posting Control IP11 – Use Tax posting type.

Posting Control IP11 can be configured with the Control Types made available in Core application and EC128 – Business Transaction Code:

Posting Control								
Search								
Posting Type: IP11 Code Part Name Control Type More ☆ Favorites Search Clear								
☰ + ✎

☐	STDBRAZIL	2621 - Output VAT on sales in Sweden, reduced 1		IP3	PIS		16,50000000	

The IP11 credit posting generated:

- Keeps the Supplier Invoice balanced;
- Records the DIFAL amount in the appropriate liability tax accounts;
- Allows the company to accumulate the tax liability during the fiscal period.

At the end of the period, the accumulated balance can be used by the fiscal department to determine the amount payable to the Tax Authority of the state where the company Site is located.

4.17 External Tax System Log

The External Tax System Log provides users with a detailed record of all tax calculation requests sent to **Avalara – Brazil** and the corresponding responses. Each entry shows whether the calculation was successful or if an error occurred, allowing users to easily trace and troubleshoot results.

The log is accessible through the **Application Base Setup/Enterprise/Tax/External Tax Systems/ External Tax System Log** page.

Application Base Setup > Enterprise > Tax > External Tax Systems > External Tax System Log

Whenever a user creates or updates any of the supported documents (e.g., Sales Quotation, Customer Order, Purchase Order, Customer Invoice, etc.) and a tax calculation is performed through Avalara – Brazil, the External Tax System Log is automatically updated with the latest response. This ensures the log always reflects the most current outcome of the integration.

The External Tax System Log is also accessible directly through the connected objects for tax calculation, from **the command button “External Tax System Log”**. This feature ensures that the log is easily accessible from the exact transaction where the tax calculation occurred, providing a direct link between the response and the object.

The **External Tax System Log** command button is available in the header of the following documents:

- Sales Quotation
- Order Quotation
- Customer Order
- Customer Invoice
- Purchase Order
- Outgoing Tax Document
- Project Invoice
- Incoming Nota Fiscal and Bill of Lading

4.18 Delimitations

For the Sales flow this release only covers tax determination via integration to Brazilian external tax system for Customer Order sales, Customer Order invoicing of goods transactions and Intersite movement of goods within same company. Scenarios supported in this release are:

- Interstate sale for ICMS taxpayer
- Interstate sale for non ICMS taxpayer
- Sale within the state

Supported tax types in this release are ICMS, ICMS Tax Substitution, PIS, COFINS and IPI.

Avalara is using 3 different calculation types, “Net”, “Gross” and “Final”. In this release, tax base amount on “Net” basis is supported for the sales flow.

For Procurement it covers the tax determination via integration to Brazilian external tax system (Avalara) for Order Quotation Part Lines and Purchase Order Part Lines. Also line connected charges are supported. In the procurement flow Gross price is used. No part lines, rental lines non-line connected charges are not supported for the procurement flow. Furthermore, the flow Purchase Requisition is not supported.

When using the Avalara integration additional costs on the purchase order line is not supported. Also note that centralized Purchase Orders are also not supported.

The External Tax System Log functionality currently supports only Avalara Tax – Brazil.

Additional delimitations may apply; all relevant flows should be tested to ensure completeness.

5 Outgoing Nota Fiscal for Goods

5.1 Overview Legal Requirement

In Brazil the Nota Fiscal is a mandatory official document that must be issued to prove the existence of a commercial act, e.g. sale of goods. It's a tax document that registers transfer of ownership or possession of a good or commercial activity provided by a company to an individual or another company that is doing business in Brazil.

The NF-e is the Nota Fiscal issued online, which allows real time reporting of transactions to the *Secretaria da Fazenda* (SEFAZ), which is the state government responsible for taxation and revenue. The NF-e must be sent to SEFAZ for authorization, and the goods may only be sent to the recipient after the Nota Fiscal has been accepted by SEFAZ. A printed version of the Nota Fiscal (DANFE) must accompany the goods during transportation.

The Nota Fiscals must always be issued in Brazilian Real (BRL).

5.2 Process Overview

Customer Order

5.3 Prerequisites

The company must be set-up to use Brazilian localization, see the Company Set-Up chapter, and the “Outgoing Nota Fiscals” parameter must be enabled.

Note that also parameters “Acquisition Origin”, “Business Operation”, “Address Specific Tax ID Numbers”, “Goods/Services Statistical Codes”, “Extended Tax Codes Tax Calculation Structures set-up”, and “Allow Cancel Customer Invoices” must be enabled to fulfill data requirements for the NF-e XML file. Please see the specific chapters on how to set up the data needed.

5.4 Define Basic Data

In order to fulfill the requirements for mandatory data in the NF-e XML sent to Tax Authority SEFAZ, please see details in the documentation of the xml file structure and mapping to IFS in the Appendix chapter.

5.4.1 ADDRESS SETUP BRAZIL

Use IFS standard functionality to define settings for Brazilian addresses in page **Application Base Setup/Enterprise/Basic Data/Address Setup per Country**. The use of Detailed Address is optional for retrieving the address information required for the Nota Fiscal.

🏠 > Application Base Setup > Enterprise > Basic Data > Address Setup per Country

Address Setup per Country

🔍 Open Search

✓	Country	Detailed Address	State Presentation	County Presentation	City Presentation	Validate State Code	Validate County Code	Validate City Code
☐	AR - ARGENTINA	No	Not Used	Not Used	Not Used	No	No	No
☐	AT - AUSTRIA	No	Not Used	Not Used	Not Used	No	No	No
☐	BE - BELGIUM	No	Not Used	Not Used	Not Used	No	No	No
☐	BR - BRAZIL	Yes	Codes	Not Used	Names	No	No	No

☐	DK - DENMARK	No	Not Used	Not Used	Not Used	No	No	No
☐	ES - SPAIN	No	Not Used	Not Used	Not Used	No	No	No

Detailed Address functionality allows street, house number, complement, and district information to be maintained in dedicated address fields in the Company. This functionality is not available for other entities such as Customer and Supplier in the application.

Address Types

Address Type	Default Address
☒ Delivery	Yes

Edit Detailed Address

Street House No Community

Avenida Tamboré 267

District

Tamboré

For Company, when the Detailed Address functionality is not used, the application derives the address information from the General Address Information fields when generating the electronic Nota Fiscal (NF-e) XML. For Customer, Supplier, and Forwarder, the address information is always derived from the General Address Information fields maintained in their respective master data pages, since the Detailed Address functionality is not available for these entities.

The values are mapped as follows:

- Address1 – The text before the first comma is assigned to the Street tag <xLgr>, while the text after the comma is assigned to the Building Number tag <nro> in the NF-e XML file.
- Address2 – Mapped to the Complement tag <xCpl> in the NF-e XML file.
- Address3 – Mapped to the Borough tag <xBairro> in the NF-e XML file.

5.4.2 ICMS TAXPAYER

ICMS Taxpayer functionality is available in the **Sales/Customer/Customer/Address/Delivery Tax Information** page which indicates that the customer is an ICMS tax payer for the specific address ID.

The screenshot shows the 'Address' page in the IFS system. The 'DELIVERY TAX INFORMATION' tab is selected. Under the 'Customer Tax Withholding' section, the 'ICMS Tax Payer' checkbox is checked and highlighted with a red box. Other visible fields include 'Tax Withholding' (set to 'Tax Withhold'), 'Tax Rounding Method' (set to 'Round to the Nearest'), 'Tax Rounding Level' (set to 'Specified on company'), and 'Business Transaction ID' (set to '100 - Venda de Mercadorias, dont set here Coastal Shippin').

The setting, *ICMS Tax Payer* controls which value to be included in the NF-e XML file, block “dest” and tag “indIEDest”.

```

- <dest>
  <CNPJ>98741254112145</CNPJ>
  <xNome>Brazilian Customer 1</xNome>
  - <enderDest>
    <xLgr>Rio Grande</xLgr>

    <xBairro>RIO</xBairro>
    <cMun>1578</cMun>
    <xMun>Rio de Janeiro</xMun>
    <UF>RJ</UF>
    <CEP>14254</CEP>
    <cPais>1058</cPais>
    <xPais>BRAZIL</xPais>
    <fone>023144445</fone>
  </enderDest>
  <indIEDest>2</indIEDest>
  <IE/>
  <email>john.smith@ifsworld.com</email>
</dest>

```

- If the customer is from abroad (Customer Invoice Document Address is not “Brazil”, the tag will be = **9** (not Tax Payer)
- If the customer is ICMS Tax Payer and no Tax Id Type STATE_REG (State Registration) is defined in Customer Invoice Document Address, the tag will be = **2** (Tax Payer without state registration).
- If the customer is ICMS Tax Payer and has Tax Id Type STATE_REG (State Registration) defined for the Customer Invoice Document Address, the tag will be = **1** (Tax Payer with state registration)
- If the customer is not an ICMS Tax Payer, the tag will be = **9** (not Tax Payer)

5.4.3 CBS/IBS TAXPAYER

IBS/CBS Taxpayer functionality is available in the **Sales/Customer/Customer/Address/Delivery Tax Information** page which indicates that the customer is an CBS/IBS tax payer for the specific address ID.

The screenshot shows the 'Address' page in the IFS system. The breadcrumb trail is: Application Base Setup > Enterprise > Customer > Customer > Address. The page title is 'Address'. Below the title is a search bar with 'Search (3)'. The main content area shows customer details for 'BR DOMESTIC CUST'. The 'Address ID' is 'SP1'. The 'Delivery Tax Information' tab is selected, showing fields for 'Tax Withholding', 'Tax Rounding Method', 'Tax Rounding Level', and 'Business Transaction ID'. The 'CBS/IBS Tax Payer' toggle is highlighted with a red box.

5.4.4 BACEN CODES (NON-ISO COUNTRY CODES)

BACEN Code is a country code provided by the Brazilian Central Bank (Banco Central do Brasil). The BACEN codes of the issuing company and receiving party are included in the NF-e XML file.

Use IFS standard functionality "Alternate Country Codes" to enter the BACEN codes in the **Application Base Setup/System Setup/ISO Code Usage/Country** page. For Brazil the Country Class "BACEN" must be used to fetch values to the NF-e XML file.

5.4.5 IBGE STATE CODES (NUMERIC STATE CODES)

The IBGE state code specified by the Brazilian Institute of Geography and Statistics is needed in the NF-e XML for the issuer address.

To define **IBGE State Code**, use IFS standard functionality “Numeric State Code” in the **Application Base Setup/Enterprise/Basic Data/States** page.

States BR - Federative Republic of Brazil ▼ 1 of 1

<<

5.4.7 FINAL CONSUMER

In the NF-e XML file there is a mandatory tag for “Final Consumer” (indFinal) with value Yes or No.

New functionality, “Final Consumer” is added in the **Sales/Order/ Customer Order/ Order Details** tab with default value NO.

This could be manually enabled considering the below criteria prescribed by the Brazilian authorities, e.g.:

- The customer is a physical party (and not juridical)

- The order value is not greater than an amount in BRL specified by the Brazilian authorities
- Depending on type of sales operation

Placeholder – “Brazil Unit Price”

In Brazilian context, some taxes are included in the price of a product (in Brazilian way of explaining). This means that the tax amounts are included in the tax base amount. The tax % is expressed for the tax base amount which includes the tax amount as well. However, the logic used to embed the tax amounts in the price for Brazil considers some specific taxes (ex: ICMS, PIS and COFINS). Some taxes are not a part of this (ex: IPI), as these taxes are always separated from the price in the Nota Fiscal.

This is the placeholder in the Customer Order Line level – “**Brazil Unit Price**” in order to be the placeholder for the amount returned by Avalara in the attribute line “Unit Price” of JSON file., This will be sent as the unit price for Outgoing Nota Fiscal line and xml file item – “**VunCom**”.

1	1	1343.82	1000.00	1000.00	1000.00	474.84	474.84	1474.84		

Note: When Avalara isn't used to calculate the relevant taxes, "Brazil Unit Price" will be calculated manually as follows.

Calculation

$$\text{Brazil Unit Price} = \frac{\text{Unit (Line Net Amount + Total Line tax Amount Without IPI Taxes)}}{\text{Line Quantity}}$$

Example: Brazil Unit Price = $((1000 + (87.61 + 46.11 + 19.02))) / 10 = 115.27$

5.4.9 Tax Calculation Method

In IFS Cloud, Outgoing Nota Fiscal can be generated using either Net or Gross Avalara tax calculation methods.

When an intra-company goods movement is performed using a Shipment Order, the applicable tax calculation method is determined based on the basic data setup of the sender site.

- If the sender site has the **“Use Price Including Tax”** toggle **enabled**, the system applies Avalara Gross tax calculation.
- If the sender site has the **“Use Price Including Tax”** toggle **disabled**, the system applies Avalara Net tax calculation.

Accordingly, the price value in the outgoing tax document is interpreted as:

- Net price when the toggle is disabled
- Gross price when the toggle is enabled

5.5 Create Customer Order

Follow standard functionality to enter a Customer Order. Select an option for Business Transaction ID in the corresponding field in **Customer Order/Order Details** tab, group Brazilian Specific Attributes.

The screenshot shows the 'Customer Order' form for order P10739. The 'ORDER DETAILS' tab is selected. Under the 'Brazilian Specific Attributes' group, the 'Business Transaction Id' field is highlighted with a red box and contains the value '100 - RCA BUSINESS TRANSACTION TEST'.

LINES	RENTAL LINES	ORDER DETAILS	CHARGES	INVOLVED PARTIES
...		Delivery Address		
Delivery Settings		Document Address		
Delivery Confirmation		Invoice		
		Order Picking		
		Shipment		
		Brazilian Specific Attributes		
		Business Transaction Id		
		100 - RCA BUSINESS TRANSACTION TEST		

A Customer Order Type which stops the processing before the “Print Invoice” event is performed must be used.

☰ 🔍 📄 ✎

☐	⋮	DELIVER ORDER	No
☐	⋮	CREATE DELIVERY NOTE	No
☐	⋮	PRINT DELIVERY NOTE	No
☐	⋮	CREATE INVOICE	Yes
☐	⋮	PRINT INVOICE	No

Tax Lines information can be automatically fetched from integration to 3rd party Avalara Brazil if LCC parameter “Tax Determination via Integration to Brazilian External Tax System” is enabled or using the core Tax Calculation Structures functionality together with enabled LCC parameter for “Extended Tax Codes and Tax Calculation Structures set-up”.

Applicable CST Code and Legal Tax Class (only for IPI taxes) should be manually entered if not automatically received in the integration to Avalara Brazil, as it’s mandatory information for the electronic Nota Fiscal to be sent to the Brazilian Tax Authority . These values will be transferred to the Customer Invoice in the next step of the process.

5.6 Deliver Customer Order

Single Order delivery

Deliver the single Customer Order using standard functionality.

Shipment delivery

In case of delivery using the IFS Shipment functionality, the Customer Order must be connected to a Shipment Type. Enter a Shipment Type in page **Shipment Management/Outbound Shipment/Basic Data/Shipment Type** and select 'Stop After' the event "Create Invoice" to stop the shipment invoice to be printed automatically before the outgoing NF-e is created and authorized.

Customer Orders with different Business Transaction ID:s are not allowed to be mixed in the same Shipment ID. The selected Business Transaction ID in Customer Order header is transferred to the "Reference ID" field in the Customer Order line and will be considered as a consolidation parameter for Shipments.

It is therefore mandatory to set **Reference ID** as a consolidation parameter in "Consolidate Source Lines By" on the **Shipment Type** page.

5.7 Create Customer Invoice

Create the Customer (Order) Invoice or the Shipment Invoice (Customer Order Collective Invoice, Debit) in Preliminary state using IFS standard functionality.

5.8 Create Outgoing Nota Fiscal

The Nota Fiscal must always be issued in Brazilian Real, Customer Orders/Invoices for sales in foreign currencies will be converted into accounting currency BRL when the Outgoing Nota Fiscal is created.

Company level parameter, “*Manually Process Nota Fiscal*” determines whether the Outgoing Nota Fiscal is automatically created when creating the Customer Invoice or manually created from the **Outgoing Nota Fiscal** page.

Process Overview

Below table shows, how this Company level parameter, “*Manually Process Nota Fiscal*” works with Customer Order Invoice, *Outgoing Nota Fiscal* and the NFe XML generation.

Parameter, Manually Process Nota Fiscal	Outgoing Nota Fiscal object	NFe XML generation
Enabled (Outgoing NF is Manually processed)	First, Customer Order Invoice is created and the Outgoing NF need to be manually created by using the command, Create Outgoing Nota Fiscal .	NFe XML need to be manually generated by using the command Send Nota Fiscal in the Outgoing NF page.
Disabled (Outgoing NF is Automatically processed)	When Customer Order Invoice is created, the Outgoing NF object is automatically created.	NFe XML is automatically generated based on the Outgoing NF object.
<i>*Both the Outgoing NF object and the NFe XML is automatically generated</i>		

5.9 Outgoing Nota Fiscal Life Cycle Management

5.9.1 OUTGOING NF MANUALLY CREATED

Company level parameter, “Manually Process Nota Fiscal” is enabled, then in the Customer Order Invoice process, Outgoing Nota Fiscal need to be manually created. To facilitate this manual process, command **Create Outgoing Nota Fiscal** is enabled on CO Invoice.

Same command is enabled on the Outgoing Tax Document for the Intracompany Goods Movement, Sales for Future Delivery and Triangular Sales scenarios as well.

The screenshot displays the 'Customer Invoice' interface for a Brazilian Customer. The top navigation bar includes a button labeled 'Create Outgoing Nota Fiscal', which is highlighted with a red rectangle. Below the navigation bar, the interface shows various fields for customer information, amounts, and invoice details. The 'Amounts' section displays currency (BRL), gross amount (125.00), net amount (100.00), and tax amount (25.00). The 'Indicators' section shows several status indicators, including 'Price Adjustment', 'Advance/Prepayment Invoice', 'Use Price Incl Tax', 'Notes', 'Correction Exist', and 'Correction Invoice', all of which are currently set to 'No'.

Currency Code	Currency Rate
BRL	1

Note

-When the Outgoing Nota Fiscal is set to the status of “Initiated” and “Sent Request”, the IFS standard command on CO preliminary invoice “Print Invoice” is disabled.

5.9.2 OUTGOING NF AUTOMATICALLY CREATED

When the Company parameter, “Manually Process Nota Fiscal” is disabled, the Outgoing Nota Fiscal Object is automatically created in the Customer Order Invoice and Outgoing Tax Document processes. Once the Outgoing Nota Fiscal Object is created, also the NFe XML is automatically generated based on the Outgoing NF object and send to the third party system integrator to communicate with the Brazilian Tax Authority .

Since in this scenario, both the Nota Fiscal Object and the NFe XML are automatically generated and sent to the Tax Authority for Approval, *Outgoing Nota Fiscal* is created in “Sent Request” state. The connected CO Invoice or Outgoing Tax Document is in “Preliminary” state and the associated CO is in “Closed” state.

55		100	

5.9.3 GENERATION AND ASSIGNING A “NF-E KEY” TO NF-E XML

Every NF-e XML generated is assigned a unique identification number as the “NF-e Key” following a logic defined by the authorities. The identification number is saved in the **Outgoing Nota Fiscal/ NF-e Information** tab, field “NF-e Key”. With this key every individual Nota Fiscal can be identified, and it’s also used to match the SEFAZ response to the right IFS Nota Fiscal.

The 44-character NF-e Key is composed according to the description in the below table:

Data item	Description	Number of characters
cUF	State Code of Issuer	2
AAMM	Year and Month from Issuing Date of Nota Fiscal	4
CNPJ	CNPJ registration of Issuer	14
Mod	Nota Fiscal model from Nota Fiscal	2
Serie	Nota Fiscal Series from Nota Fiscal	3 (left zeros are used if series is less than 3 positions)
nNF	Nota Fiscal Number from Nota Fiscal	9 (left zeros are used if series is less than 9 positions)
tpEmis	Emission Type from Nota Fiscal (=1)	1
cNF	IFS Invoice No	8 (left zeros are used if series is less than 8 positions)
cDV	Check digit (calculation logic provided by the Tax Authority)	1

The date in the field “Issue Date” is automatically set when the user selects the command **Send Nota Fiscal**. In case the Nota Fiscal is not authorized by the Tax Authority , the user needs to do some adjustments and send it again. The new “Issue Date” will then overwrite the previous one at the time the new NF-e XML is created.

5.9.4 GENERATION OF NF-E XML

In this process IFS Cloud will produce an IFS style XML file which is generated to integrate with a 3rd party solution provider. The 3rd party service provider will convert the IFS style XML file into the official NF-e XML layout and can also add a digital signature to the file. The 3rd party solution provider will communicate the file to the Brazilian Tax Authority (SEFAZ).

Once the Outgoing Nota Fiscal is created and set to the initiated status, connected CO Invoice couldn't be processed alone. Connected Outgoing Nota Fiscal should 1st process and the further processing of CO Invoice is dependent on the Outgoing NF status which describes in the chapters below.

5.9.5 OUTGOING NF APPROVED

Once the Outgoing Nota Fiscal is Approved, connected CO Invoice will be automatically Approved.

Out Going NF Status	CO Invoice Status	CO Status
Approved	Approved	Closed

5.9.5.1 Receive Response File

The Brazilian Tax Authority SEFAZ will in real time validate the received NF-e XML file and send back a response XML which must be received by IFS prior to the physical release of goods.

Similar to the sending of XML process, 3rd party service provider will receive the response file from SEFAZ first and send the response information to IFS in the IFS style XML layout.

Once the IFS style XML response is received from the 3rd party service provider, IFS reads the file and recognize the correct Nota Fiscal by validating the “NF-e Key”.

Then the **NF-e Information** tab will be updated with the values from xml file.

SEFAZ Status Code “100” indicates the response file is approved and these invoices are automatically printed and set to status “*PostedAuth*”.

```

SEFAZ responses with any other status codes will not be further processed (neither automatically nor through manual commands) and the Customer Invoice will remain in status “Preliminary”. Handling all these scenarios are described in chapters below.

5.9.6 OUTGOING NF DECLINED

Outgoing Nota Fiscal could be Declined by the Brazilian Tax Authority . This could happen when the issuer or recipient has some pending issue and irregularities with the Brazilian Government, i.e. may not perform business transactions within the state.

When a Nota Fiscal is declined it cannot be voided or cancelled and the Nota Fiscal number cannot be used again.

Outgoing Nota Fiscal - 009100000029

BRL	176.13	100.00	76.13	1	1

Outgoing NF Status	CO Invoice Status	CO Status
Declined	Cancelled	Picked

In this scenario, it's always the "Preliminary" CO Invoice which is get Cancelled and no reversal voucher will be created. Once the CO Invoice is cancelled, connected CO is automatically set to the status of "Picked" (IFS Core functionality).

5.9.7 CANCELLATION REQUEST SENT TO THE APPROVED OUTGOING NF

The general rule stated by Brazilian government says that companies are allowed to Cancel Authorized Nota Fiscals up until 24 hours from the issue date and time. There are some scenarios that still allow cancellation even after 24 hours (can be connected to penalty fee or audit).

Outgoing NF Status	CO Invoice Status	CO Status
Cancellation Request Sent	Authorized	Closed

The **Send Cancel Request** command will generate an outgoing xml file representing the request to cancel the referenced Nota Fiscal number.

```

1 <infEvento>
2   <xServ>CANCELAMENTO</xServ>
3   <chNFe>35220177214253000192650090000010311002063978</chNFe>
4   <tpAmb>2</tpAmb>
5   <xJust>Pedido de Cancelamento de Nota Fiscal Eletronica</xJust>
6 </infEvento>

```

In the above scenario, Outgoing Nota Fiscal status is set to the “Cancellation Request Sent” while connected CO is still Authorized and CO status is Closed.

5.9.8 CANCEL APPROVED FOR OUTGOING NOTA FISCAL

Once the Outgoing Nota Fiscal cancellation request get accepted by the Brazilian Tax Authority , cancelled response message will receive to the IFS Application via a 3rd party integrator and the Outgoing Nota Fiscal is set to the status of “Cancelled and the connected CO Invoice too will get automatically Cancelled.

Out Going NF Status	CO Invoice Status	CO Status
Cancelled	Cancelled (Cancelled PostedAuth Invoice)	Picked

In the above scenario, it’s always the PostedAuth CO Invoice getting cancelled, hence a reversal “K” Voucher is created reversing the original CO Invoice postings.

If a Payment Proposal, Mixed Payment, RMA, Credit Invoice or Correction Invoice is attached to any "PostedAuth" Invoice/Approved Nota Fiscal, an error will create to stop the cancellation process when receiving an approved cancellation response from SEFAZ.

The K voucher is created and revert the original voucher postings.

5.9.9 CANCELLATION REQUEST SENT TO THE APPROVED 2ND (DELIVERY) OUTGOING NF

There are some specific cancellation handling for the scenarios which requires two Nota Fiscals for the same transaction, typically the Sales for Future Delivery and the Triangular Sales scenarios, where the 2nd Nota Fiscal is created from the Outgoing Tax Document.

Outgoing NF Status	Outgoing Tax Document Status	CO Status
Cancelled	Cancelled	Picked

When cancelling the 2nd Nota Fiscal there are a few validations to be considered.

For Sales for Future Delivery (using Stage Billing), the 1st NF (Invoice NF) cannot be cancelled if an Outgoing Tax Document (OTD) exists. The OTD must be cancelled before proceeding with NF cancellation. If a 2nd NF (Delivery NF) exists, the system restricts the cancellation of the 1st NF and requires the cancellation of the 2nd NF first.

For Triangular Sales, the 1st NF (Invoice NF) cannot be cancelled if the 2nd NF (Delivery NF) exists. User must first send a cancellation request for the 2nd NF, which will trigger the automatic cancellation of the OTD along with 2nd and 1st cancellations. These validations ensure proper sequence, and compliance, and prevent inconsistencies in tax reporting.

Final Consumer

For both Sales for Future Delivery and Triangular Sales, the cancellation of a Nota Fiscal (NF) executes the reversal of all associated financial postings. Upon NF cancellation, the system automatically reverses M297 and M307 to ensure accurate tax and financial reconciliation.

5.9.10 RECEIVED Error response from the Brazilian Tax Authority

If a Brazilian Tax Authority recognized errors in the request file, they will send an Error responses via the 3rd party integrator. There could be 2 types of Errors as describes bellow,

-Receive an Error Response which could be rectified

Outgoing NF Status	CO Invoice Status	CO Status
Error	Preliminary -Rectify the error and re-send the NFE (Use Same NFe No)	Closed

-Receive an Error Response which couldn't be rectified

Outgoing NF Status	CO Invoice Status	CO Status
Error	Cancelled (Preliminary Invoice) a) Send Void Request from a Nota Fiscal.	a) Send Void request- Closed b) Approved Void Request-Picked

	b) Approved Void Request- Cancelled the Preliminary state Invoice	
--	---	--

When a Nota Fiscal is rejected due to some error in the schema of xml file or some inconsistent information, the Nota Fiscal number can be used again. The companies can fix the issue found in such Nota Fiscal and request authorization again. If the problem cannot be fixed, the Nota Fiscal must be **Voided**. A void request must be sent and approved by the Tax Authority . After the Tax Authority approved the void request, the Nota Fiscal number cannot be used again.

When the return message from the Tax Authority is “Error” the **command Send Void Request** will be available in the **Outgoing Nota Fiscal** page.

Users can cancel the Project Invoice of the Cancelled Outgoing Nota Fiscal. Once the Project Invoice is cancelled the status of the invoice will be changed to “Cancelled”.

5.13.3 CANCEL APPROVED OUTGOING NF

Companies are allowed to Cancel Approved Outgoing Nota Fiscals when the corresponding Project Invoice is not sent to the customer. Once the Approved Outgoing Nota Fiscal is Cancelled, Outgoing Nota Fiscal status will be changed to “Cancelled” and **Cancel Invoice** command on the Project Invoice gets enabled. Users can cancel the Project Invoice of the Cancelled Outgoing Nota Fiscal.

5.14 Delimitations

- In this version, Outgoing Nota Fiscal is not supported in *Instant Invoice* flow.
- Outgoing Nota Fiscal is supported only in the CO flow (and supports only the basic functionalities in CO flow) and the Project Invoice – Initial Solution, Supplier Returns for Credit and Intra company goods movements.
- In the Project Invoice – Initial Solution, Outgoing Nota Fiscal NF-e communication is not supported. Only the manual issuance of Outgoing Nota Fiscal is supported in the Project Invoice – Initial Solution.

Additional delimitations may apply; all relevant flows should be tested to ensure completeness.

6 Outgoing Nota Fiscal for Services

6.1 Overview Legal Requirement

The Service Nota Fiscal (NFS, NFS-e) is a mandatory official document required to validate the provision of services in Brazil. It includes essential details, such as the service description, provider and customer information, price, the applicable service tax (ISS), and, in some cases, tax withholdings.

The document must always be issued in Brazilian Real (BRL). It serves as a tax record for services provided by a company to an individual or another company operating within Brazil.

6.2 Process Overview

In IFS Applications, the issuing of outgoing Service Nota Fiscal is available in two flows:

Customer Order

Project Invoice – Initial Solution

6.3 Prerequisites

The company must be set-up to use Brazilian localization, see the Company Set-Up chapter, and the “Outgoing Nota Fiscals” parameter must be enabled.

The “Post Preliminary Tax Withholding” parameter located in Application Basic Setup/Enterprise/Company/Company/Tax Control/Invoice tab must be disabled to ensure correct withholding tax calculation in Brazilian withholding scenarios.

Note that also parameters “Acquisition Origin”, “Business Operation”, “Address Specific Tax ID Numbers”, “Goods/Services Statistical Codes”, NBS Code, “Extended Tax Codes Tax Calculation Structures set-up”, and “Allow Cancel Customer Invoices” must be enabled to fulfill data requirements for the Nota Fiscal. The External Tax Codes Mapping must also be configured for given the Company; this is used to record taxes returned by external tax system in the application side. Please see the specific chapters on how to set up the data needed.

The default series used to issue service Nota Fiscal must be selected for Manually Issue Nota Fiscal in the Official Document Number:

☐ Show Only Valid Combinations Apply Settings											
✓	Series	Valid From	Branch	Fiscal Document Model	Start Value	End Value	Next Value	Length	Category	Manually Issue Nota Fiscal	Default Series
☐	001 - Services	01/03/2024	SP01 - Branch SP01	NFE - Service - Paper	14000	20000	14027	9	Service	☒	☒
☐	009 - Goods	01/01/2024	SP01 - Branch SP01	55 - Goods - Electronic (NF-e)	64000	64999	64176	9	Goods	☐	☒

In the Lines tab, the federal service code is fetched from Goods/Services Statistical Codes defined for Non-Inventory Sales Parts:

When a Customer Order line is saved or modified, the application sends a request to the external tax system Avalara. This request is in JSON format, communicated via REST API, and includes all relevant attributes at the installation, entity, part, and transaction levels necessary for tax determination.

Key attributes includes:

- The External Tax System Reference set for the Business Transaction ID used.
- The Goods/Service Statistical Code (Federal Service Code – LC 116).
- The NBS Code of goods/services statistical code (Service Code – Brazilian Tax Reform)
- Service Codes according to the specific list provided by administration of cities involved in the business transaction.

All of which are crucial for accurate tax calculation. Once Avalara returns the response, all tax details are recorded in the Customer Order Tax Lines dialog for each item.

For more details about specific service codes at the city level, please refer to the chapter “Service Codes per Service and City.”

Customer Order Line Tax Lines

Gross Amount	Net Amount	Tax Amount
9014,08	8000,00	1014,08

Tax Base Amount	Tax Code	Tax Type	Tax(%)	Tax Amount/Curr	Tax Amount/Base	Impact On Net Amount	CST Code	Legal Tax Class
: 9014,08	BR-COFINS	Tax	7,6	685,07	685,07	Tax Inclusive	01	
: 9014,08	BR-CSLL	Tax	0	0,00	0,00	Tax Inclusive	01	
: 9014,08	BR-ISS	Tax	2	180,28	180,28	Tax Inclusive	01	
: 9014,08	BR-PIS	Tax	1,65	148,73	148,73	Tax Inclusive	01	

The price in the Customer Order line is communicated to Avalara as a net price. Avalara then returns the final price in the response file, including the tax-inclusive amounts. This final price is recorded in the "Brazil Unit Price" field of the Customer Order line:

Once the Customer Order lines are saved and taxes are returned, it must be processed up to the Customer Invoice, using the Core standard functionality.

In this flow, when the Customer Order is released, the application identifies the sales of service scenario based on parts entered in the lines and automatically fetches the default series set for the Services category from the Official Document Number into the Customer Order. Check the chapter Automatic Generation of Official Document Number for further details about the setup required for Nota Fiscal Series to be used when issuing Nota Fiscais in application.

RJ - NF-E EMITIDA EM AMBIENTE DE HOMOLOGACAO - SEM VALOR FISCAL

Once the Customer Invoice is created, the application sends a new tax determination request to Avalara to obtain the most up-to-date tax amounts. Similar to the Customer Order line process, the tax details returned can be verified in the Tax Lines dialog and the final price with tax-inclusive amounts is recorded in the "Brazil Unit Price" field.

The series for Services can be verified along with the other components Branch, Fiscal Document Model and Nota Fiscal Number fetched, by clicking the button Official Document Number Components:

Official Document Number Components

Serie	Branch	Fiscal Document Model	Nota Fiscal Number
001 - Services	SP01 - Branch SP01	NFE - Service - Paper	000014026

[OK](#)
[Cancel](#)

Additionally, the CFOP returned by Avalara is recorded in the "Business Operation" field on the Customer Invoice line:

Notes: If the "Manually Process Outgoing Nota Fiscal" toggle button is selected in **Company/Invoice/NF-e Compliance**, the Nota Fiscal must be created manually by clicking the command button "Create Outgoing Nota Fiscal" on the Customer Invoice page. If the toggle button is unselected, the Nota Fiscal will be created automatically, when the preliminary Customer Invoice is generated.

Once the outgoing Nota Fiscal is created, you can navigate from Customer Invoice to Outgoing Nota Fiscal by clicking the command button View Outgoing Nota Fiscal in the Customer Invoice page.

The Nota Fiscal created with Document Type “Services Nota Fiscal” contains all the relevant details in header and lines level.

Most of the information in the Nota Fiscal is directly copied from the related Customer Invoice, including the Brazil Unit Price, Business Operation (CFOP), Goods/Services Statistical Codes (federal service code), NBS Code, Nota Fiscal Series, Nota Fiscal Number, Fiscal Document Model, as well as regular taxes and withholding taxes, which be verified by clicking the "Tax Lines" and "Tax Lines – Withholding" buttons in the Lines tab:

6.6 Creating Service Nota Fiscal in the Project Invoicing flow

Project invoicing is driven by report codes that define the services delivered and the corresponding classification data required for tax determination. Create an invoicing plan or a project transaction using a report code.

Project Management > Invoicing > Invoicing Plan

Invoicing Plan

Search

Create Invoicing Plan

Each time a project invoice is created or modified, a tax calculation request is sent to Avalara. The request is sent in JSON format, and the key attributes in the request include:

- The External Tax System Reference of the Business Transaction ID
- The Goods/Services Statistical Code (Federal Service Code – LC 116)
- The NBS Code
- The municipal service codes defined according to the cities involved in the transaction.

After Avalara returns the response, the project invoice updates the tax information in the **Project Invoice Tax Lines** dialog for each line. For details on city-level service codes, refer to *Service Codes per Service and City*.

The project invoice line communicates the net price to Avalara during tax determination. Avalara returns the final price including applicable taxes, and this value is recorded in the **Brazil Unit Price** field.

When the project invoice is created, the application fetches the default series configured for the Services category of the branch from the **Official Document Number Components** page into the project invoice. For details on how official document numbers are determined, refer to the *Automatic Generation of Official Document Number* section.

Series	Branch	Fiscal Document Model	Nota Fiscal Number
001 - Service			

All document number components (Series, Branch, Fiscal Document Model, and Nota Fiscal Number) can be viewed through the **Official Document Number Components** command in the project invoice.

Series	Branch	Fiscal Document Model	Nota Fiscal Number
001 - Service	BSP01 - Branch SP01	NFES - Service - Electronic	000220018

The CFOP returned by Avalara is recorded in the **Business Operation** field on the project invoice line. CFOP (Código Fiscal de Operações e Prestações) is a Brazilian transaction classification code used to determine whether a specific operation is taxable or not.

If the **Manually Process Outgoing Nota Fiscal** toggle is enabled in **Company/Invoice/ NF-E Compliance**, the Service Nota Fiscal is created manually by selecting the **Create Outgoing Nota Fiscal** command on the **Project Invoice** page. If the toggle is not enabled, the nota fiscal is created automatically when the preliminary project invoice is generated. Once created, the outgoing nota fiscal can be viewed through the **View Outgoing Nota Fiscal** command.

The Service Nota Fiscal contains the relevant header and line-level information copied from the project invoice, including Brazil Unit Price, Business Operation (CFOP), Goods/Services Statistical

6.7 Delimitations

There is currently no support for integrating service Nota Fiscal with municipal authorities using the third-party service provider Avalara. At this time, the process is only supported manually, which requires that the default service series be configured for manual issuance. Additionally, the user must manually issue the Nota Fiscal on the municipality's website.

Additional delimitations may apply; all relevant flows should be tested to ensure completeness.

7 Outgoing Nota Fiscal – Supplier Returns for Credit

7.1 Overview Legal Requirement

Brazilian law requires that companies issue an accompanying Nota Fiscal whenever commodities are moved between different taxpayer units. When you return purchased commodities to the supplier, you must issue a new Outgoing Nota Fiscal to accompany the returned commodities.

When issuing an Outgoing Nota Fiscal to Supplier Returns transaction, following rules must be adhered:

- In Brazil, you can only process a return once the preceding outgoing nota fiscal has been printed.
- The purchase return *nota fiscal* must be based on the supplier's original *nota fiscal*. If merchandise is fully returned, the outbound *nota fiscal* values must be identical to the supplier's original *nota fiscal*.
- If merchandise is partially returned, the outbound *nota fiscal* values must be proportional to the supplier's original *nota fiscal*.
- The tax rates and costs must be returned in the same amounts as those amounts that were used in the supplier's original *nota fiscal*.
- The original freight, insurance, and expenses must also be returned proportionally and handled with a separate *nota fiscal*.

7.2 Process Overview

- Creating a Credit Supplier Invoice will automatically generate an Outgoing Nota Fiscal Object.
- Generate NFe-xml and communicate with the third party system integrator
- Outgoing Nota Fiscal lifecycle management is applied (Explained more in detail in the *Outgoing Nota Fiscals* chapter)

- Credit Supplier Invoice could be processed according to the connected Outgoing Nota Fiscal status.

7.3 Prerequisites

The company must be set-up to use Brazilian localization, see chapter Company Set up, and the parameter “*Outgoing Nota Fiscal*” must be enabled.

Company level parameter, “*Manually Process Nota Fiscal*” determines whether the Outgoing Nota Fiscal is automatically created when generating the Credit Supplier Invoice or manually processed.

7.4 Prepare shipment for items to return to Supplier

Use IFS Cloud generic functionality to register inspection results, set the Receipt Return Type = Return Credit and connect return items to Shipment.

7.5 Create Credit Supplier Invoice

7.5.1 CREATE CREDIT SUPPLIER INVOICE NUMBER SERIES

Since the Credit Supplier Invoice is produced by the buyer, it's required to have a system generated unique number series allocated for each Credit Supplier Invoice in Preliminary state.

Once the Outgoing Nota Fiscal is generated, Outgoing Nota fiscal Number will automatically get assigned to the Credit Supplier Invoice as Credit Supplier Invoice No and replace the system generated Credit Supplier Invoice preliminary number.

To have a system generated and unique number series used in Credit Supplier Invoice flow, use the IFS Cloud core functionality “Print Debit/Credit Notes” as described below.

Define a separate Invoice series used to generate Credit Supplier Invoice

Go to the ***Financials/Supplier Invoice/Basic Data/Invoice Series*** page and define a new invoice series to use in Credit Supplier Invoice flow.

Invoice Series				
  				
✓		Series ID	Description	Voucher Type
☐	:	SX	External Supplier Invoice	
☐	:	SR	Supplier returns	
☐	:	SI	Manual Supplier Invoice	
☐	:	SF	Supplier Difference Item	
☐	:	SD	Customer Order Self-Billing Invoice, Debit	
☐	:	SCR	Supplier Credit Invoice	
☐	:	SC	Customer Order Self-Billing Invoice, Credit	

Then define an Invoice No series to be used.

Non-rolling invoice numbers to be used.

Invoice Number Series

SCR - Supplier Credit Invoice 1 of 1

«

✓		Valid From	Start Value	End Value	Next Value
☐	:	8/4/2022	5000	5999	5001

Define a separate Supplier Invoice Type used to generate Credit Supplier Invoice

Connect the above defined new invoice series to a new Invoice type which could be used to generate Credit Supplier Invoice. Make sure to enable, "Print Debit/Credit Invoice" option which will enable automatically assigning of a Supplier Invoice No to the Credit Supplier Invoice.

Supplier Invoice Types									
✓	Invoice Type	Description	Tax Free Tax Code	Reference Mandatory	Correction Reason Mandatory	Invoice Text Mandatory	Definite Invoice Series ID	Branch	Print Debit/Credit Note
☐	SUPRECINV	Recurring Supplier Invoice		No	No	No	RS		No
☐	SUPPINV_CR	Credit Supplier Invoice		No	No	No	SCR		Yes
☐	SUPPINVRET	Supplier returns		No	No	No	SR		No
☐	SUPPINV	Manual Supplier Invoice		No	No	No	SI		No
☐	SUPPEXT	External Supplier Invoice		No	No	No	SX		No

Select Above Supp Inv Type when creating the Credit Supplier Invoice

When you create a Credit Supplier Invoice, make sure to manually select the above defined Supplier Invoice Type, to have a unique Credit Supplier Invoice No in Preliminary state Credit Supplier Invoice.

Automatic Payment Authorization:
Authorizer ID:

When you select the above defined Invoice Type, Invoice No field become uneditable and during the process of Credit Supplier Invoice generation, Invoice No is automatically assigned.

7.5.2 REFERENCE INVOICE NO IN THE CREDIT SUPPLIER INVOICE

As per the Brazilian legal requirement, the purchase return nota fiscal must be based on the supplier's original nota fiscal. If merchandise is fully returned, the outbound nota fiscal values must be identical to the supplier's original nota fiscal.

If merchandise is partially returned, the outbound nota fiscal values must be proportional to the supplier's original nota fiscal.

To cater the above requirement, we need to establish a connection between the original Nota Fiscal received from the Supplier with the outgoing Nota Fiscal generated based on the new Credit Supplier Invoice. IFS Cloud core functionality "Reference Series" and "Reference Invoice No" is used to establish the connection.

When a Credit Supplier Invoice is created for a Brazilian company, it's a must to connect the original Supplier Debit invoice as follows:

New Manual Supplier Invoice

7.5.3 CREATE OUTGOING NOTA FISCAL MANUALLY/AUTOMATICALLY

Create the Credit Supplier Invoice in Preliminary state using IFS standard functionality, then create an “Outgoing Nota Fiscal” object in the application. Once the Outgoing Nota Fiscal is created, the preliminary Credit Supplier Invoice number will be replaced by the Outgoing Nota Fiscal number.

Process Overview

7.5.4 BASIC DATA SETTING – OUTGOING NOTA FISCAL

Company level parameter “*Manually Process Nota Fiscal*” determines whether the Outgoing Nota Fiscal is automatically created when creating the Credit Supplier Invoice or manually processed.

Below table shows, how this Company level parameter “*Manually Process Nota Fiscal*” works with *Credit Supplier Invoice*, *Outgoing Nota Fiscal* and the NFe XML generation.

Parameter, Manually Process Nota Fiscal	Outgoing Nota Fiscal object	NFe XML generation
Enabled (Outgoing NF is Manually processed)	First, Credit Supplier Invoice is created and the Outgoing NF need to be manually created by using the command, Create Outgoing Nota Fiscal .	NFe XML need to be manually generated by using the command “ <i>Send Nota Fiscal</i> ” on the Outgoing NF object.
Disabled (Outgoing NF is Automatically processed)	When Credit Supplier Invoice is created, the Outgoing NF object is automatically created.	NFe XML is automatically generated based on the Outgoing NF object.
<i>*Both the Outgoing NF object and the NFe is automatically generated</i>		

7.6 Outgoing Nota Fiscal Life Cycle Management

7.6.1 OUTGOING NF **MANUALLY CREATED**

When Company level parameter “Manually Process Nota Fiscal” is enabled, the Outgoing Nota Fiscal needs to be manually created in the Credit Supplier Invoice process. To support this manual process, command **Create Outgoing Nota Fiscal** is enabled on Credit Supplier Invoice.

The screenshot displays the 'Manual Supplier Invoice' form for SCR - 5003. The form includes various fields for PO Reference, Receipt Reference, Sub Contract Reference, Invoice Advice Reference, Project ID, Supplier, Invoice Type, Series ID, Invoice No, Currency, Currency Rate, Invoice Date, Pay Term Base Date, Payment Terms, Due Date, Plan Pay Date, Payment Reference, Voucher Type Reference, Authorizer ID, Notes, Advance Invoice, Period Allocation, Pre-posting, Received Attachments, On Hold Installment, Gross Amount, Net Amount, Tax Amount, and Line Information. A right-hand menu is open, showing options like 'New Manual Supplier Invoice', 'More Information', 'Pre Posting', 'Installment Plan And Discounts', 'Post Invoice', 'View Vouchers', 'Purchasing', 'Copy and Cancel', 'Use Invoice Template', 'Create Invoice Template', 'Print Debit/Credit Note', 'Advance Invoices', 'Notes', and 'Create Outgoing Nota Fiscal' (highlighted with a red box).

Once the Outgoing Nota Fiscal is created from the Credit Supplier Invoice, command **View Outgoing Nota Fiscal** is enabled.

Outgoing Nota Fiscal is created in “Initiated” state while the connected Credit Supplier Invoice is in “Preliminary” state.

Outgoing NF Status	Credit Supplier Invoice Status
Initiated	Preliminary

7.6.1.1 Generate and Send NF-e XML File

Once the Outgoing Nota Fiscal object is created it’s automatically set to the status “Initiated” and the option “Send Nota Fiscal” is enabled. Use this command **Send Nota Fiscal** to generate the NF-e XML and send to the third-party system integrator for Brazilian Tax Authority approval.

Note

-When the Outgoing Nota Fiscal is set to the status of "Initiated" and "Sent Request", the IFS standard command on Credit Supplier preliminary invoice, "Post Invoice", "PO Matching" and "Copy Cancel" options are disabled.

7.6.2 OUTGOING NF **AUTOMATICALLY CREATED**

When Company level parameter "Manually Process Nota Fiscal" is disabled, then the Outgoing Nota Fiscal Object is automatically created in the Credit Supplier Invoice process. Once the Outgoing Nota Fiscal Object is created, also NFe XML is automatically generated (based on the Outgoing NF object) and sent to the third party system integrator to communicate with the Brazilian Tax Authority .

Since both the Nota Fiscal Object and the NFe XML are automatically generated and sent to the Tax Authority for Approval, *Outgoing Nota Fiscal* is created in "Sent Request" state. The connected Credit Supplier Invoice is in "Preliminary" state.

Outgoing NF Status	Credit Supplier Invoice Status

7.6.3 GENERATION AND ASSIGNING A “NF-E KEY” TO NF-E XML

The status “Sent Request” means the *Outgoing Nota Fiscal* is created and the NFe XML is generated and communicated with the third-party service provider. In this process, NF-e-Key is also generated and assigned to the Outgoing Nota Fiscal object and added in the NFe XML file.

			Return Message

7.6.4 GENERATION OF NF-E XML

IFS Cloud will produce an IFS style XML file which is generated to integrate with a 3rd party solution provider. The 3rd party service provider will convert the IFS style XML file into the official NF-e XML layout and can also add a digital signature to the file. The 3rd party solution provider will communicate the file to the Brazilian Tax Authority (SEFAZ).

Once the Outgoing Nota Fiscal is created and set to the initiated status, connected Credit Supplier Invoice couldn't be processed. Connected Outgoing Nota Fiscal should 1st process and the further processing of the Credit Supplier Invoice is dependent on the Outgoing NF status (described in the chapters below).

7.6.5 CREDIT SUPPLIER INVOICE WITH OUTGOING NOTA FISCAL

Once the Outgoing Nota Fiscal is set to the status "Initiated" and "Sent Request", connected Credit Supplier Invoice couldn't be processed. Which means that from the Credit Supplier Invoice, further processing options like, "*Post Invoice*", "*PO Matching*" and "*Copy Cancel*" are disabled.

Further processing of Credit Supplier Invoice is dependent on the Outgoing Nota Fiscal status and all possible status are described in detail in below chapters.

7.6.6 OUTGOING NF APPROVED

Once the Outgoing Nota Fiscal gets Approved, connected Credit Supplier Invoice will get automatically Approved.

Outgoing NF Status	Credit Supplier Invoice Status
Approved	Approved

7.6.6.1 Receive Response File

The Brazilian Tax Authority SEFAZ will in real time validate the received NF-e XML file and send back a response XML which must be received by IFS prior to the physical release of goods.

Similar to the sending of XML process, 3rd party service provider will receive the response file from SEFAZ first and send the response information to IFS in the IFS style XML layout.

Once the IFS style XML response is received from the 3rd party service provider, IFS reads the file and recognize the correct Credit Supplier Invoice by validating the "NF-e Key".

The **NF-e Information** tab will be updated with the values from the xml file.

    </NFE_RESPONSE>
  </SOAP-ENV:Body>
</SOAP-ENV:Envelope>

```

SEFAZ responses with any other status codes will not be further processed and the Credit Supplier Invoice will remain in status "Preliminary" (these scenarios are described in chapters below).

7.6.7 CREDIT SUPPLIER INVOICE WITH OUTGOING NF DECLINED

Outgoing Nota Fiscal could be Declined by the Brazilian Tax Authority . This could happen when the issuer or recipient has some pending issue and irregularities with the Brazilian Government, i.e., may not perform business transactions within the state.

When a Nota Fiscal is declined it cannot be voided or cancelled and the Nota Fiscal number cannot be used again.

Outgoing Nota Fiscal - 009100000033

Object Type	Object Reference	Object Reference Status
Manual Supplier Inv Return	10	Cancelled
Business Transaction Id	Payment Terms	Currency Code
	0	BRL
Nota Fiscal Text		

Once the IFS Cloud receives the Declined response message from the 3rd part integrator, Outgoing Nota Fiscal is set to the status “Declined”.

LINES	ADDRESS	GENERAL	NF-E INFORMATION
Issue Date	NF-e Key	NF-e Protocol No	
7/17/2022	352207123456789012346500910000002910020850...	135180015173174LOL	
NF-e Processing Date	NF-e Status Code	Return Message	
1/10/2022	110	Denegado o uso da NF-e	

NF-e Status Code “110” and “303” are examples of response codes meaning the Nota Fiscal is declined.

Subsequently, the connected Credit Supplier Invoice get automatically “Cancelled”.

Outgoing NF Status	Credit Supplier Invoice Status
Declined	Cancelled

In this scenario, it's always the “Preliminary” Credit Supplier Invoice which is cancelled and no reversal voucher will be created.

7.6.8 CANCELLATION REQUEST SENT TO THE APPROVED OUTGOING NF IN CREDIT SUPPLIER INVOICE PROCESS

The general rule stated by Brazilian government says that companies are allowed to cancel Authorized Nota Fiscals up until 24 hours from the issue date and time. There are some scenarios that still allow cancellation even after 24 hours (can be connected to penalty fee or audit).

Outgoing NF Status	Credit Supplier Invoice Status
Cancellation Request Sent	Authorized

The **Send Cancel Request** command will generate an outgoing xml file representing the request to cancel the referenced Nota Fiscal number.

```

1 <infEvento>
2   <xServ>CANCELAMENTO</xServ>
3   <chNFe>35220177214253000192650090000010311002063978</chNFe>
4   <tpAmb>2</tpAmb>
5   <xJust>Pedido de Cancelamento de Nota Fiscal Eletronica</xJust>
6 </infEvento>

```

In the above scenario, Outgoing Nota Fiscal status is set to the “Cancellation Request Sent” while connected Credit Supplier Invoice is still Authorized.

7.6.9 CANCEL THE APPROVED OUTGOING NF IN CREDIT SUPPLIER INVOICE PROCESS

Once the Outgoing Nota Fiscal cancellation request is accepted by the Brazilian Tax Authority , cancelled response message will be received to IFS Cloud via a 3rd party integrator and the Outgoing Nota Fiscal is set to the status of “Cancelled”. The connected Credit Supplier Invoice is also automatically cancelled.

Outgoing NF Status	Credit Supplier Invoice Status
Cancelled	Cancelled (Cancelled PostedAuth Invoice)

In the above scenario, it’s always the PostedAuth Credit Supplier Invoice which is cancelled, hence a reversal “K” Voucher is created reversing the original Credit Supplier Invoice postings.

7.6.10 RECEIVED ERROR RESPONSE FROM THE BRAZILIAN TAX AUTHORITY

If the Brazilian Tax Authority finds errors in the request file, they will send an Error response via the 3rd party integrators. There could be 2 types of Errors as described below.

Receive an Error Response which could be fixed

Out Going NF Status	Credit Supplier Invoice Status
Error	Preliminary -Rectify the error and re-send the NFE (Use Same NFe No)

Receive an Error Response which couldn't be fixed

Outgoing NF Status	Credit Supplier Invoice Status
Error	Cancelled (Preliminary Invoice) a) Send Void Request from a Nota Fiscal. b) Approved Void Request- Cancelled the Preliminary state Invoice

When a Nota Fiscal is rejected due to some error in the schema of xml file or some inconsistent information, the Nota Fiscal number can be used again. The companies can fix the issue found in such a Nota Fiscal and process to request authorization again. If the problem cannot be fixed, the Nota Fiscal must be **Voided**. A void request must be sent and approved by the Tax Authority. After the Tax Authority approved the void request, the Nota Fiscal number cannot be used again.

When the return message from the Tax Authority is "Error", the command **Send Void Request** will be available in the **Outgoing Nota Fiscal** page.

The **Send Void Request** command will generate an outgoing xml file representing the request to void the referenced Nota Fiscal number and the Outgoing Nota Fiscal is set to the status “*Sent Void Request*”.

After receiving a void request approval xml file from the Tax Authority , the NF-e status code will be updated to “102 - Inutilização de número homologado” and the Outgoing NF status is set to “*Voided*”.

8 Outgoing Nota Fiscal - Triangular Sales and Sales for Future Delivery

8.1 Overview Legal Requirement

There are two business scenarios which requires that two Nota Fiscals should be created for the same transaction – first Nota Fiscal representing the invoice and the second Nota Fiscal representing the delivery.

These scenarios are **Sales for Future Delivery** where invoice is created in advance and the physical delivery is made at a later point, and **Triangular Sales** where invoice Nota Fiscal is made to the customer and the delivery Nota Fiscal is created for the buyer's customer.

8.2 Process Overview

8.2.1 SALES FOR FUTURE DELIVERY

8.2.2 TRIANGULAR SALES

For both scenarios the Customer Invoice is the base for invoice Nota Fiscal, and Outgoing Tax Document is the base for delivery Nota Fiscal. Delivery must always be done through shipment.

8.3 Sales for Future Delivery

Prerequisites:

- Always use shipment delivery
- Same delivery address on all CO lines
- Staged Billing functionality should only be done for 100%, invoicing all lines at the same time, no individual lines, or non-stage billing lines
- Shipment and Customer Order need to be 1 to 1 relationship

8.3.1 CREATE CUSTOMER ORDER AND STAGED BILLING INVOICE

Use IFS Cloud standard functionality to create a Customer Order. Business Transaction ID used on Customer Order header must have a Connected Business Transaction ID. Add staged billing for all order lines – should be 100% of the order line value. Approve staged billing lines and create an invoice representing 100% of all order lines (100% of the order value). Create invoice Outgoing Nota Fiscal and send for approval.

8.3.2 CREATE SHIPMENT

Use IFS Cloud standard functionality to create a shipment for the order delivery. Process the shipment until Completed state.

8.3.3 CREATE OUTGOING TAX DOCUMENT

Since Business Transaction ID has a Connected Business Transaction ID, and invoiced staged billing lines exist, an Outgoing Tax Document is required to be created prior to delivery. From Shipment header the Create Outgoing Tax Document command will be available.

Create the Outgoing Tax Document and deliver the Shipment. If Company is setup for external tax calculations using Brazil Avalara integration, taxes will be calculated on the Outgoing Tax Document at the time of delivery.

8.3.4 CREATE (DELIVERY) OUTGOING NOTA FISCAL

When Shipment is delivered and taxes are calculated on Outgoing Tax Document, the Outgoing Nota Fiscal representing the delivery can be created and processed for approval.

8.4 Triangular Sales

Prerequisites:

- Always use shipment delivery
- Document Address and Delivery Address must differ on all Customer Order lines. Addresses should represent customer and buyers customer.
- Only one Customer Order should be linked to the shipment to avoid complications with multiple invoices or addresses.

8.4.1 CREATE CUSTOMER ORDER

Use IFS Cloud standard functionality to create a Customer Order. Business Transaction ID used on Customer Order header must have a Connected Business Transaction ID. Use different Delivery and Document address on the Customer Order header.

8.4.2 CREATE SHIPMENT

Use IFS Cloud standard functionality to create a shipment for the order delivery. Process the shipment until Completed state.

8.4.3 CREATE OUTGOING TAX DOCUMENT

Since Business Transaction ID has a Connected Business Transaction ID, and document and deliver addresses are different, an Outgoing Tax Document is required to be created prior to delivery. From Shipment header the Create Outgoing Tax Document command will be available.

Create the Outgoing Tax Document and deliver the Shipment. If Company is setup for external tax calculations using Brazil Avalara integration, taxes will be calculated on the Outgoing Tax Document at the time of delivery.

8.4.4 CREATE (INVOICE) OUTGOING NOTA FISCAL

When Shipment is delivered the Customer Invoice can be created and invoice Outgoing Nota Fiscal can be created and processed.

8.4.5 CREATE (DELIVERY) OUTGOING NOTA FISCAL

When invoice Outgoing Nota Fiscal is approved, the Outgoing Nota Fiscal representing the delivery can be created from Outgoing Tax Document and be processed for approval.

8.5 Sales Part Number in Outgoing Tax Document Lines

To enhance clarity and accuracy in tax document, the Sales Part No and Sales Part Description data have been introduced to the Source Part No and Source Part Description columns in the Outgoing Tax Document lines.

8.6 Nota Fiscal Reference in Inventory Transaction History

To improve traceability and compliance, the Delivery Nota Fiscal details are linked to the **Inventory Transaction History** page. This allows users to track inventory transactions with accurate Nota Fiscal references.

1. **Nota Fiscal Item:** Fetches and displays the corresponding line number from the Delivery Nota Fiscal.
2. **Nota Fiscal Number:** Displays the Delivery Nota Fiscal number associated with the transaction.

8.7 Outgoing Tax Document Postings

Following Posting Types are used for tax postings created from Outgoing Tax Document for the Sales for Future Delivery and Triangular Sales scenarios:

- **M297** – Tax Disbursed, Intracompany Part Movements

- **M307** – Company Bearing Tax Disbursed, Tax Amount

Control type **EC128 – Business Transaction Code** is enabled for both posting types. Make sure to check whether the mandatory LCC parameter “Brazilian specific fiscal attributes” is enabled and basic data for Business Transaction ID is available to use this Control Type.

☐	M297 - Tax Disbursed, Intracompany Part Movements	Account	EC128 - Business Transaction Code
☐	M307 - Company Bearing Tax Disbursed, Tax Amount	Account	EC128 - Business Transaction Code

8.8 Delimitations

- Non-Inventory Sales Part is not handled
- Package Part is not handled
- Shipment Invoice/Collective invoice should not be used in future delivery scenario
- Collective Invoice should not be used in a Triangular Sales scenario
- References between Nota Fiscals within the same transaction are not handled
- Order addresses are derived from the header. Any line level address changes do not override the scenario logic; the system consistently references header level data
- In the Staged Billing scenario, if two different addresses are detected at the header level, the system interprets it as a Triangular Sales scenario and enables the respective Outgoing Tax Document creation command, even if the stage billing invoices are not created.

Additional delimitations may apply; all relevant flows should be tested to ensure completeness.

9 Integration to Brazilian External Tax System – NF- e Communication

9.1 Overview Business Requirement

In Brazil, the Nota Fiscal is a mandatory official document that must be issued to prove the existence of a commercial act, e.g., sale of goods. It's a tax document that registers transfer of ownership or possession of a good or commercial activity provided by a company to an individual or another company that is doing business in Brazil.

The NF-e is the Nota Fiscal issued online, which allows real time reporting of transactions to the SEFAZ, which is the state government responsible for taxation and revenue. The NF-e must be sent to SEFAZ for authorization, and the goods may only be sent to the recipient after the Fiscal Note has been accepted by SEFAZ.

To facilitate the process of NFe communication with SEFAZ, IFS developed an integration with Avalara.

9.2 Process Overview

9.3 Prerequisites

The company must be set-up to use Brazilian localization, see the Company Set-Up chapter, and the “Integration to Brazilian External Tax System” parameter must be enabled.

Select” Avalara” as the NFe Communication Method in page **Application Base Setup/Enterprise/Company/Company/Invoice** and tab **NF-E COMPLIENCE**.

Note that also parameters “Acquisition Origin”, “Business Operation”, “Brazilian Specific Fiscal Attributes”, “Address Specific Tax ID Numbers”, “Goods/Services Statistical Codes”, “Extended Tax Codes Tax Calculation Structures set-up”, “Outgoing Nota Fiscals” and “Use Automatic Generation of Official Invoice Numbers” must be enabled to fulfill data requirements for the Integration. Also, company and customer basic data for tax calculation and Nota Fiscal must be defined. Please see the specific chapters on how to set up the data needed.

9.4 Define Basic Data

In order to utilize the IFS integration for Avalara, some basic data set up is required.

9.4.1 EXTERNAL TAX SYSTEM PARAMETERS

The Avalara Brazil connection information is defined in page **Application Base Setup/Enterprise/Tax/External Tax Systems/External Tax Systems Parameters**.

9.5 Create Customer Order & Process Customer Order Invoice and Outgoing Nota Fiscal

This works in similar way as Outgoing Nota Fiscal XML solution works. See,

[12.5 Create Customer Order](#)

[12.6 Deliver Customer Order](#)

[12.7 Create Customer Invoice](#)

[12.8 Create Outgoing Nota Fiscal](#)

[12.1 Outgoing Nota Fiscal Life Cycle Management](#)

Here JSON request sends to Avalara & JSON response received instead of XML files describe in above chapters.

9.6 Generation of NF-e JSON

JSON request will be sent to Avalara when selecting the command **Send Nota Fiscal** in **Outgoing Nota Fiscal** Page or it will be sent automatically depending on the company level parameter, “Manually Process Outgoing Nota Fiscal”.

The screenshot shows the 'Invoice' page for 'SARKBRAZIL - SARK BRAZIL COMPANY'. The left sidebar contains a navigation menu with options like Address, Communication Method, Message Setup, Employees, Accounting Rules, Tax Control, Invoice (selected), Payment, Fixed Assets, Periodical Cost Allocation, and Supply Chain Information. The main content area has tabs for GENERAL, DEFAULT INVOICE TYPES, PO MATCHING, DOCUMENT MANAGEMENT, and NF-E COMPLIANCE. The NF-E COMPLIANCE tab is active, showing 'Nota Fiscal Management' with two toggle switches: 'Manually Process Incoming Nota Fiscal' and 'Manually Process Outgoing Nota Fiscal'. The 'Manually Process Outgoing Nota Fiscal' toggle is highlighted with a red box. Below the toggles, there is a section for 'Nfe Communication Method' set to 'Avalara'.

Refer the Appendix 3 to see mapping details of a JSON request

Header Details of JSON file

```

10 Integration to Brazilian External Tax System - Tax Determination for Services

10.1 Overview of Legal Requirement

In Brazil, the calculation of taxes for services is a fundamental aspect of financial management and regulatory compliance. When providing services, companies must calculate the multiple service-related taxes that are applicable. The tax landscape includes various levies based on the nature and value of the services rendered. Accurately applying these taxes is not only a legal requirement but also essential for financial transparency and an important aspect when operating in the country.

10.2 Other Business Objectives

1. Enabling the User to calculate the specific taxes relevant for providing services.
2. Enabling the user to identify and record the Withholding taxes for the services provided.
3. Creating the Outgoing Nota Fiscal for services and manually approving the Outgoing Nota Fiscal

10.3 Process Overview

10.3.1 INTEGRATION OVERVIEW EXAMPLE

10.3.2 PROCESS OVERVIEW WITH CUSTOMER ORDER SALES OF SERVICES

GENERAL INVOICE SUPPLY CHAIN **EXTERNAL TAX SYSTEM** NOTA FISCAL

External Tax Codes Mapping

External Tax Calculation Method* Avalara Tax - Brazil Use CBS/IBS Tax ☒

Generic Tax Codes

City County District State

The prerequisites for IFS Cloud to communicate with Avalara is that the tax liability on the customer address is set to TAX and the Non-Inventory sales part is taxable.

Note that the parameters “Brazilian Specific Fiscal Attributes”, “Address Specific Tax ID Numbers”, “Goods/Services Statistical Codes”, “Extended Tax Codes Tax Calculation Structures set-up”, “Outgoing Nota Fiscals” and “Use Automatic Generation of Official Invoice Numbers” must be enabled to fulfill data requirements for the Integration. The company and customer basic data for tax calculation and Nota Fiscal must be defined. Please see the specific chapters on how to set up the data needed.

With the new tax reform in Brazil, it is necessary to inform the external tax calculation system whether it should apply the new taxes, since the implementation will be gradual until 2033. This is controlled by the "Use CBS/IBS Tax" field. When this field is checked, the system will be enabled to apply the new taxes; when unchecked, the current tax calculation method will remain in effect.

10.5 Define Basic Data

To utilize the IFS integration for Avalara, some basic data set-up is required with regard to the Tax Codes, the Company, the Customer, Part, Sales Parts, and Report Codes for sales flow.

[Application Base Setup](#) > [Enterprise](#) > [Tax](#) > [External Tax Systems](#) > [External Tax System Parameters](#)

City County District State

Tax Integration Parameters for Sales

Refresh Tax Information at Release of Customer Order/Sales Quotation

Automatic Fetch of Tax Information at Part/Charge Line Entry

10.5.3 ENTER 0% TAX CODES FOR THE BRAZILIAN TAX TYPES

Enter the Tax Codes with types 'Tax' and/or 'Tax Withholding' per tax type category with 0% in page **Accounting Rules/Tax/Tax Codes**. The 0-percentage rate will be replaced by the correct percentage rate for the specific tax scenario in transaction level based on the tax response from 3rd party tax determination engine Avalara.

Tax Codes									
	Tax Code	Description	Tax Type	Tax (%)	Deductible (%)	Tax Type Category	Valid From	Valid To	Tax Method Tax Received
☐	PIS-RT	PIS Withholding	Tax Withhold	1,65	100	PIS/RF	10/11/2023	31/12/2049	Payment
☐	PIS-RET	PIS Withholding	Tax Withhold	0	100	PIS/RF	10/11/2023	31/12/2049	Payment
☐	PIS-R	PIS Withholding	Tax	0	100	PIS/RF	10/11/2023	31/12/2049	Payment
☐	PIS-N	PIS Withholding	Tax	0	100	PIS	10/11/2023	31/12/2049	Payment
☐	ISS-N	Generic Tax Code for ISS	Tax	0	100	ISS	10/11/2023	31/12/2049	Payment
☐	ISS	Generic Tax Code for ISS Withholding	Tax Withhold	0	100	ISS/RF	01/01/2024	31/12/2049	Invoice Entry
☐	IRRF-RET	IRRF Withholding	Tax Withhold	0	100	IRRF	10/11/2023	31/12/2049	Payment
☐	IRRF-N	PIS Withholding	Tax	0	100	IRRF	10/11/2023	31/12/2049	Payment
☐	IRPJ-RET	IRPJ Withholding	Tax Withhold	0	100	IRPJ	10/11/2023	31/12/2049	Payment
☐	IRPJ-N	PIS Withholding	Tax	0	100	IRPJ	10/11/2023	31/12/2049	Payment

Next select the command **External Tax Code Mapping** in the page **Application Base Setup/Enterprise/Company/Company/Tax Control** and tab **External Tax System**. Connect the pre-defined 0% tax codes, type 'Tax' and/or 'Tax Withholding' for each Tax Type Category:

Tax Control

10.5.4 GOODS/SERVICES STATISTICAL CODES

The Goods/Services Statistical Codes are used in context of services to handle the Service Codes listed in the federal list provided by Brazilian government, which concerns the legislation about tax on services of any nature (LC116).

The NBS Code, are used in context of services handle the Service Codes listed in the federal list provided by Brazilian government, which concerns the legislation about tax on services for new Brazilian Tax reform.

To differentiate it from the service code still used under the current tax system in Brazil, a toggle must be selected to indicate that the code refers to the NBS.

Enter the service codes in the **Application Base Set Up/General Data/Goods/Services Statistical Codes** page as follows:

Application Base Setup > General Data > Goods/Services Statistical Codes

Goods/Services Statistical Codes

10.5.8 DEFINE CITY CODES FOR REPORT CODE

Service codes must be defined according to the lists published by the respective city halls in each city where the company's branches and customers are located. These lists differ by city, and the service may have a different code in each jurisdiction.

For example:

Company's Address

State: São Paulo

City: São Paulo

Customer's Address

State: São Paulo

City: Osasco

The service "Boliche" has one service code in the service list published by the City of São Paulo and a different service code in the list published by the City of Osasco.

10.6 Create Sales Quotation for Non-Inventory Sales Part

For Non-Inventory Sales in Sales Quotation, a new tax Calculated/Fetched is initiated resulting in new tax requests being sent to Avalara under the following circumstances:

- New Sales Quotation line is added.

- Sales Qty is updated
- Sales Price is updated
- Quotation Address is updated
- Quotation Line Address is updated
- Goods/Services Statistical Code is updated
- NBS Code is updated
- Acquisition Reason Id is updated
- Order is Released

User can decide whether the taxes are Calculated/Fetched upon, “Release of Sales Quotation” or “SQ Line Entry Level”. This is controlled by the IFS Cloud core functionality, **Company/Tax Control/External Tax System** tab, “*Tax Integration Parameters for Sales*”.

10.8 Create Project Invoices for Invoicing Plans or Project Transactions

Project invoicing for services relies on report codes that represent the services delivered within the project. Invoicing plans or project transactions created using report codes reflect the service quantities and values to be invoiced for each report code.

When a project invoice is created from invoicing plans or project transactions, a new tax calculation request is sent to Avalara so that service-related taxes can be calculated based on the current

values and attributes connected to the invoice. A new tax request is triggered under any of the following conditions:

- Project invoice is created.
- Project transactions are added or removed using **Add to Invoice** or **Remove from Invoice**.
- Invoice Qty is updated.
- Invoice price is updated.
- Invoice address is updated.
- Delivery address is updated.
- Goods/services statistical code is updated.
- NBS code is updated.
- Branch is updated.

After Avalara returns the calculated taxes, the taxable tax details can be verified through the **Tax Lines** command on the project invoice line.

10.9 Handling Withholding Taxes for Non-Inventory Sales Parts/ Services

User needs to define the WHT taxes in the **tax codes** page as explained above. The WHT taxes are calculated when the customer order is created using external tax engine AVALARA.

The Withholding taxes calculated will be reflected in the Tax Lines, **Withholding** command available in the Customer Invoice lines.

LINES | GENERAL | NF-E INFORMATION | HISTORY

10.10 Handling Withholding Taxes for Services Invoiced Through Project Invoices

Withholding taxes must be defined on the **Tax Codes** page before they can be applied to project invoices. When a project invoice is created, a tax calculation request is sent to Avalara. After Avalara returns any applicable withholding taxes, the calculated amounts appear in the **Tax Lines, Withholding** dialog, which is accessed through the **Tax Lines, Withholding** command on the project invoice line.

10.11 Tax Calculation for Services Using Single Occurrence Address

Single Occurrence address is used for defining a temporary delivery address for a particular order. The Order header must have been saved. The country codes and the address formats needed to be defined using *Application Base Setup/Enterprise/Basic Data/Address Presentation*. A single-occurrence delivery address is defined for the order. The ordered parts will be delivered to this address. This is a temporary address and it will be used only for a specific order.

Define a single occurrence address using *Operations Tab/Single Occurrence Address* available in the Customer Order header level.

Customer Order V11617

10.12 Create Order Quotation for Non-Inventory Purchase Part

For Non-Inventory Purchase Part in Order Quotation, a new tax Calculated/Fetched is initiated resulting in new tax requests being sent to Avalara under the following circumstances:

- New Order Quotation line is added.
- Quotation Qty is updated
- Quotation Price is updated
- Quotation Address is updated
- Quotation Line Address is updated
- Goods/Services Statistical Code is updated
- NBS Code is updated
- Acquisition Reason Id is updated

User can manually select the “Fetch External Tax” command to send a request to Avalara. The command is visible when at least one quotation line has status **Answered**.

10.13 Create Purchase Order for Non-Inventory Part

For Non-Inventory Purchase Order, a new tax Calculated/Fetched is initiated resulting in new tax requests being sent to Avalara under the following circumstances:

- New purchase order line is added.
- Purchase Qty is updated
- Purchase Price is updated
- Order Address is updated
- Order Line Address is updated
- Goods/Services Statistical Code is updated

- NBS Code is updated
- Acquisition Reason Id is updated
- Order is Released

User can decide whether the taxes are Calculated/Fetched upon, “Release of Purchase Order” or “PO Line Entry Level”. This is controlled by the IFS Cloud core functionality, **Company/Tax Control/External Tax System** tab, “*Tax Integration Parameters for Procurement*”.

10.14 Delimitations

No known delimitations.

11 Gross Revenue Accounting

11.1 Overview Legal Requirement

In Brazil it's a legal requirement to post revenues including taxes. The requirement is to post gross amounts on the CO Invoice to a revenue account.

In Brazil, usually prices contain ICMS/PIS/COFINS/ISS taxes. This means that tax percentage is expressed for the gross price where sum of tax amounts of the aforesaid tax types also become a portion of the tax base amount. When it comes to the revenue accounting, it's the Gross Revenue which should be disclosed in the Profit & Loss Account.

11.2 Process Overview

- In **Tax Codes** page newly introduced a column, “Tax in Tax Base”, to facilitate Inclusion of taxes to the tax base amount. *(Explained in a separate chapter)*
- In **Tax Calculation Structures** page introduced two new columns, “Tax in Tax Base” and “Mark up (%)” functionality. *(Explained in a separate chapter)*
- CO Line and the CO Tax Lines indicate the tax amount calculated according to the new way of tax calculation.
- CO Invoice lines and CO Invoice Tax Lines indicate the tax amount calculated according to the new way of tax calculation.
- Project Invoice lines and Project Invoice Tax Lines indicate the tax amount calculated according to the new method of tax calculation.
- In CO Invoice postings, two new postings are included to gross-up the revenue.
- In Project Invoice postings, two new postings are included to gross-up the revenue.

11.3 Prerequisites

The company must be set-up to use Brazilian localization, see chapter Company Set up, and the parameter “*Gross Revenue Accounting*” must be enabled.

11.4 Tax in Tax Base

Tax in Tax Base concept explained how the taxes are included in the Tax Base Amount. To facilitate this requirement, new LCC Parameter, “Extended Tax Codes and Tax Calculation Structures set-up” introduced, and the concept of Tax in Tax Base calculations and the IFS Solution explained in detail in the previous chapter.

11.5 Revenue Gross-up in Customer Order Line level

11.5.1 Sales Price Without Tax In All Price Sources

In Brazilian context, taxes are included in the Tax Base Amount and the sales price should be able to define exclusive of taxes in all sales pricing sources. To comply with this requirement, Brazilian

companies need to define price without tax in all the price sources like Sales Part, Price Lists, Customer Agreements.

Sales Part DU:BR:INV:1 - DU:BR:INV:1 - DUBR1 1 of 1

Price			Price Including Tax		Tax Code
100.00 BRL			100.00 BRL		0 - TAX 0%
Expected Average Price			Rental Price		Delivery Type
			0.00 BRL		

11.5.2 CUSTOMER ORDER LINE LEVEL

When creating a Customer Order, in line level, "Price inclusive of Tax" is calculated based on the Tax Calculation Structure set up, "Tax in Tax Base". If the "Tax in Tax Base" is set to "Yes", Tax Base Amount is calculated with inclusion of tax and the corresponding tax amount will be calculated accordingly.

Customer order line is created with the net amount 100.00

11.6.2 CUSTOMER INVOICE POSTINGS TO REVENUE GROSS-UP

In core version of the application, Customer invoice postings contain only one posting control to post the tax, that is IP4- Tax Disbursed, invoice. On the contrary to the Core application, in Brazil, First, it's required to gross-up the Revenue by tax amount and disclosed in the P&L Account. Then in the next step, in P&L, Operational Revenue should be derived by deducting the Tax Amount.

To facilitate these requirements, two new postings introduced for Brazilian country specifics, as follows,

- 1) M295: Tax in Sales Revenue -This posting is used to gross up the Revenue.
- 2) M296: Tax Deduct from Gross Revenue – This posting is used to derive “Operational Revenue” by deducting the Tax portion included in the Gross Revenue.

11.6.3 NEW CONTROL TYPES SPECIFIC TO BRAZIL

Business Transaction Code is introduced as a new Control Type for IP4, M28, M295, M296, M30 and M31 Posting Types. Make sure to check whether the mandatory LCC parameter “Brazilian specific fiscal attributes” is enabled and basic data for Business Transaction ID is available to use this Control Type.

11.7 Revenue Gross-up in Project Invoice Line Level

11.7.1 SALES PRICE WITHOUT TAX IN ALL PRICING SOURCES

Brazilian companies should set sales prices without taxes in Projects and other sales pricing sources because taxes are included in the Tax Base Amount.

11.9 Delimitations

No known delimitations.

12 Nota Fiscal Issue Date as Applied Date on Inventory Transactions for Goods Issue

12.1 Overview Legal Requirement

According to the Brazilian tax legislation, taxes must be paid on the Nota Fiscal issue date. The accounting practice says that revenues must be recognized at goods issue and that revenues are posted including taxes. These requirements can be fulfilled by ensuring that the Nota Fiscal issue date is set to the applied date on related inventory transactions for goods issue.

12.2 Process Overview

This process ensures the applied date on inventory transactions for goods issue is updated with the Nota Fiscal issue date, in a scenario where the Nota Fiscal is issued on a date after the Customer Order has been set to “Delivered” in IFS.

12.3 Prerequisites

The company must be set-up to use Brazilian localization, see the Company Set-Up chapter and the “Nota Fiscal issue date applied on inventory transactions for goods issue” parameter must be enabled.

12.4 Deliver customer order

Deliver the Customer Order following IFS standard process. During this step OESHIP inventory transactions will be created with the date on which the record was created as Applied Date (standard functionality).

12.5 Create Customer Invoice and send NF-e XML to Tax Authority

Create the preliminary Customer Invoice and send the NF-e XML to Tax Authority (SEFAZ) for authorization. Once the NF-e XML file is approved by the Tax Authority, the Customer Invoice can be printed and posted, the Nota Fiscal issue date is defined and is set on the F Voucher created.

See further information in the *Outgoing Nota Fiscals* chapter.

12.6 Set Nota Fiscal Issue Date as applied date on inventory transactions

In this automated step the IFS standard function “Modify Date Applied” is used to compare the Applied Date on the OESHIP inventory transactions (generated when the customer order was delivered in IFS) with the Nota Fiscal issue date (after acceptance from the Tax Authority). If the Nota Fiscal issue date is later than the date on the transactions, the Applied Date on these will be updated automatically to be the same as the Nota Fiscal issue date (if the conditions described in the Delimitations chapter are fulfilled).

12.7 Transfer Inventory Transactions

Use the IFS standard function **Transfer Inventory Transactions** to transfer the transactions to IFS Financials. In this step vouchers will be created in General Ledger and the date on the created MPL voucher will be equal to the date on the Customer Invoice F voucher.

12.8 Delimitations

The solution is based on the IFS standard function “Modify Date Applied”. This function has several conditions that must be fulfilled before the date on an inventory transaction can be changed:

- The inventory transaction may not have **Has Transferred Postings** selected.
- The transaction may not have been transferred to IFS Financials.
- The transaction may not be included in the inventory statistics.
- The new date of the transaction must be later than or the same as the start date of the latest period in the inventory value statistics and cannot be later than the current date.
- The new date may not belong to an accounting period that has already been closed.
- The date for a reverse transaction must not be earlier than the original transaction.

13 Cancel PostedAuth Customer Order Invoices

13.1 Overview Legal Requirement

The general rule stated by Brazilian government says that companies are allowed to cancel authorized Nota Fiscals up until 24 hours from the issue date and time. There are some scenarios that still allow cancellation even after 24 hours (can be connected to penalty fee or audit).

13.2 Process Overview

This functionality enables to cancel Posted/Printed or PostedAuth Customer Invoice. Once the Invoice is cancelled:

- Invoice is set to the status, “Cancelled”
- K voucher created reverts the original F voucher postings
- Customer Order moves back to the status “Picked”.

13.3 Prerequisites

The parameter “Allow Cancel Customer Invoice” parameter must be enabled in **Application Base Setup/Enterprise/Company/Company**, Invoice tab for selected Company:

14 Taxes in Intracompany Goods Movement

14.1 Overview Legal Requirement

According to the Brazilian tax regulations, when goods are moved from one site of the company to another site of the same company (e.g., movements between municipals within the country):

- Taxes should be calculated and paid by the sending site.
- The receiving site can take the input tax credit if goods are not used for own purpose.
- If goods are used for own purpose in the receiving site, inventory cost at arrival should be increased by the tax amount.

It's a legal requirement to issue a Fiscal Note for business transactions related to transfer of goods.

The **Tax Document** functionality has been introduced to support tax calculations and postings for intracompany goods movement scenarios, such as;

- Site to Site
- Site to Remote Warehouse
- Remote Warehouse to Site
- Remote Warehouse to Remote Warehouse

The Tax Document is developed as generic core functionality and not controlled by LCC parameter, and it can be created Manually or Automatically by disabling and enabling the **Automatic Creation of Tax Document** toggle in the Shipment Type. For Brazil the Tax Document is integrated with Outgoing/Incoming Nota Fiscal functionality.

14.2 Process Overview

14.3 Prerequisites

Go to **Company/Tax Control/Supply Chain** page and enable “Create Tax Document” parameter.

Go to **Shipment Type/Creation** page and enable “Automatic Creation of Tax Document” parameter to create Outgoing Tax Document automatically.

14.4 Define Basic Data

The attributes Acquisition Origin, Acquisition Reason, Tax Manufacturing Equivalent and Goods/Services Statistical Code has been added to Inventory Part. Values entered here are fetched as default values when an Outgoing Tax Document line is created for the particular Inventory Part.

14.5 Create and process Shipment Order or Internal Customer Order (Demand Code IPT or DO)

Create a Shipment Order or Internal Customer Order (demand code IPT or DO) for any of below goods movement scenarios within the same company, using IFS Cloud standard functionality.

- Site to Site
- Site to Remote Warehouse
- Remote Warehouse to Site
- Remote Warehouse to Remote Warehouse

Use a Shipment Type that creates a shipment when releasing the Shipment Order or Internal Customer Order (demand code IPT or DO). Release the Shipment Order or Internal Customer Order and process the connected Shipment until Completed state using IFS Cloud standard functionality. Create the Outgoing Tax Document via the command in Shipment header - **Create Outgoing Tax Document**. An Outgoing Tax Document will be created in Preliminary state.

Otherwise enable the **Automatic Creation of Tax Document** toggle in the Shipment Type page and proceed with the connected shipment until the Complete state, then **Outgoing Tax Document** will be created automatically in Preliminary state.

14.6 Process Tax Document with Nota Fiscal

14.6.1 OUTGOING NOTA FISCAL

Once the Outgoing Tax Document is created the Brazil specific attributes (Business Transaction ID on the header and Acquisition Origin, Acquisition Reason, Goods/Services Statistical Code and Business Operation on Tax Document line) and tax information, such as Tax Calculation Structure or Tax Codes, must be entered. When the shipment is delivered the average cost from the inventory transaction SHIPODSIT- / SHIPODWHS- / SHIPTRAN- are transferred to the Outgoing Tax Document and the taxes are then calculated. At this point the Outgoing Nota Fiscal can be created. The creation of the Outgoing Nota Fiscal is either a manual or automatic process.

Manual creation of Outgoing Nota Fiscal

*Company flag "Manually process Outgoing Nota Fiscal" has to be enabled in the **Company/Invoice/NF-E compliance** tab.*

The Outgoing Nota Fiscal is created via a command from the Outgoing Tax Document header. Once using the creation command the application is validating if all mandatory data is there to create an Outgoing Nota Fiscal. If all mandatory data is not registered the Outgoing Nota Fiscal can't be created. Once the Outgoing Nota Fiscal is created, the document has to be sent to the Tax authorities. This can be sent by the command in header **Send Nota Fiscal**.

Automatically creation of Outgoing Nota Fiscal

*Company flag "Manually process Outgoing Nota Fiscal" must be disabled in **Company/Invoice/NF-E compliance** tab.*

When the connected shipment is delivered and the cost and taxes are calculated on the Outgoing Tax Document, the Outgoing Nota Fiscal is created automatically. Once the Outgoing Nota Fiscal is created, it is automatically sent to the Tax authorities for approval.

14.6.2 RESPONSE FROM TAX AUTHORITIES

Below table shows how Outgoing Tax Document and Shipment statuses gets affected by different responses from Tax Authorities for the Nota Fiscal.

14.6.3 INCOMING NOTA FISCAL

After receiving approval from the Tax Authorities for the Outgoing Nota Fiscal, the Outgoing Tax Document is posted, and the creation of Incoming Nota Fiscal and Incoming Tax Document is either a manual or Automatic process.

Manual creation of Incoming Nota Fiscal

*Company flag "Manually process Incoming Nota Fiscal" must be enabled in **Company/Invoice/NF-E compliance** tab*

When the Outgoing Nota Fiscal is approved by tax authorities, the Incoming Nota Fiscal can be created via the header command **Create Incoming Nota Fiscal**. As soon as the incoming Nota

Completed 2. a) send a void request = Completed or closed (step: Delivered) b) Approved void request = Completed (next step: Deliver)
Preliminary Outgoing Tax Document cancelled (connected to a NF)	This functionality is restricted validating whether a Nfe is connected		

Fiscal is manually approved, the Incoming Tax Document can be created via the command in Incoming Nota Fiscal Header **Create Incoming Tax Document**. The Incoming Tax Document will be a mirror image of the Outgoing Tax Document. Now the postings can be done manually from the command in header **Post Tax Document**.

Automatic creation of Incoming Nota Fiscal

*Company flag "Manually process Incoming Nota Fiscal" has to be disabled in **Company/Invoice/NF-E compliance** tab.*

When the Outgoing Tax Document is approved by tax authorities, the Incoming Nota Fiscal is created automatically. Once the Incoming Nota Fiscal is manually approved the Incoming Tax Document is created and posted automatically. The Incoming Tax Document will be a mirror image of the Outgoing Tax Document.

14.7 Tax Document With 3rd Party External Tax System

Brazil country specifics basic data must be entered to be able to use the Brazil Avalara in the Intracompany goods movement scenario.

To use the Brazil external tax system (Avalara) in the intracompany goods movement scenario, first an Outgoing Tax Document must be created. When an Outgoing Tax Document is available the Brazil specific attributes have to be entered, such as Business Transaction ID on the header and Acquisition Origin, Acquisition Reason, Goods/Services Statistical Code and Business Operation on Tax Document line. Tax calculation structure or Tax codes should not have any value. Once delivering the connected shipment the call to receive taxes from Avalara is done. The Brazil Avalara is then sending calculated taxes back to IFS Cloud and the taxes are calculated on the Outgoing Tax Document. From here the Nota Fiscal process continues as described above.

14.8 Nota Fiscal Reference in Inventory Transaction History

To improve traceability and compliance, the Nota Fiscal details are linked to the **Inventory Transaction History** page. This allows users to track inventory transactions with accurate Nota Fiscal references.

1. **Nota Fiscal Item:** Fetches and displays the corresponding line number from the Nota Fiscal.
2. **Nota Fiscal Number:** Displays the Nota Fiscal number associated with the transaction.

Warehouse Management > Transaction History > Inventory Transactions History

Inventory Transactions History

Search

Order Ref 1	Created	Alt Source Ref1	Alt Source Ref2	Alt Source Ref3	Alt Source Ref4	Alt Source Ref5	Alt Source Ref Type	Nota Fiscal Number	Nota Fiscal Item	Transaction ID	Transaction Code
489	2025-05-02	489	1	*	*	2030	Shipment Order	000100494	1	295353	SHIP005IT - Deliver Shipment Order to a site in the same company
489	2025-05-02							000100494	1	295355	SHIP005IT - Receive Shipment Order from a site in the same company

To localize all the reference to the origin in the Nota Fiscal lines the source ref 1 from Shipment is fetched to the Outgoing Nota Fiscal header. For Shipment with source type Shipment Order the Source Ref 1 from Shipment header is fetched. For Shipment with source type Customer Order the one distinct source ref 1 from the shipment line is fetched. The references in the Nota Fiscal lines are then the trackable values for Nota Fiscal Number and Nota Fiscal Item in the Inventory Transaction history. If the Shipment includes multiply Shipment Orders/Customer Orders the source ref 1 from Shipment cannot be fetched to the Outgoing Nota Fiscal header and will be a limitation for the references to be retrieved in the Nota Fiscals.

Shipment with source type Shipment Order the Source Ref 1 in Shipment header will be considered as a consolidation parameter for Shipments.

14.10 Handling of Non-deductible Taxes

When moving goods between sites of the same company, if the goods received in the demand site are used for own purpose (meaning demand site cannot take the input tax credit), then inventory cost applicable for the demand site should be increased by the nondeductible tax amount. In Brazil the most common scenario is either the taxes will be 100% deductible or 0% deductible.

Handling non-deductible taxes for standard cost parts

When handling the standard cost parts in purchasing flow, the non-deductible tax amount is treated as a price difference in invoice matching. New posting types are introduced to handle this difference in supplier invoice matching. Therefore, when handling non-deductible taxes for standard cost parts in intra company goods movements, we need to follow a similar approach. The non-deductible tax amount should be posted separately when generating tax postings for incoming tax document, using a new posting type.

A new posting type needs to be introduced to handle it along with tax document postings. Following new posting type should be created. This will not be connected to a default account and user needs to manually define the required account in **posting control** page.

Posting Type	Description	Component
M303	Non-Deductible Tax, Intracompany Part Movements	INVENT

Since there are no nondeductible taxes involved, nothing to be posted under non-deductible posting type (M303).

0% Deductible Scenario

- Applicable tax code in both sites 10% and 0% deductible
- Calculated total tax %: $100 \times 10 \times 10\% = 100$
- Deductible%: $100 \times 0\% = 0$
- Nondeductible%: $100 \times 100\% = 100$

Tax Document Postings

2610		2699	
M297	100	M298	100
		M300	100
Acc XXXX			
M303	100		

Since the taxes are 100% nondeductible, the full nondeductible tax amount is posted against M303 under incoming tax document in demand site.

Handling of Multiple Taxes

The above examples are mainly for the basic scenario where you have a single tax code. But the most practical scenario would be to have multiple tax codes (tax structures) with different deductible tax percentages in each of them. Below example explains how the postings should be created for multiple tax scenarios.

- Assume parts are moved between two sites of the same company.
- Standard cost of the part in both sites is 100.
- Quantity moved between sites 10.

Tax Structure used in the goods movement has the following tax codes:

- Tax code1 - 10% and 40% deductible
- Tax code2 – 20% and 100% deductible

- Tax code3 – 15% and 0% deductible

Taxes will be calculated as follows for the above tax codes:

Tax Code	Tax Base Amount	Total Tax Amount	Deductible Amount	Nondeductible Amount
Tax code1 - 10% & 40% deductible	$100 \times 10 = 1000$	$1000 \times 10\% = 100$	$100 \times 40\% = 40$	$100 \times 60\% = 60$
Tax code2 – 20% & 100% deductible	$100 \times 10 = 1000$	$1000 \times 20\% = 200$	$200 \times 100\% = 200$	$200 \times 0\% = 0$
Tax code3 – 15% & 0% deductible	$100 \times 10 = 1000$	$1000 \times 15\% = 150$	$150 \times 0\% = 0$	$150 \times 100\% = 150$

***Even though two sites have different standard costs, still the taxes and nondeductible taxes should be calculated based on the cost in supply site. This is because when goods are sent from the supply site, it's the supply site cost that should be considered as the applicable price/cost for the demand site.

Handling of non-deductible taxes for weighted average/FIFO/LIFO parts

For the weighted average/FIFO/LIFO parts, the non-deductible tax amount should be absorbed as a part of inventory cost for the demand site. Therefore, it was decided to add the nondeductible tax amount to the INTORDTR transaction created against the demand site at the point of delivering the goods from the supply site. When calculating the new WA cost applicable for the demand site it will automatically consider the non-deductible tax portion which is already absorbed into INTORDTR transaction.

A new posting type needs to be introduced to handle it along with tax document postings. Following new posting type should be created. This will not be connected to a default account and user needs to manually define the required account in **posting control** page.

Posting Type	Description	Component
M304	Non-Deductible Tax, Order Transit	INVENT

Following control types will be enabled.

- AC1 – Fixed Value
- AC7 – Tax Code

This is how the posting should be created in WA scenario.

Example:

- Assume parts are moved between two sites of the same company.
- WA cost of the part in Supply sites is 100
- Quantity moved between sites 10
- WA cost of the part in demand site is 200 and existing qty in demand site is 10
- Applicable tax code in both sites 10% and 40% deductible
 - Calculated total tax %: $100 \times 10 \times 10\% = 100$
 - Deductible%: $100 \times 40\% = 40$
 - Nondeductible%: $100 \times 60\% = 60$

Created inventory transactions:

Note: Bellow sample is done for Shipment Order scenario and same functionality will apply for Internal Customer Order (Demand Code IPT, Distribution Order) when moving the goods within same company.

Supply Site	SHIPODSIT- - Deliver Shipment Order to a site in the same company	Dr	Cr
		M4 1000	
		M1	1000

Demand Site	INTORDTR - Move to Internal Order Transit due to Issue		Dr	Cr
	*** This is how it will work after handling the ND tax	M3	1060	
		M4		1060
		M4	60	
		M156		60

New weighted average applicable to the demand site = $(1060 + (200 \times 10))/20 = 153$
Total amount to be posted = $153 \times 10 = 1530$

Demand Site	SHIPODSIT+ - Receive Shipment Order from a site in the same company		Dr	Cr
		M1	1530	
		M3		1530

M304		60			

Handling of Different Scenarios

The goods movement using shipment order can be done for lot of different scenarios like Site to Site, Site to RWH, RWH to RWH etc. But the non-deductible tax handling should be done only for the goods movements done between two sites. This means only for the scenarios where the following set of transactions are created.

- Supply Site: SHIPODSIT- - Deliver Shipment Order to a site in the same company
- Demand Site: INTORDTR - Move to Internal Order Transit due to Issue
- Demand Site: SHIPODSIT+ - Receive Shipment Order from a site in the same company

Few example scenarios where the above transactions are created:

- Movement between two sites of the same company
- Movement from a site to a RWH of another site of the same company
- Movement between two RWHs of two sites of the same company

Apart from above scenarios, all the other scenarios are similar to goods movement between two locations of the same site, and non-deductible taxes need not to be calculated for such scenarios.

14.11 Delimitations

- Manual entering of multiple tax codes in Outgoing Tax Document tax dialog are not supported in this release, only single tax code, tax calculation structure or Brazil Avalara tax integration.
- The following responses from tax authorities are not supported in this release:

15 Taxes 100% or 0% Deductible

15.1 Legal Requirement

In IFS Cloud, when the External Tax System (Avalara) is selected for a Brazilian Company, the External Tax Codes Mapping must be configured, in order to get taxes calculated and recorded in the Purchase Order line, or else External Supplier Invoice Tax Codes must be used when reading Incoming Nota Fiscal file from XML file.

In Brazil, the possibility of taxes being deductible or non-deductible in Incoming Transactions, is directly related to the reason why the Company purchases the goods. This is indicated from the “Acquisition Reason” defined for a relevant Part. In the context of Brazilian tax type categories, **ICMS, IPI, PIS, COFINS, CBS and IBS** are always 0 or 100% deductible, and partial deduction will not be applied.

The Deduction % can be defined based on the “Acquisition Reason”, allowing for a more flexible and accurate tax treatment according to the nature of each purchase.

15.2 Process Overview Procurement

15.3 Prerequisites

The company must be set-up to use Brazilian localization, see the Company Set-Up chapter, and the “Integration to Brazilian External Tax System” parameter must be enabled.

Select “Avalara Tax - Brazil” as the External Calculation Method in page **Application Base Setup/Enterprise/Company/Company/Tax Control** and tab **External Tax System**.

15.4 Enter Basic Data

Navigate to **Acquisition Reason** page from **Application Base Setup/General Data/Acquisition Reason** and define whether taxes are 100% or 0% deductible in the relevant columns, “Appropriate IPI Credit”, “Appropriate ICMS Credit”, “Appropriate PIS/COFINS Credit” and “Appropriate CBS/IBS Credit”.

Application Base Setup > General Data > Acquisition Reason

Company: STDBRAZIL

Acquisition Reason

Q Search

Acquisition Reason ID	Description	External Use Type	Appropriate IPI Credit	Appropriate ICMS Credit	Appropriate PIS/COFINS Credit	Appropriate CBS/IBS Credit	PIS/COFINS Revenue Type
FA	Fixed Assets	Fixed Assets	100% Deductible	100% Deductible	100% Deductible	100% Deductible	None
FA1	Fixed Assets (no credit)	Fixed Assets	0% Deductible	100% Deductible	0% Deductible	100% Deductible	None
PR	Inputs for Production	Production	100% Deductible	100% Deductible	100% Deductible	100% Deductible	Export revenue exclusively
RS	Goods for Resale	Resale	100% Deductible	100% Deductible	100% Deductible	100% Deductible	Linked to untaxed revenue in the domestic and export market
RS1	Goods for Resale (no credit)	Resale	0% Deductible	100% Deductible	0% Deductible	100% Deductible	None
RS2	Goods for Resale (no credit)	Resale	100% Deductible	0% Deductible	100% Deductible	100% Deductible	None
UC	Goods for Use and Consumption	Use or Consumption	100% Deductible	100% Deductible	100% Deductible	100% Deductible	Exclusively linked to Internal Market taxed revenue
UC1	Goods for Use and Consumption (no credit)	Use or Consumption	0% Deductible	0% Deductible	0% Deductible	0% Deductible	None

Define a 100% deductible tax code and a 0% deductible tax code related to Brazilian specific Tax type categories, IPI, ICMS, PIS/COFINS CBS/IBS in **Accounting Rules/ Tax/ Tax Codes** page. The tax rates need to be defined as 0% to map these tax codes in the “External Tax Codes Mapping” page.

Amounts

Gross Amount	Net Amount	Tax Amount	Non-deductible Tax Amount
105.20	82.00	0.00	23.20

The total Non-Deductible Tax Amount will be correctly shown (Including the Tax Exclusive Tax Amount portion) will be shown in the Incoming Nota Fiscal.

According to the presented scenario a total Non- Deductible Tax Amount of 23.20BRL is calculated.

- ICMS (Tax Inclusive) – 18.00BRL
- IPI (Tax Exclusive) – 5.20BRL

The Incoming NF Tax Lines Dialog:

OK Cancel

Then the Nota Fiscal can be approved. After the approval of the Nota Fiscal the Manual Supplier Invoice can be created and the standard IFS Functionality can be followed to Post the created Manual Supplier Invoice.

Notes:

If the Acquisition Reason is not set at the Purchase Part level or Business Transaction Code, it will remain null in the object line. It can be manually entered or modified directly in the object line. However, if the Acquisition Reason is not set for the object line, the taxes returned from the External Tax System will be assigned by default to non-deductible Tax Codes defined in the External Tax Codes Mapping.

The 100% deductible Tax Codes will be applied irrespective of the selected value in the columns in Acquisition Reason for the Outgoing Scenarios – Tax calculation in Goods for Customer Order, Tax Calculation for Services in Customer Order and Tax Calculation in Shipment Order.

15.7 Delimitations

The Non-Deductible tax handling in the XML (Receiving Incoming NF-e) flow is not supported in this release. The user has the option to fetch taxes using the “Fetch External Tax” command in the Incoming Fiscal Documents as an alternative for this.

Additional delimitations may apply; all relevant flows should be tested to ensure completeness.

16 Incoming Nota Fiscal

16.1 Overview Legal Requirement

In Brazil, it's a legal requirement to issue a Nota Fiscal for the business transactions related to sales, procurement, transfer of goods and other non-billable operations. The Nota Fiscal must be authorized by the Brazilian Tax Authority prior to shipment of goods and the printed version of Nota Fiscal (DANFE – Auxiliary Document for e-Nota Fiscal) is used to support the transportation of goods to the recipient's locations.

The Nota Fiscal must be received by the goods recipient before the goods is received into inventory.

All inventory transactions created from procurement must be identified by the Nota Fiscal number and Nota Fiscal item. These references are used when submitting tax reporting to the Tax Authority at the end of tax period. These references might also be required in Tax Audits. The references are also widely used in the daily operations in Brazilian companies.

16.2 Process Overview

Incoming Nota Fiscal could be received to IFS Cloud in two ways,

- a. Receive Incoming Nota Fiscal Automatically (NF-e) – Using External Supplier Invoice Flow

IFS Cloud core *External Supplier Invoice* flow is used to upload the received Incoming Nota Fiscal XML file (NF-e). Once uploaded by using the IFS Cloud core functionalities, Incoming Nota Fiscal could be created automatically.

- b. Enter Incoming Nota Fiscal Manually – Using **Incoming Nota Fiscal** Page

User can enter an Incoming Nota Fiscal based on the DANFe document received from the supplier together with the goods using **Incoming Nota Fiscal** page.

Once the Incoming Nota Fiscal is created, user can create Manual Supplier Invoice & Approve the Incoming Nota Fiscal.

Finally, user can create the inventory transactions related to the goods receipt and process Manual Supplier Invoice.

Note: User can also create the inventory transactions related to the goods receipt before creating the Manual Supplier Invoice or Incoming Nota Fiscal depending on the requirement.

16.2.1 RECEIVE INCOMING NOTA FISCAL AUTOMATICALLY (NF-E) – USING EXTERNAL SUPPLIER INVOICE FLOW

16.2.2 ENTER INCOMING NOTA FISCAL MANUALLY (DANFE) – USING INCOMING NOTA FISCAL PAGE

SCENARIO 1 - RECEIVING GOODS BEFORE INCOMING NOTA FISCAL (SELF-BILLING MUST BE DISABLED ON THE PO LINE)

SCENARIO 2 - RECEIVING GOODS AFTER INCOMING NOTA FISCAL (SELF-BILLING MAY BE ENABLED OR DISABLED ON THE PO LINE)

16.2.3 RECEIVING GOODS BEFORE INCOMING NOTA FISCAL (SELF-BILLING MUST BE DISABLED ON THE PO LINE)

- The printed Nota Fiscal accompanying the goods contains the Nota Fiscal Number (Document No), Series (Document Series), and Model (Fiscal Document Model).

- If Nota Fiscal was entered manually the user uses *Copy Unmatched PO Receipts* to pull the PO lines.
- For Nota Fiscal created from an External Supplier Invoice via XML, *Copy Unmatched PO Receipts* is not required.
- Enter mandatory information and approve the Incoming Nota Fiscal.
- Once the Incoming Nota Fiscal is approved, create a Manual Supplier Invoice via the **Create Manual Supplier Invoice** command on the Incoming Nota Fiscal header.
- After the invoice is created, both the Receipt Reference and Invoice No. are automatically populated with the concatenated key (*Document Series + Fiscal Document Model + Document No*).

Customs Information

Customs Declaration Number: [Empty] | Customs Declaration Date: [Empty]

- If Self-Billing is **enabled** in PO line:
 - After Receipt, the Supplier Invoice is automatically created.
 - Receipt Reference and Invoice No. are automatically recorded with the concatenated key.
 - Matching is completed automatically.
 - The user follows the core posting process.
- If Self-Billing is **disabled** in PO line:
 - The Supplier Invoice must be created manually using the Create Manual Supplier Invoice command, which becomes enabled in the Incoming Nota Fiscal page header.

- Receipt Reference and Invoice No. are automatically recorded with the concatenated key.
- The user completes Matching PO Receipts per Line.
- The user then follows the core posting process.

16.2.4.2 RECEIVE BUTTON AVAILABLE FROM THE MANUAL SUPPLIER INVOICE PAGE (ONLY IF SELF-BILLING IS DISABLED)

- Once the Incoming Nota Fiscal is approved, the user may also register the arrival from the Manual Supplier Invoice page.
- Create the Supplier Invoice manually using the *Create Manual Supplier Invoice* command in the header of the Incoming Nota Fiscal page.
- Both the Receipt Reference and the Invoice No. will be automatically populated with the concatenated key.
- Register the arrival from the Manual Supplier Invoice page.
- Perform Matching PO Receipts per Line.
- Follow the core invoice-posting process.

16.3 Prerequisites

- The company must be set-up to use Brazilian localization, see the Company Set-Up chapter and the “Incoming Nota Fiscal” parameter must be enabled.
- The “Address Specific Tax Registration Numbers” parameter must be enabled. Read the chapter “Address Specific Tax Registration Numbers” and setup Supplier and Company CNPJ accordingly.
- Create Purchase Charge types related for Freight, Insurance & Other Expenses using standard functionality and select them in Application Base Setup/Enterprise/Site/Site/Sales and Procurement tab.

- Media Code “E-INVOICE” and Default Load Type “SUPPEXT” must be set up on the Supplier in page **Application Base Setup/Enterprise/Supplier/Supplier/Invoice**, tab **Message Defaults**. This set-up is defined per Company ID.

Application Base Setup > Enterprise > Supplier > Supplier > Invoice

- Enable/Disable the "Manually Process Incoming Nota Fiscal" toggle in Application Base Setup/Enterprise/Company/Company/Invoice/NF-E COMPLIANCE tab.

The screenshot shows the IFS application interface for setting up an invoice. The breadcrumb trail is: Application Base Setup > Enterprise > Company > Company > Invoice. The main header shows 'Invoice SARKBRAZIL - SARK BRAZIL COMPANY 2 of 2'. The left sidebar lists various company-related options, with 'Company' selected. The main content area has tabs for 'GENERAL', 'DEFAULT INVOICE TYPES', 'PO MATCHING', 'DOCUMENT MANAGEMENT', and 'NF-E COMPLIANCE'. The 'NF-E COMPLIANCE' tab is active, showing the 'Nota Fiscal Management' section. This section has two toggle switches: 'Manually Process Incoming Nota Fiscal' (which is turned on) and 'Manually Process Outgoing Nota Fiscal' (which is turned off). The 'Manually Process Incoming Nota Fiscal' toggle is highlighted with a red box.

16.4 Receive Incoming Nota Fiscal Automatically (NF-e) – Using External Supplier Invoice Flow

IFS Cloud standard External Supplier Invoice flow is used in this scenario to upload the received Incoming Nota Fiscal XML file. Once uploading the NFe XML in External Supplier Invoice flow, Incoming Nota Fiscal could be created automatically.

Please see the details in the process described step by step in below chapters.

16.4.1 CREATE AND HANDLE PURCHASE ORDER

Follow the normal process to enter a purchase order but with the addition to include the Brazil attributes needed as described in this document. Inventory purchase parts are added in the **Procurement/Order/Purchase Order** page. Release and confirm purchase order with the Brazilian specific taxes either manually entered or fetched from Avalara in the PO lines.

16.4.2 RECEIVE INCOMING NF-E XML FILE AND CREATE THE INCOMING NOTA FISCAL

Use IFS Core External Supplier Invoice flow to load the incoming NF-e XML and create the NFe using **Create Nota Fiscal** command.

Note

This activity is used to read an external input file, unpack the file data and call a dedicated interface (API) that will continue with the further processing of data.

Correct Company and the Supplier Identification

When NE-e XML is loaded from the Core External Supplier Invoice interface, the correct Company and the Supplier Identified from the CNPJ numbers.

Company and Supplier CNPJ Nos are defined in the NF-e XML in below tags:

a) Supplier CNPJ No

```
<emit>
  <CNPJ>21816476000175</CNPJ>
```

b) Company CNPJ No

```
<dest>
  <CNPJ>45504618000127</CNPJ>
```

Please note that the CNPJ number of the destination/receiving company is the key when mapping the incoming XML file to a Company ID in IFS. No External Supplier Invoice Load ID can be created without this match.

Nota Fiscal No as Supplier Invoice No

Receiving NF-e XML contains the Nota Fiscal No which is loaded in the IFS Application as the Supplier Invoice No.

Below is the tag containing the Nota Fiscal No,

```
<ide>
  <serie>S09</serie>
  <nNF>S00000003</nNF>
```

From the **External Supplier invoice** page below, you can see that the Nota Fiscal “Series” and “No” both concatenated and inserted as the Supplier Invoice No.

		Load ID	Invoice No	Supplier
☐	:	225	109100000171	SB SARKBRAZILSUP - SA

PO Reference on Supplier Invoice

PO No is included in the NF-e XML file in the below tag,

(<xPed>PO No</xPed>)

From the **External Supplier invoice** page below, you can see that the PO No received in relation to the Nota Fiscal is visible.

		Load ID	Invoice No	Supplier	Invoice Type	PO Reference
☐	:	225	109100000171	SB SARKBRAZILSUP - SA	SUPPEXT	P101050

```

Each of the NF-e XML Tax Lines received in relation to the Nota Fiscal is inserted into the **External Supplier invoice Tax Information** page as separate tax lines, however, when the Create Nota Fiscal command is used, an automatic call will be made to the External Tax System to calculate the taxes. The returned tax values will then be the ones considered in the Incoming Nota Fiscal that is created. If the parameters are properly set in the application, the receiver will have the same amount returned from the External Tax System as placed in the incoming xml file.

Create Incoming Nota Fiscal using External Supplier Invoice

- Go to *Financials/Supplier Invoice/External Invoice/External Supplier Invoice Load Information* and select the command **Create Nota Fiscal**.

- View Incoming Nota Fiscal

Financials > Supplier Invoice > External Invoice > External Supplier Invoice Load Information

Nota Fiscal Series: 109
Nota Fiscal No: 100000177
Invoice Date: 12/8/2020

Note: Manual Supplier Invoice will create automatically when creating the Incoming Nota Fiscal, if user disables the "Manually Process Incoming Nota Fiscal" toggle in Application Base Setup/Enterprise/Company/Company/Invoice/NF-E COMPLIANCE tab

- Approve Nota Fiscal

The screenshot shows the 'Incoming Nota Fiscal' interface. On the left, there's a sidebar with a list of items, including one with ID 63 and 'Nota Fiscal Series: 109' and 'Nota Fiscal No: 100000177'. The main area displays the title 'Incoming Nota Fiscal - 109100000177' and '1 of 1'. Below the title are buttons for 'Approve', 'Cancel', and 'Manual Supplier Invoice'. A 'Sender' section shows the 'Supplier' as 'SARKBRAZILSUP - SARK BRAZIL SUPPLIER'. There is also a small 'Approve' button below the 'Approve' button in the top bar.

16.5 Enter Incoming Nota Fiscal Manually (DANFe) – Using Incoming Nota Fiscal and Bill of Lading Page

Create Incoming Nota Fiscal manually using **Financials/Financial e-Reporting/Incoming Nota Fiscal** page. For this purpose, you can use DANFE document received with goods.

The screenshot shows the 'Incoming Nota Fiscal' form. At the top, there are 'Save' and 'Cancel New' buttons. The form is divided into several sections: 'Sender' (with a 'Supplier' dropdown), 'Receiver Group' (with 'Company' and 'SARKBRAZIL - SARK BRAZIL COMPANY'), 'Nota Fiscal Series' and 'Nota Fiscal No' (both with red input fields), 'Invoice Date' (7/25/2022), 'Object Type' (Manual Supplier Invoice), 'Object Reference' and 'Object Reference Status' (both with red input fields), 'Business Transaction Id' (with a red input field), 'Payment Terms' (with a red input field), 'Currency Code' (BRL), 'Nota Fiscal Text' (with a red input field), and 'PO Reference' (with a dropdown). Below these is an 'Amounts' section with 'Gross Amount', 'Net Amount' (0.00), and 'Tax Amount' (0.00). At the bottom, there are tabs for 'LINES', 'ADDRESS', and 'GENERAL'. The 'LINES' tab is active, showing a table with columns: Line ID, Tax Code, Tax Calculation Structure, Multiple Tax, Gross Curr Amount, Net Amount, Tax Amount, Tax Amount in Accounting Currency, Tax Amount in Parallel Currency, PO Reference, PO Line No, and PO Release No. The table is currently empty, showing '(No data)'.

- Ensure the Purchase Order number (or numbers) is referenced in field **PO Reference**.
- Columns **Goods/Services Statistical Codes**, **Business Operation** and **Acquisition Origin** are available also on the line level.

Create Manual Supplier Invoice using the command **Create Manual Supplier Invoice**.

215292	ARRIVAL - Receipt of Purchase Order	165 - Remote control, ...	BR1 - Brazilian Site 1	*	+	1 pcd	1/300777	1

16.7 Post Invoice

Follow the IFS standard process to post the invoice.

16.8 Incoming Nota Fiscal - Cancelled

When the cancellation of an Incoming Nota Fiscal is not related to a self-issued Nota Fiscal, for example, an Import Nota Fiscal, the cancellation will allow the same Incoming Nota Fiscal series and number to be entered again. Note that canceling a received Incoming Nota Fiscal will cancel the Nota Fiscal, Supplier Invoice, Reverse the accounting entries. However Inventory Transactions, if necessary, must be manually reversed using the Receipt-Cancel/Arrival Receipt option.

16.9 Delimitations

Brazilian specific tax needs to be handled manually since 3rd party tax calculation service is not integrated in these flows.

Additional delimitations may apply; all relevant flows should be tested to ensure completeness.

17 Incoming Nota Fiscal With Charges

17.1 Overview Legal Requirement

In Brazil, it's a legal requirement to issue a Nota Fiscal for the business transactions related to sales, procurement, transfer of goods and other non-billable operations. The Nota Fiscal must be authorized by the Brazilian Tax Authority prior to shipment of goods and the printed version of Nota Fiscal (DANFE – Auxiliary Document for e-Nota Fiscal) is used to support the transportation of goods to the recipient's locations.

The Nota Fiscal must be received by the goods recipient before the goods are received into inventory.

All inventory transactions created from procurement must be identified by the Nota Fiscal number and Nota Fiscal item. These references are used when submitting tax reporting to the Tax Authority at the end of tax period. These references might also be required in Tax Audits. The references are also widely used in the daily operations in Brazilian companies.

17.2 Other Business Objectives

1. Enabling the possibility of fair presentation of procurement related Charges on the Incoming Nota Fiscal Lines.
2. Enabling the recording of multiple line connected charges related to Purchase Order lines.
3. Enabling the direct cross reference between Incoming NF, Receipt Reference, and Supplier Invoice by using the Receipt Reference as the Incoming Nota Fiscal Number

17.3 Process Overview

Incoming Nota Fiscal could be received to IFS Cloud in two ways,

- a. Receive Incoming Nota Fiscal Automatically (NF-e) – Using External Supplier Invoice Flow

IFS Cloud core *External Supplier Invoice* flow is used to upload the received Incoming Nota Fiscal XML file (NF-e). Once uploaded by using the IFS Cloud core functionalities, Incoming Nota Fiscal could be created automatically.

- b. Enter Incoming Nota Fiscal Manually – Using **Incoming Nota Fiscal** Page

User can enter an Incoming Nota Fiscal based on the DANFe document received from the supplier together with the goods using **Incoming Nota Fiscal** page.

Once the Incoming Nota Fiscal is created, user can create the Manual Supplier Invoice & Approve the Incoming Nota Fiscal.

Finally, the user can create the inventory transactions related to the goods receipt and process Manual Supplier Invoice.

Note: User can also create the inventory transactions related to the goods receipt before creating the Manual Supplier Invoice or Incoming Nota Fiscal depending on the requirement.

17.3.1 RECEIVE INCOMING NOTA FISCAL AUTOMATICALLY (NF-E) – USING EXTERNAL SUPPLIER INVOICE FLOW

17.3.2 ENTER INCOMING NOTA FISCAL MANUALLY (DANFE) – USING INCOMING NOTA FISCAL PAGE

17.4 Process Overview

17.5 Prerequisites

The company must be set-up to use Brazilian localization, see the Company Set up chapter. And the “Incoming Nota Fiscal” parameter under the **Localization Control Center** tab must be enabled on the *Company/Localization Control Center* tab.

17.6 Define Basic Data

Create Purchase Charge types related for Freight, Insurance & Other Expenses using standard functionality and select them in *Application Base Setup/Enterprise/Site/Site/Sales and Procurement/Procurement* tab.

The screenshot shows the 'Sales and Procurement' interface for site S2234 - DEMO BRAZIL 3. The 'PROCUREMENT' tab is active. Under the 'General' section, the 'Over Delivery' dropdown is set to 'Inter-Site'. The 'Configurations for Available to Promise' section is expanded, showing 'Charge Types for Incoming Nota Fiscal'. This section contains three dropdown menus: 'Freight' (set to 'FREIGHT CHARGES'), 'Insurance' (set to 'INSURANCE CHARGES'), and 'Other Expenses' (set to 'OTHER CHAREGS').

17.7 Enter Incoming Nota Fiscal Manually (DANFe) – Using Incoming Nota Fiscal Page / External Supplier Invoice Flow

IFS Cloud standard External Supplier Invoice flow or the manually entering Incoming Nota Fiscal flow could be used in this scenario.

Please refer the steps described above in the Incoming Nota Fiscal Chapter to create and approve the Incoming Nota Fiscal.

17.7.1 CREATE AND HANDLE PURCHASE ORDER

Follow the IFS standard Core process to enter a purchase order for inventory purchase parts in the **Procurement/Order/Purchase Order** page. Release and confirm the Purchase Order with the multiple line connected Charges.

Purchase Order 91000687 - PUGULK SUPP 1 - S2234

Planned

Order No: 91000687, Supplier: PUGULK SUPP 1 - PUGULK SUPP 1, Site: S2234 - S2234

Order Code: 1 - NORMAL, Receipt Date: 1/9/24, 12:00 AM, Not Shared

Order Amounts

PART LINES NO PART LINES RENTAL PART LINES ORDER DETAILS CHARGES LANDED COST AUTHORIZATION

17.7.2 RECEIVE INCOMING GOODS AND CREATE THE INCOMING NOTA FISCAL (MANUALLY OR AUTOMATICALLY)

Use IFS Core External Supplier Invoice flow to load the incoming NF-e XML and create the NFe using “Create Nota Fiscal” command or create an Incoming Nota Fiscal manually using the DANFe document received.

17.7.3 FETCH THE PO DETAILS USING THE TWO OPTIONS AVAILABLE IN THE INCOMING NOTA FISCAL LINES

- ❖ **Copy Unmatched PO Receipts** option can be used when the user needs to register the prior receipts of the goods before creating the Incoming Nota Fiscal.
- ❖ **Copy Unreceived PO Lines/ Charges** option will be used when the user needs to record the receipts of the goods after creating and approving the Incoming Nota Fiscal.

17.7.6 MATCH THE PO LINES AND CHARGE LINES SEPARATELY AND POST THE MANUAL SUPPLIER INVOICE

User can separately match both purchase order lines and purchase charge lines and post the relevant Supplier Invoice with multiple charges.

17.8 Delimitations

In the procurement flow Gross price is used when tax calculation is done via External Tax System.

The tax amount relevant to purchase part is proportionately calculated and shown in the Part Lines, and this results in generating incorrect postings (Missing Tax Amounts) at the Manual Supplier Invoice level. Users need to manually match the gross amount in the invoice lines and create manual postings for the missing tax amount.

Please consider the following example.

Purchase Order 91001425 - PUGULK SUPP 1 - S2234

Released

Order No: 91001425 Supplier: PUGULK SUPP 1 - PUGULK SUPP 1 Site: S2234 - S2234

Order Code: 1 - NORMAL Receipt Date: 2/27/24, 12:00 AM Not Shared

Order Amounts

Total Net Amount/Base	Total Net Amount/Curr	Total Tax Amount/Curr
165.60 BRL	165.60 BRL	32.40 BRL
Total Gross Amount/Curr	Charges Exist	
180.00 BRL		

- Tax amounts have been distributed proportionately for part lines.

18 Incoming Nota Fiscal – Customer Returns for Credit

18.1 Overview Legal Requirement

According to Brazilian legislation, goods transported between different taxpayer establishments must be accompanied by a Nota Fiscal. In a Customer Return scenario, the customer issues an Outgoing Nota Fiscal to accompany the returned goods and the company must register this document as an Incoming Nota Fiscal in IFS Cloud.

When processing an Incoming Nota Fiscal related to a Customer Return, the following rules apply:

- The return can only be processed after the original Outgoing Nota Fiscal has been authorized by SEFAZ.
- The Customer Return Nota Fiscal must reference the company's original Outgoing Nota Fiscal.
- If the return is total, the Incoming Nota Fiscal amounts must match the original Outgoing Nota Fiscal.
- If the return is partial, the Incoming Nota Fiscal amounts must be proportional to the returned quantity.
- Tax rates and tax amounts must be consistent with those applied in the original Outgoing Nota Fiscal.
- Each Customer Return Nota Fiscal must reference one previously issued Outgoing Nota Fiscal, according to NF-e regulations.

18.2 Process Overview

In IFS Cloud, customer returns for credit are supported through two main functional flows:

Functional Flow 01: Create RMA Manually → Enter Incoming Nota Fiscal

1. A Return Material Authorization (RMA) is created manually.
2. After the RMA is approved, the user proceeds to register the Incoming Nota Fiscal.
3. The process continues through the standard return and credit processes.

Functional Flow 02: Enter Incoming Nota Fiscal → RMA is Automatically Created and Approved for Credit

In this flow, the system automatically:

1. Creates the RMA, and
2. Approves it for credit without requiring manual intervention.

The user then continues directly with the financial and logistical processes tied to the return.

18.3 Receive Customer Returns – Manual RMA Creation Prior to Incoming Nota Fiscal

Prerequisites

The company must be set-up to use Brazilian localization, see chapter Company Set up, and the parameter “*Incoming Nota Fiscal*” must be enabled.

Prepare RMA for items to return from Customer

Use IFS Cloud generic functionality to create Return Material Authorization for the Customer Orders on which goods to be returned were delivered with Outgoing Nota Fiscal issued.

Make sure the items and quantities in Return Material Authorization lines match the lines and quantities informed by customer in the incoming customer return Nota Fiscal to be received.

The Tax Lines in Return Material Authorization are copied from Customer Order Tax Lines. In case of partial returns, the taxes amounts will be prorated according to the quantity selected for return.

Once the Return Material Authorization is created, release it and approve it for credit.

Receive Incoming Nota Fiscal

CREATE INCOMING CUSTOMER RETURN NOTA FISCAL MANUALLY

Create the incoming Nota Fiscal manually using **Financials/Financial e-Reporting/Incoming Nota Fiscal** page. For this purpose, you can use DANFe document received.

Select the “Document Type” as Customer Return Nota Fiscal.

18.4 Receive Customer Returns – Automatic RMA Creation After to Incoming Nota Fiscal

Prerequisites

The company must be set-up to use Brazilian localization, see chapter Company Set up, and the parameter “Incoming Nota Fiscal” and newly introduced parameter, “Automatic Creation of RMA using Incoming Fiscal Note”, must be enabled.

Process Overview

1. Create Customer Return Incoming Nota Fiscal
2. Save and validate header information
3. Link to the original outgoing Nota Fiscal
4. Copy and adjust return lines

5. Fetch External Taxes
6. Approve the Incoming Nota Fiscal
7. RMA is created and approved for credit
8. Create and print the credit customer invoice
9. Register the receipt of returned goods

CREATE THE CUSTOMER RETURN INCOMING NOTA FISCAL

The process is started by creating a new Incoming Nota Fiscal specifically for customer returns.

Navigate to Incoming Nota Fiscal and Bill of Lading page, create a new record, select document type Customer Return Nota Fiscal. This document type triggers the return-handling functionalities and prepares the system for automated RMA creation.

After entering basic header information, save the record.

ESTABLISH THE CONNECTION TO THE OUTGOING NOTA FISCAL

To ensure the return is linked to the correct original sale, the outgoing sales Nota Fiscal must be linked. In the Incoming Nota Fiscal, go to the **Nota Fiscal Reference** section to connect the Approved Outgoing Nota Fiscal.

COPY LINES FROM THE OUTGOING NOTA FISCAL

Once the reference is established, the user can copy the original invoice lines. Use **Copy Lines from Outgoing Nota Fiscal** (available at the header level).

AUTOMATIC RMA CREATION

When the Incoming Nota Fiscal is approved, the application displays the dialog requesting the Return Reason:

The screenshot shows the IFS application interface. On the left is a sidebar with a 'Navigator menu' and a search bar. The main area displays the 'Incoming Nota Fiscal and Bill of Lading' form. A modal window titled 'Return Material Fiscal Note' is open, showing a 'Return Reason' dropdown menu with '15' selected, and 'OK' and 'Cancel' buttons. The form in the background includes fields for 'Document Type' (Customer Return Nota Fiscal), 'Sender' (Customer), 'Site' (SP01), 'Document Series' (1), and 'Object Reference'.

This field is mandatory. After the Return Reason is provided and the user confirms by selecting OK, the application automatically creates the RMA based on:

- The returned quantities defined in the Incoming Nota Fiscal
- The taxes calculated and fetched for the Incoming Nota Fiscal

The RMA is generated without additional user intervention, ensuring consistency between the fiscal document and the return transaction.

The application assigns the RMA number using the next available number in the RMA sequence. The RMA automatically created and approved for credit is linked to the Incoming Nota Fiscal.

The screenshot shows the 'Incoming Nota Fiscal and Bill of Lading' form. On the left is a list of documents with their IDs, document series, and document numbers. The main area displays a detailed view of a document with ID '001 - 125478258'. The document is marked as 'Approved'. The form includes fields for 'Document Type' (Customer Return Nota Fiscal), 'Self Issue' (No), 'Sender' (Customer), 'Receiver' (Company), 'Site' (SP01), 'RMA No' (200201), and 'Entry Date' (2/23/2026). The 'RMA No' field is highlighted with a red box.

CREATE AND FINALIZE THE CREDIT CUSTOMER INVOICE

After the Incoming Nota Fiscal is approved and linked to the auto-created RMA click the button Create the Credit Customer Invoice in the page header:

19 Self-Issue Incoming Nota Fiscal

19.1 Overview Legal Requirement

In Brazil, it's a legal requirement to issue a Nota Fiscal for the business transactions related to sales, procurement, transfer of goods and other non-billable operations. The Nota Fiscal must be authorized by the Brazilian Tax Authority prior to shipment of goods and the printed version of Nota Fiscal (DANFE – Auxiliary Document for e-Nota Fiscal) is used to support the transportation of goods to the recipient's locations.

In certain scenarios, the recipient company must self-issue an Incoming Nota Fiscal when the sender does not issue an Outgoing Nota Fiscal to be received. Brazilian tax law permits companies to generate an Incoming Nota Fiscal on behalf of the sender to ensure the transaction is legally documented.

COMMON BUSINESS SCENARIOS HANDLED WITH INCOMING NOTA FISCAL SELF-ISSUED

1. Customer Returns (Goods Refuse)

When customer refuses goods at the delivery dock and does not physically receive them, the goods return using the original Outgoing Nota Fiscal. Since a company cannot receive its own Nota Fiscal, the Tax Authority requires the company to self-issue an incoming NF to legally offset the outgoing transaction.

2. Domestic Procurement (Cases when Supplier Does Not Issue Nota Fiscal)

- Microentrepreneur (MEI) - MEIs don't need to issue Nota Fiscal when selling to individuals.
- Exempt or Immune Transactions - Some operations are legally exempt from issuing Nota Fiscal (example, certain government transactions or tax-exempt activities).
- Rural producer (individual without state tax registration) - May be exempt from issuing an electronic Nota Fiscal depending on the state and nature of the transaction.
- Transactions not subject to ICMS or ISS Taxes - When no tax applies, legislation may exempt NF issuance.

19.2 Business Objectives

The primary objective is to allow the company to create an Incoming Nota Fiscal on behalf of the sender and submit it to the Brazilian Tax Authority (SEFAZ) for approval.

19.3 Process Overview

19.4 Prerequisites

The company must be set-up to use Brazilian localization, see the Basic Data Set up chapter. And the “Incoming Nota Fiscal” parameter under the **Localization Control Center** tab must be enabled on the *Company/Localization Control Center* tab.

The parameter “Integration to Brazilian External Tax System” should also be enabled to calculate the taxes through the 3rd party tax calculation engine Avalara.

19.5 Define Basic Data

Applicable basic data should exist for Supplier, Customer, Site and Inventory Part/s defined in the company. Refer Basic Data Setup chapter for more details.

19.6 Self-Issue – Goods Incoming Nota Fiscal

Create Incoming Nota Fiscal manually using *Financials/Financial e-Reporting/Nota Fiscal and Bill of Lading/Incoming Nota Fiscal and Bill of Lading* page.

Select the Document Type as 'Goods Nota Fiscal' and enable the 'Self-Issue' toggle button.

When the Self Issue toggle is enabled, the company self-issues the Incoming Nota Fiscal on behalf of the sender. When disabled the standard Incoming Nota Fiscal process applies.

The screenshot shows a form with a 'Document Type' dropdown set to 'Goods Nota Fiscal'. To its right is a 'Self Issue' toggle switch, which is currently turned on (blue). A red rectangle highlights the 'Self Issue' toggle and its label.

Select the Supplier and Site, and the default series for the selected Branch will be picked.

The Nota Fiscal Document Number in “Document No” field will be automatically generated when saving the NF header.

The screenshot shows the 'Goods Incoming Nota Fiscal' form. The 'Document Type' is 'Goods Nota Fiscal' and the 'Self Issue' toggle is enabled. The 'Sender' section shows 'Supplier: BR DOMESTIC SUPP - NF-E EMITIDA EM AMBIENTE DE HOMOLOGAÇÃO - SEM VALOR FL...'. The 'Receiver' section shows 'Company: STDBRAZIL - BRAZIL STD - PLEASE DON'T CHANGE THE SETUP IN THIS COMPANY'. The 'Site' is 'SP01' and the 'PO Reference' is 'P101015'. The 'Entry Date' is '2/26/2026'. The 'Document Series' is '011' and the 'Fiscal Document Model' is '55'. The 'Document No' is '000250298'. The 'Object Type' is 'Manual Supplier Invoice'. The 'Object Reference' is '1'. The 'Document Text' is empty. The 'Business Transaction ID' is '200' and the 'Payment Terms' are '30 - 30 Days Net'. The 'Currency Code' is 'BRL'.

Note: Ensure the Purchase Order number (or numbers) is referenced in field **PO Reference**. If a PO is entered, the Supplier and Site details will be automatically updated.

Lines can be entered manually or by using the commands “Copy Unreceived PO Lines/Charges” or “Copy Unmatched PO Receipts” in the NF Lines.

Note: Fetch External Tax can also be used in the Self-Issue Incoming Nota Fiscal to calculate taxes through Avalara.

Once Nota Fiscal Lines are entered the Self Issue Goods Incoming Nota Fiscal can be sent for SEFAZ for approval by using the “Send Nota Fiscal” command in the Nota Fiscal header.

Follow the standard process to receive the Goods and to post the Manual Supplier Invoice.

19.7 Self-Issue – Symbolic Incoming Nota Fiscal

A Self Issue Symbolic Incoming Nota Fiscal can be issued for both a customer or a Supplier by the company depending on the Business Scenario.

Navigate to *Financials/Financial e-Reporting/Nota Fiscal and Bill of Lading/Incoming Nota Fiscal and Bill of Lading* page and create a new Incoming Nota Fiscal setting the Document Type as "Symbolic Nota Fiscal" enable the 'Self-Issue' toggle button.

« Save Cancel New

Document Type * Self Issue ☒

Symbolic Nota Fiscal

When the Self Issue toggle is enabled, the company self-issues the Incoming Nota Fiscal on behalf of the supplier or customer. When disabled the standard Symbolic Incoming NF process applies.

The Sender Type can be set as either "Customer" or "Supplier", and the list of values in the Sender ID field will display options based on the selected Sender Type.

When the Site is selected, the default series for the selected Site's Branch will be automatically picked. The Nota Fiscal Document Number in "Document No" field will be automatically generated when saving the NF header.

19.8 Self-Issue – Customer Returns Incoming Nota Fiscal

Navigate to *Financials/Financial e-Reporting/Nota Fiscal and Bill of Lading/Incoming Nota Fiscal and Bill of Lading* page and create a new Incoming Nota Fiscal setting the Document Type as “Customer Returns Nota Fiscal” and enable the ‘Self-Issue’ toggle button.

1 of 25+

Save Cancel New

Document Type *
Customer Return Nota Fiscal

Self Issue: ☒

When the Self Issue toggle is enabled, the company self-issues the Incoming Nota Fiscal on behalf of the customer. When disabled the standard Customer Returns Incoming Nota Fiscal process applies.

Select the Customer, and the Site. When the Site is selected, the default series for the selected Site's Branch will be automatically picked.

The RMA created for the original Customer Order can be entered in the "RMA No" field

The Nota Fiscal Document Number in "Document No" field will be automatically generated when saving the Nota Fiscal header.

In the Nota Fiscal Reference List, enter the Nota Fiscal ID issued from Customer Order, on which goods returned were originally delivered and save the record.

Nota Fiscal Reference						
	Nota Fiscal ID	Nota Fiscal Number	Document Type	Alt Object Reference	NF-e Key	Status
✓	527	000250281	Goods Nota Fiscal		352602041062300001905501100025028110000005279	Approved

Select command button **Copy Lines from RMA and Outgoing Nota Fiscal** in the page header. The items of Nota Fiscal Reference List, for which RMA lines are created and approved for credit, are fetched into Incoming Nota Fiscal

Note: Fetch External Tax can also be used in the Self-Issue Incoming Nota Fiscal to calculate taxes through Avalara.

Once NF Lines are entered the Self Issue Symbolic Incoming NF can be sent for SEFAZ for approval by using the "Send Nota Fiscal" command in the NF header.

20 Incoming Bill of Lading

20.1 Overview Legal Requirement

The electronic Bill of Lading (CT-e) is a mandatory legal document in Brazil. Transportation companies are required to issue the CT-e, which serves as the official record validating the provision of freight services, and obtain authorization from the Tax Authority . The party responsible for paying the freight charge must also register the CT-e as an incoming fiscal document. In practice, the incoming Bill of Lading is usually received after the incoming Nota Fiscal. The Bill of Lading can take two forms:

- **CT-e (Conhecimento de Transporte Eletrônico):** The CT-e is the official electronic transport invoice used in Brazil. It is an XML document that records the cargo value, including applicable taxes.
- **DACTE (Documento Auxiliar do Conhecimento de Transporte Eletrônico):** The DACTE is the printed auxiliary document of the CT-e. It is not a substitute for the CT-e; rather, it serves as a supporting document to facilitate the consultation of the CT-e. The DACTE must accompany the vehicle during transportation.

20.2 Process Overview

Bill of Lading can be received to IFS Cloud in two ways,

1st - Receive Bill of Lading Automatically, with CT-e xml file

IFS Cloud core *External Supplier Invoice* flow is used to upload the received Bill of Lading XML file (CT-e). Once uploaded by using the IFS Cloud core functionalities, Bill of Lading could be created automatically.

2nd - Enter Bill of Lading Manually, with DACTe

The user can enter a Bill of Lading based on the DACTe document received from the carrier (transport supplier) using Incoming Nota Fiscal and Bill of Lading page.

Once the Bill of Lading is created, the user can link one or multiple Nota Fiscal related to the transportation service, approve the Bill of Lading and create a manual supplier invoice.

Receive Bill of Lading Automatically (CT-e)

Enter Bill of Lading Manually (DACT-e)

Note: Bill of Lading connected to incoming Nota Fiscal related to a Purchase Order, the freight cost (total freight amount - deductible taxes) is automatically distributed across the Nota Fiscal items according to the goods price criteria. The Supplier Invoice is then automatically matched to the Purchase Order charges connected to the line previously received with the Nota Fiscal. Inventory transactions will reflect the freight cost distributed to the Nota Fiscal lines.

Bills of Lading connected to outgoing Nota Fiscal or to incoming Nota Fiscal not related to a Purchase Order, the supplier invoice must be manually handled using the standard Core functionality.

20.1 Prerequisites

- The company must be set-up to use Brazilian localization, see the Company Set-Up chapter and the “Incoming Nota Fiscal” parameter must be enabled.
- The “Address Specific Tax Registration Numbers” parameter must be enabled. Read the chapter “Address Specific Tax Registration Numbers” and setup Supplier (Carrier) and Company CNPJ accordingly.
- Purchase Charge type should be in place in Procurement/Part/Purchase Charge Type, with Brazilian Charge Category set as “Bill of Lading”. This Purchase Charge Type will be used to enter freight amount in Purchase Order:

Purchase Charge Type

>> BOL - Bill of Lading freight charge - SP01 2 of 11

+

- Default Purchase Charge Type for freight should be defined in Application Base Setup/Enterprise/Site/Sales and Procurement/Procurement tab. This Charge will be fetched when entering a line in the Bill of Lading, either manually or when reading from an external CT-e file upload.

Note that it does not need to be the same Purchase Charge Type used to enter the freight amount in the Purchase Order:

PART LINES NO PART LINES RENTAL PART LINES ORDER DETAILS **CHARGES** LANDED COST AUTHORIZATION

Sequence No	Charge Type	Charge Type Description	Charge Price/Base	Connect to Line No	Connect to Rel No	Invoiced Qty	Charge (%)	Charge Incl Tax
2	BOL	Bill of Lading freight charge	0,00	1	1	0		

When the Purchase Charge Type is connected to the Purchase Order line, the Brazilian Charge Category “Bill of Lading” ensures that integration with the external tax system is not triggered. This is because, unlike a freight amount highlighted in an incoming Nota Fiscal, in Bill of Lading cases the freight amount cannot be considered in the goods’ tax calculation base.

This parameter also ensures that the freight amount entered is not copied to the incoming Nota Fiscal when using Copy Unreceived PO Lines or Copy Unmatched PO Receipts, nor absorbed into

inventory transactions when goods are received after the incoming Nota Fiscal is approved, since freight cost absorption will happen when the Bill of Lading is received and invoiced.

- Media Code “E-INVOICE” must be set up on the transport service Supplier in page Application Base Setup/Enterprise/Supplier/Supplier/Invoice, tab Message Defaults. This set-up is defined by Company ID:

20.2 Entering Bill of Lading

20.2.1 Via External Supplier Invoice

IFS Cloud standard External Supplier Invoice flow is used in this scenario to upload the received Bill of Lading XML file (CT-e). Once uploading the CTe XML in External Supplier Invoice flow, Bill of Lading can be created automatically. Please see the details in the process described step by step in the chapters below.

20.2.1.1 Uploading CT-e XML File

Copy the CT-e XML file to the IN folder on the application server. The IFS Connector Reader will then upload the file into the application. See below some examples of how the information from the XML file is processed when read by the application:

Bill of Lading Document Identification

<mod>57</mod>

If the mod value is "57", it is identified as a Bill of Lading document.

Company and Supplier Identification

The Supplier will be identified using the CNPJ value of <emit>:

```
<emit>
<CNPJ>40730441000163</CNPJ>

    </ICMS00>
  </ICMS>
  <vTotTrib>2.05</vTotTrib>
</imp>
```

<vTPrest> represents the Gross Amount of the Bill of Lading and Tax details can be found inside <imp> tag.

20.2.1.2 Create Bill of Lading using External Supplier Invoice

Go to Financials/Supplier Invoice/External Invoice/External Supplier Invoices and check the listed CT-e XML files read from IN folder.

Depending on the Company setup for 'Manually Process Incoming Nota Fiscal', the Bill of Lading may or may not be created automatically after the CT-e XML file is uploaded via External Supplier Invoice.

If Company is enabled for 'Manually Process Incoming Nota Fiscal', the Bill of Lading must be created by clicking the Create Nota Fiscal command button.

Note: This action unpacks the file data and calls a dedicated interface (API) that continues with the subsequent data processing.

The screenshot shows the 'External Supplier Invoice Load Information' page. The breadcrumb trail is: Financials > Supplier Invoice > External Invoice > External Supplier Invoice Load Information. The page title is 'External Supplier Invoice Load Information'. Below the title, there are several buttons: 'Invoice Information', 'Check Invoices', 'Create Invoices', 'Create Nota Fiscal' (highlighted in blue), and 'Remove Invoices'. A table below these buttons lists invoice information. The first row is selected, and a tooltip 'Create Nota Fiscal' is visible over the 'Create Nota Fiscal' button in the table row.

Note: When entering a Bill of Lading by uploading a CT-e XML file, some tax-related information, such as CST and CFOP codes, may need to be adjusted manually to reflect the receiver's perspective. In the XML file, these codes are provided from the issuer's point of view. Optionally, taxes can be fetched from the external tax system by clicking the 'Fetch External Tax' command button in the page header. See the chapter 'Integration with Avalara for Tax Determination on Incoming Fiscal Documents' for further details.

Approved

One or multiple Nota Fiscal documents can be linked to the Bill of Lading. Note that the application does not allow mixing incoming types; for example, an incoming Nota Fiscal sourced from a Purchase Order cannot be linked together with an incoming Nota Fiscal sourced from other processes.

20.4 Approving the Bill of Lading

Once the Nota Fiscal are linked to the incoming Bill of Lading, it can be approved. Click the command button "Approve" in the page header:

Document Type Bill of Lading			
Sender Supplier BR FORWARDER - BR FORWARDER		Receiver ▼	
Site* SP01	Entry Date* 31/08/2025	Issue Date 18/08/2025	 There must be a Bill of Lading charge connected to PO P101310 available to be invoiced.
Fiscal Document Model 57	Document No 44456	Object Type Manual Supplier Invoice	

In this scenario, the user can reopen the Purchase Order and enter the missing Purchase Charge Type.

Note that an additional Charge to handle the Bill of Lading will be required in cases where the Purchase Order line is related to multiple receipts, or when an incoming Nota Fiscal is connected to multiple Bills of Lading.

20.5 Create a Manual Supplier Invoice per Single or Multiple Bill(s) of Lading

20.5.1 Create a Manual Supplier Invoice per Single Bill of Lading

Once the Bill of Lading is approved, the Supplier Invoice can be created immediately. Click the command button "Create Manual Supplier Invoice" in the page header:

When a Bill of Lading is linked to an incoming Nota Fiscal sourced from a Purchase Order, the application automatically creates the Supplier Invoice by matching the distributed freight cost to the related Purchase Order charges (posting via M189) and absorbing these costs across the ARRIVAL transactions in the inventory through the ARCHG event (posting via M187 x M1).

When a Bill of Lading is linked to an incoming Nota Fiscal sourced from other processes, or to an outgoing Nota Fiscal, the application creates the Supplier Invoice without automatically matching the distributed freight cost. In this case, the posting must be performed manually using the standard Core functionality

20.6 Delimitations

- In cases where Manual Supplier Invoice is created from an incoming Bill of Lading linked to one or more Nota Fiscal documents non-Purchase Order-related (e.g., any type of outgoing Nota Fiscal or incoming Nota Fiscal type Symbolic Nota Fiscal or Customer Return does not support automatically matching for distributed freight cost. In this case, Supplier Invoice posting must be handled manually using the standard Core functionality.
- The automatic matching of distributed freight cost supported in Manual Supplier Invoice for Companies enabled for Posting Proposal. In this case, Supplier Invoice posting must be handled manually using the standard Core functionality.

Additional delimitations may apply; all relevant flows should be tested to ensure completeness.

21 Importation - Tax Determination and Incoming Nota Fiscal for Tax Authority Approval

21.1 Overview Legal Requirement

In Brazil, it's a legal requirement to issue a Nota Fiscal for the business transactions related to sales, procurement, transfer of goods and other non-billable operations. The Nota Fiscal must be authorized by the Brazilian Tax Authority prior to shipment of goods and the printed version of Nota Fiscal (DANFE – Auxiliary Document for e-Nota Fiscal) is used to support the transportation of goods to the recipient's locations.

In the Importation scenario, the Brazilian buying Company must apply correct taxes and issue an Incoming Nota Fiscal that should be approved by the Brazilian Tax Authority as this will not be done by the Foreign Supplier. The requirement therefore would be to prepare the Incoming Nota Fiscal with support for tax calculations and communication to the Tax Authority by the Brazilian buyer Company.

21.2 Process Overview

21.3 Business Objectives

The primary objective is the creation of Incoming Nota Fiscal for Incoming Dispatch Advise to support the import process.

Other Business Objectives would be to support customs clearance related taxes and fees in Incoming Nota Fiscal and NF-e communication via Avalara from Incoming Nota Fiscal.

21.4 Prerequisites

The company must be set-up to use Brazilian localization, see the Company Set up chapter. And the "Incoming Nota Fiscal" parameter under the **Localization Control Center** tab must be enabled on the *Company/Localization Control Center* tab.

The company should have a foreign supplier, and to represent the authorities a state supplier and a federal supplier under the scenario that company decides to pay taxes instead of a broker.

If the company uses the same broker to pay charges and taxes arising from the import process, it's recommended configuring the field Supplier on PO Line(s) not equal to Supplier on Invoice in the Company as Only Match PO line(s) with Supplier Correspondence.

This configuration allows the Supplier Invoice created from the Import Incoming Nota Fiscal for the payment of taxes to the broker to also match the Charges added in the Incoming Dispatch Advise and distributed among the related Purchase Orders, provided that the broker supplier informed in the Charges is the same supplier informed when creating the Supplier Invoice for the taxes.

On the other hand, if the company uses a broker only for the payment of import-related costs and charges, but pays the taxes directly to the suppliers tax entities at the federal and state levels, its recommended configuring the field Supplier on PO Line(s) not equal to Supplier on Invoice in Company as Only Match PO line(s) with Supplier Correspondence. This configuration prevents charges to be paid through the broker's invoice from being incorrectly matched to the foreign supplier's invoice or even in the invoices created for taxes payments with federal and state authorities.

However, it is also important to consider the other business flows in the application when applying this configuration, as this setting is defined at the Company level and may impact other processes, such as the Incoming Bill of Lading flow. Therefore, the overall impact on all applicable procurement and import scenarios should be evaluated before enabling this configuration.

21.5 Define Basic Data

21.5.1 THE ADDRESS PRESENTATION

The dialog box titled "Layout Configuration" shows the "Display Layout" section with the following fields: &ADDRESS1, &ADDRESS2, &ADDRESS3, &ZIP_CODE &CITY, &COUNTRY. The "Edit Layout Visibility" section shows toggle switches for Address1, Address2, Address3, Address4, Address5, Address6, City, State, and Zip Code. Address1, Address2, Address3, City, and Zip Code are currently turned on. Address4, Address5, Address6, and State are turned off. The "Default Display Layout" button is highlighted.

The Address Presentation for the foreign supplier's country should be set up for 3 addresses on the **Application Base Setup/Enterprise/Basic Data/Address Presentation** page for the supplier's country.

21.5.2 BUSINESS TRANSACTION CODE

Navigate to **Business Transaction Codes** page available in **Application Base Setup/General Data/Business Transaction Code**. Enter "502" as the Business Transaction ID for Importation of Goods.

The screenshot shows the "Business Transaction Codes" page. The table has the following columns: Business Transaction ID, Description, Direction, Presence Type, Acquisition Reason ID, and External Tax System Reference. The row for Business Transaction ID 502 is highlighted, with the following values: Description: Importation of Goods, Direction: Inbound, Presence Type: Not Applied, Acquisition Reason ID: standardPurchase, and External Tax System Reference: standardPurchase.

Business Transaction ID	Description	Direction	Presence Type	Acquisition Reason ID	External Tax System Reference
502	Importation of Goods	Inbound	Not Applied	standardPurchase	standardPurchase

21.5.3 GENERATION OF OFFICIAL INVOICE NUMBER

Open the “Branches” tab in Application Base

Setup/Enterprise/Company/Company/Invoice/Official Invoice Number Components page and enter the company Branch IDs that need Nota Fiscal numbers to be generated.

Series	Valid From	Sub Series	Model	Start Value	End Value	Next Value	Length	Default Series

21.8 Enter Incoming Nota Fiscal – Using Incoming Nota Fiscal Page

Create Incoming Nota Fiscal manually using **Financials/Financial e-Reporting/Incoming Nota Fiscal** page. Select the “Document Type” as Import Nota Fiscal.

Select the Site and the default series for the selected Branch will be picked. The Nota Fiscal Document Number in “Document No” field will be automatically generated.

In the Currency Rate field, you can enter or modify the currency exchange rate. The defined rate will be used by the application when fetching taxes from the external tax system, registering Purchase Order receipts using the Receive option in Incoming Nota Fiscal after the Nota Fiscal is approved by the Tax Authority System, and calculating the cost of goods and charges included in the nationalization process.

Then enter the previously created Incoming Dispatch Advice No in the field **Dispatch Advice**. This will get the connected Purchase Orders in the Incoming Dispatch Advice to the **Incoming Nota Fiscal** page. Save the header level.

Upon saving the Nota Fiscal the three command buttons **Send Nota Fiscal**, **Customs Clearance Info** and **Fetch External Tax** will be visible on the Nota Fiscal Header.

Refer the Response file details received from AVALARA below.

21.9.1 REGISTERING PURCHASE ORDER ARRIVALS

Once the Incoming Nota Fiscal is Approved, the command button **Receive** will become enabled in the Nota Fiscal Lines tab:

	Discount (%)	Line ID	Part No	Tax Code	Tax Calculation Structure	Multiple Tax	Brazil Unit Price	Price	Quantity	Gross Amount
✓ (1)	0	1	BRPART6			Yes	500,0000	83,3333	100	14578,6200

Use this option to register Purchase Order arrivals. This ensures that the Receipt Reference field is correctly populated with the concatenation of the Nota Fiscal Series, Model, and Number in the receipt transaction:

Receive

Received By: RA ROALBR | Actual Delivery Date: 10/07/2026 00:00 | Actual Arrival Date: 12/07/2026 22:21 | **Receipt Reference: 01655000003024**

OK Cancelar

This reference is used in other areas of the application, such as the Inventory Transactions History, where it serves as the key to displaying the related Nota Fiscal information.

When the imported goods are handled as lot-batch tracked parts in the application, the command button **Receive with Serials/Lots** will also become enabled in the Nota Fiscal Lines tab:

LINES ADDRESS GENERAL NF-E/CT-E INFORMATION CC-E INFORMATION							
☰ ✎ 🔔 Tax Lines Receive Receive With Serials/Lots ⚙️							
✓ (1)	NBS Code	Acquisition Reason ID	Acquisition Origin	Goods/Services Statistical Code	Business Transaction ID	Line ID	Part No
✓ ☒		UC - Goods for Use and ...	5 - Nacional, mercadoria ...	85185000 - Aparelhos eletricos d...	205	1	BRPART10
✓ ☐		UC - Goods for Use and ...	1 - Estrangeira - Importaç...	85185000 - Aparelhos eletricos d...	205	2	BRPART13

Note that lot batch and tracked parts can also be received using the **Receive** option, provided that the receipt is performed into an Inventory Location of type Arrival. The Lot Batch Numbers can then be entered later when moving the goods from the Arrival location to the Picking location.

However, by using the **Receive with Serials/Lots** command, it is possible to register the arrival and allocate the parts directly to the Picking location while capturing the required Lot Batch Numbers during the receipt process.

Although the quantities of lot-controlled parts are grouped at the Nota Fiscal line level, the lines in the Receive with Serials and Lots dialog are split according to the individual Lot Batch Numbers:

In import flows involving a supplier that is linked to a Site of the same Company in another country (Intercompany process using the PO-CO flow), the Lot Batch Numbers and Expiration Dates retrieved in the Receive with Serials and Lots dialog are derived from the inventory consumption performed when the Customer Order was delivered at the sending Site.

21.9.2 CREATING THE SUPPLIER INVOICES

Once the Purchase Order receipt is done, the command Button **Create Supplier Invoices** will be enabled in the Nota Fiscal header. This can be used to Create the Manual Supplier Invoice for the Foreign Supplier and the Tax only Manual Supplier Invoices.

The screenshot shows the 'Incoming Nota Fiscal' header for document 009000002016. It includes a status bar with 'Approved' and a 'Create Supplier Invoices' button. Below the header, there are sections for 'Document Type' (Import Nota Fiscal), 'Sender' (PUGULK FOREIGN SUPP - PUGULK FOREIGN SUPPLIER), and 'Receiver' (PUGULK BRAZIL 1 - PUGULK BRAZIL 1).

This will open the “Create Tax Invoice” dialog box. Here, the Brazilian company can enable/disable the “Company Pay Taxes” toggle button as per their requirement i.e., If the company decides to pay taxes instead of a broker, they can enable the “Company Pay Taxes” toggle button.

The screenshot shows the 'Create Tax Invoices' dialog box. The 'Company Pay Taxes' toggle is turned on. The 'Federal Tax Payer' is set to 'PUGULK FED TAX SUPP' and the 'State Tax Payer' is set to 'PUGULK STATE TAX SUP'. There are 'OK' and 'Cancel' buttons at the bottom.

Then, the Federal Tax Payer and the State Tax Payer needs to be correctly entered accordingly.

If the company decides a broker should pay taxes, they can disable the “Company Pay Taxes” toggle button.

The screenshot shows the 'Create Tax Invoices' dialog box. The 'Company Pay Taxes' toggle is turned off. The 'Broker' is set to 'PUGULK BROKER SUPP'. There are 'OK' and 'Cancel' buttons at the bottom.

Once the Suppliers are entered accordingly in the 'Create Tax Invoices' dialog box, the Tax Invoices will be created accordingly.

21.9.3 POSTING THE SUPPLIER INVOICES – FOREIGN SUPPLIER INVOICE

The **View Invoices** command in the Incoming Nota Fiscal header can be used to View the created Supplier Invoices.

21.9.6 ADDITIONAL IMPORT COST HANDLING

In IFS Cloud, the Incoming Dispatch Advice can be used to register additional import costs informed by the customs broker after the Incoming Import Nota Fiscal has been created, already been approved by the Tax Authority or not, while the goods are still not received in the inventory.

For this purpose, the Purchase Charge Type used to handle the additional costs informed by the broker should be configured with Brazilian Charge Category as Additional Import Cost:

Purchase Charge Type

Site ▾ Charge Type ▾ Description ▾ Charge Group ▾ More ▾

Sort by ▾

FREIGHT
Site: MG01
Description: National Freight Charge

EXPENSE
Site: RJ01
Description: National Expense Charge

ADDCOST
Site: SP01
Description: Customs Additional Cost Charge

EXPENSE

Details

Distribute Charge By ▾ Invoicing Supplier ▾

Charge Price 0.00 BRL Charge Price incl Tax 0.00 BRL

Charge (%) ▾ Unit Charge ☐

Distribute on Receipt ☐ HSN/SAC Code ▾

Brazilian Charge Category ▾
Additional Import Cost

Tax

Tax Code ▾

Use Price Incl Tax ☐

Indicators

Intrastat Exempt ☐

With incoming Nota Fiscal in Approved status and good not received, the Charge can be entered in the Incoming Dispatch Advice and distributed across linked Purchase Order lines using the Core functionality. No tax determination is triggered with External Tax System during the transfer to the Purchase Order lines in this case. The Purchase Order amounts remain unchanged from a tax perspective. The Incoming Nota Fiscal values are not modified.

At the time of goods receipt, the distributed Charge amount is absorbed into inventory cost through the ARRCHG event (posting via M187 x M1) in ARRIVAL transaction of goods.

21.10 Incoming Nota Fiscal – Cancelled

The general rule stated by Brazilian government says that companies are allowed to Cancel Authorized Nota Fiscals up until 24 hours from the issue date and time. There are some scenarios that still allow cancellation even after 24 hours (can be connected to penalty fee or audit).

The **Send Cancel Request** command will send the request to cancel the referenced Nota Fiscal number.

22 Incoming Nota Fiscal for Services

22.1 Overview Legal Requirement

In Brazil, it's a legal requirement to issue a Nota Fiscal to register a transfer of ownership or possession of a good or a commercial activity provided by a company to an individual or another company that is doing business in Brazil. The Nota Fiscal must be authorized by the Brazilian Tax Authority by the service provider, and the authorized Nota Fiscal will be issued to the recipient company.

In situations where the Nota Fiscal records monetary value transfer between the parties, the Nota Fiscal is also intended for the collection of taxes and non-use features tax evasion.

22.2 Business Objectives

The primary business objective here is to enable a new Incoming Nota Fiscal type for Services in the **Incoming Nota Fiscal** page to support for services related business activities in Brazil.

This also seeks to support for the Tax handling in Incoming Nota Fiscal for Services, specifically in relation with Tax Withholding.

22.3 Process Overview

In IFS Cloud, Service Incoming Nota Fiscal could be entered manually by using the **Incoming Nota Fiscal** Page. User can enter an Incoming Nota Fiscal based on the DANFe document received from the supplier.

Note: Receiving the Incoming Nota Fiscal Automatically (NF-e), using the External Supplier Invoice Flow is not supported for the Incoming NF for Services flow. Each city in Brazil has the freedom to develop its own layouts for the files. Since Brazil has over 5000 cities and there is no standardized, unified layout that can be applied to facilitate the automatic upload process, in this solution, only the *manual entry of Service NF* is supported.

22.4 Prerequisites

The company must be set-up to use Brazilian localization, see the Company Set-Up chapter and the "Incoming Nota Fiscal" parameter must be enabled.

The supplier must be enabled for Tax Withholding in *Application Base Setup/Enterprise/Supplier/Invoice/Tax Information* tab.

The "Post Preliminary Tax Withholding" parameter located in Application Basic Setup/Enterprise/Company/Company/Tax Control/Invoice tab must be disabled to ensure correct withholding tax calculation in Brazilian withholding scenarios.

22.5 Define Basic Data

The supplier must be enabled for Tax Withholding in *Application Base Setup/Enterprise/Supplier/Invoice/Tax Information/ Tax withholding Reporting* tab.

Note: If there are connected POs make sure that the relevant Purchase Order number (or numbers) is entered in the field **PO Reference** in Incoming Nota Fiscal.

Enter the Incoming Nota Fiscal lines information referring the Services NF Received and save the lines.

Note: If there is a connected PO reference in the NF header, the core application functionalities “Copy Unmatched PO receipts” and “Copy Unreceived PO Lines” can be used to create non-Inventory related Incoming Nota Fiscal lines.

The screenshot shows the 'LINES' tab with a table of columns: Line ID, Tax Code, Tax Calculation Structure, Multiple Tax, BR Unit Price, Gross Amount, Gross Amount in Accounting Currency, Net Amount, Net Amount in Accounting Currency, and Tax Amount. The table is currently empty, showing '(No data)'.

Once the lines are saved, the newly introduced **Tax Lines, Withholding** command will be enabled.

The screenshot shows the 'LINES' tab with a single line. The 'Tax Lines, Withholding' button is highlighted with a purple box. The table shows one line with Line ID 1, Tax Code, Tax Calculation Structure, Multiple Tax (No), BR Unit Price 100.00, Gross Amount 100000.00, Gross Amount in Accounting Currency 100000.00, Net Amount 100000.00, Net Amount in Accounting Currency 100000.00, and Tax Amount 0.00.

Enter the Tax Withholding Information by referring to the Service NF document and save the line information.

The screenshot shows the 'Tax Lines, Withholding' dialog box. It contains the following information:

- Tax Lines Withholding Group:**
 - Fiscal Note Series: 009
 - Fiscal Note No: 091000774
 - Supplier: SAKWLK-BR-SUP - SAKWLK BRAZIL SUPPLIER
 - Withholding Base: Invoice Net Amount
 - Tax Curr Rate: 1
 - Gross Amount: 10000.00
 - Net Amount: 10000.00
- Line Details:**

Tax Code	Tax Type	Withholding Base Amount	Tax %	Tax Amount	Tax Amount in Accounting Currency	Tax Amount in Parallel Currency	Use Withholding Amount Table	Report Code	State
IRRF 10	Tax Withhold	10000.00	10	1000.00	1000.00	1000.00	No		

Buttons: OK, Cancel

Note: The default Tax Withholding Codes given for the supplier in Supplier/Invoice/Tax Information/ Tax withholding Reporting/ Default Tax Withholding Codes will not be copied to the “Tax Lines, Withholding” dialog. The Tax Withholding Codes for each Nota Fiscal item will be automatically fetched from the External Tax System during the Tax Calculation.

23 Support to Issue and Receive Manual Nota Fiscal

23.1 Overview Legal Requirement

In Brazil the Nota Fiscal is a mandatory official document that must be issued to prove the existence of a commercial act, e.g., sale of goods. It's a tax document that registers transfer of ownership or possession of a good or commercial activity provided by a company to an individual or another company that is doing business in Brazil.

The NF-e is the Nota Fiscal issued online, which allows real time reporting of transactions to the *Secretaria da Fazenda* (SEFAZ), which is the state government responsible for taxation and revenue.

There are some business scenarios that aren't related to sales and procurement flows. Therefore, the normal customer/supplier invoices are not required in all the Nota Fiscal types listed above, since these are about non-billable transactions on both incoming/outgoing sides. For the below mentioned NF scenarios, the inventory must be issued/received, and BR Taxes needed to be calculated.

Scenario	Description	IFS Application Used by	Outgoing Nota Fiscal Creation	Incoming Nota Fiscal Creation	Category
Warranty	The Company (The Customer) will send the Inventory Part (Warranty Part) to the Supplier	Customer	Customer	-	Outbound
	Customer Receives the warranty claimed part from the Supplier.	Customer	-	Customer	Inbound
	Supplier Receives the Warranty claimable inventory Part from the Customer	Supplier	-	Supplier	Inbound
	Supplier provides the warranty facility and sends the warranty claimed part back to the Customer	Supplier	Supplier	-	Outbound

Scenario	Description	IFS Application Used by	Outgoing Nota Fiscal Creation	Incoming Nota Fiscal Creation	Category
Repair & Maintenance	The Company (The Customer) will send the Inventory Part to the Supplier	Customer	Customer	-	Outbound
	Customer Receives the repaired part from the Supplier.	Customer	-	Customer	Inbound

	Supplier Receives the inventory Part to be repaired from the Customer	Supplier	-	Supplier	Inbound
	Supplier does the repair and maintenance and sends the part back to the Customer	Supplier	Supplier	-	Outbound

Scenario	Description	IFS Application Used by	Outgoing Nota Fiscal Creation	Incoming Nota Fiscal Creation	Category
Gifts	Supplier sends gifts to the Customer	Supplier	Supplier	-	Outbound
	Customer receives the gifts from the Supplier	Customer	-	Customer	Inbound

23.2 Other Business Objectives

1. Following Business Scenarios will be handled using BR –147.
 - Issuing and receiving goods to claim warranty
 - Issuing and receiving goods for repair and maintenance
 - Issuing and receiving goods as gifts
2. Enabling the Creation of Tax Only Invoices using the Core FOC functionality and handling the related postings

23.3 Process Overview

Scenario 01: The Company (The Company Uses the IFS ERP) will send the Inventory Part (Warranty Part / Maintenance Part) to the Supplier and supplier will do the repair and maintenance and then sends the Warranty part back to the Customer.

Sending the Inventory Part to the Supplier – (Recipient Supplier and the Issuer is the Customer)

The flow is as follows.

- Calculate the PO taxes.
- Create a Component Customer Order.
- Calculate the Component Customer Order taxes using AVALARA.
- Release the Purchase Order
- Component Customer Order will automatically come to the Invoiced/Closed level.
- Create the Outgoing Nota Fiscal
- Send the Outgoing Nota Fiscal
- Approve the Outgoing Nota Fiscal
- Create Tax Only Invoices
- Post the Tax Only Invoices

The Core **Component Customer Order functionality** will be used to send the Inventory part to the Supplier. The flow starts by creating a Purchase Order and entering the line details of the receiving inventory part from the Supplier after the repair/maintenance/warranty process. The user needs to define a Component part and connect that part to a Component Customer Order. An identical Customer related to the Supplier should be connected as a prerequisite to this flow.

The issuer has to pay the taxes in these types of NF scenarios and the sending party should be connected as the tax payer in the *Company Basic Data >> Tax Control >> Supply Chain >> Tax Payer for free of Charge >> Company*. The Core FOC functionality will be used to create the tax only invoices. The Component part should be selected as a **“Charge Item”** and upon releasing the Component Customer Order, Inventory transactions will be updated.

Country Solution Brazil 392

Receiving the Inventory Part back from the Supplier (Recipient Customer and the Issuer is the Supplier)

The flow is as follows.

- Create a Purchase Order
- Calculate the PO taxes using AVALARA.
- Release the Purchase Order
- Register the receipt of the goods
- Create the Incoming Nota Fiscal
- Approve the Incoming Nota Fiscal.
- Create the Tax only Invoices
- Post the Tax Invoices.

The normal Brazilian Incoming Nota Fiscal flow will be used to record the Incoming NF transactions. Upon approving the Incoming Nota Fiscal following Tax posting will be created. After registering the receipt of the Inventory items, the inventory transactions will be automatically updated.

Scenario 02: The Company (The Company Uses the IFS ERP) will receive the Inventory Part to be repaired/ warranty claimable (Warranty Part / Maintenance Part) from the Customer and supplier will do the repairs & maintenance and then sends the Warranty part back to the Customer.

Receiving the Inventory Part from the Customer (Issuer is the Customer and the Recipient is the Supplier)

The flow is as follows.

Create a Purchase Order (Goods are received from the Customer, therefore, the user should create an identical supplier for the Customer)

- Calculate the PO taxes using AVALARA.
- Release the Purchase Order
- Register the receipt of the goods
- Create the Incoming Nota Fiscal
- Approve the Incoming Nota Fiscal.
- Create the Tax only Invoices
- Post the Tax Invoices.

The normal Brazilian Incoming Nota Fiscal flow will be used to record the Incoming NF transactions. Upon approving the Incoming Nota Fiscal following Tax posting will be created. After registering the receipt of the Inventory items, the inventory transactions will be automatically updated. Normal Procurement related Supplier invoices needn't be created in these NF types and the tax only invoice will be generated. In order to create the tax only Invoices the user needs to enable the creation of Tax Only Invoice in the *Business Transaction Code* page >> *Business Transaction ID* >> *Tax Only Invoice*.

Sending the Inventory Part to the Customer– (Recipient Customer and the Issuer is the Supplier)

The Flow is as follows.

- Create a Customer Order and Calculate the AVALARA taxes.
- Release the Customer Order
- Create the Customer Invoice

Taxes needed to be calculated based on the Cost of the Part in **Company >>Tax Control >> Supply Chain >> FOC Tax Basis Source >> Part Cost**

For Outgoing Nota Fiscal scenarios, the equivalent functionality is provided by the Free of Charge option, which can be enabled directly on the Customer Order line. This allows the application to generate an Outgoing Nota Fiscal creating Customer Invoice only for tax posting purposes, excluding the goods' amount.

23.6 Delimitations

Tax Only Manual Supplier Invoice postings are enabled for Manual Incoming NF scenarios.

24 Support to Issue and Receive Complementary Nota Fiscal

24.1 Overview Legal Requirement

In Brazil the Nota Fiscal is a mandatory official document that must be issued to prove the existence of a commercial act, e.g., sale of goods. It's a tax document that registers transfer of ownership or possession of a good or commercial activity provided by a company to an individual or another company that is doing business in Brazil.

The NF-e is the Nota Fiscal issued online, which allows real time reporting of transactions to the Secretaria da Fazenda (SEFAZ), which is the state government responsible for taxation and revenue.

In cases where the tax amount or price stated in the Nota Fiscal is different than it should be, the Tax Authority allows the taxpayer to correct it by issuing a complementary Nota Fiscal. This new document refers to the previous one and includes the amount differences.

24.2 Other Business Objectives

Following business Scenarios will be handled using BR 146 – Complementary Nota Fiscal.

- Price Adjustment Scenarios
- Tax Inclusive and Exclusive Scenarios
- Enabling Outgoing Nota Fiscal handling in the New Manual Customer Invoice
- Handling No Tax Scenarios in both Incoming and Outgoing Nota Fiscals

24.3 Process Overview - Complementary Outgoing Nota Fiscal

Complement the Price, Inclusive and Exclusive taxes in the Outgoing Nota Fiscal

6. Approve the Incoming Nota Fiscal
7. Create the Manual Supplier Invoice
8. Manually handle the Postings
9. Post the Invoice

24.5 Prerequisites

The company must be set-up to use Brazilian localization, see the Company Set-Up chapter, and the “Outgoing Nota Fiscals” parameter must be enabled.

Note that also parameters “Acquisition Origin”, “Business Operation”, “Address Specific Tax ID Numbers”, “Goods/Services Statistical Codes”, “Extended Tax Codes Tax Calculation Structures set-up”, “Use Automatic Generation of Official Invoice Numbers” and “Cancel PostedAuth Customer Order Invoices” must be enabled to fulfill data requirements for the NF-e XML file. Please see the specific chapters on how to set up the data needed.

24.6 Define Basic Data

Define No tax code in the **Application Base Setup >> Enterprise >> Company >> Company >> Tax Control**

	Tax Code	Description	Tax Type	Tax (%)	Deductible (%)	Valid From	Valid To	Tax Method Tax Received	Tax Method Tax Disbursed	Tax Amount at Invoice Printout	Tax Amount Limit in Accounting Currency
☐	N	No Tax	No Tax	0	100	1/1/2024	12/31/2049	No Tax	No Tax	Separate from Price	

Fetch the Default No Tax Code in the **Company >> Tax Control >> No Tax Code for Incoming Nota Fiscal**

This will automatically create a Gross Zero invoice line in the Incoming Nota Fiscal.

- Charges are not handled in the Complementary Nota Fiscals.
- Cancellation, Error and Void Nota Fiscal lifecycles aren't handled.

25 Support to Issue Debit Nota Fiscal

25.1 Overview Legal Requirement

In Brazil Debit Notas Fiscais are the electronic fiscal document created by the tax reform to **formalize increases in the tax owed** (IBS/CBS) related to events that occur after the original nota fiscal was issued. It's operationalized within the NF-e itself, using finNFe = 6

- Debit nota fiscal : the issuer records an increase in the tax owed — and, on the other side, a reduction in the tax owed by the recipient/buyer.
- The Debit Nota Fiscal represents an increase in tax owed from the issuer's perspective, while the Credit Note represents a reduction.

The main goal is to ensure greater traceability and integration of tax assessment, replacing manual adjustments and allowing the tax authority to track changes linked to the original operations.

Key points on when issuance is required:

- Adjustments not documented via NF-e, or made only in the accounting system, have no fiscal effect on the assisted tax assessment — meaning without the note, the adjustment "doesn't exist" for tax authorities.
- If there's no adjustment to make, the company doesn't need to issue these notes — they're only used when there's a real need for correction.
- They're required for situations such as charging interest and penalties, renegotiating amounts, advance payments, inventory losses, among other cases.
- Every note must reference the original operation via access key, and NT 2025.002 determines that this link be made globally (refNFe), ensuring traceability without requiring complex item-by-item matching
- **Important restriction: IBS/CBS exclusivity**

These notes don't replace ICMS or IPI — they're exclusive to the new IBS and CBS taxes. This has a practical consequence:

- A type-04 debit note (interest and penalties), for example, won't contain ICMS information and won't be recorded in the EFD ICMS/IPI.
- Rejection 1001 blocks credit/debit notes that contain "old-era" taxes (ICMS, IPI, PIS, or COFINS).

25.2 Process Overview - Debet Nota Fiscal

Types of Debit Notas Fiscais:

Code Reason	Notes
01 Transfer of credits to Cooperatives	Issued by a Member (Regular Regime) to transfer to the Cooperative (Specific Regime) credits from acquisitions of goods/services supplied with a 100% rate reduction; limited to the Member's unused IBS credit balance

Code	Reason	Notes
02	Reversal of credit due to tax-exempt/immune outflows	Reversing previously appropriated credits when the outflow doesn't generate a tax debit
03	Debits from invoices not processed in the assessment	Regularizes IBS/CBS values from documents not correctly accounted for
04	Interest and Penalties	Used when issuing documents for IBS and CBS incidence upon receipt of interest and penalties; the taxpayer who pays them is entitled to the corresponding credit
05	Credit transfer in succession	Between companies in corporate succession operations
06	Advance payment	Used for future-delivery sales with advance payment, issued without ICMS, IPI, PIS, and COFINS highlighted
08	Simples Nacional de-framing	Records tax debit owed when the taxpayer exits the Simples Nacional regime

Issue Debit Nota Fiscal in the Outgoing Nota Fiscal

- 1) Go to the New Manual Customer Invoice and enable the Toggle Button “Debit Nota Fiscal” and Nota Fiscal Debit Type

➤ A user can include only a No Tax Line to make it a gross zero invoice line for the inclusive taxes and No Taxes (CBS/IBS).

- Manually handle the postings in the Manual Customer Invoice Setup
- Create the Debit Nota Fiscal
- View and Send the Debit Nota Fiscal
- Approve the Debit Nota Fiscal
- Create the postings upon the Approval of the Nota Fiscal

26 Support to Issue Credit Nota Fiscal

26.1 Overview Legal Requirement

In Brazil Credit Notas Fiscais are the electronic fiscal document document created by the tax reform to **record fiscal credits related to IBS and CBS**. It's operationalized within the NF-e itself, using finNFe = 5

It requires mandatory completion of the tpNFCredito field, which identifies the nature of the credit and sets specific issuance and taxation rules.

Unlike the Debit Note (which increases the tax owed), the Credit Note represents a **reduction in tax owed** or the **appropriation of a fiscal credit** in favor of the issuer.

The Credit Note must be used whenever there's a need to formalize fiscal credits linked to the IBS and CBS system, according to the credit types provided for in the layout. Key points:

- It doesn't replace regular adjustment, return, or complementary notas fiscais; its use depends on correctly framing the situation under one of the provided credit types.
- It must always be an Inbound operation (tpNF=0), since it represents a credit from the issuer's perspective.
- Without issuing the note, tax authorities won't recognize adjustments made only in accounting systems — no note, no fiscal effect.
- Every note must have a clear technical reason (tpNFCredito), reference the original operation when necessary, and use compatible CST and cClassTrib codes. Issuing a generic full-value adjustment note without justification is not allowed.

- Scope restriction: IBS/CBS exclusivity. Credit Notes are exclusive to IBS/CBS adjustments in principle, you cannot issue a credit note for ICMS, except for one specific exception (type 03 – Return), detailed below.

26.2 Process Overview - Credit Nota Fiscal

Types of Credit Notas Fiscais:

Code Reason

- 01 Interest and Penalties
- 02 Appropriation of presumed IBS credit on debit balance in the Manaus Free Trade Zone (ZFM)
- 03 Return due to **total** delivery refusal or recipient not found
- 04 Reduction of amounts or quantities
- 05 Credit transfer in corporate succession
- 06 Return due to **partial** delivery refusal

Issue Credit Nota Fiscal in the Incoming Nota Fiscal

- 1) Go to the Incoming Nota Fiscal page and select the Document Type as “**Credit Nota Fiscal and Nota Fiscal Credit Type**”

🏠 > Financials > Financial e-Reporting > Nota Fiscal and Bill of Lading > Incoming Nota Fiscal and Bill of Lading > Incoming Nota Fiscal and Bill of Lading 🔍

11. Create the Manual Supplier Invoice
12. Manually handle the Postings
13. Post the Invoice

27 Symbolic Shipments with Tax Document

27.1 Overview Legal Requirement

In Brazil the Nota Fiscal is a mandatory official document that must be issued to prove the existence of a commercial act, e.g., sale of goods. It's a tax document that registers transfer of ownership or possession of a good or commercial activity provided by a company to an individual or another company that is doing business in Brazil.

The NF-e is the Nota Fiscal issued online, which allows real time reporting of transactions to the *Secretaria da Fazenda* (SEFAZ), which is the state government responsible for taxation and revenue.

The **Symbolic Nota Fiscal** is used to handle scenarios where physical goods are either consumed, altered, or otherwise do not exist in their original form. They ensure that even though the physical item may no longer be present, the transaction is still properly documented to meet fiscal and regulatory requirements.

It is important to note that customer or supplier invoices are not required for Symbolic Nota Fiscals, as these relate to non-invoiced transactions on both the incoming and outgoing sides. Although inventory transactions, even if Inventory Part is used, cannot be issued or received in these cases, Brazilian taxes can still be calculated.

Business Scenarios in Handling Symbolic Nota Fiscal

Symbolic Nota Fiscal supports various business transactions where the recipient is not charged and physical goods are either consumed, altered, or otherwise do not exist in their original form such as the following.

1. Inventory count adjustments
2. Return of sample parts previously received
3. Extending the period for external warehousing for goods.

27.2 Process Overview

To facilitate the Brazilian legal requirement of handling Symbolic Nota Fiscals, the Incoming/Outgoing Tax Document objects are used, with some necessary additions, to address these requirements.

ISSUE OF AN OUTGOING SYMBOLIC NOTA FISCAL

RECEIPT OF AN INCOMING SYMBOLIC NOTA FISCAL

27.3 Prerequisites

The company must be set-up to use Brazilian localization, see the Company Set-Up chapter, and the “Outgoing Nota Fiscals” and “Incoming Nota Fiscals” parameters must be enabled.

The parameter “Integration to Brazilian External Tax System” should also be enabled to calculate the taxes through the 3rd party tax calculation engine Avalara.

27.4 Define Basic Data

To create the Outgoing and Incoming Tax Documents the toggle button “Create Tax Document” should be enabled in the **Company/Tax Control/Supply Chain** page.

SAKWLK BRAZIL - SAKWLK BRAZIL COMPANY 1 of 1

Company: SAKWLK BRAZIL, Name: SAKWLK BRAZIL COMPANY, Association No, Created By: SAKWLK

Tabs: GENERAL, INVOICE, **SUPPLY CHAIN**, EXTERNAL TAX SYSTEM

 Create Tax Document: ☒

Define other basic data relevant for the above-mentioned business scenarios, in the **Business Transaction Code** and **Business Operation** pages.

Application Base Setup > General Data > Business Transaction Code 23 Company: SAKWLK BRAZIL COMPANY

Business Transaction Codes

Q Search

Business Transaction ID	Description	Direction	Presence Type	Acquisition Reason ID	External Tax System Reference	Tax Only Invoice	Connected Business Transaction ID
140	Gift Or Sample	Outbound	Non-Presence	RS	demonstrationShippingOutbound	No	
150	Gift Or Sample	Inbound	Presence-Onsite		returnOfDemonstrationShippingInbound	No	

Applicable basic data should exist for Supplier, Customer, Site and Inventory Part/s defined in the company.

27.5 Issue of an Outgoing Symbolic Nota Fiscal

An Outgoing Symbolic Nota Fiscal can be issued by a Company for either a Customer or a Supplier depending on the Business Scenario. Therefore, the Issuer for an Outgoing Symbolic Nota Fiscal will always be the Company’s site and the Receiver of the Nota Fiscal will be a Customer or a Supplier. To facilitate this requirement the “Outgoing Tax Document” functionality is used.

Navigate to “Outgoing Tax Document” in **Warehouse Management/Intracompany Tax Reporting/Tax Document/Outgoing Tax Document** page. Add a new record for a Tax Document manually with the enablement of a new button in the Outgoing Tax Document page.

Inform the specific "Business Transaction ID" in Brazil Specifics and save the Tax Document. Once saved, the "Series" should also be informed in the Official Document Number.

Outgoing Tax Document provides support for Inventory Parts, Non-Inventory Sales Parts and Non-Inventory Purchase Parts for Symbolic transactions.

Go to Lines tab and select the Part Source. Based on the selected source, choose the appropriate Inventory Part in the Inventory Part No field or the Non-Inventory Sales Part/Purchase Part from the Part No List of Values.

Line-based information, such as Acquisition Reason, Acquisition Origin, and Goods/Service Statistical Codes, is automatically retrieved from the selected part source.

The “Unit Cost” defined for the selected Inventory Part will be automatically fetched for the “Price” and can be modified if needed. Save the lines and use the “Fetch External Tax” command to calculate taxes through Avalara.

When the command button Fetch External Taxes is clicked, a request for tax determination is sent to the external tax system Avalara. The Brazil unit price returned by Avalara is recorded in the Outgoing Tax Document line, along with all tax details, which are recorded in the Tax Lines dialog for each item.

27.6 Receipt of an Incoming Symbolic Nota Fiscal

An Incoming Symbolic Nota Fiscal can be received by a Company from either a Customer or a Supplier depending on the Business Scenario. Therefore, the Receiver for an Incoming Symbolic Nota Fiscal will always be the Company and the Issuer of the Nota Fiscal will be a Customer or a Supplier. To facilitate this requirement a new Document Type, "Symbolic Nota Fiscal" has been introduced in the "Incoming Nota Fiscal and Bill of Lading" page.

Navigate to **Financials/Financial e-Reporting/Nota Fiscal and Bill of Lading/Incoming Nota Fiscal and Bill of Lading** page and create a new Incoming Nota Fiscal setting the Document Type as "Symbolic Nota Fiscal".

27.8 Delimitations

Charges such as Freight, Insurance, and Expenses will not be handled in this flow, as Charges are not supported in the Tax Document.

The option to enter Non-Inventory Parts in the Outgoing Tax Document Lines will not be supported in this release.

Additional delimitations may apply; all relevant flows should be tested to ensure completeness.

28 Discounts in Incoming and Outgoing Nota Fiscals

28.1 Overview Legal Requirement

In Brazil the Nota Fiscal is a mandatory official document that must be issued to prove the existence of a commercial act, e.g., sale of goods. It's a tax document that registers transfer of ownership or possession of a good or commercial activity provided by a company to an individual or another company that is doing business in Brazil.

The NF-e is the Nota Fiscal issued online, which allows real time reporting of transactions to the Secretaria da Fazenda (SEFAZ), which is the state government responsible for taxation and revenue.

In both Incoming and Outgoing Nota Fiscal, discounts are mandatory to be specified at the line-item level, whenever applicable.

28.2 Prerequisites

The company must be set-up to use Brazilian localization, see the Company Set-Up chapter, the “Outgoing Nota Fiscal” and “Incoming Nota Fiscal” parameters must be enabled.

Note that also parameters “Acquisition Origin”, “Business Operation”, “Address Specific Tax ID Numbers”, “Goods/Services Statistical Codes”, “Extended Tax Codes Tax Calculation Structures set-up”, “Use Automatic Generation of Official Invoice Numbers” and “Cancel PostedAuth Customer Order Invoices” must be enabled to fulfill data requirements.

The basic data related to the Incoming Nota Fiscal – automatic (XML) flow also needs to be set up. Please see the specific chapters on how to set up the data needed.

Tax Calculation incorporating Discounts in the Incoming Nota Fiscal

In the Incoming Nota Fiscal, the user can use the '**Fetch External Tax**' command to calculate taxes for both inventory and non-inventory parts, incorporating discounts. The Discount Amount, Amount Before Discount, and Discount Percentage fields will be enabled in the Incoming Nota Fiscal lines after fetching the AVALARA taxes.

28.5 Delimitations

- Payment- and receipt-level cash discounts are not considered in this development.
- The user cannot use the Matching option to create automatic postings in the Manual Supplier Invoice; therefore, postings must be handled manually.
- Tax calculation in the Customer Invoice using the Additional Discounts and Group Discounts options is disabled at the Customer Invoice level.
- Charges are not supported in either Incoming or Outgoing Nota Fiscals.
- The "Amount Before Discount" field in the Incoming Nota Fiscal lines will not be calculated correctly when the Incoming Nota Fiscal is created through the **External Supplier Invoice Load Information** page.

Additional delimitations may apply; all relevant flows should be tested to ensure completeness.

29 Source Nota Fiscal linked to an already issued or received Inc or Out Nota Fiscal

29.1 Overview Legal Requirement

The referenced Nota Fiscal information within an issued or received NF-e is a fundamental requirement of the Brazilian electronic invoicing model, as it establishes the formal relationship between fiscal documents associated with a commercial transaction. The Brazilian NF-e framework, governed by tax legislation and the official SEFAZ layout specifications, requires the reference of prior fiscal documents in several business scenarios, including returns, complementary invoices, fiscal adjustments, symbolic remittances, goods return, and correction-related processes.

The primary purpose of this reference mechanism is to ensure fiscal traceability throughout the transaction lifecycle, enabling tax authorities to identify the origin of the operation and maintain consistency between the information declared by both issuer and recipient. Properly referencing related fiscal documents also helps prevent tax inconsistencies, accounting discrepancies, and potential rejections during the NF-e authorization process.

From an operational and compliance perspective, the linkage between fiscal documents plays a critical role in supporting audits, internal controls, and tax validations, particularly in complex scenarios involving tax credits, partial returns, cancellations, or symbolic movements of goods. In many cases, the absence of a referenced NF-e may compromise the correct fiscal treatment of the transaction, either within the ERP system or during SEFAZ validation procedures.

Additionally, certain operation types are subject to mandatory validation rules that require a referenced NF-e before authorization can be granted. For this reason, providing accurate referenced Nota Fiscal information should not be viewed merely as a recommended practice, but rather as an essential compliance requirement within the Brazilian electronic invoicing environment.

29.2 Process Overview

Link an Incoming Nota Fiscal to an already issued Outgoing Nota Fiscal

Link an Outgoing Nota Fiscal to an already received Incoming Nota Fiscal

29.3 Prerequisites

The company must be set-up to use Brazilian localization, see the Company Set-Up chapter, the “Outgoing Nota Fiscal” and “Incoming Nota Fiscal” parameters must be enabled.

Note that also parameters “Acquisition Origin”, “Business Operation”, “Address Specific Tax ID Numbers”, “Goods/Services Statistical Codes”, “Extended Tax Codes Tax Calculation Structures set-up”, “Use Automatic Generation of Official Invoice Numbers” and “Cancel PostedAuth Customer Order Invoices” must be enabled to fulfill data requirements.

The basic data related to the Incoming Nota Fiscal – automatic (XML) flow also needs to be set up. Please see the specific chapters on how to set up the data needed.

29.4 Define Basic Data

To comply with the regulations applicable to return scenarios, with respect to notas fiscais issued for return purposes where the finNFe attribute of the electronic nota fiscal must mandatorily be generated with the value 4 – Return, a new toggle has been created on the Business Transaction Code page, called Return Purpose.

29	B25	finNFe	Finalidade de emissão da NF-e	E	B01	N	1-1	1	1=NF-e normal; 2=NF-e complementar; 3=NF-e de ajuste; 4=Devolução de mercadoria.
----	-----	--------	-------------------------------	---	-----	---	-----	---	---

When this toggle is enabled on the Business Transaction selected in the header of the incoming or outgoing nota fiscal, and the nota fiscal’s Document Type is set to “Goods Nota Fiscal” or “Symbolic Nota Fiscal”, then when the nota fiscal is sent for SEFAZ authorization, the finNFe attribute will be generated with the value 4 – Return in the JSON file sent to the External Tax System.

Business Transaction ID	Description	Direction	Presence Type	Acquisition Reason ID	External Tax System Reference	Tax Only Invoice	Connected Business Transaction ID	Coastal Shipping	Return Purpose
100	Venda de Mercadoria	Outbound	Presence-Onsite	RS	standardSales	No			No
101	Remessa para Demonstração	Outbound	Presence-Onsite	PR	demonstrationShippingOutbound	No			No
102	Retorno de Mercadoria	Inbound	Non-Presence	RS	salesReturn	No			Yes
103	Outras Saídas	Outbound	Presence-Onsite	PR	gOut949	No			No

When this toggle is disabled on the Business Transaction selected in the header of the incoming or outgoing nota fiscal, and the nota fiscal is sent for SEFAZ authorization, it will use the existing rules in the application according to the nota fiscal's Object Type.

29.5 Validations

Incoming and Outgoing Flows

To ensure that the Business Transaction Code used in the header and lines of certain processes has this toggle set with the same configuration, a validation has been added to prevent the header and line Business Transactions from having different Return Purpose settings.

This validation has been included on the following pages: Sales Quotation, Customer Order, Order Quotation, Purchase Order, and Incoming Nota Fiscal and Bill of Lading (for incoming notas fiscais where Self Issue is set to False), where the validation message will be displayed inside the Log Analysis command button right after the nota fiscal is approved.

When the Business Transaction in the header or line is changed to another code whose configuration differs between the header and the line, the following validation message will be displayed, preventing the change from being completed.

The screenshot shows the 'Sales Quotation' interface. At the bottom right, a red notification box displays the message: "The Return Purpose toggle on the Business Transaction Code must match across the Sales Quotation header and all lines." The interface includes a sidebar with a list of quotations (P1292, P1055, P1056, P1057, P1058, P1033, P1049, P1071) and a main area showing details for P1292, including sales quotation amounts and a table of lines.

The message: "The Return Purpose toggle on the Business Transaction Code must match across the X header and all lines," will be displayed, where X is the page name.

29.6 Link an Incoming Nota Fiscal to an already issued Outgoing Nota Fiscal

To comply with regulations applicable to scenarios where a referenced Nota Fiscal is required, such as container returns, among others, the Nota Fiscal Reference section, previously supported only for the Incoming Nota Fiscal type Customer Return, is now also available for other document types, including Goods Nota Fiscal, Import Nota Fiscal, Symbolic Nota Fiscal, and Complementary Nota Fiscal, while the Nota Fiscal is in Initiated or Error status.

After the Incoming Nota Fiscal header is created and saved, the user will be able to select an Outgoing Nota Fiscal in the list of values of the Nota Fiscal ID field.

The details will then be populated in this section, including Nota Fiscal Number, Document Type, Alt Object Reference (if any), Status, and NF-e Key and only one referenced nota fiscal can be linked in this way.

If the user attempts to enter a second referenced nota fiscal, the message “Only one Nota Fiscal Reference can be associated” will be displayed, preventing the inclusion of the second referenced nota fiscal.

Nota Fiscal ID	Nota Fiscal Number	Document Type	Alt Object Reference	NF-e Key	Status
2684	000201287	Symbolic Nota Fiscal	352800041062300001905013000201287000028842		Approved

The logic behind the refNFe attribute in the JSON file generated for Tax Determination and NF-e integration has been adjusted, so that the access key is retrieved from the Nota Fiscal Reference section whenever this information is available, ensuring that it is always fetched in a standardized and consistent manner across all scenarios.

For the Supplier Return Nota Fiscal, the referenced Nota Fiscal details in the Nota Fiscal Reference section will be automatically populated when the Nota Fiscal is created through the New Manual Supplier Invoice flow. Please see the specific chapters on how to set up the data needed.

For the Complementary Nota Fiscal, the referenced Nota Fiscal details in the Nota Fiscal Reference section will be automatically populated when the Nota Fiscal is created through the New Manual Customer Invoice flow. Please see the specific chapters on how to set up the data needed.

30 Handling Of Transport Related Attributes In Incoming and Outgoing Nota Fiscal

The Brazilian Tax Authority (SEFAZ) requires transportation information to be included in the electronic Nota Fiscal (NF-e). Depending on the business scenario, the application automatically retrieves most transportation attributes from the originating business document, while allowing users to maintain additional information before the Nota Fiscal is communicated to SEFAZ.

The transportation information includes:

- Forwarder

- Delivery Terms
- Ship Via Code
- Weights
- Volumes
- Vehicle Information
- Transport-related tax registrations

30.1 Process Overview

Transportation information is populated when an Incoming or Outgoing Nota Fiscal is created.

The source of each attribute depends on the originating business flow (Customer Order, Shipment, Purchase Order, etc.). Most values can still be modified directly in the Nota Fiscal before it is communicated to the Brazilian Tax Authority.

30.2 Basic Data

Before transportation information can be used in the Nota Fiscal, the Forwarder must be configured in the application.

From a business perspective, the Forwarder represents the company responsible for arranging the transportation. In many cases, the Forwarder is not the actual carrier but instead hires another transportation company to perform the shipment. Configure the Forwarder in Application Base Setup > Enterprise > Forwarder then associate the corresponding Supplier with the Forwarder.

Forwarder	Name	Association No
UPS	United Parcel Service	

Supplier

UP UPS - UPS-Delivery partner

The Brazilian tax registration numbers required for NF-e are maintained in: Application Base Setup > Enterprise > Supplier > Address > Document Tax Information

Supplier		Name	
UPS		UPS-Delivery partner	
Address ID: UPS AD1 ▼			
Supplier's Own Address ID		Supplier Name	
GENERAL ADDRESS INFORMATION		DELIVERY TAX INFORMATION	
DOCUMENT TAX INFORMATION			
▼	(1) ✓	Company	Tax ID Type

ADDRESS SPECIFIC TAX ID NUMBERS			
✓		Tax ID Type	Tax ID Number
☐	⋮	CNPJ	19940987654321
☐	⋮	STATE_REG	20220804

30.3 Transportation Information in Incoming and Outgoing Nota Fiscal

Most transportation attributes are automatically retrieved from the originating business flows. Some information must be entered manually before the Nota Fiscal is communicated to SEFAZ.

Field	Usage	Fetches From / Remarks
Vehicle License Plate	License plate of the vehicle transporting the goods.	Can be entered or modified manually.
Vehicle State	State where the vehicle is registered.	Can be entered or modified manually.
Vehicle Country	Country where the vehicle is registered.	Can be entered or modified manually.
Forwarder	Identifies the carrier responsible for transporting the goods.	Fetches from the Customer Order, Shipment, or Purchase Order, depending on the business flow. Can be changed using the LOV in the Incoming and Outgoing Nota Fiscal pages.

Forwarder Document Address	Defines the document address of the carrier.	Fetches from the Forwarder master data (default document address). Can be changed using the LOV.
Supplier	Identifies the supplier connected to the selected forwarder.	Automatically fetched from the forwarder master data.
Supplier Document Address	Defines the supplier's document address.	Fetches from the default document address of the forwarder-connected supplier. Can be changed using the LOV.
Forwarder CNPJ	Defines the CNPJ registration of the carrier.	Fetches from the Tax ID Numbers of the forwarder-connected supplier.
Forwarder State Registration	Defines the State Registration of the carrier.	Fetches from the Tax ID Numbers of the forwarder-connected supplier.
Forwarder City Registration	Defines the City Registration of the carrier.	Fetches from the Tax ID Numbers of the forwarder-connected supplier.
Forwarder SUFRAMA Registration	Defines the SUFRAMA registration of the carrier.	Fetches from the Tax ID Numbers of the forwarder-connected supplier.
Forwarder CNAE Registration	Defines the CNAE registration of the carrier.	Fetches from the Tax ID Numbers of the forwarder-connected supplier.
Net Weight	Defines the total net weight of the goods.	Calculated from the total net weight of all Nota Fiscal lines based on the Master Part data. Can be modified in the Incoming and Outgoing Nota Fiscal pages.
Gross Weight	Defines the total gross weight of the shipment.	For Shipment flows, fetched from the Shipment. Otherwise, calculated from the reserved parts. Can be modified in the Incoming and Outgoing Nota Fiscal pages.
Volume Quantity	Defines the number of shipping packages transported.	Can be entered or modified manually. Volumes represent the physical shipping units, such as boxes, pallets, crates, or drums.
Volume Type	Defines the type of shipping package used to transport the goods.	Can be entered or modified manually. Examples include boxes, pallets, crates, drums, and other packaging units.
Volume Numbers	Defines the identification assigned to each shipping package or volume.	Can be entered or modified manually. Used to uniquely identify individual packages during transportation and logistics operations.
Volume Labels	Defines the marks or labels printed on the shipping packages or volumes.	Can be entered or modified manually. Examples include "ACME", "LOT A", "PALLET 01", "BOX 15", and "EXPORT".
Delivery Terms	Defines the delivery terms applicable to the shipment.	Fetches from the Customer Order, Shipment, or Purchase Order, depending on the business flow. Can be changed using the LOV.
Ship Via Code	Defines the transportation method used for the shipment.	Fetches from the Customer Order, Shipment, or Purchase Order, depending on the business flow. Can be changed using the LOV.

31 Correction Letter for NF-e

31.1 Overview Legal Requirement

The Correction Letter (CC-e) is an electronic document used to amend information in an Electronic Nota Fiscal (NF-e) previously issued and authorized by the Tax Authority (SEFAZ). This correction can only be made for errors that do not change fiscal values, total amount, taxes, or recipient information (name, CNPJ). Tax Authority allow issuing up to 20 correction letters per Nota Fiscal.

31.2 Process Overview

31.3 Prerequisites

The company must be configured to use Brazilian localization (refer to the Company Setup chapter). Additionally, the 'Integration to Brazilian External Tax System' parameter must be enabled. Ensure that the series used for issuing Nota Fiscal is unselected for Manual Issue Nota Fiscal in the 'Official Document Numbers' settings.

31.4 Issue Correction Letter

Goods Nota Fiscal can be issued through different flows in the application. Once the Nota Fiscal has been created, integrated with the Tax Authority (SEFAZ), and authorized, a Correction Letter can be issued if adjustments are required.

Click the command button Correction Letter:

CONDIÇÕES DE USO DA CARTA DE CORREÇÃO

A Carta de Correção é disciplinada pelo parágrafo 1º do art. 7º do Convênio S/N, de 15 de dezembro de 1970 e pode ser utilizada para regularização do erro ocorrido na emissão de documento fiscal, desde que o erro não esteja relacionado com:

- I - as variáveis que determinam o valor do imposto tais como: base de cálculo, alíquota, diferença de preço, quantidade, valor da operação ou da prestação;
- II - a correção de dados cadastrais que implique mudança do remetente ou do destinatário;
- III - a data de emissão ou de saída.

The Brazilian Tax Authority allows taxpayers to issue up to 20 Correction Letters (CC-e) for the same Nota Fiscal. Each new Correction Letter supersedes the previous one, therefore only the latest authorized Correction Letter is considered valid. When issuing a new Correction Letter, it must include all corrections that should remain applicable to the Nota Fiscal.

32 Tax Events for CBS/IBS

32.1 Overview Legal Requirement

The tax events are electronic records linked to the Brazilian electronic invoice (NF-e / NFC-e). They complement notas fiscais information without canceling or replacing the document for purposes of calculating IBS (Tax on Goods and Services), CBS (Contribution on Goods and Services under Brazil's new Consumption Tax Reform).

These events allow companies to register specific stages of the taxable event or tax-relevant situations that affect credits, adjustments, payment confirmation, and goods allocation.

These events become part of the mandatory ancillary obligations within the NF-e lifecycle.

Events:

Event Code	Description	Responsible
112110	Information on full payment made to enable presumed credit for the purchaser. (Header)	Issuer
112130	Perishing, loss, theft, or robbery during transportation arranged by the supplier.	Issuer
112140	Delivery not completed despite advance payment.	Issuer
112150	Update to the estimated delivery date.	Issuer
112120	Import in Free Trade Zone (ALC/ZFM) not converted into exemption.	Issuer(Importation Notas Fiscais)
211110	Request for appropriation of presumed credit.	Recipient
211124	Perishing, loss, theft, or robbery during transportation arranged by the purchaser.	Recipient
211128	Acceptance of debit in tax calculation due to credit note issuance. (Header)	Recipient
211130	Item allocated to fixed assets (capital goods).	Recipient
211140	Request for appropriation of fuel credit.	Recipient
211150	Request for appropriation of credit for goods/services dependent on purchaser's activity.	Recipient
212110	Response to IBS credit transfer request in succession operations.	Recipient
212120	Response to CBS credit transfer request in succession operations.	Recipient
412120	Tax Authority response regarding IBS credit transfer in succession operations.	Recipient
412130	Tax Authority response regarding CBS credit transfer in succession operations.	Recipient

32.2 Process Overview

Events for Outgoing Nota Fiscal

Events for Incoming Nota Fiscal

32.3 Prerequisites

The company must be configured to use Brazilian localization (refer to the Company Setup chapter). Additionally, the 'Integration to Brazilian External Tax System' parameter must be enabled and Use CBS/IBS Tax.

32.4 Send Outgoing Nota Fiscal event for CBS/IBS

Goods and Services Nota Fiscal can be issued through different flows in the application. Once the Nota Fiscal has been created, integrated with the Tax Authority (SEFAZ), and authorized, it complies with the rules for issuing event for CBS/IBS.

Notes:

- Not all Outgoing Notas Fiscais for goods/services are eligible for sending the event to SEFAZ (the Brazilian Tax Authority).
- Each event dynamically enables the necessary fields for its submission.

Click the command button Send Events and select one:

32.5 Send Incoming Nota Fiscal event for CBS/IBS

Goods and Services Nota Fiscal can be issued/Approved through different flows in the application. For the Incoming Notas Fiscais issued (Import Nota Fiscal and Self Issue), once the Nota Fiscal has been created, integrated with the Tax Authority (SEFAZ), and authorized, It complies with the rules for issuing event for CBS/IBS. For the Incoming Notas Fiscais without self Issue, once the Nota Fiscal has been Approved, It complies with the rules for issuing event for CBS/IBS integrated.

Notes:

- Not all Incoming Notas Fiscais for goods/services are eligible for sending the event to SEFAZ (the Brazilian Tax Authority).
- Each event dynamically enables the necessary fields for its submission

Click the command button Send Events and select one:

The screenshot shows the IFS application interface for 'Incoming Nota Fiscal and Bill of Lading'. The document number is 001 - 10089402. The document type is 'Goods Nota Fiscal'. The sender is 'BR DOMESTIC SUPP - NF-E EMITIDA EM AMBIENTE DE HOMOLOGAÇÃO - SEM V...'. The site is 'SP01' and the PO Reference is 'P100894'. The document series is '001' and the fiscal document model is '55'. The document number is '10089402' and the object type is 'Manual Supplier Invoice'. The issue date is '18/02/2026'. The object reference is '0015510089402' and the object reference status is 'Posted'. The currency rate is '1'. The 'Send Events' dropdown menu is open, showing the following options: Presumptive Credit Appropriation Request, Loss/Damage During Buyer Transport, Debit Acceptance Due to Credit Note, Asset Immobilization, Fuel Credit Appropriation Request, Credit Request for Activity-Based Goods/Services, IBS Credit Transfer in Succession, CBS Credit Transfer in Succession, Allocation of item for Personal Use, and Event Cancellation.

The application communicates the event to Tax Authority (Sefaz) via integration with external tax system Avalara.

Once event dialog is closed, the event is submitted, an event submission history will be generated. If the event is not approved it's possible to send the event again. If the event is approved and needs to be cancelled, you can submit the event cancellation request.

33 Boleto – Bank Collection Bill

33.1 Overview Legal Requirement

Boleto is an accounts receivable document used to receive money from customers. This is not a legal requirement but is a widely used business requirement. This document is a copy of the customer invoice and can be paid in any institution or bank, until the due date.

There are enough key elements in the Boleto so the payer can easily identify all data needed to make the right compensation of the amounts.

It is estimated that 50 million of Boletos are paid monthly in Brazil.

The system covers Boleto for following Brazilian banks: **Bradesco, Itaú, Santander, Banco do Brasil, and Caixa Econômica Federal.**

33.2 Solution Overview

- Boleto functionality should be enabled on company level and the Payment basic data for specific bank should be defined.
- Boleto could be printed soon after the Customer Invoice is set to the status “PostedAuth”.
- The amount is compensated in the company’s bank account just after the customer process the Boleto’s payment and can be identified manually or automatically by using a file integration (core process).

- Boleto's layout - Each bank has a specific layout for the Boleto printout. This document describes the solution for bank Bradesco.

33.3 Process Overview

33.4 Prerequisites

The company must be set-up to use Brazilian localization, see the Company Set up chapter. The 'Boleto – Bank Collection Bill' parameter under the **Localization Control Center** tab must be enabled on the *Company/Localization Control Center* tab. The **Customer Invoice Creation Method** field should be set to 'Brazilian Boleto' on the *Company/Invoice/General* tab.

33.5 Define Basic Data

Payment Format per Company:

Select the Customer Payment Format Id that will be used to print the Boleto. After selection, the Payment Format it will be available for use in the company.

Payment Formats per Company													
	Payment Format ID	Format Description	Used in Company	Allowed Currencies	Payment Party Type	Input/Output Type	Repeatable Output	Format Instruction	Incoming File Template	Outgoing File Template	Payment Advice as a Single Print Job	Generate Payment Advice	Allow Negative Amount
☐	BR237CUST	Brazilian format for bank BRADE	☒	BRL	Customer	FILE	☒	On Plan or Spec Date	CUP_BR_23	CUST_GEN_	☐	☐	☐

Payment Method:

Enter a new Payment Method and connect to Payment Format in **Financials/Payment Basic Data/Cash Book/Payment Methods** page.

Payment Methods					
	Payment Method	Description	Format ID	Generate Trace Information	Cash Account In Any Currency
☐	BR237CUST	Brazilian format for bank BRADESCO, customer	BR237CUST - Brazilian format for bank BRADESCO, customer	☒	☐

Payment Institutes:

Define Payment Institute for bank in **Financials/Payment Basic Data/Cash Book/Payment Institutes** page. The field **Our Identity** should be filled with the number of the bank and respective control digit because it is important information to be printed in the Boletto.

Payment Institute	Our Identity	Description	Use Value	Date For	Matching	Cash	Box
BANK	237-7	Bank	Yes	No			

Payment Institute Offices:

Define a Payment Institute Office to be used in the Cash Account that will be used to print the Boletto in **Financials/Payment Basic Data/Cash Book/Payment Institute Offices**.

Payment Institute	Office Code	Description	Address1	Address2	Address3
BANK	1234	Bradesco Office			

Cash Account:

After creating Payment Institute and Payment Institute Office it is necessary to create the Cash Account that will be used to print the Boletto in **Financials/Payment Basic Data/Cash Book/Cash Account** page. The field **Short Name** can be used to define the unique identifier of the Cash Account in the system. Fill the **Office Code** column using LOV, the **Account Number** column should be filled with the account number and the control digit of the account, as the picture below:

Short Name	Description	Payment Institute	Office Code	Currency	Account Number	Account Reference	BIC/Swift Code	Default Flag	International Cash Account
BANK	Bank	BANK	1234	BRL	123456-7			Yes	No

Format Specific Info per Institute:

Make sure that all Boletto definitions are filled in **Financials/Payment Basic Data/Cash Book/Payment Institutes/Payment Methods per Institute/Format Specific Information per Institute**. Enter record in **Format Specific Info per Institute** page using cash account defined previously. This definition can be found in the Bank's documentation related to the layout of the Boletto. Start value mentioned here is the "Our Number" in Boletto layout.

In this page both the IFS Customer Invoice number as well as the Official Invoice number (represented by Nota Fiscal series concatenated with Nota Fiscal number) can be used when searching for Boletos.

33.6.3 BOLETOS HISTORY

Boletos History is a page that contains all the history actions performed on the *Boletos Manager* page. Once a Boletto document is printed, canceled or reprinted, it is possible to follow all the actions and have a complete history simply by analyzing this page.

Boletos History												
✓	:	History ID	User ID	Hist Date	Customer	Customer Name	Printed	Series ID	Invoice No	Official Invoice No	Installment ID	Currency

33.7 Delimitations

Only five Brazilian banks are covered by this solution:

- Bradesco
- Itaú
- Santander
- Banco do Brasil
- Caixa Econômica Federal

34 Self-Billing Invoices in Brazil

34.1 Overview Legal Requirement

In Brazil, it's a legal requirement to receipt a Nota Fiscal for the business transactions related to procurement transactions and referred as Incoming Nota Fiscal. The Nota Fiscal must be authorized by the Brazilian Tax Authority prior to shipment of goods and the printed version of Nota Fiscal (DANFE – Auxiliary Document for e-Nota Fiscal) is used to support the transportation of goods to the recipient's locations.

The Nota Fiscal must be received by the goods recipient before the goods is received into inventory.

All inventory transactions created from procurement must be identified by the Nota Fiscal number and Nota Fiscal item. These references are used when submitting tax reporting to the Tax Authority at the end of tax period. These references might also be required in Tax Audits. The references are also widely used in the daily operations in Brazilian companies.

Note: The Primary business objective here is to enable the Supplier side Self-Billing functionalities in Brazilian localization to further support the above described, Incoming Nota Fiscal flow.

34.2 Other Business Objectives

1. Enabling the possibility of entering the Incoming Nota Fiscal prior to the goods arrival.
2. Enable direct cross reference between Incoming NF, Receipt Reference and Supplier Invoice by automatically filling the Receipt Ref as Incoming NF No.

34.3 Process Overview

- a. Enable Supplier for Self-Billing invoicing (Core functionality)

Incoming Nota Fiscal could be received to IFS Cloud in two ways,

- b. Receive Incoming Nota Fiscal either,
 1. Automatically (NF-e) – Using External Supplier Invoice Flow or,
 2. Enter Incoming Nota Fiscal Manually – Using **Incoming Nota Fiscal** Page
- c. Once the Incoming Nota Fiscal is created, application is validate whether the Supplier is Self-Billing enabled and, from the Incoming Nota Fiscal page user can receive the Goods by using the newly introduced option “Receipt Goods”.
- d. Finally, user can create the inventory transactions related to the goods receipt and process Manual Supplier Invoice.

34.4 Process Overview

34.5 Prerequisites

The company must be set-up to use Brazilian localization, see the Company Set up chapter. And the “Incoming Nota Fiscal” parameter under the **Localization Control Center** tab must be enabled on the *Company/Localization Control Center* tab. The **Supplier should be enabled for Self-Billing Invoicing**.

34.6 Define basic data

The **Supplier should be enabled for Self-Billing Invoicing**.

Invoice BRAZIL SUPPLIER 01 - SAKWLK BRAZIL/SUP 2 of 2

34.7 Self-Billing: Receive Incoming Nota Fiscal and Supplier Invoice Flow

IFS Cloud standard External Supplier Invoice flow or the manually entering Incoming Nota Fiscal flow could be used in this scenario to facilitate Self billing supplier invoices.

Please refer the details in the process described step by step in related above chapters to how to create Incoming Nota Fiscal in Brazilian context.

34.7.1 CREATE AND HANDLE PURCHASE ORDER

Follow the IFS standard Core process to enter a purchase order for inventory purchase parts in the **Procurement/Order/Purchase Order** page. Release and confirm purchase order.

34.7.2 Receive Incoming Goods and create the Incoming Nota Fiscal (Manually or Automatically)
Use IFS Core External Supplier Invoice flow to load the incoming NF-e XML and create the NFe using **Create Nota Fiscal** command or create an Incoming Nota Fiscal manually.

34.7.3 APPROVE INCOMING NOTA FISCAL

The step of Approve incoming nota fiscal will validate whether the supplier is enabled for self-Billing.

34.7.6 SAME CROSS REFERENCE FOR THREE IMPORTANT DOCUMENTS

Once completed, the same reference number should exist for all the three documents: Incoming Nota Fiscal, Receipt Reference and the Manual Supplier Invoice.

34.8 Delimitations

Supplier Self-Billing in Subcontract Management is not supported in the Project Invoice – Initial Solution.

Additional delimitations may apply; all relevant flows should be tested to ensure completeness.

35 External Brazilian Reporting

35.1 Overview Legal Requirement

In Brazil the Legal Reporting are a mandatory official files that must be send Brazilian Federal Revenue Office. These files are related to taxes, accounting, inventory, services, etc. The official name for the legal reporting is “SPED Project”.

Public Digital Bookkeeping System (Sped). It is a technological solution that formalizes the digital files of taxes and accounting bookkeeping of business systems within a specific and standardized format.

Instituted by Decree No. 6,022, of January 22, 2007, the Public Digital Bookkeeping System (Sped) is part of the Federal Government's Growth Acceleration Program (PAC 2007-2010) and constitutes yet another advance in the computerization of relationship between the tax authorities and taxpayers. Benefits:

- Reduction of costs with the waiver of issuance and storage of paper documents;
- Elimination of paper;
- Cost reduction with the rationalization and simplification of ancillary obligations;
- Standardization of the information that the taxpayer provides to the different federated units;
- Reduction of involuntary involvement in fraudulent practices;
- Reduction of time spent with the presence of tax auditors at the taxpayer's premises;
- Simplification and streamlining of procedures subject to control by the tax administration (foreign trade, special regimes and transit between states);
- Strengthening control and inspection through the exchange of information between tax administrations;
- Quick access to information;
- Increased auditor productivity by eliminating steps to collect files;
- Possibility of exchanging information between the taxpayers themselves based on a standard layout;
- Reduction of administrative costs;
- Improved quality of information.
- Possibility of crossing between accounting and tax data;
- Availability of authentic and valid copies of the bookkeeping for different and concomitant uses;
- Reduction of the "Brazil Cost";
- Improving the fight against tax evasion;
- Preserving the environment by reducing paper consumption.

Sped Project in Brazil:

On IFS Cloud we will provide some of these reports through integration with Avalara. The reports available are:

- NF-e – Electronic Nota Fiscal (chapters 19,20)
- CT-e – Bill of Lading (chapter 21)
- EFD ICMS / IPI
- EFD Contribuições
- EFD Reinf
- ECD
- ECF

35.2 Solution Overview

All tax/accounting reporting will be generated by the Avalara partner. Basic and transactional data will be sent from IFS to Avalara.

35.3 Process Overview

Flow Chart IFS's Source data to Avalara

Flow chart IFS Integration to Avalara

35.4 Prerequisites

The company must be set-up to use Brazilian localization, see the Company Set up chapter. The “Integration to Brazilian External Tax System” parameter under the **Localization Control Center** tab must be enabled on the *Company/Localization Control Center* tab.

35.5 Define basic data

To utilize the IFS integration for Avalara, some basic data set up is required with regards to the Company.

35.5.1 EXTERNAL TAX SYSTEM PARAMETERS

The Avalara Brazil connection information is defined in page **Application Base Setup/Enterprise/Tax/External Tax Systems/External Tax Report Information**.

- Unit meas/ Unit Meas Conv Factor
- Fixed Asset
- **Transaction data needed by Avalara**
 - Fiscal Document
 - Incoming Nota Fiscal
 - Outgoing Nota Fiscal
 - Bill of Lading
 - Importation Process
 - Inventory Transactions
 - Fixed Asset Pis/Cofins Credit
 - Fixed Asset Fiscal Info
 - Payment of Tax Withholding
 - Observation
 - Observation Adjustments (ICMS Adjustments)
 - Accounting Entries

- Accounting Balance
- Inventory Adjustments
- Manufacturing Shop Order
- Disassembly Shop Order
- Repair Shop Order
- Shop Order Adjustments

35.6.1 MASTER / TRANSACTION DATA

Go to Financials/Financial e-Reporting/Brazilian Reporting / External Reporting select the Command “New Reporting”.

Can choose to send a single endpoint or all at once. The format of execution can be online or scheduled (background).

After sending the endpoints, they will be available on the **external reporting** page.

On this page, we will be able to view the status of the interface and if any correction is necessary and send it again. Possible statuses are: Created, SentRequest, Error, Partly Completed, Completed.

If an error occurs in one or more endpoints, it will be possible to adjust and send it again through resend reporting.

Notes:

For initial data loads with large data volumes, we recommend running them in the background (scheduled). This helps prevent session drops and interruptions in the integration with the external system.

For the Items and Customer | Supplier endpoints, JSON files of 1000 and 500 lines, respectively, will be generated at a time.

The accounting entries endpoint can only be executed in the background and within a single period (monthly) due to the large amount of data to be generated. Also, JSON files of 5000 lines at a time will be generated.

For the accounting entry and accounting balance endpoints, it is mandatory to have the accounting structure (a core functionality of IFS) defined in accordance with the referential chart of accounts from the ECD (Brazilian Digital Accounting Bookkeeping – SPED Contábil) provided by the Brazilian Federal Revenue Service. This structure must include both analytical and synthetic accounts, along with their respective levels.

Example of accounting structure:

Strucutre Node/Code Part Value	Node Name/Code Part Value Name	Level	Parent Account	Node / Account
1	Assets	1		Node
1.1	Current Assets	2	1	Node
1.1.1	Cash and Cash Equivalents	3	1.1	Node
1.1.1.01	Cash	4	1.1.1	Account
1.1.1.02	Bank Accounts	4	1.1.1	Account
1.1.2	Accounts Receivable	3	1.1	Node
1.1.2.01	Domestic Customers	4	1.1.2	Account
2	Liabilities	1		Node
2.1	Current Liabilities	2	2	Node
2.1.1	Suppliers	3	2.1	Node
2.1.1.01	Domestic Suppliers	4	2.1.1	Account
3	Equity	1		Node
3.1	Share Capital	2	3	Node
3.1.1.01	Subscribed Capital	3	3.1	Account
4	Revenues	1		Node
4.1	Gross Revenue	2	4	Node
4.1.1.01	Sales Revenue	3	4.1	Account
5	Expenses	1		Node
5.1	Operating Expenses	2	5	Node
5.1.1.01	Sales Commissions	3	5.1	Account
5.2	Administrative Expenses	2	5	Node
5.2.1.01	Salaries and Wages	3	5.2	Account
5.2.1.02	Rent Expenses	3	5.2	Account

To generate the **Inventory Adjustments** or any **Shop Order-related** endpoint:

- It is also necessary to generate the following endpoints as well: **Item**, **Unit Meas**, and **Inventory**.
- For By-Products:

It is required to finalize the Shop Order within the selected period.

313	313	23/02/2024	Approved	Nota Fiscal	SP01	23/02/2024 14:23		Completed

The fiscal document page is filled in for each incoming and outgoing nota fiscal whose status is:

- Incoming Nota Fiscal (Goods / Services)
 - After the supplier invoice or customer return credit have been posted – Will be insert in Avalara System
 - Canceled Status – Will be delete in Avalara System
- Outgoing Nota Fiscal (Goods / Services/ Project)
 - Approved Status – Will be insert in Avalara System
 - Canceled, Voided, Declined Status – Will be change in Avalara System the nota fiscal Status
- Intersite Process (Outgoing / Incoming Nota Fiscal)
 - After the final inventory transactions have been posted
- Symbolic Outgoing / Incoming Nota Fiscal)
 - After the tax document has been posted

There are two method calls to integrate the tax document into the Avalara system. The first one is "POST" method which will validate endpoint structure errors, and the second method is "GET" which will validate data errors.

The format of execution for both methods are background jobs.

After sending the endpoint, they will be available on the **fiscal document log** page.

On this page, we will be able to view the status of the interface and if any correction is necessary and resend it again. Possible status are: Created, SentRequest, Error, Pending and Completed. The Completed Status is available just after to send GET method.

The resend option will be available in any status, and for the incoming nota fiscal, when the NF-e key or CEST code is changed, it will be possible to trigger the resend again.

35.6.3 CIAP BASIC DATA FOR ICMS AND PIS/COFINS CREDIT

35.6.3.1 Overview Legal Requirement

CIAP (Credit Control of Fixed Assets) is a record used within the scope of the Public Digital Bookkeeping System (SPED) in Brazil. SPED is a Brazilian government project that aims to modernize and unify companies' tax and accounting bookkeeping activities.

CIAP is part of Block G of SPED Fiscal, which deals with the Control of ICMS Credit for Permanent Assets. It is used to control and demonstrate ICMS credits related to the company's permanent assets, such as machinery, equipment and other assets used in production activities.

The idea behind CIAP is to allow companies to credit the ICMS paid on the acquisition of permanent assets over time, considering the depreciation of these assets. This way, the company can recover part of the tax paid in previous stages of the production chain. Therefore, the taxpayer who purchases item to compose the asset can use this physical report to perform the calculation of the credit of ICMS to be monthly appropriated referring to the acquisition of good of the fixed asset.

It is important that companies comply with SPED obligations, including correct CIAP basic data, to avoid tax problems and ensure transparency in accounting and tax operations.

Another point that we will also consider are the credits determined based on the acquisition value of goods incorporated into the fixed assets of the legal entity, acquired for use in the production of goods intended for sale, or in the provision of services that, depending on their nature, NCM, destination or date of acquisition, tax legislation allows the right to PIS/COFINS credit based on its acquisition value.

35.6.4 Process Overview

Fixed Asset Acquisition Process Overview

Fixed Asset Sale Process Overview

Fixed Asset Scrapping Process Overview

35.6.4.1 Prerequisites

The company must be set-up to use Brazilian localization, see the Company Set-Up chapter and the “Integration to Brazilian External Tax System”.

35.6.4.2 Define basic data

A Fixed Asset must be registered, and the IFS Cloud core functionalities must be executed until it reaches Active status.

Fixed Asset Object 1009 - NOTEBOOK DELL INSPIRON 15 3000 INTEL CORE I5

Active

Deactivate Object Acquisition Value Adjustment per Book View Hold Information Object Functions Object Inventory Other

Object	Description	Replaced/Split Object	Object Type
1009	NOTEBOOK DELL INSPIRON 15 3000 INTEL CORE I5		Normal

The incoming nota fiscal related to the acquisition of the fixed asset must be previously entered into the application and sent to the third-party system integrator.

The outgoing nota fiscal for the fixed asset must be previously entered into the application and sent to the third-party system integrator.

35.6.4.3 CIAP Basic Data

It is necessary to fill below fields on the **Financials \ Financial e-Reporting \ Brazilian Reporting \ CIAP Basic Data** page:

CIAP Basic Data 1008

Fixed Asset

Object Id: 1008 - CAMINHÃO CONSTELLATION - VOLKSWAGEN Status: Active

General

Total Installments: 48 ICMS Amount: Observation:

Issued by Outgoing Nota Fiscal

Outgoing Fiscal No... Nota Fiscal No Nota Fiscal Series

Connected Incoming Fiscal Documents

Fiscal Document ID	Document No	Document Series	Document Type	Line ID	Quantity	ICMS Credit Amount	Sender Id	Sender Name	Part Description	ICMS Amount	Line Total Amount
(No data)											

Object Id: Enter the Fixed Asset code which will initiate the credit process for ICMS and PIS/COFINS purposes. Only fixed assets with the Active status will be displayed.

Total Installments: Enter the Total Number of Installments that will be used to calculate the CIAP credit by the third-party system.

ICMS Amount: Enter the total value of ICMS with rights to the tax credit for the fixed asset. This total ICMS value is also automatically filled in, totaling the total ICMS of the notes connected in the Connector Incoming Fiscal Documents session.

Observation: Enter a brief description of the function of the asset in the site's activity.

It is necessary to enter the incoming fiscal documents received regarding the acquisition of the fixed assets in the gridline below:

CIAP Basic Data 1008 ▾

Fixed Asset

Object Id: 1008 - CAMINHÃO CONSTELLATION - VOLKSWAGEN Status: Active

General

Total Installments: 48 ICMS Amount: [Empty]

Issued by Outgoing Nota Fiscal

Outgoing Fiscal No... Nota Fiscal No Nota Fiscal Series

Observation: [Empty]

Connected Incoming Fiscal Documents

+ [Icon] [Icon] [Save] [Cancel New] 24 ▾

(1)	Fiscal Document ID	Document No	Document Series	Document Type	Line ID	Quantity	ICMS Credit Amount	Sender Id	Sender Name	Part Description	ICMS Amount	Line Total Amount
[Icon]	195	550000005	1	Nota Fiscal	1	5	63000.00	RCA SUPP	RCA SUPP - NF-E E...	Compra Ativo	63000.00	350000

You can connect the incoming fiscal documents to the fixed asset by manually entering information about the **Fiscal Document ID** and the **Line ID** fields. In this case, the remaining information will be automatically filled, both for incoming fiscal documents and for bill of lading.

The **ICMS Credit Amount** field contains the tax credit for given fixed asset in this fiscal note line. The value informed in such column will be added in the **ICMS Amount** field present in the header of the CIAP Basic Data/General tab. In necessary, it is possible to change de value recovered from the respective line of the fiscal note.

You can also modify the information of **Quantity** field in case acquisition of such fixed asset is related to only a part of the total quantity of this item in fiscal note line. The rest can also be connected to another fixed asset if you want.

This movement will be sent to the third-party system integrator with the Type: **IM - Immobilization of individual assets**, referring to the first installment based on the acquisition of the fixed asset.

This IM type indicates the initial movement of the fixed asset, and from there, the third-party system integrator will control the CIAP for all other installments, until it reaches the end of the useful life of the fixed asset and the credit to be taken for this fixed asset ends, where the third-party system integrator will write off and close this fixed asset, generating the movement **BA - Asset write-off - End of appropriation period** in SPED Fiscal - Block G.

This initial IM movement will be sent to the third-party system integrator through the option below:

If IFS customer has other fixed assets that are already in the process of appropriating the credit in its current ERP and the current portion calculated is after 1, that is, the acquisition occurred in the past, then the movements referring to the Type: **SI - Initial balance of fixed assets** for these fixed assets that are already in the process of appropriating the ICMS credit must be imported directly into the third-party system integrator, informing the information of the last appropriate installment for each fixed asset in the customer's current ERP, so that in this way, the third-party system integrator will be able to calculate the other installments until the end of the appropriation period.

You can enter the below information if the fixed asset was sold:

Outgoing Fiscal Note Id: Enter the Fiscal Note Id of the fixed asset sold. With this, the movement of the sale of the fixed asset with the movement type **AT - Alienation or Transfer** will be sent through the **Fixed Asset Fiscal Info** toggle on the **External Reporting** page.

When the third-party system integrator receives this transaction related to the sale of the fixed asset, it will write off and close the right to credit for this fixed asset.

If the fixed asset is scrapped, the core processes must be used via the Scrap Object option on the **Fixed Asset Object** page. With this, the movement type **PE - Perishment, Loss or Deterioration** will be sent through the same **Fixed Asset Fiscal Info** toggle on the External Reporting page.

When third-party system integrator receives this transaction related to the scrapping, loss, deterioration, etc. of the fixed asset, it will write off and close the right to credit for this fixed asset.

35.6.5 INTEGRATION OF TAX WITHHOLDING FOR THIRD PARTY SYSTEM

35.6.5.1 Filter for sending taxes withheld on the Incoming Nota Fiscal

The export will be done by filtering by the Entry Date of the Incoming Nota Fiscal. The withholdings tax codes existing within the Tax Lines, Withholding command button of the Manual Supplier Invoice connected to this Incoming Nota Fiscal defined as **Invoice Entry** in the **Tax Method Tax Received** field of the **Tax Codes** page will be exported, since a Payment ID has already been previously created on the **Supplier Payment Analysis** page with the Payment Type: **Supplier Tax Withholding**, after posting the manual supplier invoice.

Tax Lines, Withholding option on Incoming Nota Fiscal:

Line Details							
✓	Tax Code	Tax Type	Withholding Base Amount	Tax %	Tax Amount	Tax Amount in Accounting Currency	Tax Amount in Parallel Currency
☐	COFINSRET	Tax Withhold	169.58	3	5.09	5.09	1.02
☐	CSLLRET	Tax Withhold	169.58	1	1.70	1.70	0.34
☐	INSSRET	Tax Withhold	169.58	0	0.00	0.00	0.00
☐	IRPJRET	Tax Withhold	169.58	0	0.00	0.00	0.00
☐	IRRFRET	Tax Withhold	169.58	1.5	2.54	2.54	0.51
☐	PISRET	Tax Withhold	169.58	0.65	1.10	1.10	0.22

35.6.5.2 Filter for sending taxes withheld on payment of Manual Supplier Invoice

The export will be done by filtering by Payment Date from Supplier Payment Analysis, for Payment Type: **Automatic Payment** and **Supplier Payment**. Each record from Supplier Payment Analysis is connected to an Installment from Manual Supplier Invoice with Status: **Paid** or **Partly Paid**, and the withholdings tax codes of these installments will be considered in the export, being those calculated after payment of the manual supplier invoice.

When the payment of the installment is made by **Supplier Payment Orders** page: A Payment ID is generated in **Supplier Payment Analysis** page with Payment Type: **Automatic Payment**.

In this flow, the withholdings calculated on the payment can be seen on the **Supplier Payment Proposal Details** page \ **Details** tab \ Select the line and click on the Tax Lines, Withholding command button.

After confirming the proposal and creating the Supplier Payment Order, it is no longer possible to see the individualized withholdings tax codes, showing only the total amount withheld in the payment of the installment in question.

However, the export will be done individually for each withholding tax code defined as **Payment** in the **Tax Method Tax Received** field on the **Tax Codes** page, which are the withholdings that are considered by default by Core in the payment of the installment of the Manual Supplier Invoice.

When the installment payment is made by **Mixed Payment** page: A Payment ID is generated in Supplier Payment Analysis with Payment Type: **Supplier Payment**.

In this flow, the withholdings calculated in the payment can be seen within Mixed Payment, which is also connected to Supplier Payment Analysis \ Transactions Tab \ Transaction Details Session \

Select the line and click on the View Transactions button \ Select the line in the Matched Transactions Details session \ Tax Lines, Withholding command button, where the withholdings tax codes calculated for the installment in question are shown and individualized, ready to be exported.

Tax Lines, Withholding option on Manual Supplier Invoice payment:

Line Details											
✓	Modify Tax	Tax Code	Income Type	Tax Base Amount	Prel Tax Amount	Prel Tax Amount In Acc Curr	Prel Withheld Tax Amount In Parallel Curr	New Tax Amount	New Tax Amount In Acc Curr	New Withheld Tax Amount In Parallel Curr

☐	No	CSLLRET-INCOMING	BR-INCOMET...	1920.00				19.20	19.20	3.84	
☐	No	PISRET-INCOMING	BR-INCOMET...	1920.00				12.48	12.48	2.50	

35.6.5.3 Filter for sending taxes withheld in the Outgoing Nota Fiscal

The export will be done by filtering by the Issue Date of the Outgoing Nota Fiscal. The withholdings tax codes existing within the Tax Lines, Withholding command button of the Customer Invoice connected to this Outgoing Nota Fiscal defined as **Invoice Entry** in the **Tax Method Tax Disbursed** field of the **Tax Codes** page will be exported, since a Payment ID has already been previously created on the **Customer Payment Analysis** page with the Payment Type: **Customer Tax Withholding**, after posting the customer invoice.

Tax Lines, Withholding option on Outgoing Nota Fiscal:

Line Details							
							
✓	Tax Code	Tax Type	Withholding Base Amount	Tax %	Tax Amount	Tax Amount In Accounting Currency	Tax Amount In Parallel Currency
☐	COFINSRET	Tax Withhold	169.58	3	5.09	5.09	1.02
☐	CSLLRET	Tax Withhold	169.58	1	1.70	1.70	0.34
☐	INSSRET	Tax Withhold	169.58	0	0.00	0.00	0.00
☐	IRPJRET	Tax Withhold	169.58	0	0.00	0.00	0.00
☐	IRRFRET	Tax Withhold	169.58	1.5	2.54	2.54	0.51
☐	PISRET	Tax Withhold	169.58	0.65	1.10	1.10	0.22

35.6.5.4 Filter for sending taxes withheld on Customer Invoice payment

The export will be done by filtering by the Payment Date from Customer Payment Analysis, for Payment Type: **Customer Payment** and **Customer Automatic Payment**. Each Customer Payment Analysis record is connected to a Customer Invoice Installment with Status: **Paid** or **Partly Paid**, and the withholdings tax codes of these installments will be considered in the export, being those calculated after the customer invoice payment.

When the installment payment is made by **Mixed Payment** page: A Payment ID is generated in Customer Payment Analysis with Payment Type: **Customer Payment**.

In this flow, the withholdings calculated on the payment can be seen within Mixed Payment, which is also connected to Customer Payment Analysis \ Transactions Tab \ Transaction Details Session \ Select the line and click on the View Transactions button \ Select the line in the Matched Transactions Details session \ Tax Lines, Withholding button, where the withholdings tax codes calculated for the installment in question are shown and individualized, ready to be exported.

When the installment payment is made by **Customer Payment Orders** page: A Payment ID is generated in Customer Payment Analysis with the Payment Type: **Customer Automatic Payment**.

In this flow, the withholdings calculated on the payment can be seen on the **Customer Payment Proposal Details** page \ Details Tab \ Select the line and click on the Tax Lines, Withholding button.

After confirming the proposal and creating the Customer Payment Order, it is no longer possible to see the individualized withholdings/tax codes, showing only the total amount withheld in the payment of the installment in question, however the export will need to be done individually for each withholding/tax code defined as **Payment** in the **Tax Method Tax Disbursed** field on the **Tax Codes** page, which are the withholdings that by default are considered by Core in the payment of the installment of the Customer Invoice.

Tax Lines, Withholding option on Customer Invoice payment:

35.6.6 Observations / Observation Adjustments (Sped Fiscal records C195/C197)

35.6.6.1 Overview Legal Requirement

The obligation to submit the EFD-ICMS/IPI (and, consequently, the records that comprise it) stems from Convênio ICMS No. 143, of December 15, 2006, later supplemented by Ajuste SINIEF 02, of April 3, 2009, which established the Digital Tax Bookkeeping in digital file format, mandatory for ICMS and/or IPI taxpayers. This regulatory framework is operationally detailed by the EFD-ICMS/IPI Practical Guide, published and periodically updated by the Federal Revenue Service/CONFAZ, which serves as the technical-legal basis for the layout of each record, including C195 and C197.

Specific mandatory requirements for each record

Record C195 has been mandatory since the EFD ICMS/IPI itself was first required, and is linked to Record 0460 (table of observation codes). From a regulatory standpoint, C195 must be reported when, due to state legislation, there are adjustments to fiscal documents, information about tax rate differentials, tax anticipation, and other situations — information equivalent to the observations recorded in the "Observations" column of the fiscal books provided for in Convênio SN/70 – SINIEF, Article 63, items I to IV.

The mandatory requirement for C197 had a specific timing milestone: the revocation of item 4 of Annex I of Portaria CAT 147/2009 (as amended by Portaria CAT No. 157/2015) made the inclusion of Record C197 in the EFD ICMS/IPI mandatory starting in 2016 — importantly, according to the same source, the start of C195's mandatory requirement is not tied to the start of C197's mandatory requirement, meaning these are requirements that evolved at different points in time.

Functionally, C197 is intended to detail other tax obligations, adjustments, and value information from the fiscal document referenced in record C195, which may or may not affect the calculation of the tax amount; ICMS or ICMS-ST values are added directly into the assessment, in records E110 (ICMS Assessment – Own Operations) and E210 (ICMS Assessment – Tax Substitution), according to the specification of the third character of the adjustment code in Table 5.3.

35.6.6.2 Process Overview

35.6.6.3 Prerequisites

The company must be set-up to use Brazilian localization, see the Company Set-Up chapter and the “Integration to Brazilian External Tax System”.

35.6.6.4 Define basic data

It is necessary to fill the Observation and observation ICMS Adjustment on the **Financials / Financial e-Reporting / Brazilian Reporting / Observation and Observation Adjustments** page:

35.6.6.5 Observation

[Home](#) > [Financials](#) > [Financial e-Reporting](#) > [Brazilian Reporting](#) > **Observations**

Observations

	Observation ID	Observation Description
☐	01	Difal
☐	02	Importações

Observation Id: The observation id field must be populated with the content to be sent to Avalara in order to compose record C195.

Observation Description: The Observation description field must be populated with the content to be sent to Avalara in order to compose record C195.

35.6.6.6 Observation Adjustments

124

[Financials](#) > [Financial e-Reporting](#) > [Brazilian Reporting](#) > [Observation Adjustments](#)

Observation Adjustments

	Country Code	State	Business Operation	Tax Code	Observation ID	Adjustment Code
☐	BR	RJ - Rio de Janeiro	2551 - Compra de bem ...	ICMS DIFAL - Avalara I...	01 - Difal	RJ70000003

☐	BR	RJ - Rio de Janeiro	3102 - Compra p/ com...	ICMSFCP - Avalara - IC...	02 - Importações	RJ70000005

State: Enter the state of the adjustment code.

Business Operation: Enter the CFOP of the adjustment code.

Tax code: Enter the Tax Code of the adjustment code.

Observation Id : Enter the observation id previous registered of the adjustment code.

Adjustment Code : Enter the adjustment code based on Table 5.3 of SPED Fiscal.

The data entered into this table will as the basis for generating record C197 for Sped Fiscal. Notas fiscais meeting the established criteria will be sent to Avalara via the DFE endpoint, updating the "Observations" tab within Avalara's DFE module.

35.6.7 FCI – Import Content File

35.6.7.1 Overview Legal Requirement

FCI - Import Content File is a control introduced by the Brazilian government to track the use of special ICMS tax percentage when the product is sold, between states, has some portion of imported material on its manufacturing.

The calculation of the imported content for manufactured products considers the notas fiscais for the acquisition of production inputs (component parts in the structure of the manufactured products) versus the interstate sales of the manufactured product using as a reference the second period before the current period. In such cases, before selling the finished product, it is necessary to calculate the percentage of imported material used during the manufacturing process and classify the finished product accordingly.

This classification is sent to the Brazilian government, using a .txt file, to request the FCI hash code for each finished product. When the Brazilian government returns the file with the FCI hash code, this information must be recorded and included in the Nota Fiscal XML file, in a specific tag. This FCI hash code contains all the details of the imported content of the manufactured products, allowing

control and authorizing the use of this special ICMS tax rate at a reduced value in interstate transactions.

In IFS Cloud, all of this will be controlled by the third-party system, so they will be the ones who will calculate the FCI according to the notas fiscais we have already sent to them and, for this to happen, some data such as the structure of manufactured parts and manufactured recipe must be previously sent to the third-party system so that they can calculate the FCI and generate the .txt to be submitted to the validator program provided by the Brazilian Government.

35.6.7.2 Process Overview

35.6.7.3 Prerequisites

The company must be set-up to use Brazilian localization, see the Company Set-Up chapter and the “Integration to Brazilian External Tax System”.

35.6.7.4 Define basic data

Manufactured parts must be previously registered on the **Inventory Part** page, set to **Manufactured** in the Part Type field:

The screenshot shows the 'Inventory Part' form for part VAA005. The 'Part Type' field is highlighted with a red box and set to 'Manufactured'. The 'Part Description in Use' is 'Finished Good' and the 'Site' is 'SP01'. The 'Part Status' is 'A - Active'. The 'General' tab is selected, showing fields for 'Part Type', 'Inventory UoM', 'Created', and 'Modified'. The 'Cost Control' tab is also visible, showing fields for 'Inventory Valuation Method', 'Inventory Part Cost Level', and 'Supplier Invoice Consideration'.

The structure of the main parts set to manufactured with its respective inputs must be registered on the **Product Structure** page. The structure defined with the Structure Type: **Manufacturing** will be considered, as well as the last revision of the structure is the one that will be considered, as can be checked through the Revision field:

          "Descricao": "Brazil STD - PLEASE DON'T CHANGE THE SETUP IN THIS COMPANY"
        }
      }
    }
  }
}
```

In summary, we can consider that as basic data for the FCI:

- The parts defined as Manufactured or Manufactured Recipe on the **Inventory Part** page.
- The Product Structure for the Manufactured part and the Recipe Structure for the Manufactured Recipe part, defined on the Product Structure and Recipe Structure pages, respectively.
- The incoming nota fiscal related to the acquisition of production inputs (component parts in the structure of the manufactured products) must be previously entered into the application and sent to the third-party system integrator.
- The outgoing nota fiscal for the interstate sales of the manufactured product must be previously entered into the application and sent to the third-party system integrator.

35.6.7.5 Delimitations

- Currently, the third-party system does not have an endpoint in which we can use it to automatically obtain, right after processing the return file generated by the government validator program, the acquisition origin and the FCI hash code, so that these are updated in the Master Part of the material sold in interstate operations and thus, this data could be sent in the electronic XML, to prove its right to use the reduced ICMS rate.

Thus, the current solution will require the user to access the Master Part page and manually update the material with the updated acquisition origin, as well as with the FCI hash code, for the purpose mentioned above.

As soon as the third-party system provides an endpoint in which the acquisition origin and FCI hash code are returned, this integration will be reviewed so that there is an automatic update of the Master Part without the need for manual intervention.

- The structures containing the list of components/inputs will always be obtained from what is previously defined on the Product and Recipe Structure pages. The structures used in the shop orders of the period will not be considered, since these changes are most of the time punctual and will not necessarily impact much on the calculation, and since the change in the structure of a material is frequent, the ideal is to create a new revision for the structure with the new list of components updated for this material.

Additional delimitations may apply; all relevant flows should be tested to ensure completeness.

36 Brazilian Payment Formats

36.1 Overview Requirement

Brazilian payment formats are used to exchange Customer and Supplier financial information between companies and banks to process payments. Electronic files are generated by using the external files functionality.

There are two payment format processes, one for Customer communication and another one for Supplier communication. The purpose of this communication is to send and receive payment information from suppliers and customers to process such payments automatically.

The system covers the following Brazilian banks: **Bradesco**, **Itaú**, **Santander**, **Banco do Brasil**, and **Caixa Econômica Federal**.

36.2 Solution

This solution consists of outgoing and incoming file templates created by using the **External File** functionality. Below are the details about the available layout structures:

BANK	PARTY TYPE	PAYMENT FORMAT	DIRECTION FILE	FILE TEMPLATE	FILE TYPE	FILE LENGTH
BRADESCO	SUPPLIER	BR237SUP	REMITTANCE	SUP_GEN_BR_237_CP	BrPayment237Cp	500
			RETURN	SRF_BR_237_CP	ExtSuppPaymRet	
	SUPPLIER	BR237SUP240	REMITTANCE	CUST_GEN_BR_237_240_CR	BrPayment237Cp	240
			RETURN	CUP_BR_237_240_CR	ExtSuppPaymentRet240	
	CUSTOMER	BR237CUST	REMITTANCE	CUST_GEN_BR_237_CR	GenCustPaymentBr	400
			RETURN	CUP_BR_237_CR	ExtCustPayment	
ITAÚ	SUPPLIER	BR341SUP	REMITTANCE	SUP_GEN_BR_341_CP	BrPayment341Cp	240
			RETURN	SRF_BR_341_CP	ExtSuppPaymentRet240	
	CUSTOMER	BR341CUST	REMITTANCE	CUST_GEN_BR_341_CR	GenCustPaymentBr341	400
			RETURN	CUP_BR_341_CR	ExtCustPayment	
BANCO DO BRASIL	SUPPLIER	BR001SUP240	REMITTANCE	SUP_GEN_BR_001_CP	BrPayment240Cp	240
			RETURN	SRF_BR_001_CP	ExtSuppPaymentRet240	
	CUSTOMER	BR001P240CUST	REMITTANCE	CUST_BR_001_240_CR	BrPayment240Cr	240
			RETURN	CUP_BR_001_240_CR	BrPayment240CrRet	
SANTANDER	SUPPLIER	BR033SUP	REMITTANCE	SUP_GEN_BR_033_CP	BrPayment240Cp	240
			RETURN	SRF_BR_033_CP	ExtSuppPaymentRet240	
	CUSTOMER	BR033CUST	REMITTANCE	CUST_GEN_BR_033_CR	GenCustPaymentBr033	400
			RETURN	CUP_BR_033_CR	ExtCustPayment	
CAIXA ECONÔMICA	SUPPLIER	BR104SUP240	REMITTANCE	SUP_GEN_BR_104_CP	BrPayment240Cp	240
			RETURN	SRF_BR_104_CP	ExtSuppPaymentRet240	
	CUSTOMER	BR104P240CUST	REMITTANCE	CUST_BR_104_240_CR	BrPayment240Cr	240
			RETURN	CUP_BR_104_240_CR	BrPayment240CrRet	

The below process is used in the system to handle both customer and supplier payments, no matter what the payment format used.

This document will describe the solution for **Banco do Brasil** Bank. Users can follow the same process for other banks as well.

36.3 Prerequisites

The company must be set up to use Brazilian localization, see the [Company Set up](#) chapter. The **'Brazilian Payment Formats'** parameter under the **Localization Functionality** section must be enabled on the **Company/Localization Control Center** tab to use Banco do Brasil, Caixa Economica, and Santander payment formats whereas Itau and Bradesco payment formats are implemented as a core solution.

To run the Customer process all basic data relevant to the Boleto process must be defined before starting the communications with the banks. Further, it is necessary to print the Boleto if the company has this process. Unpaid customer ledger items that match the Customer Payment Proposal loading criteria specified must exist.

To run the Supplier process, unpaid supplier ledger items that match the Supplier Payment Proposal loading criteria specified must exist.

36.4 Basic Data

All Basic Data stated in Boleto – Bank Collection Bill chapter 28 are necessary to set up before starting the remittance and return file generation for customer payments. In this section, additional basic data necessary to run remittance and return files for supplier payments are provided.

Enter all necessary **Payment Instruction Codes** that will be used during the communication with the bank in the **Financials/Payment Basic Data/Cash Book/Payment Instruction Codes** page.

Financials > Payment Basic Data > Cash Book > Payment Instruction Codes

Payment Instruction Codes

✓	Country	Identity Type	Identity	Description
☐	BRAZIL	Entry	01	Credit Account
☐	BRAZIL	Entry	03	DOC
☐	BRAZIL	Entry	08	TED
☐	BRAZIL	Entry	41	TED ITAU
☐	BRAZIL	Entry	30	Boleto same bank
☐	BRAZIL	Entry	31	Boleto Different Banks
☐	BRAZIL	Entry	13	Bills
☐	BRAZIL	Condition	1	License No/Our Number
☐	BRAZIL	Condition	2	Agency/Account/License No/Our Number
☐	BRAZIL	Entry	5	Savings Account Credit

Define **Payment Method** in **Financials/Payment Basic Data/Cash Book/Payment Institutes/Payment Methods per Institute** page.

Financials > Payment Basic Data > Cash Book > Payment Institutes > Payment Methods per Institute

Company: DEMO BRAZIL 3

Payment Methods per Institute

BANCO DO BRASIL - BANCO DO BRASIL 1 of 1

✓	Payment Method	Bank Transaction Code	Output File Name
☐	BR001P240CUST - BR001P240CUST	* - IFS Bank Transaction Code	BR001P240CUST.DAT
☐	BR001SUP BB - BR001SUP BB	* - IFS Bank Transaction Code	BR001SUP BB.DAT

Define **Format Specific Info per Institute** for the payment method in **Financials/Payment Basic Data/Cash Book/Payment Institutes/Payment Methods per Institute/ Format Specific Info per Institute** page.

The below information might differ from one payment format to another and should be filled according to the bank layout definitions and specifications.

Information specific to a particular Payment Method and Payment Institute. The information required depends on the Payment Format connected to the Payment Method. This field is defined on the **Client Mapping** page.

Financials > Payment Basic Data > Cash Book > Payment Institutes > Payment Methods per Institute > Format Specific Information per Institute - BANCO DO BRASIL - BR001SUP BB

Company: DEMO BRAZIL 3

Format Specific Information per Institute - BANCO DO BRASIL - BR001SUP BB

Format ID	Boleto Diff Bank Entry Code	Boleto Same Bank Entry Co...	TED Entry Code	DOC Entry Code	Current Account Credit Entr...	Utility Bills Entry Code	Control File Seq No
BR001SUP240	31	30	08	03	01	13	☐
File Seq No	Limit Amount						

Define return **Message Codes** for each Format ID in **Financials/Payment Basic Data/Cash Book/Payment Formats per Company/Payment Formats/Payment Format Message Codes** page.

Financials > Payment Basic Data > Cash Book > Payment Formats per Company > Payment Formats > Payment Format Message Codes

Payment Format Message Codes BR001SUP240 - * - Default issuer 1 of 1

» Add Issuer Update External Payment Parameters

Payment Format: BR001SUP240 - Brazilian format for bank Banco do Brasil, supplier
Issuer: * - Default issuer

Message Code Details

✓	Message Code	Description	Transaction Type	Error Code	Payment Format Message Function
☐	01	ACCEPT	Supplier Payment	No	
☐	02	REJECTION	Supplier Payment	Yes	Remove From Order
☐	03	PAYMENT	Supplier Payment	No	Accept Payment

Related to the return file creation setup, connect the payment method to the **External Payment Parameters** page in the **Financials/Cash Book/External Interface/External Payment Parameters** page.

Financials > Cash Book > External Interface > External Payment Parameters

External Payment Parameters BR001SUP BB - BR001SUP BB

» + Copy Parameter

Payment Method: BR001SUP BB - BR001SUP BB Default ☐

Matching

Allow Automatic Matching ☐ Only Complete Matching of Payment Amount ☐ Only Identifiers Connected to Message Code ☐ Consider Customer/Company Tolerances when Matching ☐

MESSAGE CODES DEFINITION OF IDENTIFIERS SEGMENTATION CRITERIA COMPANY IDENTIFIER DEDUCTION RULES WRITE-OFF

Issuer	Message Code	Transaction Type	Identifier Connected	Error Code	Payment Format Message Function	Tax Code	Account	New Item Invoice Type	New Item Invoice Series	Payment Terms	Generate Text for New Item	Default Difference Code
*	01 - ACCEPT	Supplier Payment	No	No							No	
*	02 - REJECTION	Supplier Payment	No	Yes	Remove From Order						No	
*	03 - PAYMENT	Supplier Payment	No	No	Accept Payment						No	

36.5 Customer File Generation

After printing Boletos, it is necessary to generate the Customer Payment Proposal to select the invoices that will be sent to the bank.

Create Customer Payment Proposal in **Financials/Accounts Receivable/Customer Payment Proposal/Customer Payment Proposals** page. The Customer Payment Proposal can be created automatically, using the **New Directing Debit Proposal** command button or by clicking **New**.

On the **Customer Payment Proposal Details** page, it is possible to insert or remove invoices/installments. The **Cash Account** and **Payment Method** fields will be automatically filled with the same information printed previously in the Boletos using the default entries or should be manually filled.

Financials > Accounts Receivable > Customer Payment Proposal > Customer Payment Proposals > Customer Payment Proposal Details

Company: PUGULK BRAZIL 1

Customer Payment Proposal Details 2 1 of 1

Created

Proposal ID: 2 Proposal Type: Direct Debiting Creation Date: 2/9/2024 User ID: PG PUGULK

DETAILS PARAMETERS

Print Proposal Recalculate Netting Possibility Recalculate Offset Possibility

	Series ID	Inv/Prepaym No	Installment ID	Payment Method	Cash Account	New Payment On Account	Payment in Advance	Netting Possibility	Offset Possibility	Advance Invoice	Payment Reference	Voucher Type	Voucher No	Customer
☐	CD	00917000060	1	BR001P240CUST	BANCO DO BRASIL	No	No	No	No	No		F	2024000020	P PUGULKBRAZILCUST - PUGULKBRAZILCUST

Select the above Proposal ID from the **Customer Payment Proposal** page and **Acknowledge** it. Afterward, click on the **Create Direct Debiting Order** command and enter the **Payment Method** and the **Payment Institute** used in this Proposal.

New Payment Order

Payment Order Information Cash Accounts Information

Selected Proposals: 2 Payment Method: BR001P240CUST - BR001P240CUST

Only Installments Specified with Default Payment Method: ☐

Payment Institute: BANCO DO BRASIL - BANCO DO BRASIL Currencies: BRL

Payment Date:

Previous Next Finish Cancel

Upon finishing the above process Customer Payment Order and the remittance file will be generated. Subsequently, the user can share the remittance file with the relevant banks.

36.6 Customer Return File

After the payment instructions are realized by the bank, the bank will provide a return file for the same remittance file provided.

The financial user will load this file to the system by using the External Interface functionality, in the **Financials/Cash Book/External Interface/External Payments** page using the **Load File** command.

Select the **Payment Institute** and **Payment Method** related to this return file. Browse for the return file received from the bank.

After loading the return file, click on the **Create Mixed Payment** command. The next step is to view the **Mixed Payment** created using the **Attached Mixed Payment** command.

Once the mixed payment is approved payment will be accounted and the status of the invoices will change to **PaidPosted**.

36.7 Supplier File Generation

The process to generate the Supplier remittance and return files is the same as Customer remittance and return file generation but with the use of Supplier Payment Formats.

Create Payment Proposal in **Financials/Accounts Payable/Supplier Payment Proposal/Supplier Payment Proposals** page. The Supplier Payment Proposal can be created automatically, using the **New Proposal** command, or by selecting **New**. On the **Supplier Payment Proposal Details** page, it is possible to insert or remove invoices/installments.

Select the above proposal ID from the **Supplier Payment Proposals** page and **Acknowledge** it. Afterward, click on the **New Payment Order** command and enter the **Payment Method** and the **Payment Institute** used in this Proposal.

Upon finishing the above process Supplier Payment Order and the remittance file will be generated.

Subsequently, the user can share the remittance file with the relevant banks to process all supplier payments.

36.8 Supplier Return File

After the payment instructions are realized by the bank, the bank will provide a return file for the same remittance file provided.

The financial user will load this file to the system by using the External Interface functionality, in the **Financials/Cash Book/External Interface/External Payments** page using the **Load File** command.

Select the **Payment Institute** and **Payment Method** related to this return file. Browse for the return file received from the bank.

After loading the return file, click on the **Create Mixed Payment** command. The next step is to view the **Mixed Payment** created using the **Attached Mixed Payment** command.

Once the mixed payment is approved payment will be accounted and the status of the invoices will change to **PaidPosted**.

36.9 Delimitations

Only five Brazilian banks are covered by this solution:

- Bradesco
- Itaú

- Santander
- Banco do Brasil
- Caixa Econômica Federal

37 Appendix

37.1 Appendix:01

The NF-e XML mapping to IFS Cloud is described in DocMan document “NF-e xml mapping to IFS (Brazil)”.

37.2 Appendix:02

37.2.1 AVALARA INTEGRATION: TAX BASE AMOUNT: **NET**

Scenario: 01 Tax Base Amount: Net Amount – Excluding Tax: IPI

Let’s have a look into the scenario below explaining a Brazilian tax calculation based on Net Amount and excluding the tax, IPI.

Net Amount calculation and Tax calculation

▪ Net Amount	= 72.75
Tax Base Amount	= $\frac{72.75 \times 100}{100 - (18 + 1.65 + 7.6)}$ = 100.00
▪ Tax: ICMS 18%	= 18.00
PIS 1.65%	= 1.65
COFINS 7.6%	= 7.60
Total Tax	= <u>27.25</u>
Gross Amount (72.75 + 27.25)	= <u>100.00</u>

Scenario: 02 Tax Base Amount: Net Amount – Including Tax: IPI

Let's have a look into the scenario below explaining a Brazilian tax calculation based on Net Amount and including the tax, IPI.

Net Amount calculation and Tax calculation

▪ Net Amount	= 78.75
Tax Base Amount	= $\frac{78.75 \times 100}{100 - (7.6 + 1.65 + 12)}$
	= 100.00
▪ Tax: ICMS 12%	= 12.00
PIS 1.65%	= 1.65
COFINS 7.6%	= 7.60
IPI 30%	= 30.00 (100 X 30%)
Total Tax	= <u>51.25</u>
Gross Amount (78.75 + 51.25)	= <u>130.00</u>
